Junk in the trunk Gulfport, Ms

Posted: 19 Oct 2012 08:11 AM PDT
http://forums.qrz.com/showthread.php?365357-Junk-in-the-trunk-Gulfport-Ms&goto=newpost

Ed Byrd KA5VFU is going to host a junk in the trunk Nov 17, 2012 at his
home on Landon Rd in Gulfport, Mississippi. Everybody is invited to buy
sell or trade or just sit and hang out like old friends. There will be
hamburgers and hot dogs and while donations are accepted there is no charge.

Bring friends that you would like to see get interested in ham radio. All
are welcome.

Thank you

2068. SARL News in English 20/10/2012

Newsgroup: rec.radio.amateur.misc
Date: 2012-10-20 16:22:37 UTC
From: website@sarl.org.za
Message-ID: <C407A23868654A80B5DAEC1C51DDE20C@ZAJNBTCSARL01>
Source record: 1735
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 21 October 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

SARL TAKES UP ZONING REGULATIONS WITH THE CITY OF CAPE TOWN

CQ INTRODUCES 40 CQ ZONES ON 160 PLAQUE

MORE CLUBS AFFILIATE WITH THE SARL

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

SARL TAKES UP ZONING REGULATIONS WITH THE CITY OF CAPE TOWN

SARL President, Rassie Erasmus, ZS1Y,T and the SARL Legal advisor. Johan Marais, ZS1JM, met with a delegation of the Cape Town Metro to intervene in a notice received by a SARL member stating that he requires approval in terms of the Environmental Act & City of Cape Town Zoning regulations for his antenna which is less than 15 metres in height. It transpired that they had received a complaint from a neighbor, which is most probably RF related, but elected to notify the home owner that his antenna has not been approved and that they intend taking steps to either have him remove the tower or that he has to apply for the necessary approval.

The SARL delegation pointed out that antennas under 15 metres of radio amateurs are exempt from the provisions of the National Environmental Management Act, 107 of 1998. It was agreed that the process will be suspended pending the Council consulting with their legal advisors. The SARL will be afforded further opportunities to discuss the issues once feedback has been received from the Council's legal department.

SARL members who have had similar problems are requested to send details to admin@sarl.co.za so that Council can investigate the issues and the merits thereof.

CQ INTRODUCES 40 CQ ZONES ON 160 PLAQUE

CQ has announced the availability of a special plaque for those who have achieved contact to all 40 CQ zones on 160 meters. This is considered the most difficult of all amateur radio awards to earn and because of this the Worked All Zones 160 Metres Plaque recognizes that receiving it as one of the elite Top Band DXers. If you believe you qualify, please contact W-A-Z Award Manager Floyd Gerald, N5FG, by e-mail to n5fg@cq-amateur-radio.com for further details.

MORE CLUBS AFFILIATE WITH THE SARL

During the past week the following clubs have affiliated to the SARL:

Antique Wireless Association of Southern Africa-ZS0AWA Centurion Radio Amateur Club- ZS6CEN Hibiscus Coast Amateur Radio Club-ZS5HAC Noordwes Amateurradioklub ZS6RWT Oos-Transvaal-Laeveld Radioklub-ZS6OTL Oakdale Amateurradioklub -ZS1OAK Overberg Amateurradioklub -ZS1OAR Sandton Amateur Radio Club-ZS6STN Welkom Radioklub ZS4WRC Winelands Amateur Radio Club- ZS1WRC and Vrystaat Amateurradioklub-ZS4B Sasolburg Radioklub-ZS4SRK

The SARL welcomes the clubs to the SARL family. If your club is not already affiliated to the SARL, visit www.sarl.org.za and select Club Talk for details and an affiliation vorm.

NEW MEMBERS

The SARL extends a hearty welcome to the following radio amateurs who have joined the SARL as members: ZS1AW - Baxter, WHO had already been welcomed from the UK but now has a RSA call sign! ZS1CU - Claude Steenkamp ZSL1038 - Edric Russel ZSL1047 - Keith Ferry G2HIX - David Craig

STILLLISTEN OUT FOR JOTA STATIONS

On Saturday 20 October CQ Hou Koers took place with many amateurs hosting young people on the air. JOTA is run over two days, and is still active today. ICASA has agreed, on the SARL's request, to allow unlicensed youth to operate amateur radio stations under the supervision of licensed radio amateurs during these two events.

Give a young person the experience of a life time and encourage him or her to call CQ and operate an amateur radio station. The bug may just bite and you will have recruited a new person to join the world of radio amateurs.

CONTEST NEWS

The next RaDAR contest takes place on Saturday 3 November 2012, starting at 12:00 UTC and ending at 18:00 UTC (14:00 CAT to 20:00 CAT)

giving 6 hours of activity - approximately 4 during the day and 2 at night. Activity may take place on all amateur bands and modes, including cross band contacts via amateur satellites. QSOs via terrestrial repeaters will NOT be allowed.

The exchange is your call sign, your name, a RS(T) report, your QTH and grid locator. The scoring is one point per QSO and one QSO per mode, per band/satellite, per call sign. There is a category and a power multiplier. Portable and RaDAR stations can also earn bonus points.

To be considered as a true RaDAR station, the entire station equipment, radios, batteries, mast, antennas and refreshments must be easily portable and hence the need to carry the equipment for at least 1 km prior to setting up.

Log sheets must be sent to the Lichtenberg Amateur Radio Club (LARK), PO Box 410, Lichtenburg, 2740 or by email to zs6lrk@nwinternet.za.org. The closing date for logs is 18 November 2012 and a photograph of the station (JPG format) MUST accompany every log entry.

The second leg of the SARL National Field Day will take place between 10:00 UTC on Saturday 17 November and 10:00 UTC on Sunday 18 November 2012 with activity on 160, 80, 40, 20, 15 and 10 metres using Phone, CW and Digital modes.

There are five classes of participation, namely Class A - Field Station, Multi operator; Class B - Field Station, Multi operator, QRP; Class C - Field Station, Single Operator; Class D - Field Station, Single Operator, QRP and Class E - General stations. The exchange is the number of transmitters, Field Day operating Class and Province.

Equipment for Field Stations may only be set up in the 24 hours prior to the starting time of the contest. This restriction applies to antennas, masts, towers and transmitting equipment, but excludes accommodation such as a caravan, tent, etc. Once a Field Station has been established at a site, it may not move to an alternative site after the contest starts.

Get all the rules in the 2012 SARL Contest Manual.

VOLUNTEERS FOR NEWS TEAM

The News Team is grateful for the volunteers who offered to join the team but more volunteers will be appreciated. The main task of volunteers will be to translate bulletin items into Afrikaans. This news item is a request for members to offer their services to keep the bulletin service going. The news items for the bulletin will be e-mailed to the translators, who will translate them and e-mail them to the editor.

Bulletin translators will be SARL members, bilingual, with some rudimentary computer and editing skills and will have an e-mail address. If there are for example six translators, each one will only

take responsibilty for the translations two months out of every year.

If you are be willing to try your hand at this, please send your name and contact details to Fritz, ZS6SF, with email address secretary@sarl.org.za during the coming week.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at moderate levels. All current visible sunspot regions remain stable and many of the sunspots are in a state of decay. A potentially significant sunspot hiding off the eastern limb has started to rotate into view. It is still too early to tell just how big or small this sunspot is, however keep an eye on this region for further C-Class flare activity.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 84.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. 10 m openings will be more frequent due to the higher solar activity.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

3 November - RaDAR Contest, 12:00 to 18:00 UTC. 18 November - Log sheets for the RaDAR Contest to be in to Lichtenberg Amateur Radio Club (LARK), PO Box 410, Lichtenburg, 2740 or by email to zs6lrk@nwinternet.za.org. 17 November - SARL National Field Day will take place between 10:00 UTC on Saturday 17 November and 10:00 UTC on Sunday 18 November.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3 230 kHz. Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled by George Honiball, ZS6NE.

Thank you for listening, 73. /EX

30 Meter Multi Mode Event Weekend 27/28 October

Posted: 19 Oct 2012 11:05 PM PDT
http://forums.qrz.com/showthread.php?365474-30-Meter-Multi-Mode-Event-Weekend-27-28-October&goto=newpost

30 Meter Multi Mode Event Weekend

When: 27/28 October 2012

Where: 10 MHz - 30 Meter Band (10.100 ☐ 10.150)

Objective: To promote experimenting and using different digital modes on
the unique 30 Meter Band

For a more detailed listing of this event go here:

http://www.30mdg.net/news.html

30mdg white back ground jpeg3.jpg

The 30 Meter Digital Group (30MDG) is celebrating our 5 year Anniversary,
6,000 members (118DXCC), and our 30MDG Award Program issuing over 31,000
Award Certificates. 30MDG is FREE to join, FREE Awards program with FREE
Award software ☐ Ultimate 30 or U30). All licensed Amateur Operators and
any SWLers are welcome - come as you are we are a casual group, promote all
digital modes from the latest to the original digital mode (CW), enjoy
rag-chew to DX, experimenting with different modes/software/antenna/power,
promote good operating practices, NO CONTESTING -WARC band, and the unique
30m band propagation...with some great ops! (please note we are secondary
users of the 30m band)

Hope to CU on the band and as always this is NOT a contest ☐ no start or
stop times, no exchanges, no logs to send to anyone, no winners or trophy ☐
this IS to PROMOTE AWARENESS of the 30 METER BAND and the only winners are
those that participate and have fun!

Don KB9UMT 30MDG#0001-Founder

And the 30MDG ☐Team"

J. YL/XYL

K. SWL

7. Numbers exchange:

Members of ATCC send character report consisting of a signal report RST plus a (one-three digit) number your member of ATCC.

For example: (R8MC-599 123; SP2LNW-599 13; UA1CEC-599 3).

Other stations send character report consisting of a signal report RST plus a (two digit) your

WW-section (World Wide Squares)

For example: (HA1YI-599 JN; ON3ND-599 JO; RD9CX-599 MO).

8. Participants: Amateur radio stations around the world.

9. Points:

QSO with own country count-1 point;

QSO with a different country in the same continent-2 points;

QSO with a different continent-3 points;

QSO with a member of ATCC- 5 points.

10. Multipliers:

Each different WW-section worked on each bands and each different number a member of ATCC on each band gives 1 point for multiplier.

SWL have not multipliers.

11. Final score:

The total number of QSO points on all bands times the total number of multipliers

worked on all bands.

12. E-logs:

Send as attached fill to: atcclub-open@rambler.ru

In the field subject of your e-mail letter it is necessary to mention your call.

For example: RX1XXX SOAB-LP.

In the field SOAPBOX: necessary to show: RIG; PWR; ANT, as your comments and wishes.

13. Awards:

Special plates for different categories 1st place winners are founded.

Certificates to the first 3 stations in the category.

All participants who have logs will receive E-mailed Virtual certificates for ATCC OPEN-2012-contest.

14. Deadline:

All logs must be E-mailed to: atcclub-open@rambler.ru no later than 2012-Oct-28.

HAMRADIONOW.tv

Episode 28: The Transformer Guy

Episode 29: The Huntsville Hamfest Guy

Peter Eggiman builds transformers. Little ones, big ones, and really big ones,

for business and for hams. Jeff AC4ZO talks to Peter about the technology, after Gary

does a "pledge drive" and a short visit from The Bear.

Charlie Emerson N4OKL is the benevolent dictator of the Huntsville Hamfest.

Charlie's now saying, "Wait... is THAT what they got out of the interview?" Not really.

But Huntsville isn't like most hamfests, and Charlie explains why. Then he confuses

HamRadioNow with Ham Nation. And finally, the Mouse visits Gary as he

wraps up the episode. So don't tune out early.

Watch these episodes at our web site, www.HamRadioNow.tv.

Ham Radio Operators to Team Up with Boy Scouts for Jamboree On The Air:

Posted: 19 Oct 2012 05:04 PM PDT
http://www.eham.net/articles/29183

Local amateur radio operators will showcase their skills to the Boy Scout community at the 55th annual Jamboree on the Air, to be held this Saturday, October 21, at the WNC Agriculture Center. The following is from the monthly newsletter of the Western Carolina Amateur Radio Society:

//
Hamming It Up:

Posted: 19 Oct 2012 05:04 PM PDT
http://www.eham.net/articles/29182

Last week, I dragged my kids to an outing that sounded fun. I saw a notice in our church bulletin about a special ham radio event honoring Saint Maximilian Kolbe, patron saint of ham radio operators. Who knew? I was intrigued. Ham radios have been around for more than a century and are an effective emergency communications back-up in our digital age. The eternal optimist, I thought this might be a cool opportunity to learn about something you don't see every day.
When I told my kids about it, my daughter's first question was whether or not we could use it to talk to aliens. RIGHT??! That's exactly the sort of thing I wanted to find out, and I was glad that we were on the same page. My son was less enthused. Despite the lure of having additional fodder for future "Lives of the Saints" projects, he wasn't moved. We arrived at our parish center to find a few older gentleman and one sole supportive wife giving "shout outs" about the special feast day over the air. They had a wipe-board of places they had reached, and at one point linked up with a man from Italy! My son wasn't impressed.

//
Hamfest Planned this Weekend at BMS:

Posted: 19 Oct 2012 05:03 PM PDT
http://www.eham.net/articles/29181

BRISTOL, Tenn. -- The Gray HamFest, an amateur radio event which has been held in the Tri-Cities for three decades, will be held this weekend at Bristol Motor Speedway. About 1,000 amateur radio operators from eight states are expected to attend Saturday's event, which will be held at Gates

6 and 7 at the track, according to a written statement announcing the event. Ham operators can gather and trade equipment in the parking lot by the Bruton Smith Building, and retailers will sell equipment under the grandstands, the statement said. Gates open at 6 a.m. for tailgating, and the main gates will open at 8 p.m. The event is expected to last until about 1:30 p.m.

Sun Unleashes Solar Plasma Wave Larger than Earth:

Posted: 19 Oct 2012 05:03 PM PDT
http://www.eham.net/articles/29180

A giant wave of super-hot solar plasma larger than the Earth erupted from the sun on Friday in a spectacular display captured by a NASA spacecraft. The huge solar prominence occurred at 4:15 a.m. EDT (0815 GMT) and was recorded in amazing detail by the high-definition cameras aboard NASA's Solar Dynamics Observatory before escaping the sun. "Once it started breaking away, the process only took 10 hours before it was out of sight," NASA media specialist Steele Hill explained in a photo description. "The prominence stretched out many times the size of Earth." The Solar Dynamics Observatory showed the solar prominence as a wispy red-orange wave stretching out from the lower right section of the sun. The image was recorded in the 304 Angstrom wavelength of extreme ultraviolet light, according to Hill.

Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5U, 5W, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T30, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2M, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B9, RODRIGUES ISLAND. The 3B9SP DXpedition is close to going QRT. The operation is expected to go QRT October 23rd. According to the ClubLog Web page, as of 1455z, October 21st, 3B9SP has made 18715 QSOs with 8211

unique callsigns (11213/CW, 6353/SSB, 890/RTTY and 259/PSK). Breakdown by continent is: 176/AF, 0/AN, 3690/AS, 9177/EU, 5279/NA, 290/OC and 103/SA. QSL via HB9ACA direct or use the OQRS on ClubLog. The logs will be uploaded to LotW within 6 months after the DX Operation. For more details and updates, see: http://hb9fr.ch/3b9sp

5H, TANZANIA (Senior Moment For Editor!). Last week we reported that Noel, WB0VGI, informed OPDX that he is now operational in Iringa, Tanzania. However, your editor forgot to put Noel's callsign in the announcement. His callsign is 5H3NP, and he will be there until December 17th. Operations will be on CW, SSB and PSK. QSL via his home callsign.

5X, UGANDA (Back On!). Nick, G3RWF, who was expected to be active this October as 5X1NH from Uganda for two months but then postponed his trip, has now announced that he will return on November 6th for 5 weeks. He should be on 80-10 meters, possibly 160m, and he prefers to operate CW but will also be on the Digital modes with some SSB. Nick will probably also be in the CQWW DX CW Contest and the ARRL 10m Contest. QSL via his home callsign.

9V, SINGAPORE. Koichi, JR1MLT, is currently active as 9V1KK from Singapore. He is there because of his job, and he informs OPDX that he expects to be in Singapore for "five years or so (up to economy and market)". His station is very much limited due to the residential conditions. Koichi mentions that he currently lives on the 10th floor of a condo and his antenna is much restricted. Koichi just put up a long wire with the ATU for the HF bands (40-10m) with 100 watts. He operates mostly on SSB and CW. However, he travels extensively and his operating time is limited, but he will get on the air as much as possible. QSL via JH1ILX direct.

9Y4, TRINDADE AND TOBAGO. Chris, 9Y4D (ex-9Y4NZ), will be active during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (20m)/High-Power entry. QSL via 9Y4D (see QRZ.com).

A22, BOTSWANA. Schalk, ZS3O, from Sandbaai, South Africa, was active as A22LL this past weekend from Lobatse, Botswana. He informed OPDX that he has a farm in Lobatse and will be in there "every 2nd weekend". When there, Schalk mentioned that he will be on the 20m band operating CW and SSB. Watch 14020 kHz for CW and between 14180-14240 kHz for SSB (mostly on 14200 kHz calling CQ. QSL via his home callsign, direct and by the Bureau. NO LoTW.

AH0, MARIANA ISLANDS. Operators Kuniyoshi/7L1FPU (W1FPU), Moto/JE1NDE (W1NDE), Naoyuki/JK1FNL (NA8O), Yuzo/JQ2WTT (KH0XW) and Hiroyuki/JG7PSJ (KW2X) will be active as AH0BT during the CQWW DX SSB Contest (October 27-28th) as a Multi-2 entry. QSL via 7L1FPU. The team will try to be active using their own callsign before the contest (October 25-26th).

AH2, GUAM. Members of the Guam Contest Club will be active as AH2R during the CQWW DX SSB Contest (October 27-28th) as a Multi-Single entry. Operators mentioned are: Kazuma/JG3RPL, Toshinobu/JI3ERV, Mikiawa/JR7OMD and Miyazawa/JP7DKQ. QSL via LoTW or direct to JH7QXJ. PLEASE DO NOT QSL

via the KH2 Bureau.

C45, CYPRUS. Spyros, 5B4MF, will be active using his special callsign C45T for the CQWW DX SSB Contest (October 30-31st) as a Single-Op/Low-Power entry. QSL via address on QRZ.com, or by the Bureau or LoTW.

CP8, BOLIVIA. Peter, DF7NX, is now active as CP8MW from Bolivia until October 23rd. Activity will be on the 30-10 meters mostly CW. QSL via his home callsign, direct or by the Bureau.

CR2, AZORES. Kim, OH6KZP, will be active as CR2X from Ribeira Grande during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/High-Power entry. QSL via OH2BH. For more details, visit the CR2X Web page at: http://www.cu2a.com

CY0, SABLE ISLAND (Reminder/Update). PRESS RELEASE - date October 20th [edited]: "Murray/WA4DAN and Ron/AA4VK announce that everything is set for their operation from Sable Island beginning October 22-31st. The weather forecast for Monday looks good, at this time. The only concern is the beach conditions. Rain is forecast for Sunday which could potentially affect the 'beach runway'. Travel to Sable Island is always problematic. Often, when conditions in Halifax are good, conditions at Sable Island are not good and visa versa. Also, the 'old' Britten-Norman Islander aircraft is not equipped with modern instrumentation, which limits the conditions under which it is safe to fly between the mainland of Nova Scotia and Sable Island. We were unsuccessful in two previous attempts to visit Sable Island. We are optimistic that Monday will be a 'GO'.
As previously advertised, our focus will be on 10, 12, and 15 meters, where the demand for CY0 is greatest, and especially on 10M, where new DX'ers, with modest stations, have the best opportunity to work 'a new one'. Also, we plan to be active in the upcoming CQWW Phone contest on 10, 15, 20, and 40 meters to provide CY0.
We would like to thank Gerry Forbes, Officer-in-Charge for Sable Island for being so helpful in trying to make this, our third attempt, successful. In addition, we would like to express our appreciation to Gary, VE1RGB, who has provided invaluable logistical support in Halifax, Nova Scotia, the departure point for the flight to Sable Island.
Monitor <www.cy0dxpedition.com> for the latest updates."

DXPEDITION VIDEOS OF THE WEEK. With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings:
2011 - D4C Cape Verde (CQWW WPX SSB Contest):
http://www.youtube.com/watch?v=c-CTHU6z0
2011 - D4C Cape Verde (CQWW DX SSB Contest):
http://www.youtube.com/watch?v=ruNHc9o0I
1990 - XU8DX - XU8CW Phnom Penh, Cambodia: http://vimeo.com/30892749
1989 - XW8DX - XW8CW Vientiane, Laos: http://vimeo.com/30307643
1988 - 3W8DX - 3W8CW Hanoi, Vietnam:
http://www.youtube.com/watch?v=39iNDVfD4

If you have a DXpedition 'video' available on the Web and would like to have it listed in the OPDX, PLEASE send the URL to use, and we will publish it.

EA8, CANARY ISLANDS. Operators Andrea/IK1PMR and YL Claudia/PA3LEO will be active as EA8/homecall from Tenerife Island (AF-004, S-012 for the Spanish Islands Award, WLOTA LH-1276) between December 3rd and February 12th (2013). Activity will be on the HF bands and 6 meters. Andrea will operate CW and Claudia will operate RTTY. QSL via their home callsign, direct or by the Bureau (E-mail requests accepted). Watch Andrea's Web site for updates and more details at: http://www.ik1pmr.com

ED9, CEUTA AND MELILLA. Operators Con/DF4SA, Frank/DL2CC, Zoli/HA1AG, Laszlo/HA3NU and Mark/N5OT will be active as ED9Z from Ceuta during the CQWW DX CW Contest (November 24-25th) as a Multi-Single entry. The group will be using all Spiderbeam antennas and a 40m 3 element full size beam. QSL via EA9LZ.

EF8, CANARY ISLANDS. Juan, EA8CAC, will be active as EF8R from Gran Canaria Island (AF-004) during the CQWW DX SSB SSB Contest (October 27-28th) as a Single-Op/Low-Power/SO2R entry. QSL via direct to EB7DX or LoTW.

FG, GUADELOUPE. Yann, F1NGP, President of the French Clipperton DX Club, is now active as FG/F1NGP from Saint Francois (Grid FK96IF), Guadeloupe (NA-102) until about October 26th. Activity will be on 40-10 meters using CW, SSB and RTTY. QSL via his home callsign.

FG, GUADELOUPE. Gildas, TU5KG, is now active as FG/TU5KG from Guadeloupe until October 24th. Activity will be holiday style operating mainly RTTY and SSB. QSL via F4DXW, direct only.

FG, GUADELOUPE. Yann, F5UTN, will be active as FG/F5UTN from Guadeloupe between October 23rd and November 1st. Activity will be holiday style operating mainly CW and SSB. He will also be in the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band or Single-Band (15m)/Low-Power entry. QSL via his home callsign.

GJ, JERSEY. Members of the Jersey Contest Group will be active as GJ2A from Jersey Island (EU-013) during the CQWW DX SSB Contest (October 27-28th) as Multi-Single entry. QSL via LoTW, or direct to GJ3DVC.

HK, COLOMBIA. Pepin, CO2TK, will be active as HK3TK during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (10m)/Low-Power entry. QSL via F5CWU direct.

HR, HONDURAS. Operators Dan/HR2DMR, HQ2DOM and Johnny/HQ2JCM will be active as HR2WW during the CQWW DX SSB Contest (October 27-28th) as a Multi-Op/All-Band/Low-Power entry. QSL via KD4POJ.

HS, THAILAND. Anothai, HS8FLU, from Nuakhlong Krabi will be active during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (20m)/Low-Power entry. QSL via his home callsign, direct, by the Bureau or eQSL.

HS25, THAILAND (Special Event). Look for special event station HS25DX to be active from Kao Kluay in Surathani Province in the south part of Thailand from October 27-28th. Activity is to celebrate the 25th anniversary of the "100watts Magazine". Activity will include an entry in the CQWW DX SSB Contest (October 27-28th). QSL via E20PFE.

IOTA NEWS.....
AS-060. Members of the Korea Contest Club (KCC) will be active as D93I from Pigum Island between October 21-29th. Activity will be on 80-10 meters using a beam antenna for HF, 4-square for 40m and vertical for 80m. They will also be in the CQWW DX SSB Contest (October 27-28th). QSL via DS4NYE direct or LoTW.

EU-050. Carlo, IK4JQQ, will be celebrating his 25th year on amateur radio by being active as IL7/IK4JQQ from San Domino Island, Tremiti Islands, between October 21-23rd. Activity will be on the HF bands and possibly the satellites. QSL via his home callsign, direct, by the Bureau, LoTW or eQSL.

NA-027. Operators Gus/VO1MP and George/K5KG will be active as VD1M from Newfoundland Island during the CQWW DX SSB Contest (October 27-28th) as a Multi-Single entry. QSL via VO1MP.

OC-160. Akira, JA1NLX, is now active as JA1NLX/VK4 from Hamilton Island until October 23rd. Activity will be on the 40-10 meters on the IOTA frequencies using CW, SSB and RTTY. He will use an Elecraft KX3 with Juma PA100D into a random wire wound on fishing pole and radials with ATU or Loop wire with ATU. It will be mounted on the room balcony. QSL via his home callsign or LoTW. Log will be upload onto ClubLog and LoTW server when he returns home. For more details and updates, watch the following Web pages at:
http://www.ne.jp/asahi/ja1nlx/ham/VK4_2012.html
http://ja1nlx-aki.blogspot.jp/search/label/JA1NLX%2FVK4_2012

OC-271. (NEW IOTA). Operators Joppy/YB8XM and Andy/YC0MVP will activate the new IOTA Babar Island during the first week of November. The specific dated are November 1-8th. QSL via YB9BU.
Look for updates on Joppy Twitter account or Blog page at:
https://twitter.com/YB8XM
http://oc271.blogspot.jp

SA-087. Operators Ruben/LU3XEM, Luis/LU3XEI, Edgar/LU5VAT and Carlos/LU7DSY will be active as LT0X from Penguin Island between November 2-4th. There has been no activity from this island for 12 years. Activity will be on 80/40/20/15/12/10 meters, possibly 6 meters, using CW, SSB and PSK31, with three stations active on the air. QSL via LU7DSY.

KG4, GUAM. John, KF4EME, will be active as KG4EM from Guantanamo Bay during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/Low-Power entry. QSL via KB7GJ.

KP2, U.S. VIRGIN ISLANDS. Operators Bob/K3EST, Fred/K9VV and Philip/KT3Y will be active as KP2M from the Radio Reef Contest Station on St. Croix (NA-106) during the CQWW DX CW Contest (November 24-25th) as a Multi-Single entry. QSL via AI4U and LoTW. Look for the operators to possibly be active outside of the contest as KP2/homecall. They will be there between November 22-27th. For more details about the KP2M station, see: http://www.radioreef.com

LX, LUXEMBOURG. Philippe/LX2A will be active as LX7I during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band entry. He states that he will be using a new setup and antennas for the contest. QSL via LX2A. Visit the LX2A Web page at: http://www.lx2a.com

OH0, ALAND ISLAND. Look for OH0Z to be active once again in the CQWW DX SSB Contest (October 27-28th), but as a Single-Op/All-Band/High-Power entry. Operator will be Tomi/OH6EI. QSL via W0MM.

OH0, ALAND ISLAND. Kim, OH6KZP, will be active as OH0X from Aland Island during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/ High-Power entry. QSL via OH2TA.

OH0, ALAND ISLAND. Pekka, OH2YY, will be active as OH0YY during the CQWW DX SSB Contest (October 27-28th) as a Single-Op (possibly as a Single-Band (10m) entry. QSL via OH2YY.

OH0, ALAND ISLAND. Waldemar, SM0TQX, will be active as OH0JFP during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (40m or 10m) entry. QSL via OH0JFP, by the Bureau or direct.

P4, ARUBA. Valery, R5GA, will once again be active as P4/R5GA from Oranjestad (P49V/P40YL Aruba Ham Radio Rental - see <www.p49v.com>) between November 22-28th. Activity will be on CW mainly on 160-10 meters, especially on the 30/17/12 meters. Operations will also include the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band entry using the callsign P40F. QSL via UA3DX. QSL P4/R5GA via R5GA, direct, by the Bureau or LoTW.

PJ4, BONAIRE. Operators Paul/K1XM, Al/W1FJ, John/K4BAI and Jeff/KU8E
will be active as PJ4A from the "PJ4G Radio House" on Bonaire (SA-006,
WLOTA LH-1279) during CQWW DX CW Contest (November 24-25th) as a Multi-?
entry. The team will be on the island between November 20-27th. Outside
the contest, operators will be active as PJ4/homecall. QSL PJ4A, PJ4/K4BAI
and PJ4/KU8E via K4BAI. QSL PJ4/K1XM and PJ4/W1FJ via their home callsigns.
Check out the "PJ4G Radio House" at: http://www.pj4g.com

PREVIEW THE 7O6T QSL CARD on "DX-World.net at:
http://dx-world.net/2012/qsl-card-preview-7o6t

UK TO PHASE OUT IRCS. Phil, G3SWH, received the following info from the
Royal Mail: "Due to declining international mail volumes and electronic
substitution, customer demand for International Reply Coupons has been
falling dramatically over the last few years. Overall sales of Inter-
national Reply Coupons have been very low indeed - on average just 4
per annum bought from each Post Office branch. Therefore, it was no
longer commercially viable to maintain the sale of coupons and Royal
Mail has taken the decision to withdraw them from sale.
International Reply Coupons have not been withdrawn globally from
sale. Under UPU regulations Royal Mail through Post Office Counters
is obliged to redeem International Reply Coupons presented having been
purchased overseas, but we are not obliged to sell them. However, I can
confirm that customers have up to December 2013 to redeem IRCs."
Phil states, "This seems to be much more in line with the Royal Mail's
responsibilities under their UPU membership. Looks like they're safe
until 31st December 2013. It may be that the UPU will change their rules
after that date (which would be no bad thing IMHO)."

QSL RECEIVED VIA LoTW: 3A6TS, CT1ILT, DU3/N0QM, EW8DJ, IZ2OBS, PF7DKW, S57S, T6LG, T6MO, UN5J, UR3IFD, UR5MSW and XM2I

QSLS RECEIVED VIA MAIL: 3D2AG/p, D3AA, CY9M, EX2F, FK/JJ2NYT, FW0NAR, HB0/DL2SBY, KH8/W8GEX and YE0M

QSLS RECEIVED VIA THE BUREAU: CY9M

SI9, SWEDEN. Operators Jef/DD2CW, Marcel/ON6UQ and Dirk/ONL741 will operate as SI9AM between October 24-31st, from the "King Chulalongkorn Memorial" in Raganda. They will be in the CQ WW SSB DX Contest (October 27-28th). Outside of the contest, they will be active on all HF bands. Main frequencies:
CW - 1817, 3517, 7017, 10117, 14017, 18077, 21017, 24897 and 28017 kHz
SSB - 1840, 3760, 7060, 14210, 18160, 21310, 24960 and 28510 kHz
FM - 145.550 MHz and Repeater RV49 - 145.612 MHz.
QSL via SM3CVM, Bureau cards can be requested by E-mail to: info(at)si9am.se
Visit the SI9AM Web page at: http://www.si9am.se

SILENT KEY. OPDX was informed that Th&#65533;o Jacobs, ON4LEP, become a Silent key (SK) on October 12th. OPDX and its readers would like to send out our deepest sympathy to the family and friends of ON4LEP.

T30, WESTERN KIRIBATI. The Brazilian team will go QTH as T30PY (HF) and T30SIX (6m, EME on WSJT-JT65A) from Tarawa Island (OC-017) this week on October 25th. According to the ClubLog Web page, as of 0842z, October 19th, T30PY has made 15652 QSOs with 6369 unique callsigns (6994/CW and 8235/SSB and 423/RTTY). Breakdown by continent is: 58/AF, 0/AN, 7606/AS, 2484/EU, 3823/NA, 883/OC and 798/SA. QSL via PY2PT, direct, by the Bureau ("Estimation to reply: at least, 3 years."), or by their OQRS on the Web page. For more details, see: http://www.mdxc.org/t30py

T33, BANABA (Update). A group of 14 operators, who was expected to be led by Jay/W2IJ and David/N1EMC for a DXpedition to Banaba for March/April 2013 (see OPDX.1079), has now been cancelled according to "The Daily DX". The cancellation is the "result of logistical issues that occurred this (past) week. They are re-evaluating the issues and hope to activate the island later on in 2013."

T4, CUBA. Operators Carlos/CO6CAC, Jose/CO6EC, Hector/CO6HLP, Orelvis/CO6LC, Luis/CO6LE, Luis/CO6LP, Yordany/CO6YAC, Edor/CO7PH and Jose/CM8AKD will be active as T46A during the CQWW DX SSB Contest (October 27-28th) as a Multi-? entry. QSL via EA5GL.

T6, AFGHANISTAN. Eric, K9GY, will be active as T6MO during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (10m or possibly 15m)/Low-Power entry. QSL via K9GY.

T8, PALAU. Three JA operators will activate the "West Plaza By The Sea Hotel Rental Shack" on Palau Islands (OC-009) over the next month. Their activities should be on all bands and modes. Currently, operators Kunio/JO1AEC and Hideyuki/JM1LJS will be active as T88EC and T80W, respectively, until October 23rd. This will be followed by Mazshita/JF2SKV as T88KV between October 26-30th. He will be active in the CQWW DX SSB Contest

(October 27-28th) [for more details, see OPDX.1079]. Then look for Toshiharu, JA3JND, to be active as T88ON between November 9-13th. QSL T88EC via JO1AEC, T80W via JM1LJS and T88ON via JA3JND. For details on the "West Plaza By The Sea Hotel Rental Shack", see: http://palau.rental-shack.com/english

TF, ICELAND. Members of the IRA club (ÞslenskirradÞÞamatÞrar) will be
active as TF3W during the CQWW DX SSB Contest (October 27-28th) as a Multi-Single entry. Operators mentioned are Jon/TF3ZA, Bjorn/SM0MDG, Patrik/SM0MLZ and Ulf/SM0NOR. QSL via TF3W, by the Bureau or direct.

TK, CORSICA. Salvatore, IK8UND, will be active as TK9R during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/High-Power entry. Look for possible activity on CW and RTTY before the contest. QSL via IK8UND direct ONLY.

TX5, CLIPPERTON ISLAND (Update). The 2013 Cordell Expedition to Clipperton Island posted the following on October 15th [edited]: "The March, 2013 DXpedition to Clipperton Island has received the callsign TX5K to be used during the operation. With the addition of Luis/XE1L, Dave/WJ20, and Giovanni/I5JHW, the team has 23 members. One space remains available for another operator, scientist, or other supporter who wishes to join the DXpedition.
We are proud to announce that the QSL Manager will be Bob, N2OO. Offsite team member Dean, N7XG, is developing new software to help automate some of the operations at the QSL manager and his team.
The expedition will use DXA, the system that enables real-time Web display of the log data, first used on Kure Atoll K7C 2005, to provide confirmation of valid QSOs in about 1 minute after they are made. We will also make use of ClubLog and LoTW.
The DXpedition will be active on all HF bands and modes for about 10 days. In addition to the radio operations, the team will carry out numerous scientific projects of environmental science, especially involving studying invasive and undiscovered species that have potential for catastrophic disruption of the Clipperton ecosystem. The team will study vortex winds produced by the island, and will document foraging by congenitally deformed birds. Advisor Robert Pitman reports that a significant portion of the masked boobies are deformed and apparently are fed by their parents their entire lives.
The DXpedition is very pleased to acknowledge a personal gift from a world-famous ham of 10,000 USDs. While preferring to remain anonymous, the donor hopes that his gift will stimulate others to support the project. A particularly interesting activity will be the real-time Internet video connection with students. After the expedition the students will write essays for a compendium to be titled 'Saving the World, by We the Students.' The publication is designed to be the first of a series of 'Saving the World, by...' The team also will collect and remove plastic debris from the island. You can help in these efforts by making a donation through the link on the Web site.
Complete information about the project is available on the Web site at

<www.cordell.org/CI>. The project is being organized and will be led by:
Bob KK6EK schmieder (a) cordell.org
Chris DL1MGB Chris (a)DL1MGB.com "

VE2, CANADA (Zone 2). Operator Yuri, VE3DZ, will once again be active as VE2IM from Sept-Iles, QC (Zone 2), during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/High-Power or Low-Power entry. Yuri states that he will be there between October 23-30th. This is his 17th trip to Zone 2 since 1999. Activity before and after the contest will be on CW, SSB and RTTY, and all HF bands including the 30/17/12 meter bands. QSL via VE3DZ, direct, by the Bureau or LoTW.

VK0H, HEARD ISLAND (Update). A recent update, dated October 15th, was posted on the Heard Island (The 2014 Cordell Expedition) Web page at:
http://www.cordell.org/HD
Under "News" it states [edited]: "We have posted updates of the Project Description (version 5.2)
<http://www.cordell.org/HD/HD_pages/HD_Documents.html>
and the TEAM.
We are pleased to welcome Steve Chamberlian/VK6IR and William (Wild Bill) Beyer/N2WB to the radio team. We also welcome several other persons to the offsite team, including Yasuo "Zorro" Miyazawa/JH1AJT, Tommy Horozakis/VK2IR,
and Christopher Wells/N9LXR. Wells is implementing a real-time interactive video capability for the Clipperton Expedition (see below), and will do the same for Heard Island.
We are also pleased to welcome Dr. Robert Pitman, NOAA Southwest Fisheries Science Center in La Jolla, California. Pitman is a world expert on killer whales. Killer whales are arguably one of the most recognizable, and best-studied, large animals on earth, yet basic questions about how many species there are and how they function within the ecosystem remain unanswered. Pitman has assembled evidence for the existence of a new species of killer whale in Antarctic waters, in the area that the Heard Island expedition will be travelling. Pitman will be on the Heard Island cruise to search confirm the proposed new whale species. Confirming new species in Antarctic waters would highlight the fact that our knowledge of marine biodiversity is perhaps even more rudimentary than currently recognized.
Please note the connection between the 2014 Heard Island Project and the 2013 Clipperton Expedition <www.cordell.org/CI>. Some of the same team members will be implementing some of the same science projects on Clipper-ton that we expect to carry out at Heard Island. While being a major expedition on its own, Clipperton is also a development and test project for Heard Island. Because of this close relationship, we hope that sponsors will support both projects."

VP2M, MONTSERRAT (Update). Operators (YL) Babs/DL7AFS and Lot/DJ7ZG will once again be on another DXpedition. This time they will be active as VP2MYL and VP2MGZ, respectively, from Montserrat (NA-103, WLOTA 1475) between November 5-20th. Activity will be on 80-6 meters using mainly RTTY, PSK31, PSK63 and SSB, on the usual DX frequencies. QSL via DL7AFS, by the Bureau or direct to: Baerbel Linge, Eichwaldstr. 86, D-34123 Kassel,

Germany. Lot states, "We hope to have an internet access for online log because our QTH is in the north part of Montserrat." For more information and updates, visit their Web site at: http://www.qsl.net/dl7afs

VQ9, CHAGOS ISLANDS. Steve, W3HF, will be active as VQ9HF from Diego Garcia Island until the end of October. Activity will be on the HF bands, but with a focus on PSK31. QSL via his home callsign.

XX9, MACAO. Operators Francisco/EA7FTR (XX9TFR), Eugene/EA5HPX (XX9TPX), Jose/EB5BBM (XX9TBM) and David/EB7DX (XX9TEX) are now active from Pousada de Coloane Hotel, Coloane Island (AS-075) until October 29th. Activity will be on 160-6 meters, including the 30/17/12 meter bands, using CW, SSB and RTTY, with at least 2 stations on at the same time on different bands and modes. Suggested frequencies were published in OPDX.1081. There will be an emphasis on working NA and EU. QSLs for all callsigns are via EA7FTR, direct. All QSOs will be confirmed via LoTW. For more details and updates, see: http://adxg.org/macau/index.php

ZP9, PARAGUAY. Manu, ZP9MCE, announced that he will be active in both the CQWW DX SSB Contest (October 27-28th) and CQWWDX CW Contest (November 24-25th) as a Single-Op/Single-Band (10m)/Low-Power entry. QSL only via EA5ZD.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 21st October 2012

Silent Key

It is with great sadness that we only recently learned that Philip Murphy (EI8HN) became a silent key last July.

Philip served as a committee member of both the North Dublin and Fingal Radio Clubs. For many years he was also the Morse Code tutor in NDR and helped many students pass the then 12 wpm test.

Philip was a gentle giant and was always there to help out on field days or with other projects. He was a deeply religious man and emigrated to England several years ago, initially to Lancashire and then Sunderland. Ar dheis D&#65533; go raibh a hanam d&#65533;lis.

IOTA Contest Results

The provisional results for this year's Islands On The Air contest have now been published. An extract of these results, covering logs submitted from stations operating from the island of Ireland and offshore islands, is in the contest results section of the IRTS web site: see www.irts.ie for a direct link to the results.

This year, 26 logs were submitted by EI/EJ and GI/MI stations, almost 20% more than in 2011. The highest Irish score was from the Polish-Irish Papa Lima DX group, who operated from Little Saltee Island with the call sign EJ0PL. Their total score was in excess of 6 million points. Other Irish stations with million-plus scores were EJ3Z (Shannon Basin Radio Club, who were on Inisboffin) and mainland stations EI7KD (Oleg), GI5K (Chris) and EI1A (Olivier).

IOTA contests continue to be very popular: a total of 2,517 logs were submitted for this contest - 200 more than in 2011. Worldwide, the highest score was achieved by the Slovak Contest Group operating from Sardinia, with the Bristol Contest Group - last year's highest scoring group - in second place.

IRTS Technical Panel

The IRTS is planning to launch a new service for our membership. In our ongoing endeavours to engage more fully with our membership we have identified an area we feel could be of significant benefit to them.

The IRTS Technical Panel is a group of volunteers who have expertise in, or experience of, different aspects of amateur radio. The e-mail address irtstech /at/ irts.ie is a single point of contact for communicating with the Panel. Our aim is to help radio amateurs with technical or operational problems.

Send your question to irtstech /at/ irts.ie. . Provide as much information as possible, including details of attempts already made to deal with the issue in question.

Your query via irtstech /at/ irts.ie will be distributed to all the members of the Technical Panel and the resolution to the query e-mailed to your private e-mail address. See the October edition of Echo Ireland for further information.

South Eastern Amateur Radio Group

The SEARG tour bus was on the road again last weekend as members of the club headed to the IVETA (Irish Vintage Engine & Tractor Association) 2012 National Show which took place in the Cavan Equestrian Centre in Cavan. The lads headed up on Saturday and enjoyed a great night in Cavan town on the Saturday night. The show on Sunday was a great event with the 3 arenas in the centre packed with vintage cars, tractors and bikes. The SEARG display yet again proved to be very popular with people attending the event. Although band conditions were poor on the day a few contacts were made. Cavan Community Radio done an interview with Mark EI7IS and we will publish the link for it as soon as it becomes available.

The "Class of 2012" proved they knew their stuff at the recent exam which was held on the 4th October. The club's theory course which had been run for people wishing to do the exam was a great success and hopefully the club will run another course in the near future. The committee and members of SEARG would like to congratulate all the students on the great results and look forward to having a QSO with you all soon. For anyone who didn't succeed this time don't give up keep at your notes and the members of SEARG will be happy to help you to get ready for the next exam which should be held in early 2013.

SEARG would like to thank John Clancy of IVETA for inviting us to attend the national show in Cavan and we look forward to taking part in many events in the future. The next monthly meeting of the club will take place in Roanmore Social and Sports Centre, Cleaboy Road, Waterford at 8.30 p.m. on Monday the 29th October. The meeting will be preceded by a committee meeting at 8.00 pm. New members are always welcome. For up-to-date news about the club you can check our website www.searg.com and you can follow us on Facebook and Twitter.

Dundalk Amateur Radio Society, EI7DAR

Radio Theory Classes will commence Monday 5th November at DAR Society premises 'Larkin House', 113, Castletown Road, Dundalk, for preparation to sit the radio theory exam early in 2013. Tuition places are strictly limited and intending candidates are encouraged to enrol at the earliest opportunity. Tuition will involve approximately 20 weeks class attendance and an investment of 100 is required. Open nights to find out more information and to enrol on the course will be held October 31st and on November 5th, the start of the classes. All are welcome to enrol. More information from www.ei7dar.com or secretary at ei7dar dot com.

DX News

Yann F1NGP is at present in Guadeloupe using the callsign FG/F1NGP. He will be there until 26 October. Look for him on 40 - 10m on RTTY, CW and SSB.

Three Italian stations, IK5RUN, I5OYY and I5IHE, will be QRV from the Seychelles from 21 October until 4 November. They will use the calls S79UN, S79YY and S79LC. This is a holiday style operation and they hope to be on 80 - 10m CW, SSB and RTTY.

Mek SP7VC will be in North Africa signing EA9/SP7VC from Ceuta from 22 - 28 October. He will be taking part in the CQ WW DX SSB Contest next weekend (27-28 October)

Among the more exotic callsigns to be heard in the Contest next weekend include 6Y9X (Jamaica), 8P2K and 8P5A (Barbados), AH0BT (Mariana Islands), C5A (Gambia), KG6DX and NH2T (Guam), T88EB and T88KV (Palau), VQ5X (Turks and Caicos Islands) and ZD8O (Ascension Island). A comprehensive list of these stations and many others can be found on the NG3K website. Go to www.ng3k.com and click on 'Announced DX Operations'.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Ham Radio Back in Style at St. Charles High School:

Posted: 20 Oct 2012 05:06 PM PDT
http://www.eham.net/articles/29184

Alpha, bravo and charlie are part of a new language students are learning at St. Charles High School. It comes from the school's amateur radio club, the first at St. Charles High since the 1960s, said science teacher Ellen Zerr, the club's sponsor. The American Radio Relay League (ARRL), a national association for amateur radio, recently awarded nearly $2,000 to the school. Zerr used the grant to buy a few radios and antennae that are mounted on the school roof. The club has only three members, but Zerr hopes to generate more interest in the group. She wants students to learn that operating a ham radio involves much more than sitting by the receiver. "It's not just the radio per se, it's what the kids can do with it," Zerr said. Students at St. Charles High participate in fox hunts in which they use their radio to search for hidden antennae and will try to make the most contacts during field days organized by the St. Charles Amateur Radio Club. Young interest in the hobby has dwindled through the years with constantly evolving technologies. A club like the one at St. Charles High is a good way to revitalize interest and serve students, said Ben Barnett, president of the St. Charles Amateur Radio Club. "A lot of young people are struggling trying to find their identity and finding a place where like-minded folk can get together and have some fun," he said. Senior Sean Basler, whose 16-year-old sister Jesse is also in the club, said he became interested in amateur radio for a practical reason. "In an emergency, ham radio is probably the best form of communication there is," he said. Ham radios can operate on direct current (DC) power, like that supplied by batteries or solar power, making them a reliable source of communication, he said. "The FCC let's us do it because we are the first line of emergency response," Basler said. "Cell phone towers would become very congested with all the calls in an emergency. With ham radio that is less likely because fewer people have them and they have wider broadband. There will be less congestion and you can get your message across more quickly." Beside being a valuable survival skill, ham radio has other perks. "It's interesting to hear other people over the radio," Basler said.

Changes followed by "|".

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Posting-Frequency: posted twice monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

GB2RS NEWS

Sunday 21 October 2012

The news headlines:

RSGB Extraordinary General Meeting, 17 November 2012

Is it time to validate your licence?

G6 QSL Manager details incorrect in RadCom

RSGB Members are now receiving their copy of the November 2012 RadCom. Contained with in it are details of the EGM to be held on 17 November 2012, at which Members will be invited to vote on new governance arrangements for the Society. RSGB Members can vote electronically via the RSGB website, by post or in person at the EGM. The Board is very keen to ensure that the outcome of the EGM accurately reflects the view of the whole membership, and all Members are encouraged to cast their vote.

If you received your Licence for Life between November 2006 and August 2007 and have not validated it with Ofcom since, then it's time to do so. Ofcom extended the validation period of licences issued during that time for an extra year, to avoid having a large number of validations to process around the time of the London Olympic and Paralympic Games. Amateurs are recommended to use the online licensing system at www.ofcom.org.uk/licensing/olc. If you experience difficulties or need assistance in processing your licence online, please call Ofcom on 0300 123 1000 or 020 7981 3131.

The QSL bureau wishes to apologise to Tony, G6GLP, for any inconvenience caused by wrongly attributing his name and call to the G6 sub-series in the November issue of RadCom. The new collection sub-manager for the G6 series of call signs is Steve Wellon, G6DMG. His details can be found on the RSGB website by following the links to QSL managers, via the Operating section. If any Member is concerned that they may have recently sent collection envelopes to the wrong address, please contact the QSL bureau. The phone number is 01422 359 362, or email QSL@RSGB.org.uk.

At 6pm last Sunday the Emergency Planning Officer from Maldon District Council requested Essex RAYNET to be placed on standby, in response to flood alerts issued by the Environment Agency. At 8pm, members were mobilised. They were deployed to the riverbanks at Heybridge Basin, Fulbridge and the Hythe in Maldon. This was in preparation for the high

tide and tidal surge due at quarter to one in the morning. High tide was reached without any significant incident, and the stand down was issued at 1am. Further information on Essex RAYNET can be found online at www.essexraynet.co.uk.

An amateur radio balloon project launched in May finally ended this month with the recovery of the payload. Argentinean amateurs, members of AMSAT-LU, launched a high altitude balloon on 19 May from La Pampa, Argentina. The payload included a 70cm to 2m 4W FM repeater, live SSTV, an HF beacon and two video cameras. During the 4 hour flight, over 200 stations made contacts through the repeater. The balloon came down in an isolated and flooded area. It was finally recovered from the mud by a 4x4 adventure group on 6 October. The flight data was retrieved, including over 6 hours of video from the two cameras. Details can be found at www.uk.amsat.org/?p=11094.

The famous Alexanderson SAQ CW transmitter will be on the air on 24 October, celebrating United Nations Day. The electromechanical 17.2kHz transmitter will be started at 1010UTC and a message will be sent at 1030UTC. More details are on the Alexanderson website, www.alexander.n.se.

Copyright © RSGB 2012. Not for public release before Monday 22 October 2012 except as a GB2RS broadcast. Ofcom has announced that it intends to legalise AM and SSB CB apparatus, subject to the MOD agreeing to the use of spectrum allocated to it. According to the statement on the Ofcom website, the relevant ECC Decision about harmonising CB across Europe should probably be implemented in the UK by the end of 2013. The statement indicates that there are several legislative and other steps that must first be carried out. It also points out that, until these changes are implemented, it will remain an offence to install or use AM, SSB or any other CB apparatus other than in accordance with the current exemption regulations and Interface Requirement. The full Ofcom statement is at http://tinyurl.com/Ofcom-SSB-CB.

And now for the details of rallies and events for the coming week

Today sees the Galashiels and District ARS radio rally at The Volunteer Hall, St Johns Street, Galashiels, Scottish Borders TD1 3JX. Entry is £2.50 and the opening time is 11.30, or 11.15 for those with special needs. Details from Jim, GM7LUN, on 01896 850 245.

Also today, the Ripon and District Amateur Radio Society rally and surplus equipment sale takes place from 10.30 at The Hugh Ripley Hall, Ripon, North Yorkshire HG4 2TP. Admission is £2. Details are available online at www.ripon.org.uk/content/radars-rally-2012.

On Saturday 27 October the Radio Astronomy Group of the British Astronomical Association will be holding a one-day meeting at the National Space Centre in Leicester. The main speakers will be Prof Andrew Lyne from Jodrell Bank and Dr Chris North from Cardiff University, who is also a co-presenter for the BBC's Sky at Night.

Other papers will be presented by Peter Blair, G3LTF and Brian Coleman, G4NNS. Tickets are £15 and include a buffet lunch, entrance to the National Space Centre and free parking. Further details from Paul, G4CSD 01256 470135, or online at www.britastro.org/radio.

Next Sunday sees the North Wales Rally at John Bright School, Llandudno LL30 1LF. Opening from 10am to 4pm, admission is £4.50 and there are disabled facilities. There will be trade stands, a Bring and Buy, special interest groups and catering. Details from Gordon, MW0GBR 0773 3531 766, or online at www.nwrs.org.uk.

Now for the news of special events

Members of the Worked All Britain Awards Group and the British Amateur Radio Lighthouse Society will be operating GB0RME from Great Ormes Head on 27 October. Activity will be mostly on 40m and 80m. The WAB square is SH78 and the Lighthouse reference is A5134X. The summit will not be valid for SOTA as this activation does not fulfil their criteria. Full details of GB0RME are on QRZ.com.

The 30m Multi Mode Weekend starts next Saturday. Its stated objective is to promote experimenting and using different digital modes on the 30m band. The organisers are at pains to point out that this is not a contest, although there is an awards programme. More details are online at www.30mdg.net/news.html.

Ham Radio Celebrates Hollywood will be active on 28 October from 1600 to 2000UTC. The station is located on Stage 9 of the CBS Studio Center facility in Studio City, California. Modes in use will include HF, VHF, UHF, D-Star, Echolink and IRLP. A schedule of operating times and frequencies is on www.papasys.com. Operators will blog in real time at www.facebook.com/KA0XTT, and on Twitter as @NN6JA. A special QSL card will be issued to all confirmed contacts.

And now the DX news compiled from 425 DX News and other sources

The Radio 7 team operation on Rodrigues Island, AF-017, finishes on Tuesday. 3B9SP is active on 160-6m on CW, SSB and datamodes. QSL via HB9ACA or the OQRS on ClubLog. Full details are at http://hb9fr.ch/3b9sp.

The Canadian authorities have approved revised dates of October 22-31 for the DXpedition to Sable Island, NA-063. The two-man team of WA4DAN/CY0 and AA4VK/CY0 will focus on 15, 12 and 10m. More information is on the web at www.CY0dxpedition.com.

Copyright © RSGB 2012. Not for public release before Monday 22 October 2012 except as a GB2RS broadcast. F1NGP will be working stroke FG from Saint Francois Island in Guadeloupe, NA-102, until 26 October. He will be active on 40 through 10m on CW, SSB and RTTY. QSL via his home callsign.

N3IQ will be on the air as C6AQQ from Nassau's Providence Island, NA-001, from 25 &#65533; 31 October. Activity will be mostly on the lower bands. QSL via N3IQ, direct, via the bureau, Logbook of the WQorld or eQSL.

Now the contest news

All contest times are UTC.

Today, from 0900 until 1200, it's the 50MHz AFS, which is a Super League event. Using all modes on the 6m band, the exchange is signal report, serial number and locator.

On Tuesday the 50MHz UKAC takes place from 1900 to 2130. Using all modes on the 6m band, the exchange is signal report, serial number and locator.

Also on Tuesday, the SHF UKAC is from 1900 to 2130 on the 2.3 to 10GHz bands, all modes. Signal report, serial number and locator form the exchange.

The 80m Club Sprint is on Thursday from 1900 to 2000. Using SSB only, the exchange is serial number and name.

Next weekend sees the CQWW DX SSB Contest, from 0000 on Saturday until 2359 on Sunday. Using SSB on all contest bands from 3.5 &#65533; 28MHz, the exchange is signal report and Zone, which is 14 for the UK.

And now the solar factual data for the period from Friday the 12th to Thursday the 18th of October, compiled by Neil Clarke G0CAS on Friday the 19th of October

Seven new sunspot groups appeared during the period, however, solar activity was low on most days with a number of C class solar flares taking place, except for the 13th when none took place and, as a result, solar activity was very low. Solar flux levels increased from 122 units on the 12th to 138 by the 18th. The average was 132 units. The 90 day solar flux average on the 18th was 119, that's one unit up on last week. X-ray flux levels showed little variation day to day and averaged B4.7 units. Geomagnetic activity increased to `minor storm' levels at mid latitudes and `severe storm' levels at high latitudes on the 13th with an Ap index of 52 units. Activity gradually declined and was at quiet levels from the 15th. The average was Ap 15 units. The solar wind data from the ACE spacecraft saw wind solar wind speeds increase from 400 kilometres per second on the 12th to 600 during the evening of the 13th. Particle densities were low every day. Bz, which is the magnetic component of the solar wind, was minus 5 and plus 3 nanoTeslas on the quietest day and between minus 12 and plus 9 nanoTeslas during the disturbance. Except for the 13th, MUFs reached predicted values and some trans-Atlantic working was reported at 28MHz. VHF aurora was reported, particularly on the morning of the 13th but, since this was only a mild disturbance, few contacts &#65533; if any &#65533; were reported from the UK.

And finally the solar forecast for the coming week. The active side of the Sun is still expected to be looking our way. Saying that, solar activity is expected to be at low to moderate levels, with occasional M class solar flares taking place on the odd day. Solar flux levels should increase and be around the 150's later in the week. Geomagnetic activity is expected to be mostly quiet, however, if a coronal mass ejection heads our way then activity would increase. MUFs during daylight hours at equal latitudes should be around 30MHz or even slightly higher. Just a reminder that daytime highs normally take place around local noon during the winter months. Darkness hour lows should be about 8MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of around 35MHz. The optimum working frequency with a 90 per cent success rate will be about 27MHz. The best time to try this path will be between 1100 to 1600 hours UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies can be found on the RSGB

website, including email addresses and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Wythall Radio Club is holding club net on 145.225MHz today and next Sunday. On Monday the Advanced course continues, and there's a curry night at Monsoon. Dave Pick, G3YXM is speaking on Tuesday on preparing for the 160m Club Calls Contest. On Thursday it's the RSGB 80m Club Sprint SSB Contest and on Friday there's a social evening in the shack. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications Club is running a club net on Monday from 7pm on 144.165MHz USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR and on Friday there is a club net on 3.748MHz. Contact the FELCC Information Line on 07554 362 020 for more information.

South Birmingham Radio Society is having an open meeting and ragchew on Monday. On Thursday there are training classes by Dave Murphy, G8OWL, and Friday sees shack and aerial work. Contact Don, on 01214 581 603.

Lincoln Short-Wave Club is taking part in the 50MHz UK AC on Tuesday. The club used equipment sale is at Aisthorpe Village Hall on Wednesday. Thursday sees the club net on 145.375MHz from 20.00, and participation in the CQ World Wide Contest starts at 23.00 on Friday, continuing all day Saturday. For more information contact Pam Rose, G4STO, on 01427

788 356.

Now we return to the traditional listing in date order. On Monday Gloucester Amateur Radio & Electronics Society is on the air. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Tuesday Derby & District Amateur Radio Society is having an illustrated talk on the work of the RAIBC by Russell, G0OKD. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday Loughborough & District Amateur Radio Club is looking at internet video. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday Midland Amateur Radio Society's new committee is looking at social planning and training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday South Kesteven Amateur Radio Society is holding a club net on 145.525MHz from 20.00 BST. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday South Notts Amateur Radio Club is having a talk on propagation by M0RIA. Contact Robin, G4NDM, on 01159 372 942.

On Wednesday Telford & District Amateur Radio Society is having a video presentation of a Hamfest lecture. Contact Mike, G3JKX, on 01952 299 677.

On Thursday Central Radio Amateur Circle is on the air from 20.00 on 145.375MHz. Details from Martin Hallard, G1TYV, by email to radio-circle@live.co.uk.

On Thursday Salop Amateur Radio Society is holding its AGM. Details on the club website at www.salop-ars.org.uk.

On Thursday Tamworth Amateur Radio Society is having a night out on the local high spots, meeting initially at the club. Details from Darren, by email to secretary@tars.es.

Copyright © RSGB 2012. Not for public release before Monday 22 October 2012 except as a GB2RS broadcast.

NEWS FOR THE NORTH OF ENGLAND On Monday Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Sheffield Amateur Radio Club is having a talk on motorbike mobile in Germany by Roland, M0NUE. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday Workington and District Radio and IT Group is having a talk on data modes by Alex, G7KSE. Details from Barry Easdon, G0RZI, on 01946 812 092.

On Tuesday Morecambe Bay Amateur Radio Society is having a data modes night. Contact Sheila, on 07867 516 836.

On Wednesday Denby Dale Radio Club is on the air on 145.575MHz from 19.30. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday South Lancashire Amateur Radio Club is having a visit by RSGB president Dave Wilson, M0OBW and Region 3 Manager Kath Wilson, M1CNY. They will be presenting two informative talks about the RSGB and the operation of repeaters. Everyone is welcome, come to Bickershaw Labour Club, Bickershaw Lane, Bickershaw, WN2 5TE. Entry is £1 on the door, which includes a raffle ticket. Contact Allan Green, 2E0RAG, on 07533 970 841.

On Wednesday Hornsea Amateur Radio Club Club is having an activity night and, on Thursday, is taking part in the 80m Club Sprint SSB. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Thursday South Manchester Radio and Computer Club is having a talk on beginning DXing by John, G4IRN. Details from Ron, G3SVW, on 01619 693 999.

On Friday East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday Tynemouth Amateur Radio Club commences its weekend operating in the CQ Worldwide DX Contest. Contact Bob, M6KLO, by email to mail@g0nwm.com.

NEWS FOR NORTHERN IRELAND Mid Ulster Amateur Radio Club is recruiting candidates for a new Foundation course. This will hopefully be followed by an Intermediate course shortly afterwards. More details are on Training link on the club website, www.muarc.com.

NEWS FOR SCOTLAND Jim Kelly, GM0SYV, RSGB Deputy Regional Manager for District 12, that's Lanarkshire & Renfrewshire, has indicated he wishes to stand down. The Society wishes to record its thanks for Jim's many years of service. Deputy Regional Managers represent Members within their area and are a key interface between the Society, local Members and clubs. If you think you can meet the challenge of this key post, please contact Len Paget, GM0ONX, on 01563 534 383 or email rm1@rsgb.org.uk for further details. Candidates for the post must be a Corporate Member of the RSGB of at least 2 years standing and resident within the area he/she wishes to represent.

On Tuesday Livingston & District Amateur Radio Society is having Morse code practice. Details from Norman, GM1CNH, on 07740 946 192.

On Saturday Cockenzie & Port Seton Amateur Radio Club is taking part in the CQWW SSB Contest. More information from Bob, GM4UYZ, on 01875 811 723.

Copyright © RSGB 2012. Not for public release before Monday 22 October 2012 except as a GB2RS broadcast.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. Today, Chesham & District Amateur Radio

Society is taking part in JOTA with 1st Aylesbury Scouts, using the callsign GB0AYL. On Wednesday there's a talk on using data modes by Terry, G0VFW, including a demo of PSK31. More details from Terry, G0VFW, on 01442 831 491.

Chelmsford Amateur Radio Society has its Top Band net on 1975kHz from 8.30pm on Tuesday. Thursday sees the Advanced exam revision course at Danbury Village Hall from 7pm. Contact Martyn, G1EFL, on 01245 469 008.

Now we return to the traditional listing in date order. On Monday Braintree & District Amateur Radio Society has its 70cm net. For more information contact John, M5AJB, on 01787 460 947.

On Monday East Kent Radio Society is closed. Details from Karl Davies, M1DFM, on 01227 710 120.

On Tuesday Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday Dorking & District Radio Society is having a talk by Peter Hart, G3SJX, on receiver architectures and assessing their performance. Contact Garth, G3NPC, on 01737 359 472.

On Tuesday Harwell Amateur Radio Society is having a shack activity night. Details from Malcolm, G8NRP, on 01235 524 844.

On Wednesday Fareham and District Amateur Radio Club is having a grand junk sale from 8pm. More information is on the web at www.fareham-darc.co.uk/index.htm.

On Wednesday Farnborough & District Radio Society is having a talk by Chris G0FDZ on the history, construction, purpose, trial and tribulations of the 2m beacon GB3VHF at Wrotham, Kent. Contact Neville, G3SPD, on 01252 404 816.

On Wednesday Newbury & District Amateur Radio Society is having a talk by Tony, G4LDL on the real story of T32C. Contact Rob, G4LMW, on 01635 862 737.

On Wednesday Norfolk Amateur Radio Club is having a talk by Steve Nichols, G0KYA, on living radio history in California. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday Worthing & District Amateur Radio Club is having part 2 of the talk on Linux and amateur radio by Gerry, M3ORE. Contact John, G8FMJ, on 01273 593 232.

On Thursday Bittern DX Group Club is meeting at Pinewood Park Leisure Club. Details from Linda, G0AJJ, on 01692 404 154.

On Thursday Edgware & District Radio Society is having a Morse key evening. More information from Mike, G4RNW, on 02089 500 658.

On Thursday Havering & District Amateur Radio Club is having a talk on Logbook Of The World by Dave, M0TAZ. More information from John, M0UKD,

on 07890 222 111.

On Thursday Reading & District Amateur Radio Club is holding its autumn junk sale. Details from Pete, G8FRC, on 01189 695 697.

On Thursday Shefford & District Amateur Radio Society is having a talk on propagation by a member of the RSGB team. Details from John Burnett, M6JBU, on 07860 804 793.

On Thursday Vange Amateur Radio Society is having a natter night. Contact Steve, G0KVZ, on 01268 552 606.

On Thursday Worthing & District Amateur Radio Club is taking part in the 80m CW Sprint contest. Contact John, G8FMJ, on 01273 593 232.

On Friday Cambridge & District Amateur Radio Club is having a talk on UHF aerials by Arthur, G3BMI. Contact Ron, G3KBR, on 01223 501 712.

Copyright © RSGB 2012. Not for public release before Monday 22 October 2012 except as a GB2RS broadcast. On Friday Itchen Valley Amateur Radio Club is looking at the RTL-SDR with Brian, G0UKB. Details from Liz, M0ACL, on 02380 254 599.

On Friday Mid-Sussex Amateur Radio Society is holding its autumn fox hunt. Cyprus Hall is closed. Contact Rob, 2E0RJA, on 01444 232 129.

On Friday Wimbledon & District Amateur Radio Society is holding its AGM. Contact Andrew Maish, G4ADM, on 02083 353 434.

On Saturday Kent Weald Radio Club is holding a club meeting. Contact Patrick, G0UXG, by email to palybl@btinternet.com.

On Saturday Shefford & District Amateur Radio Society is taking part in the CQWW Contest from Barry's field. Details from John Burnett, M6JBU, on 07860 804 793.

NEWS FOR THE SOUTH WEST Exeter Amateur Radio Society is having CW practice and operations on Monday from 7pm at the Moose Centre. The 2m net is on Tuesday and the 4m net is on Thursday. Contact Nick, 2E0NRJ, on 01363 775 756.

On Monday Weston Super Mare Radio Society is having a construction evening. Details from Paul, G3SDH, on 01761 221 206.

On Wednesday Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417 048.

On Thursday South Bristol Amateur Radio Club is holding open house and is on the air. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750.

On Friday Poole Radio Society is having an activity night and Intermediate course session. Contact Bill Coombes, G4ERV, by email to

secretary@g4prs.org.uk.

On Friday Torbay Amateur Radio Society is having a visit by Tony Helm with his mobile military radios. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Thursday Aberystwyth & District Amateur Radio Society is having a club night on the air, starting on 145.500MHz then moving to 145.550MHz. Details from Ray, GW7AGG, on 01970 611 853.

Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
15 - 21 October 2012

Solar activity ranged from low to high levels. Activity was low during 15 - 19 October due to mostly low-level C-class flares. The largest flare of this interval was a C7 at 17/0802 UTC from Region 1596 (N07, L=150, class/area Eho/460 on 21 October) which displayed a beta-gamma magnetic configuration during most of its transit. Activity increased to high levels on 20 October due to an impulsive M9 x-ray flare at 20/1814 UTC from Region 1598 (S12, L=113, class/area Dhi/270 on 21 October) as it crossed the east limb. The M9 flare was associated with a Type II radio sweep (estimated shock speed 516 km/s) and a non-Earth-directed coronal mass ejection (CME). Activity decreased to moderate levels on 21 October due to an M1/Sf flare at 21/2003 UTC from Region 1598, which was also associated with a non-Earth-directed CME.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at high levels during most of the period.

Geomagnetic field activity was at unsettled levels early on 15 October, then decreased to quiet levels for the rest of the period.

Forecast of Solar and Geomagnetic Activity
22 October - 17 November 2012

Solar activity is expected to be at low to moderate levels during 22 October - 02 November with M-class flare activity likely from Region 1598. Activity is expected to decrease to low levels during 03 - 17 November. However, there will be a chance for M-class flare activity beginning 15 November as (old) Region 1598 returns to the visible disk.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at mostly high levels during 22 - 24 October. A decrease to normal to moderate flux levels is expected during 25 October - 04 November. An increase to mostly high flux levels is expected during 05 - 17 November.

Geomagnetic field activity is expected to be at quiet to unsettled levels during 22 - 23 October with a slight chance for active levels due to a coronal hole high-speed stream (CH HSS). Quiet levels are expected during 24 October - 07 November. An increase to unsettled levels is expected on 08 November due to a solar sector boundary passage followed by a co-rotating interaction region in advance of a CH HSS. A further increase to active to minor storm levels is expected on 09 November due to the onset of a CH HSS. Activity is expected to decrease to quiet to active levels on 10 November as CH HSS effects subside. A further decrease to quiet levels is expected during 11 - 17 November.

Isabella County Ham Radio Volunteers Wanted to Assist in Crises:

Posted: 21 Oct 2012 05:11 PM PDT
http://www.eham.net/articles/29185

When it comes to emergencies in Isabella County, Marc Griffis is serious and welcomes help from others. Griffis, the county's emergency management directors, has reached out to ham radio operators to assist in some types of crises. Griffis is actively recruiting licensed ham radio operators to help out in a variety of situations including training exercises. Examples of the types of assistance Griffis is referring to include assisting in the coordination of search and rescue perimeters, communications between shelters and situations where other forms of communication have failed.

QRZ Temporarily Shut Down by Amazon Web Services Outage

Posted: 22 Oct 2012 02:04 PM PDT
http://forums.qrz.com/showthread.php?365726-QRZ-Temporarily-Shut-Down-by-Amazon-Web-Services-Outage&goto=newpost

Our cloud services provider, Amazon.com, suffered some kind of big network failure this morning, knocking hundreds of websites offline, including QRZ. The outage lasted about 2.5 hours and it looks like the worst of it may be behind us.

You can read more about it here, at http://techcrunch.com/2012/10/22/aws...ku-still-down/">TechCrunch.com

Meanwhile, it looks like QRZ has returned back to normal and things are running smoothly at this time. We would not be surprised if a few more hiccups take place throughout the day, but for now we'll keep our fingers crossed.

Thanks everyone for your patience.

Special Symposium Visitor Hector Martinez, CO6CBF

Hector Martinez, CO6CBF will travel from Cuba to the AMSAT Symposium in Orlando next week. AMSAT extended an invitation for Hector to attend and to make a presentation. Thanks to the work done by Patrick Stoddard, WD9EWK/VA7EWK, Hector has been able to obtain a visa to come to the United States for the Symposium.

Once the invitation was extended, Hector had to approach both governments and file applications to get a Cuban passport and travel permit and a US visa. All expenses for his trip must be guaranteed by someone outside Cuba. Patrick took on that task personally on behalf of AMSAT, even signing legally-binding documents for the Cuban government to that end. Patrick has covered expenses out of his personal funds since no AMSAT funds are available. Patrick would appreciate donations to cover the expenses via his callbook address.

AMSAT looks forward to welcoming Hector, CO6CBF at the Symposium!

[ANS thanks Patrick Stoddard, WD9EWK/VA7EWK and the 2012 Symposium Committee for the above information]

2012 AMSAT Space Symposium Begins This Week in Orlando

This bulletin is a reminder that the time of the 2012 AMSAT SpaceSymposium is quickly approaching. The Symposium will be held on Friday, October 26th through Sunday, October 28th in Orlando, Florida at the Holiday Inn at Orlando-International Airport.

The Symposium weekend will feature:

Space Symposium with Amateur Satellite PresentationsOperating Techniques, News, & Plans from the Amateur Satellite WorldBoard of Directors Meeting open to AMSAT membersMeet Board Members and OfficersAnnual General Membership MeetingAnnual Banquet-Keynote Speaker and Door Prizes

Symposium Registration including Proceedings

Starting September 24, 2012: $ 50.00At the Door: $ 55.00Saturday Evening Banquet $ 45.00Sunday Morning Area Coordinators' Breakfast $ 15.00Sunday Trip to the Orlando Science Museum - the preregistration for the Star Wars Exhibit has closed; however, access to the rest of the exhibits remains available. Refer to the Museum link on the Symposium Schedule page for tour details.Monday (Oct 29) bus trip to KSC and entrance ticket $ 100.00

Visit the AMSAT Web Store to complete your on-line registration. Downloadable paper registration forms in MS-Word format and PDF format are available on the 2012 Symposium page.

The hotel offers free Internet connection and free airport shuttle. When you arrive at the Orlando Airport call 407-709-5310 to request the shuttle. The Orlando International Airport (MCO) is the closest to the Symposium and is served by most major air carriers. The hotel address is: 5750 T.G. Lee Blvd - Orlando, FL 32822. A map link is included on the hotel web page.

Dr. Samuel T. Durrance, NASA Astronaut at the Saturday Evening Banquet

The featured speaker for the AMSAT 2012 Saturday Evening Banquet on October 27 will be Dr. Samuel T. Durrance, NASA Astronaut/Payload Specialist and Professor of Physics and Space Sciences at the Florda Institute of Technology.

Visit the 2012 AMSAT Symposium Schedule page for a complete listing of events.

[ANS thanks the 2012 Symposium Committee for the above information]

Symposium Speaker and Presentation List is Taking Shape

The Symposium Team is working on finalizing the presentations which are slated to begin at 1:00PM on Friday afternoon, October 26 and run through Saturday, October 27 at 3:00PM.

You will hear from AMSAT's experts on topics including:

Successful ARISS Contacts With Youth

Luxembourg

Students from St. George's International School in Luxembourg participated in a Q&A session with Sunita Williams, KD5PLB on Monday, October 8 via an Amateur Radio on the International Space Station (ARISS) contact.

The radio connection was handled by telebridge station W6SRJ in California. Approximately 700 students, teachers and guests were in attendance - 200 in the gym watched live and another 500 in classrooms watched a "live stream" of the contact.

The audience included several VIPs: the UK Ambassador Alice Walpole, the Head Teacher Heather Duxbury and the Deputy Head Teachers (Kath Griffiths and Mark Stenton) of both primary and secondary sections. Guest speakers gave talks on satellites as well as the NASA "Moon Buggie" project. The contact was one of the educational activities

the students from both sections took part in to learn about electricity, astronomy and physics.

Italy

On Tuesday, October 9, Liceo Statale Adelaide Cairoli in Pavia, Italy took part in its Amateur Radio on the International Space Station (ARISS) contact via station W6SRJ in California. On-orbit astronaut Sunita Williams, KD5PLB, was able to answer 18 questions during the contact as nearly 1100 students gathered for the event.

The school uses amateur radio as a teaching tool and its radio club provides students the opportunity to speak with other amateurs all over the world using different languages. This ARISS contact was used to focus on technology, science and foreign languages. The video may be viewed here: http://livestre.am/4aJ08

Successful PACIFICON ISS contact

An Amateur Radio on the International Space Station (ARISS) contact was held with youth attending the American Radio Relay League (ARRL) Pacific Division annual convention, PACIFICON in Santa Clara, California on Saturday, October 13.

Telebridge station IK1SLD in Italy provided the radio connection.

Astronaut Akihiko Hoshide, KE5DNI, on the ISS participated in the contact which was the featured event of the PACIFICON Youth Program that emphasized hands-on radio operation, electronics kit building, orbital mathematics and CubeSat satellite design, among other STEM activities.

Fellow astronaut Dr. Lee Morin gave a presentation at the event and exchanged greetings with Hoshide at the end of the ISS pass.

An audience of approximately 150 was present for the contact; 2500 attended the convention.

AO-27 Recovery Work Still in Progress

AO-27 Command Station Michael Wyrick, N3UC reported on the team's to recover the satellite and return its FM repeater back to service after it stopped responding on October 5.

The next day AO-27 was restored back to running on its primary Bootloader. Control operators were able to turn on the Transmitter for a short time. The command team downloaded the memory dump between October 8-12 to try to determine the cause of the failure. This was slowed due to interference.

On October 14 the command team recovered from the AFSK modem problem which was one of the initial symptoms of the problems. They were ableto upload the entire kernel. As of October 15 they finished uploading the high level code to AO-27. The TOPR schedule will be on digital for the entire pass until the command team collects enough telemetry and finishes the on-orbit checkout.

AO-27 crashed once again on October 16. The command team once again recovered to the bootloader state, recovered from another occurrence of the AFSK modem problem and once again is attempting another software upload.

ATTENTION OPERATORS: To prevent interfering with the command team's recovery efforts, if you can't hear AO-27 in Analog mode, please don't transmit to it.

The latest AO-27 news is posted on its webpage:

JA0CAW Receives 5840.0 MHz Downlink From FITSAT-1

Tetsurou Satou, JA0CAW, successfully received the 5840.0 MHz downlink from FITSAT-1 while it orbited over Japan. FITSAT-1, was oneof five CubeSats deployed from the International Space Station on October 4.

He used a 38cm dish with a down-converter to an IF of 1284 MHz, a BGA2717 LNA and the AMSAT-UK FUNCube Dongle SDR with HDSDR software.

Visit the AMSAT-UK web to view a video and photos of the JA0CAW station.

CAMSAT Announces New Details of CAS-2 Amateur Satellite Mission

First announced at the Friedrichshafen Ham Radio 2012 event, the Chinese Amateur Satellite Group (CAMSAT) has made additional information available on the new CAS-2 satellite under development. The latest news has been posted by AMSAT-UK.

CAMSAT is building two micro-satellites CAS-2A1 and CAS-2A2 to be combined into a binary star system for amateur radio communication and education.

There will be a radio link between two satellites when the satellites are in suitable positions in their orbits, so that the amateur radio communication coverage can be extended. Both spacecraft are 25kg 270x270x250mm and are planning to launch from Taiyuan into a sun synchronous, 1000km apogee, 99.5 degree orbit.

Missions of CAS-2A1 satellite:

145 MHz CW telemetry beacon 100mW145 MHz AX.25 digital telemetry beacon 500mW145 MHz FM voice beacon 500mW435/145 MHz mode Linear transponder 50 kHz 500mW1260/2400 MHz Linear transponder 200 kHz 320mW435/145 MHz APRS repeater

Missions of CAS-2A2 satellite:

AMSAT-LU Recovers Stratospheric Balloon

AMSAT-LU launched their LUSEX high altitude balloon from La Pampa, Argentina on May 19, 2012. The payload included a UHF to VHF (4w) subtone activated repeater, APRS lu7aa-11, Robot-36 live SSTV, CW, 40/20m CW tlm beacon and two video cameras. Over 200 stations made contacts through the

repeater during the 4 hour flight that reached 34,000 meters, 111,548 feet.

Initially thought lost during descent the payload was recovered on October 6 from a muddy, flooded and isolated area by 4x4 Adventure Group. Video and sound taken by two on board TV Cameras spanned 6 hours. They can be viewed at: http://tinyurl.com/AMSAT-LU

Details of the LUSEX Experiment, part of Amsat-LU development and field tests of AMSAT Argentina's planned LUSEX satellite are posted at AMSAT Argentina. See http://www.amsat.org.ar/rescate.jpg for additional photos.

Pending approval and flight authorization by Argentina Federal Aviation Authorities AMSAT-LU plans another balloon flight during the November-December timeframe.

AMSAT-UK posted a related story at: http://www.uk.amsat.org/?p=11094 with videos and photos from the flight.

[ANS thanks AMSAT Argentina for the above information]

NASA Announcement of (Suborbital) Flight Opportunities #6 Now Open

While AMSAT generally seeks orbital flight opportunities, this NASA announcement for access to flights on parabolic flights, suborbital Reusable Launch Vehicles (sRLV), and high-altitude balloons may be of interest to our allied university groups.

The National Aeronautics and Space Administration (NASA) Dryden Flight Research Center has released a solicitation entitled "NASA Announcement of Flight Opportunities (AFO) for Payloads Maturing Crosscutting Technologies that Advance Multiple Future Space Missions to Flight Readiness Status."

These NASA flight opportunities are for payloads that seek to gather information required for the design, development and refinement of new technologies. For instance, such information could concern how certain fluids phenomena behave, how thermal transport changes, or how human physiology is altered under microgravity.

The full document and program details are posted on NASA's NSPIRES (NASA Solicitation and Proposal Integrated Proposal and Review System; and then select the "Announcement of Flight Opportunities (AFO) - #6" link.

Applications are due on or before 11:59 PM Eastern Time December 21, 2012, and selections will be announced in a target timeframe of February 2013.

[ANS thanks NASA for the above information]

NASA History Program Office Spring and Summer 2013 Internships

The NASA History Program Office is seeking undergraduate and graduate students for spring and summer 2013 internships. The History Program Office maintains archival materials to answer research questions from NASA personnel, journalists, scholars, students at all levels and others from around the world. The division also edits and

publishes several books and monographs each year. It maintains a large number of websites on NASA history.

Students of all majors are welcome to apply. While detailed prior knowledge of the aeronautics and space fields is not necessary, a keen interest and some basic familiarity with these topics are needed. Strong research, writing and editing skills are essential. Experience with computers, especially hypertext markup language, or HTML, formatting, is a plus.

Intern projects are flexible. Typical projects include handling a variety of information requests, editing historical manuscripts, doing research and writing biographical sketches, updating and creating websites, and identifying and captioning photos.

Applications for spring 2013 internships are due Oct. 30, 2012. Summer 2013 internship applications are due Feb. 4, 2013.

For more information, visit http://history.nasa.gov/interncall.htm.

If you have questions about this opportunity, please contact Bill Barry at bill.barry@nasa.gov.

[ANS thanks NASA Education Express Message -- Oct. 18, 2012 for the above information]

Iran Capable of Launching Satellites Weighing Below 10kg

An article appearing on SpaceDaily.com says that, "MICROSAT BLITZ Iran capable of launching nano-satellites weighing below 10 kg: official", by Staff Writers Tehran (XNA) Oct 19, 2012

Source: http://tinyurl.com/SpaceDaily-Iran (SpaceDaily.com)

Iran Space Agency (ISA) Director Hamid Fazeli said the Islamic republic has the capability to launch nano-satellites weighing below 10 kg into space, Tehran Times daily reported Thursday.

Some of Asian countries and an Austrian university have announced readiness to set their satellites into orbit using Iranian space shuttles, Fazeli was quoted as saying.

He said Iran is among a handful of countries in the world that are capable of developing satellite-related technologies.

In February, Iran launched an observation satellite into orbit. The spacecraft, named Navid (Herald), weighed 50 kg and could take pictures in low attitudes of about 250 km to 375 km from the earth.

Iran, a founding member of the United Nations Committee on the Peaceful Uses of Outer Space, launched its first domestically-made data-processing satellite, the Omid (Hope), into space in 2009.

An echolink connection is available on the N2EYH-L node. More information at: http://www.hvsatcom.org. (Stu, WA2BSS)

[ANS thanks everyone for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled

in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information. And with that, please keep in mind the tale of the ham who went to his dentist to see why his dentures kept decaying rapidly. The dentist looked at the hams's dentures and remarked, "This is very odd. They look like something's been eating them. Is there anything different that you've been eating lately?" The ham said, "Well, my wife has been making a lot of eggs Benedict recently with hollandaise sauce." "Ah!" exclaimed the dentist, "That's it. I know just what you need. I'm going to order you some new dentures with plates made out of chrome." "Chrome?" exclaimed the ham incredulously, "Why Chrome?" The dentist replied, "Because, there's no plates like chrome for the hollandaise."

Air Jamboree:

Posted: 22 Oct 2012 06:51 PM PDT
http://www.eham.net/articles/29188

MAYVILLE - The exciting world of ham radio has cut through the static to reach a new generation. Rob Miles is an ordinary 9-year-old boy with an atypical hobby. He is a FCC-licensed ham radio operator, the result of passing a test at the age of 8. "I first got pulled into the world of radio when my dad's friends held a 'Ham In A Day' event," said Rob, who is also a Boy Scout. "I decided that being able to talk on the radio would be a fun thing to do. I took one test and failed. I took another test and failed. I took a third test, and because three is the lucky number, I actually got (my license). What I love about ham radio is that setting it up can be very elaborate or as simple as threading a wire through a pole and hanging it on a tree."

//
Lantern Tours Historically Good Fun:

Posted: 22 Oct 2012 06:50 PM PDT
http://www.eham.net/articles/29187

The Grande Prairie Museum was born for this: A lantern-lit evening of guests journeying back through time through its many outposts. On its second and final night of its fifteenth year, the museum welcomed 50 visitors to supper, tour and dessert, at Saturday's historically-based Lantern Tours. Guided by the capable staff and volunteers at the museum, by the students of the Grande Prairie Composite High School Warrior Drama club, and by special guests, visitors toured six of the museum's many possible outposts, stopping at each for a ten minute activity. At the Pipestone Creek Store re-enactment, Selina Kingsford (played by Composite High School student Sarah Alemu) chatted to bickering sisters Mary-Lou and Jessa Kohlman (played by McKenzie Bond and Marcie Ticheler) about their love lives as they purchased groceries. "I love seeing all the people. There's a great variety that come through, from old to young," said Alemu. "It's so interesting to see the different reactions to the demonstration." The students noted that the lantern tours emphasize the importance of history, and appreciated that the event gave them a chance to get outside of school - although the night's biting cold was a sore point. In the Heritage Barn, surrounded by model farm animals and one unreasonably large white horse, Amy Muise of Northern Rhythms got guests warmed up with

a drum circle that started with a 5,000 year-old rhythm, and ended with lots of cheerful improv. And at the Memorial Ham Shack VE6GPM, Don Allen, member of the Peace Country Amateur Radio Club, explained that innovations made by amateur radio operators were integral to how we're able to communicate today. The club still holds several dozen members, who meet Sundays at the Army Navy Air Force Veterans Club. The radio station at the museum is in true working order, and Allen picked up a few distant signals during the tours. "Amateur radio is a wonderful hobby, and very enjoyable. You can talk to people all over the world," said Allen. "Once you get started, the world is yours."

A New Set of Solar Fireworks:

Posted: 22 Oct 2012 06:48 PM PDT
http://www.eham.net/articles/29186

The sun emitted a significant solar flare, peaking at 2:14 p.m. EDT on Oct. 20, 2012. This flare is classified as an M9 flare. M-class flares are the weakest flares that can still cause some space weather effects near Earth. Since flares are rated on a scale from 1 to 10, an M9 is a particularly strong M class flare, but still ten times weaker than the most powerful flares, which are labeled X-class.

The ARRL Contest Update

Published by the American Radio Relay League
****************************************

October 24, 2012

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- CQ World Wide or ARRL Sweepstakes? Yes!
- Time for a Libration? ARRL EME
- Lunar-Link Lives
- Clash of the Titans
- Keep Those Cards and Letters Coming
- Make Space for Plaques
- Seat of Consciousness
- Hackerspace SDRs
- Revisiting the Edge

NEW HF OPERATORS - THINGS TO DO

No question about it - you've been practicing for a while and you have
gotten pretty savvy about operating in HF contests. Now the Big Show is
starting! This weekend is the CQ WW SSB contest - arguably the biggest
radio contest of all. The ARRL CW Sweepstakes runs the following
weekend - the oldest domestic contest. Those will limber you up for
Sweepstakes Phone and CQ WW CW later in the month!

BULLETINS

November is a busy, busy contest month. With the new, improved, shorter
log submission periods, it will be easy to overlook sending in a log.
Make sure you submit your log before the next contest rolls around!

Don't forget about the new Ontario sections (ONE, ONN, ONS, and GTA) in
November's ARRL Sweepstakes that raise the Clean Sweep bar to 83.

The W1AW 160 meter signal has been off the air recently due to antenna
damage but is due to be restored shortly when a contractor replaces the
antenna on the 24th of October. (Thanks, Don WD8DSB and W1AW Chief
Operator, Joe NJ1Q)

BUSTED QSOS
```

Ed W0YK is the Director of CQ WW RTTY and CQ WPX RTTY contests. K5ZD manages only the CQ WW DX contests - CW and SSB. (Thanks, Doug KR2Q)

The Cheesebits article referenced in the previous issue was authored by W3CMP, not W3CMF. (Thanks, Phil K3TUF)

The ballpoint pen invented for NASA was the Fisher space pen that was specially pressurized to work in zero gravity. (Thanks, Walt N2IK)

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Oct 27-28

- SKCC Weekday Sprint--CW (Oct 24)
- CQ World Wide SSB Contest
- SNS and NS Weekly Sprints--CW, Digital, (Nov 2)

Nov 3-4

- ARRL EME Contest
- ARRL November Sweepstakes--CW
- IBM QSO Party
- Ukranian DX Contest
- Radio Club of America QSO Party--Phone
- Collegiate ARC Championship--CW
- DARC 10-Meter Digital "Corona"
- OK1WC Memorial Contest (Nov 5)
- ARS Spartan Sprint--CW (Nov 6)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

VHF+ contesters will be glad to know that the Lunar-Link <http://www.lunarlink.com/> amplifier business has been acquired from the estate of the late Steve Powlishen K1FO. According to Steve Simons W1SMS <w1sms@manitousys.com>, the business will immediately be known as "Lunar-Link International" and will offer the same high quality legal limit output VHF / UHF linear amplifiers, accessories, technical support, repairs and, replacement parts as in the past. Steve's partner, Lou Parascondola W1QJ states that new product orders are now being accepted for delivery starting in the first quarter of 2013.

Are you ready for the CQ World Wide Contest <http://www.cqww.com/>? Part of getting ready is to read the rules and there are some new rules <http://cqww.com/rules_2012changes.htm> this year. All online records and scores have been updated, too. You can now submit your CQWW log on via a web site <http://cqww.com/logcheck> with instant feedback on any formatting errors. There's a blog for late-breaking announcements, too. (Thanks, CQ WW Director, Randy K5ZD)

Another part of getting ready is to be sure you have the current data files that help your logging software tell who's who and where they are. Jim AD1C has updated the CTY files <http://www.country-files.com/cty/> as of 22 October. These files

contain information thatprefix (and sometimes call sign) to zone and other data. There are links to popular logging software at the top of the home page. Another popular software tool is known as "Super Check Partial" or SCP and new databases <http://www.supercheckpartial.com/> of calls for both CW/Phone and Digital contesting are now available from Bob WA1Z. More than 44,000 calls are contained in the CW/Phone file and nearly 12,000 for digital! Another update will be released prior to the CW weekend of CQ World Wide at the end of November.

Contest rental stations have been available for years and years - every type of station from primitive cabins to fully-featured turn-key stations. Remote Ham Radio <http://www.remotehamradio.com/> is now making the same access available over the Internet on a subscription basis. Whenever you are operating remote, remember to abide by all of the rules and regulations in the country from which the transmitter operates, along with any rules about remote operation for the contest you choose to enter. (Thanks, Jim N7US)

Here's one way to keep from moving your hands off the keyboard while operating - change your hands into a keyboard! <http://www.designnews.com/author.asp?section_id=1362&doc_id=249848&cid=NL_Newsletters+-+DN+Daily&dfpPParams=htid_66,bid_30,aid_249848&dfpLayout=blog>

The real-time score reporting sites, Getscores <http://getscores.org> and the Online Contest Score Server <http://cqcontest.ru/> (a.k.a. cqcontest.ru) are attracting more participants every weekend. Using these sites to watch the changing scores of other stations facilitates challenges, local competition, "contests within a contest", and can be a powerful motivator to maximize the all-important BIC (Butt In Chair) metric! The Online Contest Score Server was also used officially for real-time scoring in this year's Scandinavian Activity Contest's "National Team Contesting Trial <http://www.sactest.net/blog/sac-2012-national-team-contesting-trial/>". In addition to the scores, the site has the ability to embed audio and video streams from the stations. (Thanks, Kim OH6KZP and others)

>From the ARRL Propagation Bulletin by Tad K7RA, we learn that the NASA solar cycle prediction <http://solarscience.msfc.nasa.gov/predict.shtml> has been revised slightly since last month. You may recall that the predicted peak was moved recently from Spring to Fall 2013, and now the predicted peak has gone down one point, from a smoothed sunspot number of 76 to 75.

Web Site of the Week - We take it for granted these days that power from the utility grid is ac. It wasn't always so and you can find out more about the clash of the titans <http://www.edn.com/design/analog/4398453/War-of-currents--Tesla-vs-Edison?cid=EDNToday> - Tesla and Edison - that determined whether dc or ac would eventually prevail.

WORD TO THE WISE

The time to update your logging software is today...NOT FRIDAY AFTERNOON BEFORE THE CONTEST!

==> SIGHTS AND SOUNDS

Before you get too wrapped up in preparations for the upcoming contests, why not take a few minutes to send a photo and story to the sponsor of your last contest? CQ WW RTTY Director, Ed W0YK <w0yk@cqww.com> encourages you to send photos and stories about your operation. Writeup authors are always looking for material!

The webinar <http://wwrof.org/webinars/webinar/> hosted by new CQ World Wide Director, Randy K5ZD was recorded and can be viewed online. Randy's PowerPoint slides <http://www.cqww.com/images/CQ_WW_webinar_2012_web_version.pdf> have also been posted for you to download and view. Hey, I think this Internet thing may be catching on... (Thanks, Ken K4ZW)

How about a little "wayback machine"with this 20-minute professional WRTC video <https://docs.google.com/file/d/0BwHFMr_kRaifQV95SHhNQ1Nramc/edit?pli=1> from 1990 in Seattle? Thanks to Stu N7ZZ for converting it to digital for us to enjoy. (Thanks, Danny K7SS)

==> RESULTS AND RECORDS

Watch for the mail carrier - 2011 Sweepstakes plaques have been shipped out and will be arriving in time to put them up in the shack before the contest! (Thanks, ARRL Contest Branch Manager, Sean KX9X)

August NAQP CW preliminary results are <http://www.ncjweb.com/naqpcwprelim.php> now online. (Thanks, NAQP CW Manager, Chris KL9A)

The results for the Stew Perry Warmup <http://www.kkn.net/stew/> are now posted even though the contest ended Sunday! As more logs come in - the results will be updated. (Thanks, Tree N6TR)

Official results for the 2012 EU HF Championship <http://lea.hamradio.si/scc/euhf/euhfc.htm> are now ready on the Slovenian Contest Club website having been verified by the SCC Contest Committee. All UBN reports are publicly available as usual, too. Everyone can print their own certificate online directly from the results. (Thanks, SCC Contest Manager, Robert, S57AW)

IOTA Contest Manager, Don G3XTT writes, "Provisional results for the 2012 IOTA Contest were made available last week, and all entrants should have received an email from the robot with a link to the results and to their personal UBN. If you entered and have not received this information, please email me <iotacontest@rsgbcc.org> as soon as possible. We are allowing a short time for appeals and will go "final" with the results (including making the URL available to everyone) probably in mid-November."

OPERATING TIP

CQ WW RTTY Director, Ed W0YK, shares the log submission issues experienced by all contest sponsors. "It is apparent that many people do not read the robot email reply they receive. At the bottom of that email, the robot lists the format errors in the log. If you don't understand what the robot is telling you, then simply compare that specific QSO line with the format specified on the Logs web page. The problem should be obvious.

"Major logging programs like Win-Test, N1MM Logger and WriteLog all create compliant Cabrillo files ... IF you enter your data correctly. For example, if you enter your sent exchange as 'CA 03' in N1MM Logger (which is backwards from the required order for CQ WW RTTY), it will come out in that (incorrect) order in the Cabrillo file.

"You can easily edit your Cabrillo file with a text editor. Since is it common to add, change or move the same parameter field in every QSO line, a column editor is invaluable. I recommend the freeware Crimson Editor <http://www.crimsoneditor.com/>."

So read that robot message! If it tells you there is something wrong with your log - do something about it and resubmit it. Double- and triple-check your operating category and all of the information for your station. Once you have a happy robot and you are a happy log submitter - save the confirming message in an easy-to-find location. My email software has a folder named "Contest Log Submissions" for all of my log submission confirmation messages. It's easy and helps avoid the dreaded "forgot to send in my log" disease.

==> TECHNICAL TOPICS AND INFORMATION

We spend hours and hours (and hours) driving our cars - almost as many as we spend driving our radios. Those seats are pretty comfy - maybe some spare seats could be converted <http://www.instructables.com/id/How-to-Turn-Junker-Car-Seats-into-Beautiful-Office/> into a good shack chair with some adjustment of the table height and equipment placement. Maybe you could replace the tuning knob with a steering wheel?

Episode #42 of Chat With The Designers is about Homebrewing VHF/UHF Antennas illustrates examples of antennas for getting on 6m, 2m and 70cm (440 MHz). Get ready for the ARRL's January VHF+ Contest now! The "whiteboard material <http://dl.dropbox.com/u/43021514/CWTD/Oct16.html>" is online and you can watch live and archived presentations <http://dl.dropbox.com/u/43021514/CWTD/TeamspeakInstructions.html>, too. (Thanks, George N2APB and Joe N2CX)

When you need a little more "oomph" for a heavy job, Dan K0DAN suggests, "Another improvised 'leverage amplifier' is a large tire iron used to mount/unmount truck tires...about 5' long made of really hard 3/4" steel. It does NOT bend, and has a nice tapered lip on it for where it's supposed to pry the tire rubber on/off the wheel rim." Woof!

Switchmode power supplies are not the mysterious beasties we may think - with the right design tools, building them is easy. Try the Texas Instrument's "Simple Switchers <http://www.ti.com/ww/en/simple_switcher_dc_dc_converters/index.html>" web site for an example. A good project is building a little dc-to-dc converter to change 12 V into the 28 V needed to operate surplus aircraft relays. Don't forget the input and output filtering!

Making a PC board for power distribution looks simple but how do you know if the traces are wide and heavy enough for the load? It's pretty easy to tell when they weren't by using your olfactory senses. Here's an online calculator <http://www.desmith.net/NMdS/Electronics/TraceWidth.html> for safe PC board current that goes up to 35 A and will help minimize the chance of you saying, "Something smells hot..."

At a recent special event station setup, KL7VIC installed a hinge assembly that allows installation of a Yagi at ground level on a tilted-over tower without bending the elements. The assembly consists of two steel plates connected together with high-quality barn door hinges (see photo at right). Plate A is attached directly to the mast that is mounted in the rotator. Plate B is attached to Plate A with hinges, free to hang perpendicularly to Plate A when the tower is horizontal as in the photo. A short stub mast installed on plate B holds the Yagi boom by its normal boom-to-mast mount. While the tower is raised from horizontal the Yagi elements stay level all the way up as Plate B folds toward Plate A and the main mast. (Thanks, Rich KL7RA)

Technical Web Site of the Week - Software-defined radio is rapidly approaching a tipping point where it becomes so affordable it will start crowding out traditional radio architectures. For example, this Slashdot <http://slashdot.org/story/12/10/22/0518231> story notes that at the ToorCon hacker conference in San Diego, Michael Ossmann of Great Scott Gadgets revealed a beta version of the HackRF Jawbreaker <http://www.forbes.com/sites/andygreenberg/2012/10/19/darpa-funded-radio-hackrf-aims-to-be-a-300-wireless-swiss-army-knife-for-hackers/>,
It can both read and transmit signals from 100 MHz to 6 GHz. At Ossmann's target price of $300, the versatile, open-source devices would cost less than half as much as currently existing software-defined radios with the same capabilities. The Defense Advanced Research Projects Agency (DARPA) pitched in $200,000 last February as part of its Cyber Fast Track program.

==> CONVERSATION

Living On the Edge

(This item was originally published in the 27 Oct 2010 issue, just before CQ WW SSB, and its message is just as important today - do you know where your sidebands are?)

With this weekend's CQ World Wide SSB Contest coming up and the 40 meter band allocations having evolved rapidly over the past few years,

it's worth taking a few minutes to review some do's and don'ts, particularly for US operators.

First, the lower edge of the US phone band is 7.125 MHz - not 7.100 MHz. The requirement is for you to keep your signal above 7.125 - all of it. If you are using LSB, the frequency display of your radio shows the carrier frequency and that has to be high enough to keep the sidebands of your signal inside the phone band. What does that mean? According to the FCC in Part 97.3a, everything stronger than 26 dB below the mean power of the signal counts as the signal's bandwidth.

Without getting into a huge derivation of carrier suppression and the effects on bandwidth of audio and RF compression and distortion, let's just say that you should tune no lower than 7.1275 or 7.128 MHz to be sure of "coloring inside the lines." I'm sure some enterprising contest station outside the US will set up shop with a carrier frequency of 7.125 MHz, but just don't call them. If you have a connection to the spotting network, you can always post a spot that says, "XY0ZZ 7.125 Not Legal for US Phone Band" and perhaps they (and those calling) will see it and move.

A similar problem over the past couple of years has been stations at the top end of 20 meters with their USB carrier frequency above 14.3475 - you're out of the band, folks! Again, just don't call them - these are not the usual frequencies for rare stations.

Another "gotcha" is caused by jumping to that freshly posted spot and giving your call without looking closely at the frequency. DX stations can operate well below 7.125 MHz, 14.150 MHz, and 21.200 MHz - don't call them there! In every contest, you can hear a steady stream of US stations well outside the US band who should know better. If you can program your radios not to transmit outside the US segments or set up your spotting network filters or logging program not to tempt you with out-of-band spots, do so. That way, in the heat of battle, you won't make a mistake. Or be tempted to "make a mistake."

Finally, before sending in your log - make sure it states the right category for your entry. If you receive ANY spots from the spotting networks by any means, you must enter in the Single-Operator, Assisted category (SOA). (This is the Unlimited category in most ARRL contests.) Most logging programs now automatically connect to the Internet and then to a spotting network, so you have to disable that feature if you are going to enter the unassisted Single-Operator category. The current versions of N1MM logging software now assume a default of SOA for Single-Op entrants, so be sure and check when you set up the software.

As you get ready for radiosport's Big One, remember to play nice. Have fun, definitely, but be sure to set good examples for good operating and clean signals. The world does listen - especially when you're living on the edge!

73, Ward N0AX

==> CONTESTS

24 October - 6 November 2012

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL November Sweepstakes--CW, from Nov 3, 2100Z to Nov 5, 0300Z. Bands (MHz): 1.8-28. Exchange: Serial, category, call, check, ARRL/RAC sec. Logs due: Nov 20. Rules <http://www.arrl.org/contests>

SKCC Weekday Sprint--CW, from Oct 24, 0000Z to Oct 24, 0200Z. Monthly on the fourth Tuesday local time. Bands (MHz): 1.8-28, 50. Exchange: RST, S/P/C, name, SKCC number. Logs due: 2 days. Rules <http://www.skccgroup.com/>

CQ World Wide SSB Contest--Phone, from Oct 27, 0000Z to Oct 28, 2359Z. Bands (MHz): 1.8-28. Exchange: RS and CQ zone. Logs due: 5 days. Rules <http://cq-amateur-radio.com/>

SNS and NS Weekly Sprints--CW,Digital, from Nov 2, 0200Z to Nov 2, 0300Z. Weekly on Thursday evenings local time. Bands (MHz): 1.8-14. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/>

IBM QSO Party--Phone,CW,Digital, from Nov 3, 0000Z to Nov 3, 2400Z. Bands (MHz): 3.5-28. Exchange: Serial, name, country, continent, and US state. Logs due: 60 days. Rules <http://qsl.net/w0ry/HamRadio/IBMHams/IBMQPRules.htm>

Ukranian DX Contest--Phone,CW, from Nov 3, 1200Z to Nov 4, 1200Z. Bands (MHz): 1.8-28. Exchange: RST and serial or Ukraine oblast. Logs due: 30 days. Rules <http://www.ucc.zp.ua/>

OK1WC Memorial Contest--Phone,CW, from Nov 3, 1600Z to Nov 3, 1659Z. First through fourth Monday of each month; see website for bands. Bands (MHz): 3.5, 50, 144. Exchange: RS(T) and serial. Logs due: 7 days. Rules <http://www.hamradio.cz/ok1wc>

Radio Club of America QSO Party--Phone, from Nov 3, 1700Z to Nov 4, 0500Z. Bands (MHz): 3.5-21. Exchange: RST, QTH, name, equipment. Rules <http://www.radioclubofamerica.org/>

Collegiate ARC Championship--CW, from Nov 3, 2100Z to Nov 5, 0300Z. Bands (MHz): 1.8-28. Exchange: See ARRL Sweepstakes. Logs due: Nov 20. Rules <http://www.collegiatechampionship.org/>

DARC 10-Meter Digital "Corona"--Digital, from Nov 4, 1100Z to Nov 4, 1700Z. Bands (MHz): 28. Exchange: RST and serial. Logs due: 2 weeks. Rules <http://www.darc.de/referate/ukw-funksport>

ARS Spartan Sprint--CW, from Nov 6, 0200Z to Nov 6, 0400Z. Bands (MHz): 3.5-28. Frequencies (MHz): Monthly on the first Monday evening local time. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

VHF+ CONTESTS

ARRL EME Contest--Phone,CW,Digital, from Nov 3, 0000Z to Nov 4, 2359Z. Bands (MHz): 50-1296. Exchange: Call signs, sig rpt, acknowledgement. Logs due: Jan 1. Rules <http://www.arrl.org/contests>

SKCC Weekday Sprint--CW, from Oct 24, 0000Z to Oct 24, 0200Z. Monthly on the fourth Tuesday local time. Bands (MHz): 1.8-28, 50. Exchange: RST, S/P/C, name, SKCC number. Logs due: 2 days. Rules <http://www.skccgroup.com/>

OK1WC Memorial Contest--Phone,CW, from Nov 3, 1600Z to Nov 3, 1659Z. First through fourth Monday of each month; see website for bands. Bands (MHz): 3.5, 50, 144. Exchange: RS(T) and serial. Logs due: 7 days. Rules <http://www.hamradio.cz/ok1wc>

==> LOG DUE DATES

24 October - 6 November 2012

- October 25 - 10-10 Int. 10-10 Day Sprint
<http://www.ten-ten.org/Forms/QSO%20Party%20Rules.pdf>

http://forums.qrz.com/showthread.php?365814-HAM-Days-13&goto=newpost

HAM Days '13 February 23rd 2013 is a full featured HAMFest and Emergency Services Fair sponsored by the Grays Harbor ARC and held in Elma WA.

Besides all new classes, door prize, and expanded swapmeet we have a few new tricks up our sleeve this year:

1) Food Drive (admission is a can of food at the door)

2) Blood Drive come show your spirit by giving your life's blood for HAM Radio

3) Bake Sale to support local HS youth activities.

Come and check out a public service event that actually renders service to the public! We should have at least 2 Boy Scouts getting their Eagle projects and a few HS senior projects as well.

Vendors are welcome--contact Les N7GH at N7GH@ARRL.NET for more info.

SILENT KEY: Bob,VK2ABP, also known as VK0BP and AX0VB from the Davis Base
passed away at the age of only 36 years on Oct 14.
Our condolences and sympathy are with his family and friends.
We do not want to be sad that we lost him, but grateful that we could
get to know him as a radio friend. We will always keep him in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Oct 27/28 CQ WWDX Contest, SSB

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Hurricane Watch Net activates for Sandy

Posted: 23 Oct 2012 12:38 PM PDT
http://forums.qrz.com/showthread.php?365819-Hurricane-Watch-Net-activates-for-Sandy&goto=newpost

The Hurricane Watch Net is being activated for Hurricane Sandy. The net will activate on 14.325 MHz to report observed conditions to the National Hurricane Center. Net operations will begin at 0700 Eastern (1100 UTC) Wednesday, October 24, 2012. Operation on lower frequencies (40 or 80 meters) will be considered depending on propagation during evening and night hours. We will try to monitor Cuban stations, but would appreciate your helping us on 14.325.

Amateur stations in the affected area should be aware of the storm, and be prepared to operate from a place of safety. We will be looking for condition reports from stations in the affected area. We do appreciate the consideration of Amateur Operators in keeping our frequency clear, and listening for possible relays. For information on the storm and the Hurricane Watch Net, go to http://www.hwn.org

//
UK to phase-out IRC's

Posted: 23 Oct 2012 01:03 AM PDT
http://forums.qrz.com/showthread.php?365774-UK-to-phase-out-IRC-s&goto=newpost

Phil, G3SWH, has received the following info from the Royal Mail: "Due to declining international mail volumes and electronic substitution, customer demand for International Reply Coupons has been falling dramatically over the last few years.

"Overall sales of International Reply Coupons have been very low indeed - on average just 4 per annum bought from each Post Office branch. Therefore, it was no longer commercially viable to maintain the sale of coupons and Royal Mail has taken the decision to withdraw them from sale.

"International Reply Coupons have not been withdrawn globally from sale. Under UPU regulations Royal Mail through Post Office Counters is obliged to redeem International Reply Coupons presented having been purchased overseas, but we are not obliged to sell

them. However, I can confirm that customers have up to December 2013 to redeem IRCs."

Phil states, "This seems to be much more in line with the Royal Mail's responsibilities under their UPU membership. Looks like they're safe until 31st December 2013. It may be that the UPU will change their rules after that date (which would be no bad thing IMHO)."

Wattsburg Students Speak with Astronaut in Space:

Posted: 23 Oct 2012 05:30 PM PDT
http://www.eham.net/articles/29195

WATTSBURG -- Astronaut Sunita Williams might have been more than 200 miles away from the surface of the Earth on Friday, but that didn't mean she couldn't answer questions from students at Seneca High School. A dozen Wattsburg Area School District students had the chance to talk directly to Williams for just over 10 minutes Friday through the Amateur Radio on the International Space Station -- or ARISS -- program. The event was organized locally by Paul Semrau, an English and biology teacher at Seneca. The 12 students chosen to ask questions were from Seneca, Wattsburg Area Middle School and Wattsburg Area Elementary Center. Those students were picked from a pool of almost 60 who applied to ask questions based on their questions and a project they completed. Those projects could be essays, collages or some other way of representing why their question was important.

//
Scouts Take To Airwaves to Make Friends, Share Ideas and Learn New Skills:

Posted: 23 Oct 2012 05:29 PM PDT
http://www.eham.net/articles/29194

More than 500,000 young people take part in the event worldwide, which was set up in 1957 to give international Scout groups the chance to get in contact with each other. In the past, local groups had talked to others in countries as far away as Australia, Russia and America, and this year, Scouts found friends in Sweden and Germany within an hour of being on air. Andy Carlile, manager of the Grimsby and Cleethorpes District Scouts Active Support radio scouting team, said: "The event gives Scouts a chance to connect with people from the other side of the world, make friends, share ideas and learn a skill, which is what scouting is all about." Scouts talked on the radio but also transmitted television images and Morse code, as well as learning secret codes and ciphers, how to make an emergency telephone call and sign language.

//
A Radio for All Frequencies to Rule the Airwaves:

Posted: 23 Oct 2012 05:30 PM PDT
http://www.eham.net/articles/29193

Zap-happy channel-surfers could soon control a lot more than cable TV from their remotes. Michael Ossmann, co-founder of Great Scott Gadgets, is developing HackRF, a software-defined radio (SDR) that lets you switch between radio frequencies on the fly. Most wireless gadgets, like the 3G antenna in a phone, operate using a fixed radio frequency band. But. HackRF could potentially receive and transmit any radio frequency from 100 megahertz to 6 gigahertz - a range that includes broadcast and amateur radio, GSM, Bluetooth, Wi-Fi, and remote garage-door openers. Ossmann presented the device at ToorCon in San Diego, California, last weekend.

//
Major Solar Flare Erupts from the Sun:

Posted: 23 Oct 2012 05:29 PM PDT
http://www.eham.net/articles/29192

The sun unleased a powerful solar flare late Monday (Oct. 22), releasing waves of radiation into space that have already caused a short radio blackout on Earth. The flare erupted from the sunspot AR 11598 (short for Active Region 11598), and reached peak brightness at 11:22 p.m. EDT (0322 GMT this morning, Oct. 23), according to scientists working on NASA's Solar Dynamics Observatory (SDO), a space telescope that constantly monitors the sun with high-definition cameras. It ranked as an X1.8 solar flare, one of the strongest types of solar flares, according to the U.S. Space Weather Prediction Center (SWPC) run by NOAA and the National Weather Service. The same sunspot produced three strong flares before this one in just the two days since it became visible from Earth's perspective. "This means more flares are probably in the offing, and they will become increasingly Earth-directed as the sunspot turns toward our planet in the days ahead," astronomer Tony Phillips wrote on Spaceweather.com, a website that tracks skywatching and space weather events. Solar flares are caused when magnetic activity ramps up in certain patches, called sunspots, on the surface of our star. Scientists measure the strength of solar flares in terms of energy classes, with X-class flares the most powerful sun storms. Moderate flares rank as class M storms and can supercharge Earth's northern lights displays when aimed at our planet. Class C solar flares are the weakest of the bunch and have little effect on Earth.

//
Cobb Confident it Could Win Suit Over Radio Tower:

Posted: 23 Oct 2012 05:28 PM PDT
http://www.eham.net/articles/29191

WEST COBB -- Rob Hosack, director of Cobb's community development agency, thinks the county would prevail if a west Cobb amateur radio operator sues to keep his 140-foot tower. "Given that this is a very, very specialized area of the law, we just decided to get a recognized expert to kind of chime in," Hosack said. "We've had three different hits now kind of get together and say 'here's our position,' so if this ends up where I think it's going to end up, I think we're going to be in a good position." Amateur radio operator Ritner Nesbitt, a grandfather of 10 who lives down the road from Dominion Christian Schools, was cited after neighbors

complained about his tower. He applied for a special land use permit, which the county's Planning Commission unanimously recommended denying on Oct. 2. Hosack said Nesbitt would be in the clear if his tower stopped at the county's 70-foot height limit -- "We would just wish him good luck and send him on his way" -- but to have one higher than that requires a special land use permit. Nesbitt, who has spent between $30,000 and $40,000 on the tower, said he'll take the county to court before taking the tower down. The county paid attorney Anthony LePore of CityScape Consultants, Inc. $500 to render an opinion on the matter. LePore concluded that federal regulations "would not preclude Cobb County from processing this application in accordance with its existing wireless communications regulations."

Hurricane Sandy
2012-10-24

Arnie Coro, CO2KK, Area C, Emergency Coordinator IARU Region 2,
reports that Hurricane Sandy is on its way to the Cuban eastern
provinces. He reports this is a very serious menace to eastern Cuba
because of the large amount of rain it is transporting, that will fall
on areas already saturated by heavy rains from a tropical trough.

The Cuba emergency communication nets were activated at 1600 hours
October 24, 2012. We kindly ask you to leave these frequencies clear.

7110 kHz primary

7120 kHz secondary

7045 kHz for Eastern Cuba provinces

3740 kHz primary

3720 kHz secondary

Arnie Coro CO2KK (coro@enet.cu) and Carlos Alberto CO2JC will be
available for any traffic on the national Cuban emergency net frequencies
.

WIANEWS WEEK COMMENCING OCTOBER 28 2012.

Towers and Planning Review

November is busy in VK3.

ITU Needs Girls

ZL9HR

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING OCT 28 2012.

You would probably be aware of the campaign created to get amateur towers,
masts and antennas listed at exempt or complying development in the
NSW Planning Review currently under way.

Roger Harrison VK2ZHR has been contacted by the Sydney Morning Herald
Urban Affairs journalist, Nicole Hasham, and did a telephone interview.

The phone discussion (recorded by her) lasted about 50 minutes and was
quite positive. She wanted to know what amateurs did, what motivated people
to become amateurs and what the issues were with the Planning laws.

Hopefully the story will be out very soon if not already.

Roger will be here on VK1WIA in a few minutes with more on this issue and later in the broadcast today Jason VK2LAW sheds some light on a story dealing with towers in South Africa.

HAMS ACROSS AUSTRALIA.

VK3
web service:- http://www.amateurradio.com.au/news/

November is a busy month of activity in VK3.

Saturday the 10th at 2pm, the inaugural meeting to form a local homebrew construction group will be held, with Rob Whitmore VK3MQ in the chair.

The following Tuesday, November the 13th, is the speaker night. The topic at 8pm is 'Demystify SWR' by Peter Cossins VK3BFG.

The next Foundation Licence training and assessment weekend in on November the 17th and 18th.

The home-brew meeting, speaker night and classes are all at the Amateur Radio Victoria office, 40G Victory Boulevard, Ashburton.

And November the 16th to the 18th is a special activation period for the Keith Roget Memorial National Parks Award - check out the website under Awards for the latest Master List.

Miena Hamfest

As heard last week, Saturday the first of December 2012 is when the big biennial VK7 HamFest happens in the Central Highlands of Tasmania thanks to the Central Highlands Amateur Radio Club of Tasmania.

They even have David Long from the ACMA making the trip up to Miena and demonstrating what the ACMA is all about.

If any club or individual would like a display table could they please contact Dave VK7OB on 0429123080.

(Dave, VK7OB)

North West Tasmanian Amateur TV Group (NWT-ATVG)
http://www.vk7ax.id.au/atvgroup/

Amateur Radio Assessments and training

Persons in the N/West Area of VK7 interested in Training and Assessments for all classes of Amateur Radio Licenses are advised that the Club can provide these requirements and much more.

(Tony 7ax)

Northern Tasmanian Amateur Radio Club
www.ntarc.net

November General Meeting

Block B, Skills Institute, Alanvale Campus on the evening of November 14. This one will be a little different though, as it will likely take the form of a working tea, during which there will be a brief club business session.

That will be followed by a guest speaker, David Murray from Centerlink, who will bring all up to speed on current changes to benefits and the like.

Are you and your partner already Centerlink clients but wondering what all the carbon tax compensation really meant? Maybe you are about to retire, become redundant or, heaven forbid, undergo some other life changing event? If so, or even if just idly curious, why not go along and have all your questions answered.

Even if the answers prove less favourable than you hope, you will at least go home well fed!

WIA BOARD TALK

The WIA gives Australian radio amateurs and electronics enthusiasts access to an extensive range of locally and internationally sourced publications including those from the ARRL and the RSGB.

Our bookshop is designed to provide you with a simple and secure way to purchase the latest amateur radio books and publications online. We use a secure commercial e-commerce gateway for all credit card transactions and delivery to your door is provided by Australia Post.

Purchasing the latest in amateur radio publications is both secure and easy.

We hold a wide range of the most popular publications suitable for those starting out in the hobby as well as books popular with the more experienced hobbyists.

If there is a particular publication that you are trying to locate that is not listed in our online catalogue, then we would be more than happy to help you. Please send an email with the details of the book you are looking for to bookshop@wia.org.au

Both WIA members and non-members are able to purchase from the WIA online bookshop, however the bookshop provides significant discounts to members of the Wireless Institute of Australia.

>From time to time we do run specials on some publications, so keep an eye on your Amateur Radio magazine each month for details.

This is Mal VK3FDSL for the WIA Bookshop

ANTENNA MASTS AND NSW PLANNING LAW REFORM

This is Roger Harrison VK2ZRH.

New South Wales amateurs will recall that, since October last year, the New South Wales Government has been conducting comprehensive reform to the planning laws.

As this is the first review of the State's planning laws for more than 30 years, a GOLDEN OPPORTUNITY was presented to get some consideration for Amateur Radio antenna masts.

You will remember that we called for NSW amateurs to make submissions to the planning review last year.

The NSW amateur fraternity responded magnificently with a barrage of submissions, wanting Amateur Radio antenna masts to be included in the laws as exempt or complying development.

In fact, so many amateurs made submissions that the NSW planning department commented about it on their website in November last year.

Draft legislation has recently been posted on the NSW Planning website and the department has invited all interested parties to comment.

Disappointingly, Amateur antenna masts have not been included in the draft.

I spoke to a policy officer in the department and asked - what do radio amateurs have to do to get some consideration on this issue?

The answer - make (more) submissions !

It's time to express your disappointment and send submissions again.

You have until close of business on Friday 9th November.

You can email your submissions to codes@planning.nsw.gov.au.

You can find the draft legislation on the NSW planning website, at: www.planning.nsw.gov.au

click on the "Development" tab and select "On exhibition", and then select "Draft Policies and Plans".

Information on putting together a submission is on the WIA website.

The advice we gave last year can be found by typing "antenna masts" into the search field on the WIA website.

While you're in a mood to make submissions, check out the NSW Government's HAVE YOUR SAY website at: www.nsw.gov.au/haveyoursay
Select "Reduce local government red tape" and you can make a submission on Local Approvals Policies - BUT -

SUBMISSIONS ON THIS ONE CLOSE MONDAY 29TH OCTOBER.

The battle isn't over. Amateurs of NSW - get cracking !

What use is an f-call? (20120325)

With coax going between radios, amplifiers, tuners, SWR meters and antennas there is no shortage on connectors. You can buy pre-made connecting cables, but after a while you'll likely realise that you're spending a fortune on such luxuries and you'll likely come to the conclusion that the pre-made solution is never quite the right length, either too long or too short. So you take like a duck to water and you start making your own cables, patch leads, etc.

Leaving aside what kind of connector to select, where to buy it or which of the bewildering array of coax to acquire from a bevy of suppliers, you have a fundamental choice between crimping and soldering.

If you spend a little time online you'll find that there is solid evidence either way and adherents to either school. Just like Holden versus Ford or Mac versus PC, each "side" vehemently defends their turf.

Until recently I was exclusively a crimper. I crimped each connector that I could and I was happy. Well, mostly happy that is. I had this really annoying tool that for some reason would not crimp RG58 BNC connectors without leaving a little wing on the ferrule. Turns out that my dear supplier had snuck some RG59 connectors into the mix and they look really similar until you hold them side by side - and if you're wondering, the RG59 ferrule fits around the RG58 one, so no wonder it bulged like that.

Anyway, that started the conversation about crimping versus soldering.

Now, I'm not going to tell you what to choose. I suspect there are solid arguments that I'm avoiding here, but food for thought is this:

A crimp has no undo. That is, once you've mashed your lug, it's all over.

If you stuffed it up, you cut off your connector, throw it out and start again. Of course if you practice enough, stuffing it up hardly ever happens. Better crimping tools help you achieve your aim.

However, if you solder, then if you stuff it up, you have the opportunity to heat it all up again, remove the offending poor connection and try again. I've just acquired a gas soldering iron - I never even knew such a thing existed, I'd never have bought the 12V travel iron for my trip if I'd known, and now I have the option to solder in the field.

So, why does this matter? What should you choose?

You have no need to be exclusive one way or the other. Just like one antenna doesn't do all jobs, and one screwdriver is never enough, crimping and soldering are two options in your arsenal. They complement each other.

I'm Onno VK6FLAB

(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

Now Jason VK2LAW joins us again with his take on the INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

Jason I hear that An amateur radio balloon project launched in May finally ended this month with the recovery of the payload.

Yes GraHam, an amateur radio balloon project launched in May finally ended this month with the recovery of the payload.

Argentinean amateurs, members of AMSAT-LU, launched a high altitude balloon May 19 from La Pampa, Argentina. The payload included a 70cm to 2m 4W FM repeater, live SSTV, an HF beacon and two video cameras. During the 4 hour flight, over 200 stations made contacts through the repeater.

The balloon came down in an isolated and flooded area. It was finally recovered from the mud by a 4x4 adventure group on 6th October. The flight data was retrieved, including over 6 hours of video from the two cameras.

Details can be found at www.uk.amsat.org/?p=11094.

QATAR TO HOST FIRST MIDDLE EAST HAM RADIO FESTIVAL

The city of Doha will host the Qatar's first International Festival for Amateur Radio in December. This according to the Chairman of the Administrative Control and Transparency Authority and the vice-chairman of the US Amateur Radio Society.

The festival will include a contest between amateur radio operators from all over the world. About 100 hams from across the globe will be invited to the festival to take part in the competition.

The festival is being dubbed as the first of its kind in the Middle East and will take place in conjunction with the Qatar National Day celebrations.

ITU launches Tech Needs Girls Prize to spark creativity

Seeking the unique voices and talents of girls to invent our future

To mark the first ever International Day of the Girl Child, ITU members and partners are joining forces to launch the Tech Needs Girls Prize, a new global technology competition designed to inspire more girls to embrace technology and invent the future.

Our future is being shaped by technology and, with over 95% of all jobs now having a digital component, the information and communication technology sector is an exciting place to be. Yet, as a global shortage of ICT professionals looms and the uptake of girls and women into ICT-related study declines, research reveals that technology has an image problem.

Put simply, too many talented young girls mistakenly consider an ICT career to be boring, geeky, uncreative or a career path that lacks the world-changing component many aspire to.

Working in partnership with lead players in the ICT, education and media industries, ITU&#65533;s new annual Tech Needs Girls Prize aims to dramatically

shift perceptions. The prize targets girls between the ages of 9 to 18 at the very time when they start forming opinions about their place in the world and their choice of career path.

In 2010, ITU membership established Girls in ICT Day, celebrated on the fourth Thursday in April every year and designed to raise visibility on the many exciting opportunities offered by an ICT career. For Girls in ICT Day 2012, over 1,320 events were held in nearly 90 countries, providing an estimated 30,000 young women with a better understanding of the opportunities offered by the ICT sector.

http://www.itu.int/net/pressoffice/press_releases/2012/69.aspx

SARL President, Rassie Erasmus, ZS1Y,T and the SARL Legal advisor Johan Marais, ZS1JM, met with a delegation of the Cape Town Metro to intervene in a notice received by a SARL member stating that he requires approval in terms of the Environmental Act & City of Cape Town Zoning regulations for his antenna which is less than 15 metres in height.

It transpired that they had received a complaint from a neighbour, which is most probably RF related, but elected to notify the home owner that his antenna has not been approved and that they intend taking steps to either have him remove the tower or that he has to apply for the necessary approval.

The SARL delegation pointed out that antennas under 15 metres of radio amateurs are exempt from the provisions of the National Environmental Management Act, 107 of 1998.

It was agreed that the process will be suspended pending the Council consulting with their legal advisors.

==========

NEWS FROM ARNEWSLINE USA

SUPREME ASKED TO RULE THAT PUBLIC HAS NO RIGHT TO RESELL OWNED GOODS

How would you feel if there was a law that kept you from selling or even giving away a piece of ham gear or anything else you think you own without first getting permission from the original manufacturer?

Sound crazy?

Well this is a legal precedent that the United States Supreme Court has been asked to rule on as we hear from Amateur Radio Newsline's Mark Abramowitz, NT3V:

Imagine, if you possibly can, the Dayton Hamvention, the Orlando Hamcation or the Huntsville Hamfest with no flea market.

Or, what about ham gear disappearing altogether from eBay or Craigslist.

Some fear this could be a real possibility, depending on how the U.S. Supreme Court rules in a case that could impact a nearly 104-year-old doctrine recognized by the high court that allows us to resell items without fear of a

copyright holder coming after us.

The doctrine essentially says the copyright holder had control only over the first sale.

But a case decided last year in the U.S. Court of Appeals in the Second Circuit in New York has the potential to re-set that doctrine.

The case involves a man from Thailand who came to the United States in 1997 to enrol in Cornell University in Ithaca, N.Y.

The student found that the same textbooks they were asking him to buy in the book store could be had for much less in Thailand.

The man asked his relatives there to help him buy the books and send them back overseas to him in New York.

Later, the man got some entrepreneurial spirit and court documents in the case show he decided to start selling textbooks on eBay. There's some dispute as to how much the man made on the sales.

So, the publisher of the books objects and brings a suit against him.

The publisher admits it was charging less for books sold overseas, but it claims the man was guilty of copyright infringement. But the man counters his sales are covered by that first-sale practice.

The federal appeals court in New York upheld a lower court decision saying, no, that doctrine only applies to stuff produced in the United States and not to anything made overseas.

That court's ruling, in the view of some constitutional scholars, could now throw into jeopardy the whole idea of what you buy at flea markets, or yard sales and on-line sales of used goods.

Polk Wagner, a law professor at the University of Pennsylvania Law School here in Philadelphia, isn't ready to push the panic just yet with that conclusion.

Wagner says in this case, it's about copyrights...

"So the question here that the Supreme Court has got to wrestle with is to try and figure out how these two provisions of the copyright act - one that says that you can't import anything that's copyrighted without the permission of the copyright owner and also one that says lawful owners of books are allowed to do what they want with the copies of the books that they purchase," Wagner says.

He says there's a bit of conflict here...

"So, the legal question is how those two provisions of the Copyright Act work together or don't as the case may be," Wagner says. "Courts have wrestled with this for the last 5 or 10 years and have not reached any satisfactory conclusions. So, hence, the Supreme Court is going to take it up."

eBay has filed a brief on the issue warning that the Second Circuit's ruling would have significant consequences for trade and ecommerce. And, in a broader reach, the company says it could hurt small businesses and consumers and cost jobs in the U.S.

Wagner, the University of Pennsylvania law professor, says there's another area and it may involve patents.

For example, he says in cases involving ham gear, it's legal to buy overseas and import the gear. And, there's nothing under the patent laws that prevents you from reselling the gear.

However, Wagner says there's another matter and it has to do with software that may be included or needed to operate the gear.

And, while most companies or software developers will sell you a license to use their software, it's not the same thing as selling you a book. And, while Wagner says that's not at issue here it eventually it could be sorted out by the courts in the future.

Stay tuned.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

The Supreme Court is scheduled to hear oral arguments on the case tomorrow October 29th.

If it does rule with the appellate court, it's likely that the matter would be brought to Congress to force a change in law. However that could take months if not years or even decades. Until then, consumers, including ham radio operators would be stuck between a rock and a hard place when trying to resell their belongings without breaking the law.

==========

G4TUT SOUTHGATE AMATEUR RADIO CLUB NEWS DESK

Pico 434 MHz balloon lands in Sweden

PicoAtlas VII, a single foil balloon launched by James Coxon M6JCX on Saturday, October 20, 2012 from Suffolk travelled to Sweden.

It carried GPS and a miniature radio transmitter sending RTTY (ascii-8) on 434.301 MHz USB running 10 mW output.

During the 19 hour flight it crossed the North Sea before landing in central Sweden.

This side of the world an increasing number of radio amateurs are experimenting with ultra-light balloon payloads, typically weighing less than 100 grams.

Balloons such as these do not go to high altitudes instead they float between 3,500 and 6,000 metres for an extended period.

In an attempt to understand the concepts of foil balloons and super-pressure a collection of statistics from pico balloon flights have been compiled at

the web address shown in the text edition of this, the WIA
National News Service , I'm G4TUT Richard and this is VK1WIA.

VK Spring VHF / UHF Field Day November 24-25

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Hi This is Ed VK2ARE Australian publicity Officer for ZL9HR DXpedition to Campbell Island.

All going to plan! - Campbell Island DXpedition activation is just a month away and all is on schedule. All the equipment has arrived at the storage facility in Invercargill New Zealand. Some of the team are already in New Zealand, others will arrive over the next few weeks. There will be a quarantine inspection of all of the gear and then it will be loaded onto the boat that will take the equipment and team down to Campbell Island.

It's not too late to vote for which bands and modes you will like to work ZL9HR on - go to www.zl9hr.com to vote and to find out all the details of this major DXpedition.

The Campbell Island team is looking forward to working you,

Best 73, good DX.

Morocco CN 2 YZ through years end. His activity will be from the city of Tangier especially on the weekends.

GB 80 PW Practical Wireless 80th year
In the UK Ofcom have issued the special callsign GB 80 PW to Practical Wireless magazine to celebrate the publication's 80th year in print.

Temotu Province H 40 FN between this December 22nd and January 7th of 2013. QSL H 40 FN via HA 8 DD.

AWARDS

CQ INTRODUCES 40 CQ ZONES ON 160 PLAQUE

CQ has announced the availability of a special plaque for those who have achieved contact to all 40 CQ zones on 160 meters. This is considered the most difficult of all amateur radio awards to earn and because of this the Worked All Zones 160 Meter Plaque recognizes that receiving it as one of the elite Top Band DXers. If you believe you qualify, please contact W-A-Z Award Manager Floyd Gerald, N5FG, by e-mail to n5fg@cq-amateur-radio.com

(CQ via Facebook and ARNewsLine)

28.000 to 29.700

Jamming interrupts Western broadcasters

Programming from the Deutsche Welle and other foreign broadcasters has been jammed in parts of the Middle East. DW Director General Erik Betterman called the interruption an attack on freedom of the press.

Western radio and television broadcasts to parts of the Middle East have apparently been cut off because of a targeted jamming attack.

In addition to programming by Deutsche Welle, the BBC and Voice of America have also been affected.

European satellite operator Eutelsat said earlier this week that the "deliberate and intermittent interference" originated in Syria.

Deutsche Welle programming was last interrupted on Thursday morning (18.10.2012). DW Director General Erik Bettermann protested against the renewed attack on freedom of expression. In cooperation with other foreign broadcasters, the Deutsche Welle was preparing a resolution against the jamming, Bettermann said.

Experts suspected that Iran was behind the current interruptions. According to media reports, the country has jammed reception of a variety of broadcasters in recent years.

The most recent episode, experts said, could be connected to a Eutelsat decision to stop carrying 19 Iranian channels. The satellite operator stopped broadcasting television and radio stations operated by Iran's state media organization, Islamic Republic of Iran Broadcasting (IRIB). Effective immediately, the programming offered by these channels, including the international news channel "Press TV," is no longer available outside of Iran.

BROADCAST MONITORING SWL AND SCANNER NEWS

ALL DIGITAL AM HD TESTING ON ITS WAY

Information is surfacing regarding NAB Radio Technology Committee plans to test all-digital AM H-D Radio technology on an existing full carrier AM radio station.

The committee has been meeting since last November to discuss technical options for the revitalization of AM. Testing would quantify both indoor and outdoor coverage. In general, the goal is to verify whether the station coverage and robustness are improved with an all-digital signal in both day and night transmission. Also to quantify any change. There's little technical data in the public arena for all-digital AM operation.

Glynn Walden is CBS Radio Senior Vice President of Engineering. He said during the fall NAB Radio Show that a test station has been chosen with testing likely to begin right after the presidential elections. Walden and other committee members declined to identify the facility but some believe it will be a CBS station in an area that could be characterized as a medium sized market.

You can read more about this AM broadcast digital experiment on-line at tinyurl.com/all-digital-am

(CGC, RW via ARNewsLine)

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

ISRAELI GPS CUBESAT BEING BUILT

Israel is planning to launch a student built ham radio microsat. The Space Duchifat-1 is an experimental and educational CubeSat being developed and built by students at the Space Laboratory of the Herzliya Science Centre.

The CubeSat will carry an APRS digipeater operating on 145.825 MHz and a UHF/VHF 1200 bps B-P-S-K transceiver that can provide a CW beacon and an FM to DSB transponder.

The main mission of the satellite is to transmit real-time information via packet radio from a Low Earth Orbit using the Automatic Position Reporting System protocol. The satellite will allow remote traveller's to access the bird for worldwide position, status reporting and messaging. This using simple handheld or mobile radios with omni-directional whip antennas.

The project is directed by Dr. Ana Heller with
support from the Herzliya city municipality and
the Israeli Amateur Radio Club. At this moment
no launch date or orbit details are available.

Rally Victoria is again being held in the forest area north of Warragul
Friday 16th and Saturday 17th November.

Rally Victoria is an Australian Rally Championship and Victorian Rally
Championship event.

On Friday, there will be 2 bush stages and on the Saturday, 5 stages.
Each stage will be run twice.

As previously, Rally HQ will be at Lardner Park. Event commander is
Chris VK3CJK. Communications will be required for logistics, safety, and
scoring, with scoring and car tracking via 2m packet and other functions
via 2m voice.

If you can assist with the event, could you please phone 51 955 247
in the evenings.

(John VK3ZRX)

Wednesday December 26th 2012
YMCA Murray Marathon
Yarrawonga to Swan Hill

It is now time to register your interest as radio operators for the five day
Murray Marathon itself.
The WICEN Murray Marathon Training Exercise is conducted in conjunction with
the YMCA who are the event organizers.

The Marathon is a canoe race on the Murray River that starts at Yarrawonga on 27th December and finishes in Swan Hill on 31st December.

Each year hundreds of canoes paddle their way down the river. They are supported by their own support teams, and along with all the officials, volunteers and spectators there are a few thousand people moving down the river with the event.

WICEN has a team of 25 members and other amateurs who provide communication and logistical support for the event by establishing six check point stations each day operating on HF and VHF. Another six to eight mobile stations in boats and vehicles move with the canoes to supervise their safety.

YMCA provides free campsites and good food at very cheap prices and this makes the event easy as far as camping and catering are concerned.

If you are interested in joining the team for the 2012 event please drop an Email to: Gerard Werner VK3GER at gerwer01@gmail.com or
03 9773 6313 begin_of_the_skype_highlighting

FEEDBACK
VK4FABB : brandonbugsbunny@yahoo.com.au

I Have really enjoyed the two temp news readers that have been reading the news for the past few weeks and i think they should be on the national news more often, so good work guys you deserve a pat on the back and even a nice coldy. Also i have really enjoyed the little bit of humour that they have been putting into the news as they read it, it makes it that bit less dull and something to have a bit of a laugh at on a Sunday morning

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only
be broadcast once, if you want a couple of mentions, please submit different
slants to keep your event 'fresh 'and always if the news room is to read your
item write in the 3rd person.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

November 1.

==> FCC NEWS: FCC SEEKS COMMENTS ON PROPOSED CHANGES TO AMATEUR
LICENSING RULES, EMISSION TYPES

Earlier this month, the FCC released
<http://www.arrl.org/news/fcc-seeks-to-change-amateur-radio-licensing-rules-a
llow-additional-emission-types>
a Notice of Proposed Rulemaking (NPRM
<http://transition.fcc.gov/Daily_Releases/Daily_Business/2012/db1002/FCC-12-1
21A1.pdf>)
-- WT Docket No. 12-283 -- proposing to amend the Part 97 rules
governing the Amateur Radio Service. On October 24, a summary of the
NPRM was published in the Federal Register
<https://www.federalregister.gov/articles/2012/10/24/2012-26201/amateur-servi
ce-rules>
and the FCC is seeking comments on it.
```

Specifically, the Commission is proposing to modify the Amateur Radio Service rules to grant examination credit for expired and beyond-the-grace-period-for-renewal Amateur Radio operator licenses; to shorten the grace period during which an expired amateur license may be renewed; to revise the time a call sign is not available to the vanity call sign system correspondingly, and to reduce the number of volunteer examiners needed to administer an amateur license examination. The NPRM also asks for comment on amending the rules to permit remote test administration, and proposes to amend the Amateur Radio Service rules to allow amateur stations to transmit certain additional emission types.

Comments must be filed on or before December 24, 2012 (60 days after publication in the Federal Register); reply comments must be filed on or before January 22, 2013 (90 days after publication in the Federal Register). Instructions on how to file comments are listed beginning on page 12 of the NPRM.

==> PUBLIC SERVICE: HURRICANE SANDY NOW A CATEGORY 2 STORM

As Hurricane Sandy -- now a Category 2 storm -- heads toward the Bahamas, both the Hurricane Watch Net and the VoIP Hurricane Net are supporting WX4NHC, the Amateur Radio station at the National Hurricane Center. As of 8 AM (EDT) on Thursday, October 25, Sandy was moving toward the north between the northeast coast of Cuba and the Central Bahamas (about 130 miles south of the Bahamas and 75 miles northeast of Cuba) with maximum sustained winds of 105 miles per hour. Read more here <http://www.arrl.org/news/hurricane-sandy-now-a-category-2-storm>.

==> GET READY FOR THE 7TH ANNUAL ARRL ON-LINE AUCTION

The Seventh Annual ARRL On-Line Auction <http://www.arrl.org/auction> is now open for bidding! According to ARRL On-Line Auction Coordinator Lisa Tardette, KB1MOI, there is a large assortment of ARRL Product Review items, including an Elecraft KPA500 HF/6 meter power amplifier, an ICOM IC-7410 HF/6 meter transceiver, a Yaesu FT-450D HF 6 meter transceiver, a Kenwood TM-281A 2 meter FM transceiver and an MFJ-998 RT and MFJ-994BRT remote auto antenna tuner.

The ARRL On-Line Auction also features a wide assortment of books, including ARRL Handbooks from the 1920s and 1930s -- most notably, a first edition of the 1926 Radio Amateur's Handbook -- and a set of three first-day-of-issue covers of the 1964 5-cent stamp highlighting Amateur Radio (see an image of a stamp here <http://www.qsl.net/wj8c/>).

"Once again this year, bidders will find a large variety of product review equipment, vintage books, novelty items and a number of very special items that have been donated by the crew of the ABC Television's Last Man Standing, starring Tim Allen as Mike Baxter, KA0XTT," Tardette explained. "In order to place a bid, you must register on the ARRL On-Line Auction website. You may browse the website and scope out those 'must-have' items without being a

registered bidder, and you can register at any time during the auction. If you are interested in some great bargains -- and some great fun -- you really need to check out the ARRL On-Line Auction." The 2012 ARRL On-Line Auction runs through 11:45 PM EDT on October 31 (0345 UTC November 1). Contact Tardette via e-mail <ltardette@arrl.org> with any questions concerning the ARRL On-Line Auction.

==> ON THE AIR: FUN AND EXCITEMENT FILL THE AIRWAVES FOR THE 2012 ARRL NOVEMBER CW SWEEPSTAKES

Steeped in tradition and still as exciting as ever, the 79th Annual ARRL Sweepstakes offers US and Canadian operators a fun-filled contest opportunity again this fall. First up is CW Sweepstakes during the weekend of November 3-5. "You don't have to have a huge station with large antennas to have fun in Sweepstakes," explained ARRL Sweepstakes Manager Larry Hammel, K5OT. "Maybe you have 100 W and a backyard dipole or vertical. Or perhaps the challenge of a 5 W QRP effort hits your hot button this year. You will be amazed at the number of stations you can work as you trade exchanges all over the continent."

This year, with four new Canadian Sections, the November Sweepstakes will be a bit different: In August, the RAC split its Ontario Section into four new Sections: Ontario East (ONE), Ontario North (ONN), Ontario South (ONS) and the Greater Toronto Area (GTA). Contesters now need to work 83 sections to earn the coveted Clean Sweep. Read more here <http://www.arrl.org/news/fun-and-excitement-fill-the-airwaves-for-the-2012-arrl-november-cw-sweepstakes>.

==> ARRL HQ: W1AW RECEIVES SEMI-ANNUAL ANTENNA INSPECTION, NEW ANTENNA FOR 160 METERS

On October 24, Matt Strelow, KC1XX, and Andrew Toth of XX Towers came to Newington to inspect the antennas and towers at W1AW, the Hiram Percy Maxim Memorial Station, and W1HQ, the Laird Campbell Memorial HQ Operators Club. In addition to the annual autumn inspections, they also repaired some of the W1AW antennas.Strelow and Toth replaced the 160 meter dipole located atop the Rohn 65 (120 foot) tower. The antenna -- used for both station broadcasts and visitor operations -- was damaged in a windstorm a few weeks ago. "I'm happy that we now have a new 160 meter dipole," said W1AW Station Manager Joe Carcia, NJ1Q. "I missed W1AW being active on 160 meters, as did other radio amateurs. The station's 1300 W 160 meter signal now has someplace to go." Read more here <http://www.arrl.org/news/w1aw-receives-semi-annual-antenna-inspection-new-antenna-for-160-meters>.

==> NOMINATIONS NOW OPEN FOR THE GEORGE HART DISTINGUISHED SERVICE AWARD

Each year at its Annual Meeting in January, the ARRL Board of Directors bestows the George Hart Distinguished Service Award to a League member

whose service to the ARRL's Field Organization is of the most exemplary nature. This award is named in honor of George Hart, W1NJM, long-time Communications Manager at ARRL Headquarters and chief developer of the National Traffic System.

Selection criteria for the George Hart Distinguished Service Award include:

- Operating record with the National Traffic System, or
- Participation within the Amateur Radio Emergency Service (ARES), or
- Station appointments and/or leadership positions held within the Field Organization.

Nominations for the George Hart Distinguished Service Award shall be accepted from anyone and shall be submitted to the Membership and Volunteer Programs Manager at ARRL Headquarters by November 1. Nominations should document as thoroughly as possible the nominee's lifetime activities and achievements within the ARRL Field Organization. It is expected that nominated candidates will have 15 or more years of distinguished service. The Programs and Services Committee will serve as the Review Committee, with the Board of Directors making the final determination at its Annual Meeting in January. Recipients will be given an engraved plaque and cover letter, and will be profiled in QST <http://www.arrl.org/qst>.

Nominations for the 2013 George Hart Distinguished Service Award, including any related supporting material and letters of recommendation, may be e-mailed to ARRL Headquarters to the attention of ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N <nn1n@arrl.org>, or to ARRL Field and Public Service Team Supervisor Steve Ewald, WV1X <wv1x@arrl.org>. Nominations and supporting materials must be received no later than November 1, 2012 to be considered.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: The average daily sunspot numbers for October 18-24 were down 1.7 points from the previous seven days, to 95.3, while the average daily solar flux rose 14.7 points to 143.9. Geomagnetic activity was quieter, with all daily planetary A index measures in the single digits. As of October 24, NOAA and the US Air Force are predicting the solar flux to be at 135 on October 25-26, 130 on October 27-29, 125 on October 30-November 1, 100 on November 2-3, then 105 and 110 on October 4-5, 115 on October 6-7, 120 on November 8-11, 125 on November 12-13, then peaking at 145 on November 18 and dropping back to 100 on November 29-30. The predicted planetary A index is 5 on October 25-November 7, then 10, 20 and 15 on November 8-10, 5 on November 11-17, 10 on November 18-19, and back down to 5 on November 20-December 4. On October 23, sunspot 1598 emitted an X-1 class solar flare. This region is still rotating into the most geoeffective position toward the center of the solar disc, relative to Earth. There is a chance of more solar flares in the next couple of days. Look for more on the ARRL website on Friday, October 26. For more information

concerning radio propagation, visit the ARRL Technical Information
Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>.

==> THIS WEEK IN RADIOSPORT

This week:

- October 26 -- NCCC Sprint
- October 27-28 -- CQ WW DX Contest (SSB)

Next week:

- November 2 -- NCCC Sprint
- November 3 -- IPARC Contest (CW)
- November 3-4 -- ARRL EME Contest <http://www.arrl.org/eme-contest>;
Ukrainian DX Contest
- November 3-5 -- ARRL November Sweepstakes (CW)
<http://www.arrl.org/sweepstakes>
- November 4 -- IPARC Contest (SSB); High Speed Club CW Contest; DARC
10 Meter Digital Contest
- November 6 -- ARS Spartan Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations web page
<http://www.arrl.org/special-event-stations>.

Upcoming ARRL Section, State and Division Conventions and Events

- November 3-4 -- ARRL Georgia State Convention
<http://www.arrl.org/hamfests/georgia-state-convention-stone-mountain-hamfest
-computer-expo-1>,
Lawrenceville, Georgia
- November 4 -- ARRL Iowa Section Convention

RAC Bulletin 2012-062E - Allan Boyd, VE3AJB
2012-10-25

It is with great pleasure that I forward this news item concerning our Ontario North Section Manager Al Boyd VE3AJB. Al has been a huge supporter of the RAC as Ontario Section Manager for the past number of years, and it is great to see him professionally recognized for his contribution to the citizens of Ontario. Congratulations Al!

Manitoulin Island Ontario Provincial Police"s longest-serving full-time member has been recognized with an OPP Accolade award for his dedication to the service, according to a news release.

Provincial Const. Al Boyd joined the OPP in 1981. He was assigned to the Manitoulin detachment where he has served ever since, "dedicating himself to his family, his policing career and his community," said the OPP in the news release

The Accolade award recognizes an individual whose actions and behaviours demonstrate and/or exceed commitment to the OPP and their communities; excellent and consistent performance; exceptional customer service over a sustained period; strong support for colleagues; team spirit; a commitment to professional or personal learning; sharing ideas to increase program efficiency and effectiveness; humanitarian actions that personify OPP values; exemplary efforts in assisting the public in unfortunate circumstances; and selfless personal investment off the job requiring time and effort in support of someone else that goes beyond the pursuit of personal success and recognition.

Boyd holds the position of community service officer for Manitoulin detachment, North East Region. His strong work performance and exceptional skill set, including a background in community services, media relations, crisis negotiation and amateur radio, makes him a valuable asset to the OPP and the communities he serves, said Staff Sgt. Kevin Webb, Manitoulin detachment commander.

"It was my pleasure to nominate Al for an Accolade Award" said Webb in a news release. "Since joining the OPP, he has developed his role through outstanding and significant support to his colleagues at all rank levels, both uniformed and civilian."

"Al brings an enthusiastic professionalism to the projects he is involved with and his ideas and opinions respected. On a day-to-day basis, he consistently contributes to the goals and objectives of the OPP in service to the people of Ontario"

Amateur Radio Newsline(tm) Report 1837 - October 26 2012

Amateur Radio Newsline report number 1837 with a release date of October 26 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. New Zealand hams will have to wait a while longer to gain full access to 6 meters; Germany's national ham radio society says no to a new pan-European B-P-L standard; thethe Hurricane Watch Net activates for hurricane Sandy; G-R-E quits the scanner business and a well known British soprano will be the next space tourist to visit the International Space Station. Find out who on Amateur Radio Newsline(tm) report number 1837 coming your way right now.

**

RESTRUCTURING: CLOSURE OF TV CHANNEL 1 AND ZL ACCESS TO 6 METERS UPDATE

Changes will be coming to the 6 meter band down-under, but not as quickly as some hams in New Zealand had hoped for. Amateur Radio Newsline's Jim Meachen, ZL2BHF, reports:

--

Amateurs across New Zealand may have to wait a bit longer to get full access to the 6 meter band. As previously reported, 50 to 51 MHz down-under is to be returned to amateur radio once all Channel 1 television has ceased using the spectrum and the current management right for this band expires.

What may not be known by some hams is that the last New Zealand channel 1 television transmitter is not due to close down until November 2013. After that, the management right under which it operates does not expire until August 2015.

Because of this, the New Zealand national amateur radio society, NZART, is working with the nations Radio Spectrum Management on arrangements for the period between when all the Channel 1 transmitters are turned off and their management right expires. In the meantime any New Zealand amateur in an area where TV channel 1 is no longer operating can apply for a permit to operate on the band.

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, down-under in Nelson, New Zealand

--

As we go to air, not exact date when all New Zealand hams will have 6 meter access is known. (NZART)

**

RADIO LAW: DARC TO OPPOSE NEWLY PROPOSED EUROPEAN PLT STANDARD

Germany's national amateur radio society, the Deutscher Amateur Radio Club, or DARC will be asking the Deutsche Commission for Electrical, Electronic & Information Technologies to oppose a new pan-European draft Power Line Transmission standard. PLT is what Europe call Broadband over Powerline or BPL.

During its October 22nd meeting, the DARC Board discussed the pros and cons of the proposed draft standard. While it said that it recognizes the new draft provided for some non-binding commitments for notching out of certain frequencies in the amateur bands, it also noted that it fears the future ambitions of the manufacturers of other PLC products in the direction of higher limits for the emission of harmful electromagnetic or EMC interference. This could lead to a weakening of the previous limits in other European EMC standards.

To be clear, this new standard concerns the devices that people install in their homes to run data over their house wiring. It has nothing to do with PLC or BPL that is carried over the over company power networks. (Southgate, DJ0QN)

**

RADIO LAW: SARL TAKES UP ZONING REGULATIONS WITH THE CITY OF CAPE TOWN

Its not just hams in the United States that are having problems erecting towers and keeping them up. And a case in South Africa points graphically this out. Amateur Radio Newsline's Norm Seeley, KI7UP, is here with the details:

--

Recently South African Radio League President, Rassie Erasmus, ZS1YT and Legal advisor. Johan Marais, ZS1JM, met with a delegation of the Cape Town Metro Council. This, to intervene in a notice received by a society member stating that he requires approval in terms of the Environmental Act & City of Cape Town Zoning regulations for his antenna which is less than 15 meters in height.

It was quickly learned that the council had received a complaint from a neighbor, which was most probably RF related. Rather than investigate the matter the Council simply elected to notify the ham that his antenna has not been approved and that it intend taking steps to either have him remove the tower or to apply for the necessary permits.

But the South African Radio League delegation was right on top of this one. It pointed out that amateur radio antennas fewer than 15 meters

of are exempt under the provisions of the National Environmental Management Act of 1998.

Based on this it was agreed that the process will be suspended pending the Council consulting with its legal advisors. The South African Radio League will then be afforded further opportunities to discuss the issues once feedback has been received from the Council's legal department.

For the Amateur Radio Newsline. I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

The South African Radio League will be keeping the qorld of amateur radio up0dated on this one. (SARL)

**

RESCUE RADIO: HURRICANE WATCH NET ACTIVATED FOR HURRICANE SANDY

The United States-based Hurricane Watch Net has been activated for Hurricane Sandy. Net operations began at 11:00 UTC on Wednesday, October 24th on 14.325 MHz to observe and report conditions surrounding the storm to the National Hurricane Center.

Sandy is expected to develop into what forecasters are calling a volatile hurricane as tropical storm Sandy merges with a powerful cold front charging towards the East Coast late the weekend of October 27th and 28th. As Sandy progresses the Hurricane Watch Net will be looking for condition reports from stations located in the affected areas. Hams in the places affected by this storm should be prepared to operate from a place of safety.

Net organizers say that they appreciate the consideration of all amateur operators in keeping the frequency of 14.325 MHz clear, and listening for possible relays. Operation on lower frequencies such as 40 or 80 meters will be considered depending on propagation during evening and night hours.

For information on the storm and the Hurricane Watch Net, go to www.hwn.org on the World Wide Web. (HWN)

**

RESCUE RADIO: UK ESSEX COUNTY RAYNET CALLED OUT IN FLOOD WATCH

Ham radio is called out in the UK as rising waters along riverbanks put several towns on emergency alert.

The Radio Society of Great Britain reports that at 18:00 UTC on Sunday, October 14th, the Emergency Planning Officer from the Maldon District Council requested Essex RAYNET to be placed on standby. This in response to flood alerts issued by the Environment Agency.

At 20.00 members were mobilized and deployed to the riverbanks at Heybridge Basin, Fulbridge and the Hythe in Maldon. This was in preparation for the high tide and possible tidal surge due at quarter to one in the morning.

Thankfully, the high tide hit without any significant incident. RAYNET volunteers were able to stand down shortly afterward. More information is on the Web at www.essexraynet.co.uk. (GB2RS)

**

HAM RADIO NEAR SPACE: PICO HAM BALLOON MAKES TREK FROM UK TO SWEDEN

PicoAtlas VII, a single foil balloon launched by James Coxon, M6JCX, on Saturday, October 20th from Suffolk in the UK has landed some 1050 kilometers or 650 miles to the East in Sweden.

PicoAtlas VII carried a GPS receiver and a miniature transmitter running only 10 milliwatts output sending RTTY on 434.301 MHz USB. The telemetry data from the balloon transmitter could be decoded using the free software at dl-fldigi. This program can decode many different amateur radio digital modes and can be downloaded for Windows, Mac and Ubuntu Linux at tinyurl.com/8zlo437.

An increasing number of radio amateurs are experimenting with ultra light balloon payloads, typically weighing less than 100 grams. Balloons such as these do not go to high altitudes. Instead they float between 3,500 and 6,000 meters which roughly equates to 9000 to 20,000 feet for an extended period of time. During the 19 hour flight this balloon successfully crossed the North Sea before landing in central Sweden. We will have more ham radio space related news later on in this weeks report. (Southgate)

**

HAM RADIO NEAR SPACE: MAY LAUNCH AND OCTOBER RECOVERY OF HIGH ALTITUDE BALLOON PAYLOAD

An amateur radio balloon project launched last May finally ended this month with the recovery of the payload.

Members of AMSAT-LU, had launched a high altitude balloon on 19th May from La Pampa, Argentina. The payload included a 70cm to 2m 4 watt FM repeater, live SSTV, an HF beacon and two video cameras. During the 4 hour flight, over 200 stations made contacts through the repeater.

Unfortunately, while the flight was deemed to be a complete success the balloon came down in an isolated and flooded area. It was finally recovered from the mud on October 6th by a 4 by 4 off-road adventure group.

The good news is that all flight data was retrieved. This included over 6 hours of video from the two cameras. Details can be found at www.uk.amsat.org. (GB2RS

RADIO BUSINESS: GRE QUITS THE SCANNER BUSINESS BUR ALINCO NOT AFFECTED

GRE, the radio manufacturer which also represents Alinco here in the United States, has ceased all manufacture of scanner radios. The good news is that Alinco product sales and service will continue. Amateur Radio Newsline's Mark Abramowicz, NT3V, has the details:

--

The news was a bit of a shock to the GRE group in Belmont, California -word from Japan earlier this month that the GRE personnel in Asia and the United States were being dismissed and scanner operations were being discontinued.

It was October 16th when the official word was released by GRE-employed U.S. managers of the shutdown in Japan.

But there was a pledge to keep the California office open because of its distribution affiliation with Alinco.

Michael Herbert, WB6JKV, a service technician and engineer for GRE's Belmont office, officially confirmed for Amateur Radio Newsline that things are still go for Alinco.

"GRE America will continue to market, service and support Alinco's radio products without any interruption," Herbert says. "So, for us amateurs, it will be business as usual."

And, Herbert continues: "No worries for warranty repairs. We have a great parts supply. We have a direct line with the factory and they are really eager to go forward with us and proceed."

Herbert says he's not authorized to say much more.

However, he says GRE is waiting on Alinco's new SDR, 100 watt HF radio due for delivery by Christmas. And, is expecting to distribute the new 900 megahertz /220 megahertz mobile radio about Dayton time next May.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

The bottom line. If you own or are planning to purchase an Alinco brand piece of radio gear you have nothing to worry about. However at

airtime the future of GRE manufactured scanner radios is unknown. (ARNewsline(tm))

**

RESCUE RADIO: ISABELLA COUNTY MICHIGAN WANTS RADIO AMATEURS

An Emergency Management Director in Michigan, is seeking the assistance of the local ham radio community. This to be ready to provide solid emergency communications assistance in time of crisis.

Isabella County's Marc Griffis is actively recruiting licensed ham radio operators to help out in a variety of situations including training exercises. According to Griffis, there are more than fifty ham radio operators in Isabella County and he wants those who are interested to attend a Community Emergency Response Team training meeting.

Griffis says there is a potential in Isabella County for emergency management to call upon those with expertise in ham radio operation, and he wants them to be prepared for any situation. Examples of the types of assistance Griffis is referring to include assisting in the coordination of search and rescue perimeters. Also, communications between shelters and in other situations where other forms of communication have failed.

Isabella County is a located in central Michigan. As of the 2000 census, the population was 63,351. Its county seat is Mt. Pleasant. (Michigan Morning Sun)

**

ENFORCEMENT: UNLICENSED IOWA BROADCASTER ISSUED $10000 NAL

It's rare that you hear of an unlicensed broadcaster in Iowa, but it apparently has happened. This with word that the FCC has issued a $10,000 Notice of Apparent Liability for Forfeiture to Thomas Costa for allegedly operating an unlicensed radio transmitter on the frequency 87.9 MHz in Iowa City. Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--

This past September 17th agents from the Enforcement Bureau's Kansas City Office used direction finding to locate the source of radio frequency transmissions on the frequency 87.9 MHz to a transmitting antenna mounted on a chimney of a residence in Iowa City. The agents determined that the signal exceeded the limits for operation under Part 15 of the Commission's rules and therefore required a license. The Commission's records showed that no authorization was issued to anyone for operation of an FM broadcast station at or near this address.

On September 18th agents from the Kansas City Office again used direction finding and confirmed that the station was still in

operation. The agents, this time accompanied by the property owner, inspected the unlicensed station's antenna and transmitter. The latter was located in a locked basement room. It turned out that the station was automated with a computer providing audio to a non-certified FM transmitter. The property owner stated that one Thomas Costa rented the basement room housing the station.

Later that day, the agents interviewed Costa. At that time he admitted that he rented the basement room and installed the radio station equipment but denied operating it. Rather he claimed that several unnamed individuals owned the equipment and gave him rent money each month which he, in turn, gave to the property owner. Costa also asserted that the alleged operators of the station did not provide him with their names or contact information in order to protect him and them from the FCC. He also stated that he was told by the unnamed operators that he could expect the Commission to inspect the station at some point and order him to cease operation.

Now in issuing the $10,000 N-A-L the FCC says that the record evidence in this case is sufficient to establish that Costa violated Section 301 of the Communications Act. Also that Costa can be said to have "operated" the unlicensed radio station because the evidence shows that he exercised control over the general conduct or management of it despite his claim that other individuals, who he refused to identify, were actually the operators. In this regard, Costa admitted that he rented and paid the monthly rental for the locked room housing the unlicensed station, and that he installed the station equipment.

Further, during the interview with the FCC agents, Costa mentioned that he was warned about the unlawfulness of the operation by unnamed individuals, who told him that he could expect the Commission to inspect the station and order him to cease operations at some point. Assuming the statement to be true, it appears that, in spite of the warning, Costa nonetheless allowed the station to continue to operate in the basement room. The FCC says that these facts indicate that Costa consciously operated and/or otherwise was involved in the general conduct or management of the unauthorized station.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Costa was given the customary 30 days to pay the proposed fine or to file an appeal. (FCC)

**

RADIO LAW: BBG ACCUSES SYRIA OF JAMMING SATELLITE SIGNALS (Print version only)

The United States Broadcasting Board of Governors and several other international broadcasters believe jamming of their satellite signals

last week came from Syria.

According to an announcement from the board, the interference has disrupted satellite transmissions in Europe and the Middle East. Specifically, the jamming hit satellites operated by Eutelsat, a European satellite operator, and affecting TV and radio programs reaching millions of households.

The board noted that the jamming started when Eutelsat announced it would terminate transmission of 19 channels belonging to Islamic Republic of Iran Broadcasting. Several international broadcasters also criticized the jamming, citing disruption of broadcasts from Russia through Europe, Central Asia and the Middle East. Here in the United States, the Broadcasting Board of Governors said signals of Voice of America, Radio Free Europe and the Middle East Broadcasting Networks were affected.

According to the Broadcasting Board of Governors, an earlier round of jamming this month was traced directly to Iran. (RW)

**

RADIO ON THE WEB: SOUTHGATE NEWS OPENS AMATEUR RADIO TODAY DISCUSSION BOARD

Great Britain's Southgate Amateur Radio News has launched a new amateur radio forum discussion board. Called the Ham Radio Today the forum contains lots of amateur radio news stories, plus sections for special interest groups. While geared mainly toward Europe and IARU Region 1, the board offers subjects of interest to hams world-wide including specialty areas to discuss 5 MHz operation, ham radio satellites EME operations and reports from several of the worlds best known propagation experts. Registration is free and only takes a minute. You'll find the new forum board at www.hamradiotoday.com (Southgate)

**

RADIO EDUCATION: ARRL GRANT RETURNS HAM RADIO TO MISSOURI SCHOOL

Thanks to a dedicated teacher and a grant from the American Radio Relay League, ham radio is back at a suburban Saint Louis, Missouri school.

STL Today reports that a new amateur radio club has been created at St. Charles High School, in St. Charles County. The club was started by science teacher Ellen Zerr, KD0PES, after the ARRL recently awarded nearly $2,000 to the school. Zerr used the grant to buy radio gear and antennas for the station.

The last time the school had an active amateur radio club was way back in the 1960's. You can read the full story at tinyurl.com/new-missouri-club (STL Today)

**

HAM HAPPENINGS: ANOKA COUNTY ARC CELEBRATES THE HALLOWEEN CAPITOL OF THE WORLD (Print Version Only)

Turning to the social scene, since 1920 the City of Anoka, Minnesota, has hosted some major Halloween festivities, earning the reputation of "The Halloween Capitol of the World". To commemorate this years festivities the Anoka County Radio Club will operate a special event station W0YFZ from Anoka High School parking lot on Saturday, October 27th from 10 a.m. to 6 p.m. local time. Visitors are welcome to come observe the special event Haloween station. More about this operation is on the web at tinyurl.com/anoka-halloween-event (KB1UOG)

NAMES IN THE NEWS: 14 YEAR OLD MAKES DIGITAL DXCC

The ARRL report that 14 year old radio amateur Tom Jose, VU3TMO, has just achieved his Digital DXCC award.

First licensed when he was 13 years old in December of 2011, VU3TMO is a 3rd generation ham operator in his family along with his parents. VU3TMO is a member of India's National Institute of Amateur Radio and the Dayton Amateur Radio Association. He is reported to be one of the youngest hams in his nation. (ARRL, Southgate)

**

NAMES IN THE NEWS: ARRL MEDIA AND PUBLIC RELATIONS MANAGER ALLEN PITTS, W1AGP, RETIRES

After more than eight years as the ARRL Media and Public Relations Manager, Allen Pitts, W1AGP, has retired.

During his tenure, Pitts was responsible for developing public relations campaigns that featured the many facets of the Amateur Radio Service. The first of these was the simple but very effective Hello Radio campaign in 2006 that highlighted the fun and friendships of ham radio. That was followed by Emergency Radio, which built on the ARRL and the Amateur Radio Service's response during Hurricane Katrina. Next was his We Do That - Radio in 2008 showcased the technologies used in Amateur Radio. Pitts rounded out his career by spearheading the 2011 with the Do It Yourself or DIY campaign aimed at recruiting members of the burgeoning maker and hacker community to expand their horizons through becoming amateur radio operators.

While W1AGP has retired from day to day work at ARRL headquarters, he has not severed his ties with the national society. The ARRL is currently seeking a new Media and Public Relations Manager. In the interim, Pitts has agreed to continue on a very limited part-time basis during the selection process to find a successor. He also hopes to be able to work as a consultant on the League's Centennial projects, celebrating the 100th anniversary of the ARRL. (ARRL)

WORLDBEAT: OPERATOR NEEDED FOR 2013 AMERICAN SAMOA DXPEDITION

Are you interested in going to American Samoa on a DXpedition? If yes, listen up.

Bill Worthman, N6MW, and Jim Colletto, N6TQ. will be active stroke KH8 from a hotel in Tutuila between March 19th and the 28th of next year. Their location on the island will be well south of the Pago Pago harbor area to avoid as much mountain low angle cut off as possible.

According to their website, they have an opening for one more operator to go along on this operation. For more details and updates, visit n6mw.jimdo.com on the World Wide Web. (OPDX)

**

WORLDBEAT: DARC SEEKS NOMINATIONS FOR ANNUAL HORKHEIMER PRIZE

Nominations are being invited by the German national amateur radio society, the DARC, for the prestigious Horkheimer Prize. The prize consists of an etched glass trophy and a monetary prize for non-personal use. The money is to be spent for the promotion of amateur radio however the recipient chooses. The prize can be awarded to one or more persons or institutions.

Any member of an amateur radio society in the International Amateur Radio Union is eligible, and self proposals are permitted. Nominations must be submitted to DARC by March 28, 2013, and the prize itself will be awarded at the opening of next year's Ham Radio convention in Friedrichshafen. More information in the German language is on-line at www.darc.de (DARC, GB2RS)

HAM RADIO IN SPACE: FUNCUBE-2 A STEP CLOSER TO LAUNCH

The highly publicized Funcube satellite has taken another step toward becoming a reality. This with work that AMSAT-UK has delivered a set of completed Funcube 2 subsystem boards to Clyde Space Ltd in Glasgow. The handover took place on October 19th. The boards represent the Funcube-2 subsystem that will become a part of the UKube-1 spacecraft.

Three circuit boards make up the spacecraft. One is for command, control and telemetry. An RF Board that houses the command receiver, telemetry transmitter and linear transponder and a third board contains

the 400 milliwatt VHF amplifier and sensors.

Funcube-2 will provide a 435 to 145 MHz linear transponder for amateur radio SSB and CW communications and telemetry for school students around the world. Its host, the UKube-1 spacecraft is expected to be launched on a Soyuz-2 launcher from the Baikonur Cosmodrome launch facility in Kazakhstan in March 2013. (AMSAT-UK)

**

RADIO FROM SPACE: NEW EXOPLANET DISCOVERED ONLY 24 TRILLION MILES AWAY

Scientists using visual and radio telescope data have discovered the closest planet outside our Solar System. One that is orbiting a sun-like star about 24 trillion miles away from Earth.

According to astronomers at the European Southern Observatory the so-called exoplanet has about the same mass as Earth but it circles its star much closer than Earth does the sun, The exoplanet which is described as a planet outside our Solar System is outside the "habitable zone" for possible life because of hot and rocky conditions Temperatures on its surface could reach some 2,200 degrees and the surface is likely to be lava.

Scientists discovered the planet while monitoring stars in Alpha Centauri, a neighboring star system, only about four light years away. That system is peppered with stars orbiting one another, making the hunt for planets difficult, astronomers explained.

This is now the closest of more than 840 confirmed exoplanets. This according to research published in the British science journal Nature. (Nature)

**

DX

In DX, DF7NX is currently operational from Bolivia as CP8MW. He is active on HF Bands mostly operating CW. QSL as directed on the air.

LU3XEM, LU3XEI, LU1XBF, LU5VAT and LU7DSY will be active from Penguin Island November 2nd to the 4th as LTZ0. They will be operational on 80 through 10 ethers using CW, SSB and PSK 31. QSL this operation via LU7DSY

DF7NX is currently operational from Bolivia as CP8MW. He is active on the High Frequency bands mostly using CW. QSL via his home call, either direct or via the bureau.

JR1MLT has been heard on the air from Singapore as 9V1KK. He is reportedly active on all of the High Frequency bands using various modes. QSL direct only via JH1ILX.

N5ZO will be active from Ascension Island through October 30th as ZD8O. He plans to operate the CQ WW DX SSB Contest in Single Operator

All Band category. If you make contact, QSL via OH0XX

ND9M will be active from Diego Garcia Island through November 4th under the callsign VQ92JC. He also plans to operate the CQ World Wide DX SSB Contest while at that location. If you work him please QSL via home call.

Lastly, ZS3Oh is currently on the air from Botswana as A22LL. He is reported to be active on HF Bands mostly using CW. QSL via home call.

(Above from various DX news sources)

THAT FINAL ITEM: BRITISH SOPRANO SARAH BRIGHTMAN TO BE THE NEXT VISITOR TO THE ISS

The British songstress who created the role of Christine Daae (pron "Die Aye") in Sir Andrew Lloyd Webbers musical stage classic The Phantom of the Opera will be the next space tourist to visit the International Space Station. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has the details:

--

On Wednesday, October 10th it was announced in Moscow that world famous soprano Sarah Brightman had passed the required mental and physical examinations to permit her fly to the ISS. And in a video of the press conference made public by the Russian Space Agency Roscosmos, and the singer herself, Brightman described how as a child she was inspired by the Apollo 11 landing on the moon.

--

Brightman: "When I look back, my minds eye brings me to a rush of images from all of the incredible things that I have been privileged to experience in my life. But if I keep tracking back, my thoughts eventually come to rest on a flickering TV screen in 1969. There as a small and incredulous child I watched a man bound gently from the steps of a rocket ship and land on the surface of the moon.

"This really was an adventure. It was something miraculous.

"For me it was an epiphany. From that moment I began looking into the future. I began to dream about what life might hold in store for me and of what I could accomplish."

--

During her comments, Brightman said the trip would serve as a way to promote environmental awareness and to encourage women's education by helping to close the gender gap in the sciences. For this she has called on the United Nations Educational, Scientific and Cultural Organization, better known as UNESCO, to join with her to make it happen:

--

Brightman: "There are two key areas that we have identified which unify my personal passions, UNESCO's objectives and my spaceflight. Both are inexplicably linked and both relate to issues of sustainability."

--

After completing an upcoming world tour to promote her new album appropriately called Dream Chaser, Brightman will undertake six months of training at Star City in Moscow in preparation for her mission to the International Space Station. Once on-orbit she is expected to take part in several educational ventures as just mentioned but it is not yet known if she will obtain an amateur radio license or has any plans to make any ham radio contacts from the ISS.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

This is not Sarah Brightman's first venture into the area of science education. Earlier this year in conjunction with Virgin Galactic she launched the Brightman STEM Scholarship program. STEM is an acronym for the words science, technology, engineering, and mathematics. Her program is designed to help young women in the United States to pursue STEM education across their four year college careers.

(Roscosmos, Southgate, others)

```
WOCN31 CWHX 261145
Tropical cyclone information statement updated by the Canadian
Hurricane Centre of Environment Canada at 8:41 AM ADT Friday
26 October 2012.
---------------------------------------------------------------------
Tropical cyclone information statement for:
Nova Scotia
Prince Edward Island
New Brunswick
Southern Quebec
Southern Ontario.

For hurricane Sandy.

The next statement will be issued by 3:00 PM ADT.

This is an updated preliminary information statement to discuss
The potential impact of hurricane Sandy in Canada. An updated
Statement is planned for 3 PM ADT.

---------------------------------------------------------------------
==discussion==
Hurricane Sandy will be moving through the Bahamas today with winds
in excess of 120 km/h. During the weekend Sandy is forecast to track
northward while remaining at or near hurricane strength. Sandy will
begin to lose some of its tropical characteristics during the next
two days, it will however remain a large and powerful cyclone as it
shifts toward the East Coast of the United States.

Sandy will quite likely impact parts of Eastern Canada early next
week. The track and intensity will, as always, depend on many
changing factors over a period of several days. Thus, it is too
early to meaningfully state how the storm will affect particular
areas. At this point in time we encourage consulting the forecasts
periodically during the weekend.

Please also refer to the public and marine forecasts and warnings
issued by Environment Canada for your area.

End

Amateur Radio Newsline Report 1837 October 26 2012

Posted: 25 Oct 2012 08:25 PM PDT
http://forums.qrz.com/showthread.php?366084-Amateur-Radio-Newsline-Report-1837--October-26-2012&goto=newpost

Amateur Radio Newsline☐ Report 1837 ☐ October 26 2012

Amateur Radio Newsline report number 1837 with a release date of October 26 2012 to follow in 5-4-3-2-1.

The following is a QST. New Zealand hams will have to wait a while longer to gain full access to 6 meters; Germany☐s national ham radio society says no to a new pan-European BPL standard; the Hurricane Watch Net activates for hurricane Sandy; GRE quits the scanner business and a well known British soprano will be the next space tourist to visit the International Space Station. Find out who on Amateur Radio Newsline☐ report number 1837 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: CLOSURE OF TV CHANNEL 1 AND ZL ACCESS TO 6 METERS UPDATE

Changes will be coming to the 6 meter band down-under, but not as quickly as some hams in New Zealand had hoped for. Amateur Radio Newsline☐s Jim Meachen, ZL2BHF, reports:

*** EDITOR'S SPECIAL NOTES (by Tedd, KB8NW): This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX SSB Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW DX SSB Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 19th-October, through Friday, 26th-October there were 230 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T30, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2M, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work

First Worry Later" (WFWL).

3V, TUNISIA. Operators Hrane/YT1AD and Ashraf "Ash", KF5EYY (SWL 3V4-002), will be active as 3V8SS from the "Radio Club Station of Tunisian Scouts" in Sousse, during the CQWW DX SSB Contest (October 27-28th) as a Multi-Op/ All-Band/Low-Power entry. QSL via LoTW or to LX1NO.

4J/4K, AZERBAIJAN. Members of the "Federation of Radio Sports of Azerbaijan" and the Safari DX Activators Club are organizing a DXpedition to the battle line of the Nagorno Karabakh area between October 25-28th. The DXpedition will use two different callsigns, 4K3K and 4J0K. Please be aware that the mentioned callsigns are only legal to operate in the assigned Nagorno Karabakh area. No other callsigns are issued for the named territory by the Ministry of Communication of Azerbaijan. Any other callsigns are considered illegal. QSL both 4K3K and 4J0K via RW6HS. For more details, please see QRZ.com.

5T, MAURITANIA. Sadao, JA1PBV, is now active as 5T5BV until November 10th. Activity has been on 30/12/10 meters CW and RTTY. QSL via JA1PBV.

5V, TOGO (Reminder). By the time you read this, Wim, ON4CIT, will be active as 5V7TH from Togo (Grid Square JJ06rf) until November 5th. Activity will be on 40-6 meters, including the 30/17/12 meter bands, using CW, SSB and RTTY. Suggested frequencies reported in OPDX.1077. Wim requests on SSB to PLEASE call him only using the "International Radiotelephony Spelling Alphabet". QSL via his home callsign, direct (2 USDs/EU and 3 USDs/US), by the Bureau, LoTW (uploaded year later) or by the ClubLog's OQRS. For more details, visit: http://www.dxpedition.be/5V7TH.html

8Q, MALDIVES. Andrew, G7COD, is once again active as 8Q7AK from Embudu Island on the South Male Atoll, Maldives (AS-013), for three weeks in February 2013. If like last time, this trip is a holiday and he will be active on 80-12 meters, including 30/17/12 meters using CW and SSB. The following are suggested times of operations: 0730-0830z, 0900-1100z, 1300-1500z and 1730-1800z. Suggested frequencies (+/- QRM) are:
CW - 3503, 7003, 10103, 14003, 18073, 21003 and 24893 kHz
SSB - 3795, 7063, 14190, 18133, 21253 and 24953 kHz"
QSL via his home callsign, direct (see Web page) or by the Bureau. Andrew now has a dedicated Web page at: http://8q7ak.freewebspace.com

C3, ANDORRA. Members of the "Andorran Amateur Radio Union (URA)" will team up with a Spanish ham to be active as C37NL during the CQWW DX SSB Contest (October 27-28th) as a Multi-2 entry. QSL via C37URA. Operators mentioned are Josep/C31AT, Josep/C31JM, Beli/C31KC, Michel/C31MO, Martinho/ C31VM, Joan/C31US, Xavi/C32JK and Gerardo/EA3HCJ.

CN, MOROCCO. Operators Stefano/IK2QEI, Matteo/IK2SGC, Flavio/IK1SPR, Manuel/IK3STG, Filippo/IZ1LBG and George/NR5M will be active as CN3A from Safi during the CQWW DX SSB Contest (October 27-28th) as a Multi-? entry. QSL via LoTW or via IV3ZXQ. Visit their Web page at: http://www.facebook.com/pages/CN3A/112969535390789

CR2, AZORES. Toni, OH2UA, will be active as CR2X from Ribeira Grande during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/High-Power entry. QSL via OH2BH. For more details, visit the CR2X Web page at: http://www.cu2a.com

CR2, AZORES (Correction). Kim, OH6KZP, will be active as CR2X from Ribeira Grande during the CQWW DX CW Contest (November 24-25th) [not the CQWW DX SSB Contest] as a Single-Op/All-Band/High-Power entry. QSL via OH2BH.

CR3, MADEIRA. Members of the Madeira Contest Team will be active as CR3A during the CQWW DX SSB Contest (October 27-28th) as a Multi-? entry. Operators mentioned are Joe/CT3BD, Luis/CT3DL, Joe/CT3DZ, Luis/CT3EE, Duarte/CT3EN, Miguel/CT3IA, Tiago/CT3KU, Jose/CT3KY, Jose/CT3NT (CT1BOH) and Tony/CT1FFU. QSL via LoTW.

CY0, SABLE ISLAND. Operators Murray/WA4DAN and Ron/AA4VK continue to be active as homecall/CY0 from Sable Island until October 31st. Activity is focused on 10, 12, and 15 meters where the demand for CY0 is greatest, especially on 10m. Also, they plan to be active in the upcoming CQWW Phone contest on 10, 15, 20, and 40 meters. Look for possible update on: http://www.cy0dxpedition.com

E2, THAILAND. Operators Bob/HS0ZIA, Jack/HS0ZHI and Peter/NO2R will be active as E2E during the CQWW DX SSB Contest (October 27-28th) as a Multi-Single entry. QSL via HS0AC.

E7, BOSNIA-HERZEGOVINA. Operators Richard/9A1TT, Chris/9A5K, Suad/DK6XZ, Ranko/E70R, Vlado/E70T, Sanjin/E71DX, Fuad/E73CQ, Daniel/E73M, Radomir/E74IW, Zoran/E76C, Braco/E77DX, Rob/E77E and Bill/F5SNJ will be active as E7DX during the CQWW DX SSB Contest (October 27-28th) as a Multi-Single entry. QSL via E77E.

EA6, BALEARIC ISLANDS. Luis, EA6XQ, will be active during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/High-Power entry. QSL via the Bureau.

ED8, CANARY ISLANDS. Operators Manuel/EA8DO, Al/EA7JR and Manolo/EA7LL will be active as ED8W during the CQWW DX SSB Contest (October 27-28th) as a Multi-Single entry. QSL via EA8DO.

F6, FRANCE. Members of the Ville de Provins ARC will be active as F6KOP during the CQWW DX SSB Contest as a Multi-2 entry. Operators mentioned are Frank/F4AJQ, Terry/F4TTR, Michael/F4TJE, Olivier/F4FLF, Tony/F8ATS, Antoine/F5RAB, John/F5VHQ, Larry/F6BBO, Serge/F6DZS, Jean-Paul/F8BJI, Jo&#65533;l/F6JMT, Maurice/F5NQL and maybe Romain/F8BUI and Claude/F5GVA. QSL via F6KOP, by the Bureau.

HR9, HONDURAS. Hiro, JA6WFM, will be active as HR9/NP3J during the CQ WW DX SSB Contest (October 27-28th) as a Single-Op/Low-Power entry. QSL via EA5GL only direct. Hiro will be there until January 2014. ADDED NOTE: Hiro mentions to also look for HR9/NP3JA in contest. Operator is Naomi, JM6EBU. QSL via via JM6EBU.

IOTA NEWS.....
AF-019. Emilio, IZ1GAR, will be active as IH9/IZ1GAR from Pantelleria Island (IIA TP-001, WLOTA 0041) between November 22-25th. In the CQWW DX CW Contest (November 24-25th), Emilio will be active as IH9R and as a Single-Op/Single Band (40m) entry. Pantelleria counts as Multiplier Zone 33 Africa Italy for the CQWW DX rule (islands are located over the African continent platform). QSL via IZ1GAR, direct or by the Bureau.

EU-025. The II9K Contest Team will be active as II9K from Sicily during the CQWW DX SSB Contest (October 27-28th) as a Multi-2 entry. Operators mentioned are Giuseppe/IT9HBT, Girolamo/ IT9GNG, Rino/IT9FXY, Vincenzo/IT9ECQ, Sal/IW9FRA, Mike/IF9ZWA, Domenico/IW9GTD, Antonino/IW9HII, Dario/IT9RDZ and Santo/ IT9KZW. QSL via IT9HBT. For more details, see: http://www.ii9k.it

OC-133. Satoshi "Saty", JE1JKL, will be active as 9M6NA from Labuan Island, East Malaysia, during the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band entry. QSL via his home callsign, direct, by the Bureau or LoTW. To see the 9M6NA station, go to: http://jsfc.org/je1jkl/9m6na.html

J3, GRENADA. Operators Terry/KS5Z and Mike/K5KM arrived in Grenada on October 22nd, and will be operating as J38T for the CQWW DX SSB Contest (October 27-28th). Also look for J38K on 12 and 17 meters a day or two before the contests. QSL via operator's instructions.

J7, DOMINICA. Walter, HB9MFM, will once again be active as J79WTA from the Tamarind Tree Hotel near Salisbury on Dominica (NA-101) between October 26th and December 17th. Activity will be holiday style on 160-10 meters using SSB, RTTY, PSK and if possible in SSTV. He will use an IC-7000 with an ACOM 1000 into a dipole 50m above sea level and Spider Beam. QSL via his home callsign, direct or by the Bureau.

KG4, GUAM (News). "The Daily DX" reports [edited]: "Operations by Bill/ KG4WV and Ed/KG4KL are QRT due to loss of the ham shack to Hurricane Sandy which took off the roof and damaged several antennas. This weekend's contest activity by John/KG4EM and Norm/KG4AJ will not happen. We thank all who contacted us and hope to get back here soon to put the shack back together. 73, Bill, KG4WV"

KP2, U.S. VIRGIN ISLANDS. Operators Tony/N2TK and John/K3TEJ will be active as KP2/N2TK and KP2/K3TEJ, respectively, between October 24-31st. Activity will include the CQWW DX SSB Contest (October 27-28th) as a Multi-? entry using the callsign KP2M. Outside of the contest, John will do most of the operating "usually" with an emphasis on 160m and 30/17/12 meter bands using CW and RTTY. QSL KP2M via AI4U. QSL their KP2/homecall to their home addresses. KP2/K3CT is OK via LoTW.

NP4, PUERTO RICO. Otis, NP4G, will be active during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (20m) entry. QSL via LoTW or direct to NP3O.

OJ0, MARKET REEF (Cancelled). Operators Tomi/OG9X, Simo/OH2HAN and Juha/OH6XX had to cancel their planned DXpedition this week and weekend because of bad weather.

PJ4, BONAIRE. Look for PJ4X to be active from Bonaire (SA-006, WLOTA LH-1279) during the CQWW DX SSB Contest (October 27-28th). QSL via W1MD.

PJ7, SINT MAARTEN. Operators Kazu/7L4XDT and Masa/K1GI will be active as PJ7XK and PJ7I, respectively, from Sint Maarten (NA-105, WLOTA 383, DIFO FS-001) between November 18-24th. Activity will be on 160-6 meters using CW, SSB and the Digital modes. Equipment will be a K3 with a 500w amp into a vertical for 160-40m, hexagon beam for 20-10m, 6 element yagi for 6m. QSL PJ7XK via 7L4XDT and PJ7I via JG2BRI. For more details, see the Web site at: http://www.qsl.net/pj7i

3B9SP PIRATE. Any QSOs made after the date October 24th are by PIRATES.

NEW QSL ROUTE. Berti, HB9SLO, is the new QSL Manager for 3B9FR as of October 23rd, 2012.

NEW QSL ROUTE. Publio, I4KMW, will be the new QSL Manager for the G. Marconi Memorial Beacon Robot, IY4M, beginning November 1st, 2012. See details on QRZ.com.

QSL STATUS. The Z81D QSLs will be printed soon and start going out in December.

QSL RECEIVED VIA LoTW: 1A0C, 3G7C, 5P9X, 5W1SA, 9A4WY, 9J3A, A92GE, CO2JD, CT1JOP, DH7LF, DJ3IW, DO4DXA, EA1AKS, EA7IPP, EA8/RW3DO, EI80IRTS, F1ILA, F1RHS, FK/I2GPT, FO4BM, HB0/PA4N, HZ1PS, J28AA, JA0FVU, KH8/DL3DXX, MM0AMW, NH8S, OK6DJ, OX3XR, R5AJ, S50XX, S51DI, SM6NOC, T6MO, TI2HAS, TR8CA, V55V/P, WH0/K0BBC, WP3Z, YF1AR, YT2T and YV5JF

QSLS RECEIVED VIA MAIL: 5U5U, 7O6T, HV5PUL, VK9XS, VK9CS and YE0M

QSLS RECEIVED VIA THE BUREAU: 6V7D, 8Q7DV, 9M2MRS, 9M2TO, 9M4SDX, 9N7DX, AP2TN, CT9/RC5A, CT9/UA1ANA, CY9M, D3AA, KC4/N2TA, HS0ZIV, P3N, R1ANP, RI1ANR, S21YZ, S9DX and T88OW

UA2, KALININGRAD. Dmitri, UA2FB, will be active as UA2K (ex-UA2KK) from the Keeper Telecom LTD Club Station during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (20m) entry. QSL via direct to: Ulrich Mueller, 13 Kreutzacker Str, D-35041 Marburg, Germany. No German stamps please! All cards are replied from Russia. No IBRS please! Bureau QSLs go to the UA2 QSL Bureau.

UI2, KALININGRAD. Igor, UA2FZ, will be active as UI2K during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/High-Power entry. QSL via UA2FZ.

V2, ANTIGUA (NA-100). A team of operators will once again activate the V26B super station at Gunthroppes, during the CQ WW DX SSB Contest (October 27-28th) as a Multi-Multi entry. Activity will be on all bands. Please QSL V26B direct to KA2AEV or LoTW. Visit Team Antigua's Web page at: http://www.team-antigua.com
Operators mentioned are Darrell/AB2E, Bob/W2BZR, Mike/K3GEG, Dale/N3BNA, Brian/N3OC, Sam/WT3Q, Marco/HB9OCR, Roberto/I2WIJ, Don/JH5GHM and Luis/PY5NY. Look for operators possibly to be active before and after the contest using their own V2 callsigns.

V6, MICRONESIA (Update). Haru, JA1XGI will be active as V63XG from Yap Island (OC-012) between December 5-12th. Activity will be on 40-6 meters (especially 30/17/12m) using mainly CW, with some SSB and the Digital modes. Also JT65. Suggested frequencies are:
CW - 7005, 10105, 14005, 18075, 21005, 24895 and 28005 kHz
SSB - 7086, 14175, 18135, 21260, 24940 and 28450 kHz
RTTY - 10140, 14088, 18120, 21088, 24910 and 28088 kHz
JT65 - 7076, 10138, 14076, 18102, 21076, 24920 and 28076 kHz
6m - 7005/CW and 7086/SSB

He will use an IC-7000 into a two element yagi for 17/12m and a fishing rod (only 5m long) antenna. QSL via JA1XGI, direct or by the Bureau. QSOs will be uploaded to LoTW. Look for updates and details on Haru new Web page or Blog page at: http://island.geocities.jp/v63xg/index.htm

http://ja1xgidxvacation.blogspot.com

VI6, AUSTRALIA. John, VK6HZ, will be active as VK6XX during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band or Single-Band (10m)/High-Power entry. QSL via VK6HZ.

XV2, VIETNAM. Mal, VK6LC, will once again return to Vietnam on a "DX Vacation" during the month of November. His schedule is as follows:
XV1LC - from Northern Vietnam during early November
XV2LC - from Ho Chi Minh City during late November
Activity will usually be mainly 20 meters with some 17/12 meters using mostly CW with some SSB. QSL via his home callsign, only direct. He does NOT use the QSL Bureau. Check out QRZ.com for some more details and pictures under VK6LC, XV1LC and XV2LC.

XU, CAMBODIA. Barry, ZL1DD, will be active as XU7AEL from the XU7AAA Rental Shack (Samkam Beach Hotel) in Sihanoukville, Cambodia, during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/Low-Power entry. QSL via his home callsign.

YE0, INDONESIA. The YE0X Team will once again be active from Jakarta during the CQWW DX SSB Contest (October 27-28th) as a Multi-Multi entry. QSL via YB0ZZ. Visit the official YE0X Web page at: http://ye0x.com

YE2, INDONESIA. Members of the ORARI Daerah Jawa Tengah Contesting Team will be active as YE2R from Semarang on the Island of Java (IOTA OC-021, WLOTA L1660), during the CQWW DX SSB Contest (October 27-28th) as a Multi-Multi entry. QSL via YB3MM. Operators mentioned are Djoko/YB1TJ, Bobby/YB2BBY, Hans/YB2DX, Seno/YB2LSR, Jon/YB2ECG, Sri/YB2TET (YL), Dani/YB2TJV, Deta/YB2VTO (YL), Bagus/YB2WB, Tom/YB3KM, Buntoro/YB3PXF, Adhi/YB3MM, Imam/YB4IR, Joy/YB0NSI, Nur/YC2WBF, Budi/YF1AR, Bob/KR7O and Iwan/W7NZ. For more details, look at: http://www.ye2r.wordpress.com

Z6, KOSOVO. The following was reported on QRZ.com [edited]:
"FROM PHRISTINA TODAY 2012-10-25.
LATEST FROM THE REPUBLIC OF KOSOVO, Z60WW

Mission Goodwill Kosovo is an alliance of several nationalities in their mission to bring Kosovar hams back on the air after more than a twenty years hiatus. The initial Z60K activity was to launch Amateur Radio in this fledgling republic of two million people. Their Amateur Radio association (SHARK) is now fully registered and its initial member-ship is expected to reach fifty (50) this year. You may read about some of their first operators on the QRZ.com Website: Z61AJ, Z61DD, Z61DX, Z61FF, Z61VB.
Today SHARK has announced plans for their first participation in the CQWW DX Contest, as Z60WW, using two stations in the multi-two category and employing a multi-national team in addition to their own members. The station has an impressive lay-out with a good location in the capital, Pristina, using a beam antenna and two K3s with amplifiers. This is the first time for the Z6 prefix and the Republic of Kosovo will appear in any contest thus everyone is urged to update their CTY files. Usage of

80m is now allocated as of today for the first time.
Operators will be: Ali/Z61DD, Driton/Z61DX, Feti/Z61FF, Stein/LA4MIA,
Martti/OH2BH, Dusan/S52DD and Teemu/SM0W.
QSLs for this operation via OH2BH."

ZL, NEW ZEALAND. Members of the Quake Contesters Group will be active as
ZL3X during the CQWW DX SSB Contest (October 27-28th) as a Multi-2/
High-Power entry. QSL via ZL3PAH or LoTW. Operators mentioned are Mark/
ZL3AB, Andrew/ZL3ADW, Don/ZL3DMC, Byron/ZL3DXT, Andrew/ZL3DW, Geoff/ZL3GA,
Graeme/ZL3GK, Mike/ZL3MJS and Phil/ZL3PAH.

ZM4, NEW ZEALAND. Members of the East Coast Contesters ZM4T/ZM2M Team
will be active using the callsign, ZM4T, in the CQWW DX SSB Contest
(October 27-28th) as a Multi-2 entry. Operators mentioned are: Lee/ZL2AL,
ZL2CC, Gary/ZL2IFB, Holger/ZL3IO, Peter/ZL2LF, Tom/ZL2MY, Phil/ZL2RVW,
Stan/ZL2ST and Wayne/ZL2WG. QSL via ZL2AL, direct or LoTW or OQRS. Visit
the ZM4T Web page at: http://www.zm4t.com
Mark, ZL3AB, adds details about their QTH, "Back at our hillside location
and having learnt some valuable lessons from the CQ WW RTTY contest, we
have warmer clothes, some better antennas and in the immortal words of Tim
the Toolman Taylor 'more power!' planned as well as a Cluster connection
that actually works!"

The following stations are expected to be active in the
CQ World Wide DX SSB Contest (October 27-28th, 2012)

Thanks to Bill, NG3K, for providing OPDX readers with the following
consolidated listing of the participants in the 2012 CQWW DX SSB Contest.
For a more detailed listing (and up-to-date changes/corrections) in HTML
format, please visit Bill's Web page at:

Propagation Forecast Bulletin #43 de K7RA:

Posted: 26 Oct 2012 05:41 AM PDT
http://www.eham.net/articles/29214

Good conditions should prevail for the CQ World Wide SSB DX Contest this weekend. A chance of solar flares has greatly diminished in the past few days, and the latest forecast has planetary A index at a steady and quiet 5 for this weekend and beyond, through the first week in November.

Ham Is Where The Heart Is:

Posted: 25 Oct 2012 05:36 PM PDT
http://www.eham.net/articles/29212

Gopal Madhavan is seldom bamboozled by new technology. At a poky little room that serves as his personal ham radio station, he displays admirable mastery of Ham Radio Deluxe (HRD), a Windows software that allows a slew of radio operations to be performed on the computer. Let the tech-savvy 30-somethings out there, who curl their mouths and mutter "Big deal!" know that Madhavan is 76 years old! While most hams of his generation struggle to come to grips with the constantly evolving software-defined ham radio system, Madhavan is on top of it. As a qualified engineer, Madhavan has a clear advantage. But it is a deep-rooted passion for the hobby that has provided the impetus to embrace and master new technologies.

//
Radio Club On the Air in Anoka this Saturday:

Posted: 25 Oct 2012 05:34 PM PDT
http://www.eham.net/articles/29211

The Anoka County Radio Club will commemorate Anoka's long-standing Halloween celebration Saturday, Oct. 27 from 10 a.m. to 6 p.m. by

assembling at the Anoka High School parking lot and operating a long-distance amateur radio station as part of the 2012 Anoka Halloween Capital of the World festivities. "Since 1956, the Anoka County Radio Club has participated in many civic activities in the county,and it seemed like a great idea to get involved in the Anoka Halloween festivities and help get the word out to other amateur radio operators around the world," said the radio club's event chairperson, Dana Johnson. Amateur radio operators (also known as "ham" radio operators) are licensed by the FCC in the United States, and participate in a wide variety of communications-related activities from emergency preparedness exercises to civic event communications support. The Anoka County Radio Club's special event station at the Halloween festivities will transmit and receive voice contacts with other amateur radio operators around the world via a 30-plus-foot antenna tower, tracking names and contact information to send them a postcard after the event - another favorite past-time of some ham radio operators.

QRZ Forums - Hamfest and Convention Calendar

//
Nov. 4, 2012 - ARRL Iowa Section Convention and 41st Annual DRAC Hamfest

Posted: 26 Oct 2012 06:03 AM PDT
http://forums.qrz.com/showthread.php?366112-Nov-4-2012-ARRL-Iowa-Section-Convention-and-41st-Annual-DRAC-Hamfest&goto=newpost

The ARRL Iowa Section Convention and 41st Annual DRAC Hamfest and Computer Show will be held at Davenport, Iowa on Sunday, November 4, 2012, at the Clarion Hotel Conference Center, 5202 Brady Street. The featured speaker will be Larry Wolfgang WR1B, ARRL QEX Editor, from ARRL Headquarters. He will give two forums on ☐My Favorite Hints & Kinks☐ and ☐An Introduction to HF Digital Communications.☐

Larry has been an ARRL staff member since 1981 and QEX Editor since 2006. He holds a bachelor's degree in physics from Susquehanna University, and taught high school science prior to coming to ARRL. First licensed as WN3JQM in 1968, at the age of 15, Larry also held WA3VIL for many years. He is also very active in the Boy Scouts program and the Scouting Jamboree on the Air.

There will also be an ARRL forum presented by ARRL Midwest Division Director, Cliff Ahrens K0CA, and a program by Iowa Section Manager Tom Brehmer N0LOH on ☐My First Dayton and the ARRL Iowa Section.☐

The hamfest will include commercial vendors, and everything from parts to complete stations, computer systems, hardware and software.

For more information, see the Convention☐s web page:

http://www.arcsupport.com/drac/hamfest.html

or contact John Hoenshell N0BFJ, at n0bfj@arrl.net.

Hams and family will have a chance to meet and greet Larry, Cliff and Tom on Saturday, November 3rd at 7:00 pm at Frank's Pizza, 2297 Falcon Ave. in Bettendorf, Iowa. (Near the corner of 53rd and 18th) This is Dutch Treat in the banquet room. No RSVP needed.

SARL NEWS - SUNDAY 28 October 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

SARL MEMBERS TO GET 10% DISCOUNT ON BOOKS

SARL TO PRESENT AMATEUR RADIO'S NEEDS IN THE UHF AND MICROWAVE BANDS AT ICASA HEARING NEXT WEEK

NEW AWARD

DARC TO OPPOSE NEWLY PROPOSED EUROPEAN PLT STANDARD

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

SARL MEMBERS TO GET 10% DISCOUNT ON BOOKS

>From 1 November SARL members will enjoy a 10% discount on books ordered from the South African Amateur Radio Development Trust. A list of available books can be found on www.amateurradio.co.za. The latest edition to books available in South Africa is ARRL's Low Power Communication - the art and science of QRP and Short Antennas for 160 Meter Radio. The book dares to discuss the possibility of smaller antennas for this intriguing band. Intended for amateurs with advanced skills in antenna modelling, Grant Bingeman, KM5KG, walks you through the theory behind innovative designs for relatively compact antennas. You'll learn how to enhance bandwidth, minimize loss, and employ other techniques to enjoy 160 meters with limited real estate.

SARL TO PRESENT AMATEUR RADIO'S NEEDS IN THE UHF AND MICROWAVE BANDS AT ICASA HEARING NEXT WEEK

The South African Radio League will discuss amateur radio's needs for allocation in the 2,3; 3,5 and 5 GHz bands at the ICASA hearing on the draft frequency migration regulation and frequency migration plans to be held on 1 and 2 November 2012. A few weeks ago the SARL put forward its requirements for allocations in these bands in line with the IARU Region 1 spectrum requirements for amateur radio document.

DARC TO OPPOSE NEWLY PROPOSED EUROPEAN PLT STANDARD

Germany's national amateur radio society, the Deutscher Amateur Radio Club, or DARC, will be asking the German Commission for Electrical, Electronic & Information Technologies to oppose a new pan-European draft Power Line Transmission standard. During its October 22nd meeting, the DARC Board discussed the pros and cons of the proposed draft standard. While it said that it recognizes the new draft provided for some non-binding commitments for notching out of certain frequencies in the amateur bands, it also noted that it fears the future ambitions of the manufacturers of other PLC products in the direction of higher limits for the emission of harmful electromagnetic or EMC interference. This could lead to a weakening of the previous limits in other European EMC standards.

This new standard concerns the devices that people install in their homes to run data over their house wiring. It has nothing to do with PLC or BPL that is carried over the company power networks.

OCTOBER RADIO ZS ON THE WEB AND IN THE MAIL

The October edition of Radio ZS is now available on the web to members. The printed version has also been mailed. In this edition Hannes Coetzee, ZS6BZP, writes about an innovative technique for generating a wideband quadrature LO signal as required by Amateur SDR and phasing type SSB applications. This technique only requires a LO input frequency of twice the operational frequency and not four times as that used by current designs. The halving of the required input frequency considerably simplifies the design of SDR solutions covering either more than one Amateur band or even the whole HF band.

Read part I of Wireless Telegraphy during the Anglo-Boer War of 1899 - 1902 by Duncan Baker. Build an End Fed 40 Metre Half Wave Antenna, read about spider antennas and get up to speed with RaDAR and the ZS4U Supapix Transceiver.

If you are not a member yet, have a look at the October edition of Radio ZS and you will see what you are missing. To get a free trial copy of this edition of Radio ZS send an email to artoday@sarl.org.za with OCT Radio ZS in the subject line.

NEW ZEALAND AMATEURS MAY GET 6 m SOON

Amateurs across New Zealand may have to wait a bit longer to get full access to the 6 metre band. As previously reported, 50 to 51 MHz down-under is to be returned to amateur radio once all Channel 1 television has ceased using the spectrum and the current management

right for this band expires.

What may not be known by some radio amateurs is that the last New Zealand channel 1 television transmitter is not due to close down until November 2013. After that, the management right under which it operates, does not expire until August 2015.

Because of this, the New Zealand national amateur radio society, NZART, is working with the nation's Radio Spectrum Management on arrangements for the period between when all the Channel 1 transmitters are turned off and their management right expires. In the meantime any New Zealand amateur in an area where TV channel 1 is no longer operating can apply for a permit to operate on the band.

NEW MEMBER The SARL welcomes Roelie Kriel ZSL1049 as a new member. Welcome Roelie.

WHAT IS YOUR MEMBERSHIP STATUS

If there is any doubt about whether youR subscripion payment has been received or any other detail of your membership status, you can easily check it yourself by going to the web address given at the end of this news item. If there is any problem with your membership, contact the admin office admin@sarl.org.za or the secretary secretary@sarl.org.za.

The web address where you can do the check is http://www.sarl.org.za/public/Membercheck.asp

NEW AWARD

The SARL has received a substantial donation from SAATI (the SA Amateur Telecommuncations Institute). The proceeds on the investment of this donation are to be used to fund a new annual award, the SAATI Technology Award.

The purpose of this award is to stimulate activity and development on amateur bands and to reward radio amateurs who have contributed to this objective, especially activity on digital and lesser known modes or new modes of activity.

To enable clubs to nominate amateurs for this award, the details of the award and the qualifying conditions will be published on the web well before the 2013 AGM.

SAATI was founded in October 1975 with 10 members. It grew in membership and SAATI made an enormous contribution to amateur digital communication. Of the original founding members, only Ams, ZS6YV, and Marten, ZS6ZY, are still active members.

HAMNET GAUTENG SOUTH CHALLENGE 2012 WINNERS ANNOUNCED

On 7 October 2012 HAMNET members participated in the 2012 HAMNET Gauteng South Challenge. Members were required to show skills in operating field stations using multiple modes and multiple bands.

The winners were: Glynn Chamberlain, ZS6GLN Pieter Searle, ZS6PHS Celeste Searle, ZS6CNS

These radio amateurs received 2 x Handheld Radios and a set of DSP headphones. Thank you to their sponsors, Leon ZS6LMG, Marc, ZS6MDH, and Bato, ZS6BAT. Prizes were valued at R4000-00 in total. Marc, ZS6MDH, also sponsored the 2012 HAMNET GS Shield. Thanks Marc.

At the last HAMNET Gauteng South community service event on 25 October 2012 the following members received certificates: Leon Lessing, ZS6LMG Johan Meyer, ZS6DMX Martin Nortman, ZS6TMN Mina Nortman, ZS6MNT Koos van der Merwe, ZS6JPY Willem van der Merwe, ZS6WIM Bato Jakovljevic, ZS6BAT Ivan Pleho, ZS6IVP Hennie Rudman, ZS6RHL Silas Lesejane, ZS6YFH Mpho Mzangwe, ZS6NEO

Congratulations to them all.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at moderate levels. All current visible sunspot regions remain stable and once active Sunspot 1 598 is in a state of decay.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 77.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. 10 m openings will be more frequent due to the higher solar activity.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

3 November - RaDAR Contest, 12:00 to 18:00 UTC. 18 November - Log sheets for the RaDAR Contest to be in to Lichtenberg Amateur Radio Club (LARK), PO Box 410, Lichtenburg, 2740 or by email to zs6lrk@nwinternet.za.org. 17 November - SARL National Field Day will take place between 10:00 UTC on Saturday 17 November and 10:00 UTC on Sunday 18 November.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 UTC on 4 895 kHz ((A new time and frequency!). Reception reports are invited. We are particularly interested in reports of the 4 895 kHz transmission

on Mondays at 18:30 UTC as the frequency is close to the proposed new amateur allocation near 5 MHz. Reception reports from all areas in South Africa would be useful in our bid to ICASA for frequencies pilot studies. Send reports to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled by George Honiball, ZS6NE.

Thank you for listening, 73. /EX

WOCN31 CWHX 271745
Tropical cyclone information statement updated by the Canadian
Hurricane Centre of Environment Canada
At 2:57 PM ADT Saturday 27 October 2012

Tropical cyclone information statement for:
Nova Scotia
Prince Edward Island
New Brunswick
Southern Quebec
Southern Ontario.

For hurricane Sandy.

The next statement will be issued by 9:00 PM ADT.

Hurricane Sandy will be reaching the East Coast of the united
States on Monday. While the most severe conditions will
Affect Northeastern United States, wide-ranging and
Signigicant impacts are expected across parts of eastern
Canada.

==discussion==
1. Summary of basic information at 3.00 PM ADT.

Location: 29.5north 75.7west about 440 kilometres northeast of
Freeport Bahamas.

Maximum sustained winds: 120 km/h.

Present movement: north-northeast 15 km/h

Minimum central pressure: 958 MB

2. Public weather impacts and warnings summary.

Hurricane Sandy is currently north of the Bahamas and is moving
north-northeastward. Although Sandy briefly weakened to a
Tropical storm earlier today maximum sustained winds associated
With it have increased to 120 km/h bringing Sandy back to hurricane
status. During the weekend Sandy is forecast to continue to track
north or northeastward while remaining at hurricane strength. Sandy
will gradually lose some of its tropical characteristics and on

Monday it is expected to take an uncharacteristic turn to the northwest and begin interacting with an approaching trough from the west.

Current indications from various weather models are that Sandy could strengthen before moving inland on the United States East Coast in the vicinity of Delaware late Monday as a very large and powerful storm. It is important to remember that impacts will cover a large area well away from the center. There are various factors Influencing the evolution of the storm and as a result there is Still some degree of uncertainty with respect to the magnitude of The impacts from the storm. For this reason people living in these areas are urged to pay close attention to messages from the Canadian Hurricane Centre and local weather forecasts and possible future warnings throughout the weekend.

A. Rainfall.

Based on the current forecast scenario, Southern and Eastern Ontario and Western Quebec are likely to see the most rainfall from this system with total amounts by Tuesday evening possibly reaching the 50 to 100 millimetre range which would be typical for post-tropical weather systems. However since post-tropical Sandy will be interacting with a stalled front over Ontario, localised heavier rainfall amounts of over 100 mm are possible over areas adjacent To Lake Ontario northward to Algonquin Park.

Heavy rain could also affect other parts of Quebec with amounts of 20 mm likely. At this time, the probability of rainfall amounts exceeding 25 mm for these areas is around 40%. Heavier rain is expected over the Maritimes and amounts in this area could exceed 50 mm.

The precipitation could mix with or turn into snow over parts of South-Central Ontario and extreme Western Quebec as temperatures approach the freezing mark north and west of the storm. A Significant snowfall event could occur over Central Ontario.

B. Winds.

Most areas of Southern Ontario will be subject to very windy conditions with possible severe gusts in excess of 100 km/h especially along Western Lake Ontario and the Niagara Escarpment. These gusts could cause broken tree limbs or in some cases uprooted trees which may result in downed utility lines. Residual falling leaves can also obstruct storm water drainage systems along roadways particularly in urban areas. This combined with heavy rainfall could increase the risk of flooding in some areas.

Very strong northeast winds will also affect eastern and Western Quebec. There is a good probability of wind gusts exceeding 90 Km/h. Gusty winds can also be expected in the Maritimes especially Monday night.

C. Waves.

There will be a risk for large waves along the Atlantic coast of Nova Scotia especially along the south shore as wave activity begins to increase Monday into Tuesday. These large waves could produce pounding surf conditions.

3. Marine weather impacts and warnings summary.

Gale force winds are expected to spread to Canadian waters well in advance of Sandy reaching the United States coastline. Gales are expected on Monday over the Great Lakes, the St Lawrence seaway and western Maritimes marine waters. There is a possibility of storm force winds over southwestern marine areas of the Maritimes and on the Great Lakes.

Also, higher than normal water levels are expected on the st Lawrence River during high tide Monday evening and especially Tuesday evening. This could result in coastal flooding in the Quebec City region.

Visit weatheroffice.Gc.Ca/hurricane (all in lower case) for the latest:

- forecast position, central pressure table.

- strength and predicted wind radii table.

- hurricane track information map.

- technical discussion.

Please also refer to the public and marine forecasts and warnings issued by Environment Canada for your area.

End

FXCN31 CWHX 271800
TROPICAL CYCLONE TECHNICAL INFORMATION STATEMENT ISSUED BY THE CANADIAN HURRICANE CENTRE OF ENVIRONMENT CANADA AT 2.55 PM ADT SATURDAY 27 OCTOBER 2012.

THE NEXT STATEMENT WILL BE ISSUED BY 9.00 PM ADT

1. CURRENT POSITION, STRENGTH, CENTRAL PRESSURE AND MOTION

AT 3.00 PM ADT, HURRICANE SANDY WAS LOCATED NEAR LATITUDE 29.5 N AND LONGITUDE 75.7 W, ABOUT 238 NAUTICAL MILES OR 440 KM NORTHEAST OF FREEPORT. MAXIMUM SUSTAINED WINDS ARE ESTIMATED AT 65 KNOTS (120 KM/H) AND CENTRAL PRESSURE AT 958 MB. SANDY IS MOVING NORTH-NORTHEAST AT 8 KNOTS (15 KM/H).

2. FORECAST POSITION, CENTRAL PRESSURE AND STRENGTH

DATE TIME LAT LON MSLP MAX WIND
ADT MB KTS KMH
OCT 27 3.00 PM 29.5N 75.7W 958 65 120

OCT 28 3.00 AM 31.3N 74.2W 955 65 120
OCT 28 3.00 PM 33.2N 72.8W 950 65 120
OCT 29 3.00 AM 35.3N 72.0W 950 70 130
OCT 29 3.00 PM 37.2N 73.2W 955 65 120
OCT 30 3.00 AM 38.9N 75.8W 960 60 111
OCT 30 3.00 PM 40.0N 77.1W 968 50 93 POST-TROPICAL
OCT 31 3.00 AM 40.5N 77.4W 975 45 83 POST-TROPICAL
OCT 31 3.00 PM 41.5N 77.3W 980 40 74 POST-TROPICAL
NOV 01 3.00 AM 43.0N 77.0W 985 35 65 POST-TROPICAL

3. TECHNICAL DISCUSSION

A. ANALYSIS

HURRICANE SANDY CONTINUES TO HAVE INTENSE CONVECTION NEAR AND TO THE WEST AND NORTHWEST OF THE CENTRE. BUOY B41010 ABOUT 90 NAUTICAL MILES SOUTHWEST OF THE CENTRE CONTINUES TO MEASURE NORTHERLY GUSTS TO HURRICANE FORCE IN THIS DEEP CONVECTION. SFMR AND DROPSONDE DATA INDICATE A LARGE AREA OF 55 KNOT WINDS IN THIS CONVECTION TO THE WEST AS WELL. WATER VAPOUR IMAGERY STILL SHOWS DRY AIR IN THE MID AND UPPER LEVELS WELL WITHIN THE CIRCULATION TO THE SOUTH AND EAST OF SANDY'S CENTRE.

SANDY TOOK A WOBBLE TO THE EAST THIS MORNING BUT THE LONGER TERM MOTION IS ESTIMATED AT 030 DEGREES AT 8 KNOTS. AIRCRAFT RECONNAISSANCE DATA THIS MORNING INDICATED THAT SANDY HAD REGAINED HURRICANE STRENGTH. IN ADDITION THE WIND
FIELD CONTINUES TO GET LARGER AS MEASURED BY THE AIRCRAFT DATA AND BUOY B41010.

B. PROGNOSTIC

GLOBAL MODELS ARE IN GOOD AGREEMENT FOR SANDY TO ACCELERATE NORTHEASTWARD TONIGHT AHEAD OF A DEEP LAYER TROUGH MOVING INTO THE EASTERN UNITED STATES. A SHORTWAVE TROUGH IS EXPECTED TO MOVE THROUGH THIS
DEEP LAYER TROUGH LATE SUNDAY AND CAUSE SANDY TO TAKE A TURN TO THE NORTHWEST TOWARD THE US EAST COAST. SANDY IS EXPECTED TO REMAIN AT OR NEAR HURRICANE STRENGTH UNTIL MONDAY. PHASE SPACE PROGNOSIS INDICATES THAT ALTHOUGH SANDY WILL BE RECEIVING BAROCLINIC INFLUENCE FROM THE WEST, THE STORM WILL MAINTAIN A WARM CORE UNTIL IT MOVES INLAND. LATE MONDAY NIGHT OR EARLY TUESDAY MORNING SANDY IS EXPECTED TO GO INLAND AS A LARGE POWERFUL CYCLONE WHILE BECOMING POST-TROPICAL.

ON TUESDAY, GLOBAL MODELS INDICATE THAT POST-TROPICAL SANDY WILL BECOME CAPTURED BY THE UPPER TROUGH AS IT MOVES FARTHER INLAND IN THE UNITED STATES. POST-TROPICAL SANDY IS THEN EXPECTED TO WEAKEN AND MOVE SLOWLY NORTH-NORTHEASTWARD, REACHING SOUTHERN ONTARIO BY THURSDAY MORNING. THE REMNANTS OF SANDY WILL BE GREATLY WEAKENED AND WILL THEN SLOWLY MOVE NORTHEASTWARD WITH THE UPPER LOW. IT IS IMPORTANT TO NOTE THAT THE BIGGEST IMPACTS IN CANADA FROM SANDY WILL OCCUR WELL BEFORE THE CENTRE MOVES INTO CANADA. IN FACT THE STORM WILL LIKELY BE GREATLY

WEAKENED BEFORE ENTERING CANADA.

VERY STRONG WINDS AND AREAS OF HEAVY RAIN ARE EXPECTED IN PARTS OF
SOUTHERN ONTARIO AND QUEBEC LATE MONDAY AND TUESDAY AS POST-TROPICAL
SANDY APPROACHES. FARTHER NORTH AND WEST SOME SNOW IS LIKELY
ESPECIALLY OVER HIGHER ELEVATIONS. IN ADDITION, GUSTY WINDS AND RAIN
CAN BE EXPECTED IN PARTS OF THE MARITIMES ON TUESDAY AS A BAND OF RAIN
MOVES NORTHWARD WELL TO THE NORTHEAST OF SANDY'S CENTRE.

C. PREDICTED WIND RADII (NM)

Radio Club, Scouts Use Ham Radio:

Posted: 26 Oct 2012 05:07 PM PDT
http://www.eham.net/articles/29219

The Third Saturday in October has lost its luster in recent years, as the Vols have lost the past six games against Alabama. For UT's Amateur Radio Club, however, The Third Saturday in October has a different meaning. Every year, the Boy and Girl Scouts of America participate in the "Jamboree-on-the-Air" on October's third Saturday, a chance for members to contact other scouts around the globe. They also gain experience with amateur radio, known commonly as ham radio. A handful of students and an alumna were on hand to help the scouts learn the basics of two-way radio communication. "We presented a class to them about amateur radio, and how to use the radio," Bobbie Williams, the advisor and call trustee for the club, said. "Following the class we let them talk on the radio using several different frequencies." With two different radios set up, the club had access to both short range and long range frequencies. Williams said that the new amateur radio buffs were able to make contact with other scouts, despite poor weather conditions. They enjoyed a chance to surf the airwaves, almost to the point of exhaustion. "They had a blast, one of them was so tired he just about fell asleep," Williams laughed.

//
Amateur Radio Operators Help Others Weather the Storm:

Posted: 26 Oct 2012 05:05 PM PDT
http://www.eham.net/articles/29218

BELVIDERE (WREX) - People along the east coast prepare for the affects of Hurricane Sandy. Wind, snow, and rain could all be part of the picture. But even folks not affected by the storm's big waves, hundreds of miles away, stand by with radio waves, to help. Jim Hollich retired recently. Now that he has more time to tinker, he spends a lot of it in his basement, not watching sports or working on his car, but listening and communicating on his radio. "It's a way of developing new friendships," Jim Hollich says. It's a method of communication and depending on propagation, you could speak to anyone in the world." He's part of the Big Thunder Amateur Radio Club, a group of guys who make it a hobby to offer two-way communication to people at other amateur radio stations. In emergencies, they offer their ears to people who might need help. "If somebody in a hurricane-struck area was only able to reach my station, what they would ask me to do is they

would ask me to relay a message to another station that they weren't able to get to," Hollich says.

Hams to Broadcast Worldwide from Boca Grande:

Posted: 26 Oct 2012 05:02 PM PDT
http://www.eham.net/articles/29217

The Port Boca Grande Lighthouse Museum and its sister range light on Gasparilla Island will gain worldwide broadcast exposure from 9 a.m. to 3 p.m. Nov. 3. "The objective is to activate two historical lighthouses on air and communicate all over the world promoting the Boca Grande lighthouses," said Bill Franklin of the American Amateur Radio Lighthouse Society. Franklin said his operators also will demonstrate how amateur radio communications can be set up in the field for any situation. There's no power at the range light location in southern Gasparilla Island. Picnic tables with canopy and restrooms are available. The Port Boca Grande Lighthouse Museum has power, restrooms and gazebo available.

WOCN31 CWHX 280545
Tropical cyclone information statement updated by the Canadian
Hurricane Centre of Environment Canada at 2:54 AM ADT Sunday
28 October 2012.

Tropical cyclone information statement for:
Nova Scotia
New Brunswick
Southern Quebec
Southern Ontario.

For hurricane Sandy.

The next statement will be issued by 9:00 AM ADT.

Hurricane Sandy to transition to large and dangerous
Post-tropical cyclone on Monday. Parts of Maritimes as well as
Southern Ontario and Quebec will feel some far-reaching effects
From post-tropical storm Sandy later on Monday and Tuesday.

Tropical cyclone information statement ended for:
Prince Edward Island.

==discussion==
1. Summary of basic information at 3.00 AM ADT.

Location: 31.5 north 73.7 west about 450 kilometres south-southeast
of Cape Hatteras.

Maximum sustained winds: 120 km/h.

Present movement: northeast 22 km/h.

Minimum central pressure: 960 MB.

2. Public weather impacts and warnings summary.

Hurricane Sandy is currently moving northeastward well southeast of
Cape Hatteras. Sandy is forecast to continue to this track today
then gradually transition into a large and intense post-tropical
cyclone on Monday as it turns toward the northwest. It is possible
that this interaction could intensify the storm slightly further -

even after transitioning into a post-tropical system - prior to moving inland somewhere along the New Jersey coast late Monday night or Tuesday morning.

It is important to emphasize that impacts from post-tropical Sandy will extend over a large area well away from the storm center. In additon there are still various factors that could influence the evolution of the storm and as a result there is still some degree of uncertainty with respect to the magnitude of the potential impacts from the storm over Canadian territory. For this reason people living in these areas are urged to pay close attention to messages from the Canadian Hurricane Centre as well as forecasts from Regional storm prediction centres in the possible event of future weather warnings.

Additional information on potential impacts in Ontario and Quebec Can be found in the wocn11 special weather statement issued by The Ontario storm prediction centre, and in the wocn10 special weather statement issued by the Quebec storm prediction centre.

A. Rainfall.

Based on the current forecast scenario, rain from post-tropical Sandy won't begin to affect Canadian territory until later Monday night or Tuesday morning. Southern and Eastern Ontario and Western Quebec are likely to see the most rainfall from this system with total amounts by Tuesday evening possibly reaching the 50 to 100 millimetre range which would be typical for post-tropical Weather systems. However since post-tropical Sandy will be interacting with a stalled front over Ontario, localised heavier rainfall amounts of over 100 millimetres are possible over areas adjacent to Lake Ontario northward to Algonquin Park.

Heavy rain could also affect other parts of Quebec with amounts of 20 millimetres likely. At this time, the probability of rainfall amounts exceeding 25 millimetres for these areas is around 40%. Heavier rain is expected over the Maritimes and amounts in this area could exceed 50 millimetres.

The precipitation could mix with or turn into snow over parts of South-Central Ontario and extreme Western Quebec as temperatures approach the freezing mark north and west of the storm.
A significant snowfall event could result over Central Ontario.

The Maritimes will likely see significant rainfall late Monday night and Tuesday - and possibly lingering into Wednesday - from an evolving frontal system wrapping around the large upper-level circulation from post-tropical Sandy.

B. Winds.

Most areas of Southern Ontario will be subject to very windy conditions with possible severe gusts in excess of 100 km/h

especially along Western Lake Ontario and the Niagara Escarpment. These gusts could cause broken tree limbs or in some cases uprooted trees which may result in downed utility lines. Residual falling leaves can also obstruct storm water drainage systems along roadways particularly in urban areas. This combined with heavy rainfall could increase the risk of flooding in some areas.

Very strong northeast winds will also affect eastern and Western Quebec. There is a good probability of wind gusts exceeding 90 km/h. Gusty winds can also be expected in the Maritimes especially Monday night.

C. Waves.

Large waves are very likely over portions of the Great Lakes beginning late Monday and into Tuesday. High seastates up to 6 Metres are likely over Southern Lake Huron.

There will be a risk for large waves and pounding surf along the Atlantic coast of Nova Scotia especially along the south shore as wave activity begins to increase beginning late Monday and peaks On Tuesday. These large waves could produce pounding surf conditions and the possibility of locally elevated water levels.

3. Marine weather impacts and warnings summary.

Gale force winds extend several hundred kilometres outward from The center of Sandy's circulation and are expected to spread to Canadian waters well in advance of Sandy reaching the United States coastline. The Ontario storm prediction centre has issued gale warnings for many parts of the Southern Great Lakes for Monday. The Atlantic storm prediction centre has issued gale warnings for western maritime marine waters for Monday as well. There is a possibility of storm force winds over these areas overnight Monday Or Tuesday.

Also, higher than normal water levels are expected on the St Lawrence River during high tide Monday evening and especially Tuesday evening. This could result in coastal flooding in the Quebec City region.

Visit weatheroffice.Gc.Ca/hurricane (all in lower case) for the latest:

- forecast position, central pressure table.

- strength and predicted wind radii table.

- hurricane track information map.

- technical discussion.

Please also refer to the public and marine forecasts and warnings issued by Environment Canada for your area.

End

FXCN31 CWHX 280600
TROPICAL CYCLONE TECHNICAL INFORMATION STATEMENT ISSUED BY THE
CANADIAN HURRICANE CENTRE OF ENVIRONMENT CANADA AT 2.55 AM ADT
SUNDAY 28 OCTOBER 2012.

THE NEXT STATEMENT WILL BE ISSUED BY 9.00 AM ADT

1. CURRENT POSITION, STRENGTH, CENTRAL PRESSURE AND MOTION

AT 3.00 AM ADT, HURRICANE SANDY WAS LOCATED NEAR LATITUDE 31.5 N AND
LONGITUDE 73.7 W, ABOUT 244 NAUTICAL MILES OR 452 KM SOUTH-SOUTHEAST
OF CAPE HATTERAS. MAXIMUM SUSTAINED WINDS ARE ESTIMATED AT 65 KNOTS
(120 KM/H) AND CENTRAL PRESSURE AT 960 MB. SANDY IS MOVING NORTHEAST
AT 12 KNOTS (22 KM/H).

2. FORECAST POSITION, CENTRAL PRESSURE AND STRENGTH

DATE TIME LAT LON MSLP MAX WIND
ADT MB KTS KMH
OCT 28 3.00 AM 31.5N 73.7W 960 65 120
OCT 28 3.00 PM 33.2N 72.1W 959 65 120
OCT 29 3.00 AM 35.2N 71.3W 957 65 120
OCT 29 3.00 PM 37.9N 71.3W 955 70 130 POST-TROPICAL
OCT 30 3.00 AM 39.9N 73.4W 958 65 120 POST-TROPICAL
OCT 30 3.00 PM 40.5N 75.8W 964 55 102 POST-TROPICAL
OCT 31 3.00 AM 41.0N 76.9W 970 45 83 POST-TROPICAL
OCT 31 3.00 PM 43.1N 77.0W 978 35 65 POST-TROPICAL
NOV 01 3.00 AM 44.8N 77.7W 982 30 56 POST-TROPICAL
NOV 01 3.00 PM 47.0N 77.2W 982 25 46 POST-TROPICAL

3. TECHNICAL DISCUSSION

A. ANALYSIS

DESPITE LOTS OF DRY AIR WATER WRAPPING AROUND THE SOUTHERN AND EASTERN
SIDES OF SANDY'S LARGE CIRCULATION CENTRE, THERE HAS STILL BEEN A FEW
BURSTS OF CONVECTION NEAR SANDY'S CENTER DURING THE NIGHT, AND LATEST
AIRCRAFT RECONAISSANCE DATA INDICATES THE UPPER LEVEL CIRCULATION HAS
STRENGTHENED SOMEWHAT SINCE YESTERDAY. HOWEVER, INTENSITY IS
MAINTAINED AT 65 KNOTS FOR NOW WITH A MEASURED CENTRAL PRESSURE OF 960
MB. CURRENT MOTION IS TOWARD THE NORTHEAST AT 12 KNOTS. SURFACE
OBSERVATIONS ALREADY INDICATE AN UNUSUALLY LARGE RADIUS OF GALE AND
STORM FORCE WINDS EXTENDING OUTWARD SEVERAL HUNDERED MILES IN MOST
DIRECTIONS FROM THE CIRCULATION CENTRE, AND WIND RADII HAVE BEEN
ADJUSTED TO TRY AND REFLECT THIS.

B. PROGNOSTIC

NO SIGNIFICANT CHANGES TO PREVIOUS TRACK OR PHILOSOPHY. THERE IS
STILL A POSSIBILITY SANDY COULD INTENSIFY SLIGHTLY OVER THE NEXT 12 TO
24 HOURS AS ENVIRONMENTAL SHEAR COULD DECREASE SOMEHWAT WHILE UPPER
LEVEL DIVERGENCE REMAINS GENERALLY FAVOURABLE. MOST GLOBAL DYNAMICAL
MODELS ARE STILL IN GENERAL AGREEMENT FOR SANDY TO CONTINUE A
NORTHEASTWARD TODAY AHEAD OF A DEEP LAYER TROUGH MOVING INTO THE

EASTERN UNITED STATES. THEREAFTER, THIS TROUGH WILL INTERACT WITH AN UPPER LEVEL RIDGE TO THE NORTHEAST WHICH SHOULD CAUSE SANDY TO TAKE A TURN TO THE NORTHWEST TOWARD THE US EAST COAST. PHASE SPACE PROGNOSIS INDICATES THAT SANDY WILL REMAIN A WARM CORE SYSTEM TODAY BUT IS EXPECTED TO COMPLETE EXTRA-TROPICAL TRANSITION BY MONDAY AFTERNOON BEFORE GOING INLAND AS A VERY LARGE AND POWERFUL POST-TROPICAL SYSTEM.

ON TUESDAY, GLOBAL MODELS INDICATE THAT POST-TROPICAL SANDY WILL BECOME CAPTURED BY THE UPPER TROUGH AND BEGIN TO WEAKEN CONSIDERABLY AS IT MOVES FARTHER INLAND OVER THE NORTHEASTERN UNITED STATES. IT IS HERE WHERE THERE IS SOME DISAGREEMENT IN THE MODEL GUIDANCE, WITH THE GEM-GLOBAL SHOWING A FASTER NORTHWESTWARD TRACK TOWARD THE GREAT LAKES FOLLOWED BY A REDEVELOPMENT TOWARD THE NORTHEAST, WHILE THE GFS CURVES THE SYSTEM TOWARD THE SOUTHWEST BEFORE LOOPING A MUCH WEAKER SYSTEM NORTHWARD INTO ONTARIO ON WEDNESDAY. CONFIDENCE IN THE TRACK OF POST-TROPICAL SANDY ONCE ITS INLAND ON TUESDAY AND BEYOND IS RATHER LOW AT THIS POINT.

C. PREDICTED WIND RADII (NM)

TIME	GALES				STORMS				HURRICANE			
	NE	SE	SW	NW	NE	SE	SW	NW	NE	SE	SW	NW

*RAC Bulletin 2012-063E - *Hurricane Sandy heading our way**
2012-10-28

Hurricane Sandy lies 535 kms south of Cape Hatteras with sustained winds of 120 kms per hour and is travelling NW. Tuesday morning Sandy is expected to make landfall in the eastern US as a large powerful cyclone, but before entering southern Ontario late Tuesday, it is expected to be significantly weakened. That said, folks in Southern and Eastern Ontario need to prepare for high winds and rain.

During this time operators are encouraged to monitor all IARU center of activity frequencies (COA) and the RAC HF Emergency Communications Frequencies. As well, while monitoring local repeaters, please be extra vigilant in case your assistance is needed. Hopefully this storm will pass with no significant impact.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 28th October 2012

Echo Ireland

The October issue of Echo Ireland, the IRTS journal, includes photos and reports from a number of recent portable operations - the Limerick Radio Club's activation of Loop Head Lighthouse, SSB Field Day in Garbally, the Galway Radio Experimenters Club trip to Inisbofin and the activation of "Achill Henge" by Galway VHF Group. Steve EI5DD explains how portable operation in parts of the West of Ireland can be difficult because of the absence of trees to use as antenna supports; he suggests that this difficulty can be overcome by using a kite-supported antenna and describes how this can be achieved.

Also in the latest journal is a report by Ger EI4GXB on his participation, along with a number of Shortwave Listeners, in the Youngsters On The Air event in Belgium and, speaking of youngsters, John EI6AH, who recently celebrated his 88th birthday, is also featured. Other articles include "Fun with QRP" by John EI2HVB along with the regular "HF Happenings" with DX news and "Excerpts from the HF Files" which describes another ATV project.

EI1DRC

Jason, EI6GRB writes to state that he operated EI1DRC as a scout station whilst in Raphoe, County Donegal, last weekend. He has also written a blog and this can be viewed at http://ei6grb.com/?p=118.

South Dublin Radio Club

This Tuesday 30th of October Chris G0FDZ will be giving a talk on the UK VHF beacon GB3VHF http://www.gb3vhf.co.uk at south Dublin radio club.

Tipperary Amateur Radio Group

The Annual General Meeting of the Tipperary Amateur Radio Group will take place on Wednesday the 7th of November in Raheen House Hotel,Raheen Road, Clonmel at 8:30 pm all are welcome.

Dundalk Amateur Radio Society, EI7DAR

Radio Theory Classes will commence Monday 5th November at DAR Society premises 'Larkin House', 113, Castletown Road, Dundalk, for preparation to sit the radio theory exam early in 2013. Tuition places are strictly limited and intending candidates are encouraged to enrol at the earliest opportunity. Tuition will involve approximately 20 weeks class attendance and an investment of 100 is required. Open nights to find out more information and to enrol on the course will be held October 31st and on November 5th, the start of the classes. All are welcome to enrol. More information from www.ei7dar.com or secretary at ei7dar dot com.

New Zealand hope to get 50-51Mhz

New Zealand Radio Amateurs hope to get back the bottom end of 6m band when channel 1 Tv completely shuts down in November 2013.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Ham Radio Operators on Standby for Hurricane Sandy:

Posted: 27 Oct 2012 06:06 PM PDT
http://www.eham.net/articles/29221

NEW HANOVER COUNTY, NC (WECT) - People are on standby in the event surrounding counties have a complete communication failure. Ham radio operators are ready to hit the airwaves if Sandy hits our area hard. If the power is knocked out by the hurricane, routers won't work and there won't be wireless internet for cell phones to power off of so that's why it is important to have ham radios. "When communication lines are severed we are the people who come in and assist the county and governments in communications," said ham radio operator Bill Morine.

//
Hurricane Watch Net Resumes:

Posted: 27 Oct 2012 11:29 AM PDT
http://www.eham.net/articles/29220

The Hurricane Watch Net will resume operation
as Sandy impacts the East Coast. We will
handle reports for the National Hurricane
Center and we will also handle backup Amateur
Radio communications from emergency operating
centers and public safety locations. We
anticipate a high volume of report so we will
be operating on at least two bands
concurrently.

GB2RS NEWS

Sunday 28 October 2012

The news headlines:

Queen's Diamond Jubilee and Olympics QSO Parties

RSGB Extraordinary General Meeting, 17 November 2012

AMSAT-UK delivers FUNcube-2 boards

Certificates have been dispatched for both of the QSO Parties that were formed around the use of the special prefixes this summer. 32 certificates were issued for the Queen's Diamond Jubilee Award and 24 for the Olympic Award. They turned out to be quite challenging awards. Whilst QSOs were not that difficult as there were plenty of stations who wanted a QSO with one's special prefix, it was more challenging to find other Q or O stations to make up the required 100 contacts. The organisers hope that all those who took part enjoyed the event, even if they didn't make the requisite total to claim their certificate. Congratulations to the certificate recipients! The RSGB would like to thank Ian Pawson, G0FCT and Pete Lindsay, G4CLA, of the Contest Committee for facilitating the adjudication and to Kevin Williams, who designed the certificate.

RSGB Members should have received their copy of the November 2012 RadCom. Contained with in it are details of the EGM to be held on 17 November 2012 near Stratford, at which Members will be invited to vote on new governance arrangements for the Society. RSGB Members can vote electronically via the RSGB website, by post or in person at the EGM. The Board is very keen to ensure that the outcome of the EGM accurately reflects the view of the whole membership, and all Members are encouraged to cast their vote.

On 19 October, after some final testing and characterisation checks, Graham Shirville, G3VZV of AMSAT-UK handed over to Clyde Space Ltd of Glasgow the set of three PCBs that form the FUNcube-2 subsystem on the UKube-1 spacecraft. Clyde Space is leading the development and assembly of this CubeSat project for the UK Space Agency. FUNcube-2 on UKube-1 will provide a 435 to 145MHz linear transponder for amateur SSB and CW communications and telemetry for school students around the world. The UKube-1 spacecraft is expected to be launched on a Soyuz-2 launcher from Baikonur in Kazakhstan in March 2013.

Amateurs across New Zealand may have to wait a bit longer to get full access to the 6m band, currently in use by channel 1 television transmissions. The New Zealand national amateur radio society is working with the nation's Radio Spectrum Management on arrangements for the period between when all the Channel 1 transmitters are turned off, in November 2013, and their management right expires in 2015. In the meantime, any New Zealand amateur in an area where TV channel 1 is no longer operating can apply for a permit to operate on the band.

DARC, Germany's national amateur radio society will be asking the Deutsche Commission for Electrical, Electronic & Information Technologies to oppose a new pan-European draft Power Line Transmission standard. Like the RSGB, DARC is concerned about the future ambitions of the manufacturers of other PLC products in the direction of higher limits for the emission of harmful electromagnetic or EMC interference. This could lead to a weakening of the previous limits in other European EMC standards.

Swedish amateurs are now allowed to use the full band of 1.85 to 2MHz with Secondary status, as well as the Primary amateur radio allocation of 1.81 to 1.85MHz. For many years Swedish amateurs were not allowed to use 1.85 to 1.93MHz.

Copyright © RSGB 2012. Not for public release before Monday 29 October 2012 except as a GB2RS broadcast. International Telecommunications Union members have agreed first-stage approval of a new Universal Power Adapter technical standard for devices such as modems, set-top boxes, home networking equipment and fixed telephones. The standard will complement ITU's very successful Universal Charging Solution for mobile devices enabling further energy savings, reductions in e-waste and enhanced consumer convenience by expanding the concept's application to the vast majority of ICT devices.

And now for the details of rallies and events for the coming week

Today, 28 October, sees the North Wales Rally taking place at John Bright School, Llandudno LL30 1LF. Opening from 10am to 4pm, admission is £4.50 and there are disabled facilities. There will be trade stands, a Bring and Buy, special interest groups and catering. Details from Gordon, MW0GBR 0773 3531 766, or online at www.nwrs.org.uk.

Sunday 4 November sees the Holsworthy Amateur Radio Rally taking place at Holsworthy Community College, Victoria Hill, Holsworthy EX22 6JD. For more information, send an e-mail to gsowter@talktalk.net.

Also on Sunday 4 October, the Foyle & District ARC Rally will be held in the White Horse Hotel, 68 Clooney Road, Londonderry BT47 3PA. Doors open at 11.30am and there will be trade stands, special interest groups, an RSGB book stand and a Bring & Buy. More information from Philip Hosey, MI0MSO, by e-mail to mi0mso@yahoo.co.uk.

Now for the news of special events

On Saturday 3 November, GB50WVR will be aired for the last time. The station is celebrating 50 years of the Keighley & Worth Valley Railway Preservation Society. QSLs should be sent either direct to Pam, 2E1HQY or via the RSGB Bureau. More information can be found on qrz.com.

And now the DX news compiled from 425 DX News and other sources

LTZ0 will be active from Penguin Island, IOTA reference SA-087, off the coast of Perth, Western Australia, from 2 to 4 November. They will be operational on 10 to 80m using CW, SSB and PSK31. QSL via LU7DSY.

N5ZO will be active from Ascension Island, IOTA reference AF-003, until 30 October as ZD8O. If you make contact, QSL via OH0XX.

5V7TH will be on the air from Togo until 5 November, using 6 to 40m SSB, CW and RTTY. QSL via ON4CIT, bureau or direct. OQRS is available.

An international team will visit 6 islands belonging to Papua New Guinea until 14 November. On 28 and 29 October they will be using the callsign P29NI from Tatau, IOTA reference OC-099, then from 2 to 4 November it's P29VPB from Lihir, IOTA reference OC-069. These two callsigns QSL via G3KHZ.

Three Italian stations will be on the air from Praslin Island in the Seychelles, IOTA reference AF-024, until 4 November. They will use the calls S79UN, S79YY and S79LC. This is a holiday style operation and they hope to be on the 10 to 80m bands using CW, SSB and RTTY.

Copyright © RSGB 2012. Not for public release before Monday 29 October 2012 except as a GB2RS broadcast. Now the contest news

This weekend sees the CQWW DX SSB Contest taking place, ending at 2359UTC today, 28 October. Using SSB on all contest bands from 3.5 © 28MHz, the exchange is signal report and Zone, which is 14 for the UK.

Tuesday 30 October sees the 70MHz UK Activity Contest taking place between 2000 and 2230UTC Using all modes on the band, the exchange is signal report, serial number and locator.

The Marconi CW Contest is the first VHF event of November taking place over the weekend of the 3rd and 4th. There are 6- and 24-hour sections for Open and Single-op Fixed entries. Starting at 1400UTC on the 3rd and continuing until 1400UTC on the 4th, it's CW only on the 144MHz band with the exchange being signal report, serial number and locator.

And now the solar factual data for the period from Friday the 19th to Thursday the 25th of October, compiled by Neil Clarke, G0CAS on Friday the 26th of October

Solar activity was moderate to high with an X1 class solar flare taking place early on the 23rd. This is the first X class solar flare since the 12th of July and is the sixth of the year. In total 3 M class flares and numerous C class solar flares took place. Solar flux levels increased from 141 units on the 19th to 156 by the 22nd, levels then gradually declined to 130 units by the 25th. The average was 143 units.

The 90 day solar flux average on the 25th was 122 units, that's three units up on last week. X-ray flux levels peaked early in the period at B6.1 units on the 20th and then gradually declined to B3.8 by the 25th. The average was B5.4 units. Geomagnetic activity was quiet every day. The quietest day was the 20th with an Ap index only 1 unit. On three days the Ap was 2 units. The most disturbed day was the 23rd with an Ap index of 6 units and the average for the period was 3 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 500 kilometres per second at the start of the period to 320 by the end. Particle densities were low every day and the Bz never varied more than minus 4 and plus 5 nanoTeslas. As they approached their autumn peak the HF bands were in good shape throughout, with some excellent openings on 10 metres.

And finally the solar forecast for the coming week. This week the more active side of the Sun is expected to rotate out of view. Solar activity is expected to be predominately at low levels but there are still visible sunspot groups that could increase activity to moderate levels on some days. Solar flux levels should decline most days to around the 100 mark later in the week. Geomagnetic activity on the whole should be quiet, however, if a large solar flare and an associated Earth directed coronal mass ejection takes place then activity would increase. No coronal hole disturbances are expected. MUFs during daylight hours at equal latitudes should be around 30MHz, or slightly higher on some days. Darkness hour lows should be about 8MHz. Paths this week to India should have a maximum usable frequency with a 50 per cent success rate will be around 29MHz. The optimum working frequency with a 90 per cent success rate will be about 13MHz. The best time to try this path will be between 1000 and 1300 hours UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Wythall Radio Club is holding club net on 145.225MHz today and next Sunday. On Monday the Advanced course continues, and there's a free `n' easy evening on Tuesday. Friday sees the shack social, and there's a bonfire night special event next Saturday. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications Club is running a club net on Monday from 7pm on 144.165MHz USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR and on Friday there is a club net on GB3FR. Contact the FELCC Information Line on 07554 362 020 for more information.

South Birmingham Radio Society is having an open meeting and ragchew on Monday. On Thursday there are training classes with Dave Murphy, G8OWL, and Friday sees shack and aerial work. Contact Don, on 01214 581 603.

Lincoln Short-Wave Club is taking part in the 70MHz UK AC on Tuesday. Wednesday sees Brod Purdy, G4RPB, on his exploits as an RAF electronics officer in the Vulcan and Shackleton. The club repeater net is on 145.725MHz from 20.00 on Thursday and the Saturday surgery in the shack starts at 0900. For more information contact Pam Rose, G4STO, on 01427 788 356.

Now we return to the traditional listing in date order. On Monday Gloucester Amateur Radio & Electronics Society is having an informal evening. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Tuesday Central Radio Amateur Circle continues its Intermediate course via Skype. Details from Martin Hallard, G1TYV, by email to radio-circle@live.co.uk.

On Tuesday Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday Midland Amateur Radio Society is having a general meeting and training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday South Notts Amateur Radio Club is having a talk on SSTV by Robin, G4NDM. Contact Robin, G4NDM, on 01159 372 942.

On Wednesday Telford & District Amateur Radio Society is attending Derek's Halloween soup kitchen & social. Contact Mike, G3JKX, on 01952 299 677.

Copyright © RSGB 2012. Not for public release before Monday 29 October 2012 except as a GB2RS broadcast.

NEWS FOR THE NORTH OF ENGLAND We start with clubs that have several events this week. South Manchester Radio and Computer Club has its monthly technical forum on Monday, then on Thursday it's the winter barbecue. Details from Ron, G3SVW, on 01619 693 999.

Wakefield & District Radio Society is having a visit on Thursday by RSGB President Dave Wilson, M0OBW. Guests are welcome and the event

starts at 8pm. This could be your opportunity to ask Dave about the recent RSGB Governance proposals. The Intermediate licence course continues on Saturday. Details from Ken, G8FSO, on 07900 563 117.

Now we return to the traditional listing in date order. On Monday Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Bolton Wireless Club takes an inside look at MediaCity Studios with the help of Colin, M0TVE. For details, send an email to boltonwireless@gmail.com.

On Monday Sheffield Amateur Radio Club is having a quiz or watching a video. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Tuesday Halifax & District Amateur Radio Society is continuing its tests with PSK31. Details from Martin, M0GQB, on 01422 341 317.

On Tuesday Morecambe Bay Amateur Radio Society is having a talk by Sheila on old Morcambe. Contact Sheila, on 07867 516 836.

On Wednesday Denby Dale Radio Club is having a Real Ale Night from 8pm at the Star Inn, Lockwood HD1 3PJ. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday Hornsea Amateur Radio Club is having an activity night. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

NEWS FOR NORTHERN IRELAND On Thursday Bangor & District Amateur Radio Club is holding its annual surplus sale. Contact Mike, GI4XSF, on 02842 772 383.

NEWS FOR SCOTLAND On Tuesday Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday Ayr Amateur Radio Group is having a hands-on experience of HF and VHF operating procedure plus information about IOTA. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Wednesday Lothians Radio Society is having a talk on the radio & radar collection of the Aviation Preservation Society of Scotland. Contact Alan J Masson, GM3PSP, on 0131 623 4580.

On Friday Cockenzie & Port Seton Amateur Radio Club is having a normal club night. More information from Bob, GM4UYZ, on 01875 811 723.

On Friday West of Scotland Amateur Radio Society is doing project work & learning, then on Saturday there's a club night with talks, quiz and a raffle. Contact Sam, GM4BGS, on 07771 554 035.

Copyright © RSGB 2012. Not for public release before Monday 29 October 2012 except as a GB2RS broadcast.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. Brede Steam Amateur Radio Society is at the shack on Tuesday and Saturday. For more information contact Steve, on 01424 720 815.

Chelmsford Amateur Radio Society has its 10m net on 28.375MHz from 8.30pm on Tuesday. Saturday sees the proposed coach visit to Bletchley Park. Contact Martyn, G1EFL, on 01245 469 008.

Worthing & District Amateur Radio Club has its monthly breakfast meeting at The Goring caf&#65533; today from 9am. On Wednesday GX3WOR is on the air. Contact John, G8FMJ, on 01273 593 232.

Now we return to the traditional listing in date order. On Monday Braintree & District Amateur Radio Society has its club net on GB3BZ. For more information contact John, M5AJB, on 01787 460 947.

On Wednesday Chesham & District Amateur Radio Society is on the air and running a club net on GB3AL or GB3VA. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday Havering & District Amateur Radio Club is having an informal evening. More information from John, M0UKD, on 07890 222 111.

On Wednesday Norfolk Amateur Radio Club is having an informal meeting and Bright Sparks evening. The shack is open and the workshop is available. Details from Chris Danby, G0DWV, on 01603 898 678.

On Thursday Bredhurst Receiving and Transmitting Society is closed. Details form Charles, G4VSZ, on 07982 244 788.

On Thursday Cray Valley Radio Society is having a surplus equipment sale. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday Horndean & District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday Horsham Amateur Radio Club is having a talk by the high-altitude balloon team. Details are on the web at www.harc.org.uk.

On Thursday Shefford & District Amateur Radio Society is having a talk by Don, G4LOO on military radios from the 1940s to the 1970s. Details from John Burnett, M6JBU, on 07860 804 793.

On Thursday Vange Amateur Radio Society is holding its junk sale. Contact Steve, G0KVZ, on 01268 552 606.

On Friday Crystal Palace Radio and Electronics Club is having a talk by Dr Chris Arridge on the Cassini mission to Saturn. Contact Bob, G3OOU, on 01737 552 170.

On Friday Farnborough & District Radio Society is holding a net on 144.675MHz from 8pm. Details from Neville, G3SPD, on 01252 404 816.

On Friday Thames Amateur Radio Group is having a talk on airliner maintenance by Mike Byrne, M0MMB. Contact Pete Sipple, M0PSX, on 07940

579 116.

On Friday Wey Valley Amateur Radio Group is having a talk on mechanical music by Ken Tythacott. Details on the web at www.weyvalleyarg.org.uk.

On Saturday Bromley & District Amateur Radio Society commences its Intermediate course. Details from Andy, G4WGZ, on 01689 878 089.

Highlights of Solar and Geomagnetic Activity
22 - 28 October 2012

Solar activity ranged from low to high levels. Activity was high
during 22 - 23 October due to two major flares from Region 1598
(S11, L=113, class/area Dki/420 on 23 October). The first was an
impulsive M5/1f at 22/1851 UTC and the second was an impulsive X1 at
23/0317 UTC associated with a Type II radio sweep and a 620 sfu
Tenflare. Region 1598 displayed a delta magnetic configuration
within its trailer spots during 23 - 27 October. It showed gradual
trailer spot decay beginning 24 October. Activity dropped to low
levels during 24 - 28 with low-level C-class flares, most of which
were from Regions 1598 and 1594 (S26, L=200, class/area Dao/090 on
16 October). Two Earth-directed coronal mass ejections (CMEs)
occurred on 27 October. The CMEs were closely spaced in time and
appeared to be associated with a B9/Sf flare at 27/1235 UTC from
Region 1598.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
high levels during most of the period with moderate levels observed
on 27 October.

Geomagnetic field activity was at quiet levels throughout the
period.

Forecast of Solar and Geomagnetic Activity
29 October - 24 November 2012

Solar activity is expected to be low during the period with a slight
chance for M-class flares during 29 October - 02 November and 15 -
24 November.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is
expected to be at normal to moderate levels during 29 October - 04
```

November. High flux levels are expected during 05 - 24 November.

Geomagnetic field activity is expected to be at quiet levels during 29 - 30 October. An increase to quiet to unsettled levels is expected late on 31 October, with a chance for active levels, due to the arrival of the CMEs observed on 27 October. A further increase to active levels is expected on 01 November, with a chance for minor storm periods, as CME effects continue. Field activity is expected to decrease to unsetttled to active levels on 02 November as CME effects gradually subside and a coronal hole high-speed stream (CH HSS) begins to disturb the field. Activity is expected to decrease to quiet to unsettled levels on 03 November as CH HSS effects subside. Quiet conditions are expected during 04 - 07 November. An increase to unsettled levels is predicted for 08 November, due to a solar sector boundary crossing followed by a co-rotating interaction region in advance of a CH HSS. A further increase to active levels is expected on 09 November, with a chance for minor storm periods, due to a CH HSS. Activity is expected to decrease to quiet to active levels on 10 November as CH HSS effects subside. Quiet levels are expected during 11 - 24 November.

HamRadioNow: Hams Prepare for a Sand(y)Story

Posted: 28 Oct 2012 05:05 PM PDT
http://forums.qrz.com/showthread.php?366368-HamRadioNow-Hams-Prepare-for-a-Sand(y)Story&goto=newpost

HAMRADIONOW.tv

Episode 30: New Jersey Hams Prepare

for a Sand(y)Storm

As Hurricane Sandy lashes out at the East Coast from several hundred miles

out in the Atlantic (with a bullseye on New Jersey), Gary chats with ARRL

South New Jersey Section Emergency Coordinator John Zaruba K2ZA.

They were supposed to talk about what hams are doing to prepare for this

"Frankenstorm," but spent the better part of an hour on the state of

ham radio emcomm, generally how we need to be more digital. So if you still

havepower and Internet, watch this one and see what you think.

This is Gary's first full WireCast/Skype program! It went OK, but like ham
radio

emcomm, it needs some fine-tuning.

Watch this episode at our web site, www.HamRadioNow.tv.

AMSAT NEWS SERVICE

ANS-302

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor@amsat.org

AMSAT Board Elects Senior Officers for 2012

Election of AMSAT's Senior Officers was one of the first orders of business to be settled once the AMSAT Board of Directors meeting opened on October 25, prior to the start of the 2012 AMSAT Space Symposium held in Orlando, Florida.

The following positions were voted upon and filled:

Barry Baines, WD4ASW PresidentDrew Glasbrenner, KO4MA Vice-President OperationsGould Smith, WA4SXM Vice President User ServicesTony Monteiro, AA2TX Vice-President EngineeringFrank Bauer, KA3HDO Vice-President Human SpaceflightMark Hammond, N8MH Vice-President Educational RelationsAlan Biddle, WA4SCA SecretaryKeith Baker, KB1SF/VA3KSF TreasurerMartha Saragovitz Manager

The following Senior Officer positions remained open at this time awaiting appointments:

Executive Vice PresidentVice-President Marketing

The AMSAT Board of Directors elected on September 15 include:

Barry Baines, WD4ASW; Alan Biddle, WA4SCA; Dr. Thomas A. Clark, K3IO; Drew Glasbrenner, KO4MA; Lou McFadin, W5DID; Tony Monteiro, AA2TX; Gould Smith, WA4SXM; Mark Hammond, N8MH (Alternate); Patrick Stoddard, WD9EWK (Alternate)

At the Board Meeting AMSAT Vice-President User Services Gould Smith, WA4SXM, announced the appointment of JoAnne Maenpaa, K9JKM as the Editor of the AMSAT Journal. JoAnne currently serves as the Senior Editor of the AMSAT News Service. She will make the transition to

the Journal effective immediately. Lee McLamb, KU4OS once again is assuming the role as the Senior Editor of the AMSAT News Service. The Board noted that volunteer positions remain open for both the Journal team and the AMSAT News Service team.

[ANS thanks the AMSAT Board of Directors for the above information]

Fox-1 Satellite in Development; Working on Partnerships for Launch

AMSAT Vice-President Engineering, Tony Monteiro, AA2TX presented the latest status on the design, development, and construction of the

Fox-1A satellite project. This is the 1U cubesat which is slated as the FM repeater transponder to replace AO-51.

Project ELaNa, NASA's "Educational Launch of NanoSat" managed by the Launch Services Program at the Kennedy Space Center, accepted the AMSAT Fox-1 cubesat into this educational launch initiative on its merits toward meeting NASA's strategic and educational goals.

AMSAT met the NASA goals by designing a satellite mission in support of education with amateur radio included:

The Fox family of cubesats are ham radio transponders that are designed to host science experiment payloads.AMSAT will partner with universities to develop these science and educational missions.When the university missions gain a launch for their primary scientific missions AMSAT's amateur radio transponder will also be aboard.After the primary science/education mission is completed the AMSAT transponder will become available full-time for amateur radio service.

AMSAT will work with NASA in a collaborative agreement where NASA will cover the integration and launch costs. In the meantime, AMSAT must still pay for the development costs of the cubesats and find talented volunteers to work on the design.

Fox-1A's design goals include:

Fox-1 is designed to operate in sunlight without batteries once the battery system fails. This applies lessons learned from AO-51 and ARISSat-1 operations.In case of IHU computer failure Fox-1 will continue to operate its FM repeater in a basic, 'zombie sat' mode, so that the repeater remains on-the-air.Fox-1 is designed as the immediate replacement for AO-51. Its U/V (Mode B) transponder will make it even easier to work with modest

equipment.From the ground user's perspective, the same FM amateur radio equipment used for AO-51 may be used for Fox-1.

Fox-1 continues AMSAT's long record of success as an all-volunteer organization providing access to space communications for students in a curriculum setting as well the private citizen.

AMSAT's Fox-1 project timeline is based on targeting a launch in the second half of 2013. NASA will determine on which flight each of the Project ELaNa CubeSats fly.

Watch for news in the AMSAT Journal for details of AMSAT's partnership with universities, the National Science Foundation, and NASA in

seeking grants for getting the first and future Fox generation satellites into orbit.

[ANS thanks AMSAT Vice-President Engineering, Tony Monteiro, AA2TX and the AMSAT Board of Directors for the above information]

AMSAT News Service Welcomes New Weekly Editor EMike McCardel, KC8YLD

EMike McCardel, KC8YLD is joining the AMSAT News Service as one of the weekly rotating editors. EMike will welcome your news of Amateur Radio in Space via the ans-editor@amsat.org or his KC8YLD@amsat.org e-mail address.

He is active on the amateur satellites using his Yaesu VX8R and VX7R radios. EMike is already active within AMSAT-NA serving as Associate Director of Education working on our educational relations with Mark Hammond, N8MH. The AMSAT-Edu e-mail list, supporting our educational outreach and planning, is moderated by EMike.

Recently EMike worked with Mark, N8MH; Dale, KJ6VUC; Tom, KA6SIP; Dave, KB5WIA; Joe, K6WAO; Barry, WD4ASW; and Alan, WA6DNR as a member of the AMSAT team During PACIFICON October 12-14. This effort included a successful ARISS contact, support in the ARRL Youth Lounge making CubeSat models, the AMSAT table, and satellite demonstrations.

EMike is an extra class operator. He is a member and past-president of the Mount Vernon Amateur Radio Club, the Inter-City Radio Club in Mansfield, OH, and a member of the ARRL. He is the ARRL Ohio Section Affiliated Club Coordinator, ARRL appointed PIO and VE.

Other club affiliations include the Ohio Single Side Band Net, the Old Man International Sideband Society, and the Straight Key Century Club. His interest in emergency communications has lead to taking two ARECC and several FEMA courses leading to certificates in Incident Command System/National Incident Management System, and the National Response Plan.

ANS Bulletins will be coming from EMike as he joins the weekly editor rotation with Lee, KU4OS and JoAnne, K9JKM. The AMSAT News Service Team still has a couple of openings for weekly editors. With 4 editors each would have a bulletin for one week of the month. JoAnne has taken over as Editor of the AMSAT Journal so ANS has an immediate opportunity for a new

volunteer. Professional writing/editing experience is NOT a requirement. Your interest and enthusiasm in following and teaching on amateur radio in space will get you started.

Welcome aboard EMike, KC8YLD!

[ANS thanks AMSAT Vice-President Gould Smith, WA4SXM for the above information]

Japan PRISM Satellite Begins Amateur AX.25 Store-and-Forward Service

The team that developed the PRISM satellite have announced it is being opened up for use by radio amateurs during afternoon passes.

The satellite was built by the University of Tokyo and launched on January 23, 2009 into a 660 by 670 km orbit. It uses AX.25 packet radio and can now be used by amateur radio operators as a store-and-forward message box.

Full details at:

http://www.space.t.u-tokyo.ac.jp/pri...AMservice.html

(Ed. Note - if this link does not work with FireFox try using Internet Explorer.)

Additional information is posted at: http://www.uk.amsat.org/?p=11174

Downlink Frequency Information

Beacon 437.2500 MHz CW (80 mW)Data 437.4250 MHz AFSK 1200 BPS (800mW AX.25)

To gain access to the uplink frequency and the store-and-forward protocol the amateur radio user must agree to comply with the terms of the HAM Radio Service by clicking on the "Read the Terms" button at the bottom of the web page. If you agree then click on the "Agree" item.

Upon agreement to the user terms you will be allowed access to a technical information page describing the communications protocol and the uplink frequency.

[ANS thanks the PRISM team at the University of Tokyo for the above information]

WS4FSM Hosts the Largest School Contact Ever With the ISS

On Tuesday, October 30, at 11:58AM EDT (15:58 UTC) most of Palm Beach County's 187,000 students will be watching live as 10 students and 2 teachers make contact with the International Space Station.

The contact will be from the Motorola theater at the South Florida Science Museum (see: http://www.sfsm.org). Amateur Radio Station WS4FSM is part of a permanent Ham Radio Center exhibit built and maintained by the West Palm Beach Amateur Radio Group.

Both a tower mounted tracking antenna and a mast mounted Eggbeater antenna have been loaned to the club by area Hams for making this

contact.

The event will be televised live by closed circuit TV beginning about 11:00 AM EDT (15:00 UTC) to classrooms in all the county schools and streamed on the web at: https://vodcast.palmbeachschools.org/player/ten1

Parents at home will be able to view this contact on the web stream and on the school's educational channel and Comcast Cable in South Florida. The final audience is expected to be over 250,000 live viewers.

The students were selected from the entire school district, including private and home schooler's, and entered by submitting an essay about their interest in space exploration. Tens of thousands of essays were read and sorted by the committee which included educators, astronomers, scientists, former astronauts, and Ham Radio operators. The event is being co-sponsored by the Palm Beach Post who ran a series of articles and published the winning essays.

An educational DVD will be produced for use in the school system at other times and selected portions will be available on YouTube from the West Palm Beach Amateur Radio Group.

For information on WS4FSM see:

http://www.wpbarc.com/WS4FSM

For information on the West Palm Beach Amateur Radio Group see:

http://www.wpbarc.com

[ANS thanks Tom Loughney, AJ4XM, President, West Palm Beach Amateur Radio Group Inc. for the above information]

Report Available for Japan's UNISEC Satellite Projects

Japan's University Space Engineering Consortium (UNISEC) has compiled a report on the current state of Japanese University Micro/Nano/Pico-satellite Projects.

The 100 page report is accessible via these "Download" button at the bottom of this page: http://www.unisec.jp/member/jusat-e.html

[ANS thanks UNISEC for the above information]

FUNcube-2 Boards Delivered to Clyde Space for UKube-1 Nanosatellite

For this story with additional photos see: http://www.uk.amsat.org/?p=11133

On Friday, October 19, after some final testing and characterisation checks completed at the facilities of ISIS BV in Delft, AMSAT-UK handed over the set of three PCBs that form the FUNcube-2 subsystem on the UKube-1 spacecraft to Clyde Space Ltd in Glasgow. Clyde Space are leading the development and assembly of this CubeSat project for the UK Space Agency.

The PCBs were taken to Glasgow in a Pelicase by Graham Shirville, G3VZV who handed them to Steve Greenland Systems Engineer at Clyde Space.

The three PCB's comprise:

CCT Board - Command, control and telemetry, interfaces via I2C with the antenna deployment system and the main OBC (On-Board Computer).RF Board - Command receiver, telemetry transmitter and linear transponder of the FUNcube satellite educational payload also includes telemetry sensors.PA Board - 400 mW VHF amplifier and sensors.

FUNcube-2 on UKube-1 will provide a 435/145 MHz (U/V) linear transponder for amateur radio SSB/CW communications and telemetry for school students around the world.

The UKube-1 spacecraft is expected to be launched on a Soyuz-2 launcher from Baikonur in Kazakhstan in March 2013. UKube-1 is a demonstration CubeSat mission designed to provide a platform for up to three technology demonstrator payloads. In addition to these payloads the satellite will incorporate innovative attitude determination and control systems, deployable arrays, FPGA on board mission controllers.

There will be four communications systems:

A U/V transceiver from ISIS BV, using either 1k2 or 9k6 BPSK for downlinks.A FUNcube compatible U/V transponder and telemetry transmitter provided by AMSAT-UK for educational outreach, amateur transponder operation and redundant telecommand.A 1 watt S Band transmitter from Cape Peninsula University of Technology, Cape Town, for high data rate mission data downlinking using up to 1 Mbps QPSK or OQPSK modulation.myPocketQub 442 SuperSprite AU on UHF with 11mW output using spread spectrum with 100 kHz bandwidth.

These frequencies have been coordination by the IARU Satellite Panel:

1k2 or 9k6 BPSK Telemetry downlink 145.840 MHzFUNcube-2 1k2 BPSK Telemetry downlink 145.915 MHzFUNcube-2 Transponder SSB/CW uplink 435.080 - 435.060 MHz and downlink 145.930 -145.950 MHzS Band downlink 2401.0 MHzmyPocketQub 437.425-437.525 MHz

More information is available at:
http://www.ukspaceagency.bis.gov.uk/21973.aspx

[ANS thanks AMSAT-UK for the above information]

South Korea, Brazil, Ukraine Heading for Orbit

Brazil-Ukraine

News posted on Space-Travel.com reports that Brazil and Ukraine are partners in Alcantara Cyclone Space (ACS), a company which is preparing for the launch of the Cyclone-4 rockets from Brazil's Alcantara base in the northeastern Maranhao state.

The Ukrainian Yuzhnoye engineering office is working on the development of Cyclone-4, a new Cyclone series vehicle to be commercialized exclusively by

ACS. The Cyclone series of launch vehicles is one of the most successful series of rockets ever developed building on the prior successes of the Cyclone-2, and Cyclone-3 series initially based on the SS-9 Scarp Intercontinental Ballistic Missile. A new third stage will enable the Cyclone-4 to inject 5,300 kg in low Earth orbit, or 1,600 kg into a geo-transfer orbit. A new 4-meter diameter payload unit is under development for the Cyclone-4.

Alcantara Cyclone Space plans the first launch from Brazil by 2014.

South Korea

This week South Korea planned to join the the exclusive club of countries capable of placing a satellite in space if its Friday rocket launch from the Naro Space Center on the country's south coast was succsssful. The first stage of the space vehicle is manufactured by Russia, combined with a solid-fuelled second stage built by South Korea.

Currently, only three Asian countries -- China, India and Japan --have successfully launched a satellite into orbit.

[ANS thanks Space-Travel.com for the above information]

NASA Accepting Student Applications for HASP Balloon Flight

NASA is accepting applications from graduate and undergraduate university students to fly experiments to the edge of space on a scientific balloon during the fall of 2013.

The High Altitude Student Platform (HASP) is a balloon-borne instrument stack that provides an annual near-space flight opportunity for 12 instruments built by students. HASP houses and provides power, mechanical support, interactivity and communications for the instruments. It can be used to flight-test compact satellites, prototypes and other small payloads designed and built by students. HASP can support about 200 pounds for payloads and test articles. Since 2006, the HASP program has flown 60 payloads involving more than 500 students from 14 states, Puerto Rico and Canada. Flights are launched from the Columbia Scientific Balloon Facility's remote site in Fort Sumner, N.M., and typically achieve 15 to 20 hours' duration at an altitude of about 23 miles.

The balloon competition is a joint project between NASA and the Louisiana Space Consortium (LaSPACE) in Baton Rouge. A panel of experts

from NASA's Wallops Flight Facility in Virginia and LaSPACE will review the applications and select the finalists for the next flight opportunity.

The deadline for applications for the 2013 flight is December 14. Flight information and application forms can be found on the LaSpace web: http://laspace.lsu.edu/hasp/Participantinfo.php

A related story was posted by SpaceREF at: http://spaceref.com/news/viewpr.html?pid=38963

[ANS thanks LaSpace and NASA for the above information]

ARISS Status - 22 October 2012

1. Successful ARISS Contacts Held

On Tuesday, October 16, CRA Pozohondo in Nava De Abajo (Pozohondo), Spain hosted an Amateur Radio on the International Space Station (ARISS) contact via telebridge station LU8YY in Argentina. ISS astronaut Sunita Williams, KD5PLB chatted with students, answering 20 of their life-in-space questions. The activity was tied to lessons in astronomy, photography, radio and English as a second language. Over 100 students and guests attended. The school has posted video on its Web site: http://edu.jccm.es/cra/cra_pozohondo

Students from the Wattsburg Area School District in Erie, Pennsylvania participated in an Amateur Radio on the International Space Station (ARISS) contact with on-orbit astronaut Sunita Williams, KD5PLB on Friday, October 19 via telebridge station VK4KHZ in Australia. Approximately 600 students were in attendance with another 400 participating from their classrooms, connected by internet. The ARISS contact was part of a comprehensive education plan which covers Robotics, Astronomy, Amateur Radio and Science.

Scouts visiting the National Scouting Museum in Irving, Texas spoke with Sunita Williams, KD5PLB via an Amateur Radio on the International Space Station (ARISS) contact on Saturday, October 20. The contact was part of the Jamboree on the Air (JOTA) weekend event whereby Scouts of all ages from around the world connect with each other using Amateur Radio equipment. Williams was able to answer over 20 questions put to her by the Scouts and had time for longer than usual answers due to sharing of the contact by Australian telebridge stations VK6MJ and VK5ZAI. The audience consisted of around 200 scouts, parents, and friends and at least three television stations and several newspapers representatives were present.

2. ARISS International Team Meeting Held

The ARISS International Team monthly teleconference was held on Tuesday, October 16. A status was given on the HamTV project as well as the new VHF unit to be flown to the ISS and subsequently installed in the Columbus Module. Minutes have been posted. See: http://ariss.rac.ca/arisstel2012-10-16.htm

3. Astronaut Training Status

Luca Parmitano, KF5KDP attended his preflight session on October 17. He is slated to fly with Expedition 36 crew in May 2013.

[ANS thanks Carol, KB3LKI, for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at
one-half the standard yearly rate. Post-secondary school students enrolled
in at least half time status shall be eligible for the student rate for a
maximum of 6 post-secondary years in this status. Contact Martha at the
AMSAT Office for additional student membership information.

Hurricane Watch Net resumes as Sandy impacts the East Coast

Posted: 27 Oct 2012 01:56 PM PDT
http://forums.qrz.com/showthread.php?366269-Hurricane-Watch-Net-resumes-as-Sandy-impacts-the-East-Coast&goto=newpost

The Hurricane Watch Net will resume operation as Sandy impacts the East
Coast. We will handle reports for the National Hurricane Center and we
will also handle backup Amateur Radio communications from emergency
operating centers and public safety locations. We anticipate a high volume
of report so we will be operating on at least two bands concurrently.

The Hurricane Watch Net will begin operation with a test and checkin period Sunday evening, October 28, on 20, 40, and 80. That will be open to all but will allow temporary installations and EOC□s to confirm their stations are working properly. We will then launch the net in full operation Monday morning for the duration of the storm□s impact on the East Coast.

Sunday 10/28/2012

1700 EDT (2100Z) ☐ 2100 EDT (0100Z) Check in and test net
14.325, 7.268 3.950

Monday 10/29/2012 until storm passage

0800 EDT (1200Z) 14.325 7.268 Backup: 3.950 as propagation dictates

We will check into the Waterways Net during morning hours and copy their reports. HWN sincerely appreciates the cooperation of the 68 group and other nets for allowing us these frequencies!

HWN encourages all amateurs ~in the area affected by the storm~ to listen and report your conditions. We do not need relayed reports from the media, airports, or other sources as the National Hurricane Center already has access to that information. We rely on measured conditions, and please tell us whether your barometer has been calibrated when sending us your data. A typical report: Callsign, name, City, State , measured sustained wind, measured highest wind gust, wind direction, measured barometer, perhaps rainfall or rate of rain if above normal, and any flooding or damages you can report. Remember your own safety and that of your family comes first!

Thank you for allowing us clear frequencies! Many agencies are listening as Amateur Radio provides an important public service.

Posted: 29 Oct 2012 06:27 AM PDT
http://forums.qrz.com/showthread.php?366416-Raytown-Amateur-Radio-Club-2012-Hamfest&goto=newpost

It□s Almost Here!

I wanted to personally invite everyone to the Raytown Amateur Radio Club 2012 Hamfest, 8:00 AM to 1:00 PM, Saturday, November 10, 2010. The Hamfest will be at the Fraternal Order of Eagles, Aerie #47, 10220 East 47th Street in Kansas City, Missouri.

Raffle Tickets will be $2.00 at the door on the morning of the event, but advanced tickets can be obtained for $1.00 each from Raytown Amateur Radio Club Members gathering at the Dairy Queen in Raytown between 8:00 and 9:00 PM on the evenings of October 27th or November 3rd.

There will be great prizes to be won at this event. There will also be presentations and VE Testing!

For more information, go to http://k0gq.com, or contact Steve Deines, N0TES at sjdeines@yahoo.com.

We look forward to seeing you at the Raytown Amateur Radio Club 2012 Hamfest!

Thanks!

Randy Schulze - KDØHKD

President,

Raytown Amateur Radio Club

QRZ and Hurricane Sandy

Posted: 29 Oct 2012 02:40 PM PDT
http://forums.qrz.com/showthread.php?366478-QRZ-and-Hurricane-Sandy&goto=newpost

QRZ is hosted by Amazon Web Services and utilizes their Northern Virginia facility. While there is no indication that this facility will be impacted by the storm, QRZ users should note that in the event of a loss of QRZ services within the next 48 hours, it will have probably been caused by the storm.

There is zero chance that QRZ will suffer any permanent damage, however, and should such an event occur, we'll be back as usual as soon as Amazon recovers.

Thanks (just in case)

-fred

remote operation in contests...

Posted: 29 Oct 2012 03:25 PM PDT
http://forums.qrz.com/showthread.php?366482-remote-operation-in-contests&goto=newpost

Hi all

I did not find this through searches...

What is the exact policy of remote operating a rig in a contest within this
scope - I have been reading through some of the contest rules (CQWW, CQWPX
and ARRL) and they are pretty vague on this subject (perhaps intentionally)

scope:

- Remote operation is allowed in the licencee's country

- Being used within the same country

- the station follows the rule of no RX antennas and 500m radius etc.

- the user owns all the equipment.

and ++ as I have heard about users taking part in contest remote as
multi-singe.

or is this perhaps just no issue at all ?

'Pumpkin Patrol' Preparing for Another Halloween:

Posted: 29 Oct 2012 05:02 PM PDT
http://www.eham.net/articles/29234

On Halloween, a select team of individuals, armed with portable ham radios will venture out into the shroud of night. They will guard overpasses on stretches of the New York State Thruway to prevent shenanigans and not-so-nice pranks typical to the specific holiday. For example, no motorist wants to encounter objects hurled from an overpass as they travel below the bridges. Every year, the New York State Police Troop T, which polices the Thruway, partners with citizen-band and amateur radio groups to look out for suspicious activity. The collaborative effort has been dubbed "Pumpkin Patrol." People such as Verona resident Bob Haeger and the Madison-Oneida Amateur Radio Club, a ham radio enthusiast group, collectively keep watch over the entire stretch of the state thruway. "This is a great public service," he said. "I think our presence alone is a deterrent."

//
Ham Radio in Use at Emergency Shelter at Cheltenham High:

Posted: 29 Oct 2012 05:02 PM PDT
http://www.eham.net/articles/29233

AS HURRICANE SANDY approached the Philly region Monday afternoon, the emergency shelter at Cheltenham High School was more than ready to withstand Sandy's best punch. In addition to 100 cots, three prepared meals a day, a nurse, a mental-health professional and a generator, the shelter also has two volunteer amateur-radio operators working 12-hour shifts to provide emergency communications between the shelter and Montgomery County's Emergency Operations Center in Eagleville and the American Red Cross. "We basically provide emergency backup communications if all power goes out," said Ed Kenna, a volunteer with the Auxiliary Communications Service, which works with the Pennsylvania Emergency Management Agency. "I brought a battery I can operate off . . . for 12 hours if we lose power," said Kenna, 54, a database administrator for an advertising agency. If there was a medical emergency at the shelter and all power was lost, Kenna said, he could use the ham radio to get an ambulance dispatched to the shelter.

//
Hurricane Watch Net Stands Down:

Posted: 29 Oct 2012 01:37 PM PDT
http://www.eham.net/articles/29232

The Hurricane Watch Net has ceased operation for "Super-storm" Sandy. There is no question that the storm will continue to do damage for several days but since it is no longer a hurricane and not over open water the National Hurricane Center has handed off responsibility to another branch within the weather system. On the ham radio side, there are state and regional ARES and other emergency nets in place with the specific purpose of handling these events. We do not want to overlap their service to the public.

//
Army MARS and Sandy Landfall:

Special event with astronaut wins public relations award

Posted: 30 Oct 2012 09:57 AM PDT
http://forums.qrz.com/showthread.php?366560-Special-event-with-astronaut-wins-public-relations-award&goto=newpost

Special event with astronaut wins public relations award

As radio amateur Clint Bradford K6LCS of Jurupa Valley said, ☐It was 13 months of planning for 10 minutes of conversation, but, oh!, what a conversation!☐

☐☐LIVE! from outer space!☐ Students speak to an astronaut in the orbiting International Space Station☐ was the special event on April 19, 2012 that earned an award for Karen and Clint Bradford in the annual competition by the Public Relations Society of America. The event was planned for the 120 students of Flabob Airport Preparatory Academy and more than 80 parents, community leaders, media representatives and interested persons.

Clint initiated the event because of his hobby in ham radio and volunteer position with NASA through Amateur Radio on the International Space Station (ARISS): He provides school technical support for students in North America to talk to astronauts aboard the orbiting space station. NASA☐s ☐Teaching from Space☐ program is available to any school that applies, but the typical wait-time from application to event is three years.

He approached Kathy Rohm, vice president and director of community relations at Flabob Airport Preparatory Academy, which is supported by the Tom Wathen Center. She was enthusiastic to sponsor the literally out-of-this-world, once-in-a-lifetime special event to inspire students. More than 2,900 emails flew between Clint, Kathy, NASA, Flabob staffer Nina Bentham and ARISS volunteers to produce the event.

NASA-Houston flight director Phil Engelauf, who grew up in Rubidoux and whose mother, Beverly, still lives here, was invited to the event. His duties prevented him from attending, but he sent warm regards to the students in a special message that is posted at the event's Web site - http://iss-flabob.com (on the blog).

The event went according to plan, except for a momentary glitch with audio quality, despite having tested the system for three days preceding

the event. Clint quickly figured out a solution, although he later said that he was only 90 seconds from NASA terminating the call if he had not succeeded.

☐When we looked around the hangar at the conclusion of the contact, hearing the students☐ whoops of happiness, we saw more than a few adults wiping at their eyes us included,☐ Karen said. ☐We felt intensely rewarded to think how our students may feel throughout their lives when they look up in the sky and remember the thrilling day when Flight Engineer Don Pettit answered their questions.☐

Student Brittany Cain had asked, ☐Besides missing your family and friends, what is the biggest adjustment you have made for this mission?☐ The assembled group laughed when Pettit replied he missed not being able to take a bath for six months!

The mission of Flabob Airport Preparatory Academy is to use aviation as a tool to motivate students to achieve their personal, academic, and career goals.

Current statistics reveal that American students severely lag behind their foreign peers: In a study of 31 countries, the Organization for Economic Cooperation and Development ranked Americans 21st in science and 25th in math. Consequently, President Obama launched the Educate to Innovate Campaign in 2009 to unite teachers, parents, businesses and students toward excellence in STEM (science, technology, engineering and math) studies.

Karen is a current member and past president of PRSA☐s California Inland Empire Chapter. There are more than 80 local members.

Hurricane Watch Net stands down

Posted: 29 Oct 2012 08:14 PM PDT
http://forums.qrz.com/showthread.php?366506-Hurricane-Watch-Net-stands-down&goto=newpost

The Hurricane Watch Net has ceased operation for ☐Super-storm☐ Sandy. There is no question that the storm will continue to do damage for several days but since it is no longer a hurricane and not over open water the National Hurricane Center has handed off responsibility to another branch within the weather system. On the ham radio side, there are state and regional ARES and other emergency nets in place with the specific purpose of handling these events. We do not want to overlap their service to the public.

Over these days we took several hundred reports from amateurs who supplied detailed information in a most professional manner. These ground reports were critical to the National Hurricane Center□s ability to track and monitor the storm. We appreciate your dedication to providing this information! Our thanks go to the 14.325 group, the Waterways Net which partnered with us in the morning, and to the 68 group which graciously moved off their 40 meter frequency so we could operate. And our thanks to the hundreds of amateurs who allowed us a clear frequency or stood by to help with relays and fills even during a crowded contest.

Our thoughts and prayers are with the millions whose lives have been affected by the storm.

Students in West Palm Beach Talk with Astronaut on Space Station:

Posted: 30 Oct 2012 05:28 PM PDT
http://www.eham.net/articles/29243

WEST PALM BEACH -- The voice came out of the ham radio like it was coming from a garage down the street instead of 260 miles up in space. The people gathered at the South Florida Science Museum burst into applause. Eleven students and two teachers already were lined up and started barking their questions rapid-fire for Japan Aerospace Exploration Agency Astronaut Akihiko Hoshide, who has been on the International Space Station since mid-July. And Hoshide -- speaking in flawless, near-accentless English -- was quick with the answers. The musem was one of only 10 sites in the nation participating on Tuesday as part of the collaboration between NASA's Teaching From Space arm and museums and educators worldwide to encourage kids to pursue careers in science.

//
'Cumberland Elementary Calling the International Space Station':

Posted: 30 Oct 2012 05:28 PM PDT
http://www.eham.net/articles/29242

WEST LAFAYETTE, Ind. (WLFI) - Cumberland Elementary students were able to reach the International Space Station via amateur radio. About 600 kids and a few dozen parents were able to listen in as the school reached out to the space station. They had a short window in which they would be able to contact the astronauts, but were able to ask nearly 20 questions about the International Space Station, the universe and the life of an astronaut. Third-grade teacher and amateur radio operator David Brantley says the process of setting the communication up was a two- or three-year process, but was definitely worth it.

//
Radio Amateur Civil Emergency Service Lend a Hand in Herkimer County:

Posted: 30 Oct 2012 05:27 PM PDT
http://www.eham.net/articles/29241

HERKIMER, N.Y. (WKTV) - There were a few extra sets of hands inside the Herkimer County Emergency Management building on Monday night. Members from the Radio Amateur Civil Emergency Service or "RACES" are set up next to the 911 center. The RACES are able to monitor many frequencies, staying ahead

of the storm and are on call as back-up communication in case of any power failure in the county. They are also ready in case the generators fail at local hospitals.

//
Amateur Radio Buffs Battle to Get Messages through Council Red Tape:

Posted: 30 Oct 2012 05:27 PM PDT
http://www.eham.net/articles/29240

WITH just a wire antenna, a slice of the airwaves and his own technical guile, Compton Allen is a one-man radio mogul. He doesn't rely on the internet, or a mobile phone. From his home in Ryde, the amateur radio buff - call sign VK2HRX - can transmit messages to Parramatta or New York. Others contact the international space station, or even bounce signals off the moon. But one source of earthbound interference impedes Mr Allen, and many of the state's 4300 licensed amateur radio users - the burden of council red tape. ''[Council regulation] restricts the type of antenna I can put up \& I sometimes find it hard to talk to stations in northern Europe and Antarctica and some places in Australia,'' Mr Allen said. ''The application process for antenna towers can be long and laborious, cost considerable money and involve all sorts of technical requirements which are probably not necessary.'' The century-old pursuit of amateur radio involves sending and receiving data over selected frequency bands. Traditionalists transmit Morse code or voice; the new breed either circumvents the internet by sending digital data over the airwaves, or uses the web to link radio systems around the world.

URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

HRD Announces Windows 8 update for UK users.

Posted: 31 Oct 2012 06:27 PM PDT
http://forums.qrz.com/showthread.php?366732-HRD-Announces-Windows-8-update-for-UK-users&goto=newpost

Tampa, FL October 31, 2012

HRD Software, LLC has released version 5.24.38 to fix a minor issue with
the UK version of Windows 8.

Erik Gawtry, KC0WWC, spent the last couple of days connected remotely into
a UK hams machine so he could pinpoint the issue with the least time needed.

Work also continues on version 6.0, the current beta build is 61. Beta team
continues their fine work in making sure 6.0 is solid when released.

Hams can rest assured that HRD will continue to run on machines with
Windows XP SP3 to Windows 8, providing an all-around solution for logging,
digital modes, radio control,rotor and more.

Storm forces Internet hubs to run on generator power

Manhattan power outage amid Hurricane Sandy hits critical communication
centers, including Google-owned building

By Patrick Thibodeau, ComputerWorld

http://www.computerworld.com/s/artic...ing_2012-10-31

==

Computerworld - Two monolithic buildings in lower Manhattan that serve as major network hubs for the U.S. are operating on generator power, thanks to Hurricane Sandy.

The buildings, known as carrier hotels, are a 2.9 million square foot structure at 111 8th Ave., and a 1.8 million square foot facility at 60 Hudson St.

Telecom companies use carrier hotels to interconnect networks to allow data sharing and users of one network to connect with those of another. Thus, the two buildings are critical to the nation's infrastructure.

Dia do radioamador brasileiro - 5 de novembro - especial indicativo zw1cml

Posted: 31 Oct 2012 01:06 PM PDT
http://forums.qrz.com/showthread.php?366705-Dia-do-radioamador-brasileiro-5-de-novembro-especial-indicativo-zw1cml&goto=newpost

OS RADIOAMADORES ESTARÃO NOS DIAS 4 E 5 DE NOVEMBRO COMEMORANDO O SEU

"DIA DO RADIOAMADOR" - 5 DE NOVEMBRO - EM HOMENAGEM AO PATRONO PADRE
ROBERTO LANDELL DE MOURA - PREFIXO ESPECIAL DE ZW1CML.

UMA EQUIPE DE OPERADORES ESTARÁ PROMOVENDO UM CONTESTE NACIONAL E
INTERNACIONAL DIRETAMENTE DA ESTAÇÃO DO CLUBE MILITAR LAGOA - RUA JARDIM
BOTÂNICO, 391-JARDIM BOTÂNICO - RIO DE JANEIRO

HORÁRIO DAS 08:00 ÁS 20:00HORAS.

OS RADIOAMADORES DO BRASIL E DO MUNDO QUE FIZEREM CONTATO VIA RADIO OU
PESSOALMENTE , RECEBERÃO

O CARTÃO QSL ESPECIAL ZW1CML.

2161. Baltimore Hackerspace Open House Event

Newsgroup: rec.radio.amateur.misc
Date: 2012-11-01 19:43:58 UTC
From: David Powell <davepow16@gmail.com>
Message-ID: <98383acb-3d0c-4e5c-9afc-2743c0285ad2@googlegroups.com>
Source record: 1578

Hey HAMs,

I'm excited to announce that Baltimore Hackerspace has moved to a new location and we would like you to come help us celebrate. Come socialize, learn and check out the facility. We will have our projects on display and will be doing a couple workshops. There is also a rumor that there may be food!

When: November 17th, 2012
Time: Noon - whenever
Where: 6410 Landay Ave. Baltimore MD 21237

Please Register on meetup.com so we know how many people to expect.
http://www.meetup.com/Baltimore-Hackerspace/events/89508782/

About Baltimore Hackerspace

In 2009 Harford Hackerspace was born when we spread the word about creating a place where programmers, electronics enthusiast, and people from all types of backgrounds can hang out on a weekly basis. We operated out of a members garage for several years and have finally moved into a facility where members can have 24/7 access to great tools and knowledge to accomplish anything they want. We changed our name to Baltimore Hackerspace shortly after moving into the new space. Now that we have the space setup we again want to spread the word that such a space exist in Baltimore.

Thank You
Baltimore Hackerspace

==> + PUBLIC SERVICE: AS HURRICANE SANDY WREAKS HAVOC ON EAST COAST,
HAMS HEED THE CALL TO HELP

Even though Hurricane Sandy was declared a post-tropical cyclone by
the time it made its final landfall -- just 5 miles southwest of
Atlantic City, New Jersey at about 8 PM EDT on Monday, October 29 --
the storm still had winds in excess of 80 miles per hour. Hams across
the region, from the Carolinas to Maine, responded to requests for
assistance and activated local nets, supported the Hurricane Watch
Net's and the VoIP Hurricane Net's operations, assisted their local and
state Emergency Operations Centers and provided assistance at shelters
and wherever needed. Read more here
<http://www.arrl.org/news/as-hurricane-sandy-wreaks-havoc-on-east-coast-hams-
heed-call-to-help>.

==> + PUBLIC SERVICE: HAWAII HAMS ACTIVATE FOR TSUNAMI WARNING
```

On Saturday, October 27, radio amateurs in Hawaii responded to a tsunami warning, providing valuable and timely information to emergency management officials. The tsunami was triggered by a magnitude 7.7 earthquake which struck at struck at 5:04 PM HST (0304 UTC on Sunday, October 28) in the Queen Charlotte Islands, located off the coast of British Columbia, Canada.

At 7:14 PM HST, the Pacific Tsunami Warning Center sent out a tsunami warning and said that the tsunami had an estimated wave arrival time of 10:28 PM. After being notified, Hawaii State Civil Defense RACES Coordinator Ron Hashiro, AH6RH, began notifying Oahu leaders via cell phone while ARRL Hawaii Section Emergency Coordinator Kevin Bogan, AH6QO, began activating the ARES Emergency Coordinators on each island. Read more here <http://www.arrl.org/news/hawaii-hams-activate-for-tsunami-warning>.

==> + ROBIN WALBRIDGE, KD4OHZ, MISSING AT SEA AFTER SINKING OF TALL SHIP BOUNTY; SHIP'S ELECTRICIAN DOUG FAUNT, N6TQS, RESCUED

Every DXer knows the story of the HMS Bounty and Pitcairn Island, VP6: In 1789, the HMS Bounty -- a small three-masted sailing vessel sent by Britain's Royal Navy to the Pacific on a supply expedition -- was roiled by tension between its crew and its captain, William Bligh. After landing in Tahiti and taking on a cargo of breadfruit, the Bounty set sail for the West Indies; it never reached that destination. Instead, Master's Mate Fletcher Christian led the men in a mutiny, eventually allowing Bligh and his loyalists to sail off in a longboat. After an arduous journey, they reached safety at the Dutch-owned port of Kupang. Christian and his followers ended up on Pitcairn Island where they burned the Bounty and settled on the island. Passing ships did not discover the enclave until after the turn of the century.

On Monday, October 29, a replica of the Bounty <http://www.tallshipbounty.org/> -- built in 1960 for a remake of the 1962 film Mutiny on the Bounty -- sank off the coast of North Carolina as Hurricane Sandy made its way toward New Jersey. Of its 16 crew members, 14 were rescued by the US Coast Guard. Bounty Captain Robin Walbridge, KD4OHZ, never made it to one of the two deployed life rafts and is presumed dead. Claudene Christian, who claimed to be a direct descendent of Fletcher Christian, was unresponsive and passed away at a North Carolina hospital on Monday evening.

Doug Faunt, N6TQS, of Oakland, California, was one of the 14 who was rescued by the Coast Guard; Faunt served as a deckhand and was also the ship's electrician. A noted DXer and ARRL Life Member, he was part of the FO0AAA DXpedition crew in 2000 to Clipperton Island. He was also a member of the VP6DIA DXpedition to Ducie Island, and in 2007, he was part of the DXpedition to Lakshadweep. According to Spud Roscoe, VE1BC, Faunt had satellite communications equipment and Winlink capabilities on board the Bounty, but he was not the ship's radio officer. "Sailing on replica ships was a hobby of Doug's," Roscoe told the ARRL. "He had previously sailed across the Great Australian Bight on a replica of the HMB Endeavour <http://www.anmm.gov.au/site/page.cfm?u=1437>, Captain

Cook's ship. He was an able seaman of the watch." Roscoe was the radio officer on the replica Bounty for its original voyage to France in 1962.

Faunt told the ARRL that the Bounty crew tried various methods, including a satellite phone, to call for help, "but we got nothing when tried calling out on HF. We tried calling the Maritime Mobile Net, but nothing was out there. We had Winlink on the ship that we used for e-mail and accessing the Internet to post to blogs and to Facebook, and we finally found an e-mail address for the Coast Guard. As a last-ditch effort, we used Winlink to e-mail the Coast Guard for help. Within an hour, we heard a C-130 plane, and later, a helicopter overhead." According to Faunt, it was Walbridge, as master of the ship, who sent out the distress messages.

"I don't know how I made it off the ship," Faunt recalled. "I had finished serving a long watch, and then we started going down. I was exhausted. I had to swim to get to the life raft. The water was full of rigging, and here I am, in my Gumby suit, trying to swim. It was so difficult. While swimming to the raft, I came up for air and a spar was coming at me. I finally found a raft and tried to climb into it, but I almost didn't make it, tired as I was. Through the help of my shipmates who were already aboard the raft, I got on." The two life rafts were out about 100 miles from shore when they were rescued.

The vessel left Connecticut on Thursday, October 25 with a crew of 11 men and five women, ranging in age from 20-66. After being treated at a hospital in Elizabeth City, North Carolina, Faunt arrived back home in California on Wednesday, October 31. "I'm looking for a new boat to sail and a DXpedition to go on," Faunt told the ARRL. "Ham radio got me into my position on the Bounty, and ham radio got me out alive!"

==> NOMINATIONS NOW OPEN FOR THE GEORGE HART DISTINGUISHED SERVICE AWARD

Each year at its Annual Meeting in January, the ARRL Board of Directors bestows the George Hart Distinguished Service Award to a League member whose service to the ARRL's Field Organization is of the most exemplary nature. This award is named in honor of George Hart, W1NJM, long-time Communications Manager at ARRL Headquarters and chief developer of the National Traffic System.

Selection criteria for the George Hart Distinguished Service Award include:

- Operating record with the National Traffic System, or
- Participation within the Amateur Radio Emergency Service (ARES), or
- Station appointments and/or leadership positions held within the Field Organization.

Nominations for the George Hart Distinguished Service Award shall be accepted from anyone and shall be submitted to the Membership and Volunteer Programs Manager at ARRL Headquarters by November 1.

Nominations should document as thoroughly as possible the nominee's lifetime activities and achievements within the ARRL Field Organization. It is expected that nominated candidates will have 15 or more years of distinguished service. The Programs and Services Committee will serve as the Review Committee, with the Board of Directors making the final determination at its Annual Meeting in January. Recipients will be given an engraved plaque and cover letter, and will be profiled in QST <http://www.arrl.org/qst>.

Nominations for the 2013 George Hart Distinguished Service Award, including any related supporting material and letters of recommendation, may be e-mailed to ARRL Headquarters to the attention of ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N <nn1n@arrl.org>, or to ARRL Field and Public Service Team Supervisor Steve Ewald, WV1X <wv1x@arrl.org>. Nominations and supporting materials must be received no later than November 1, 2012 to be considered.

==> ARRL INVITES NOMINATIONS FOR 2012 INTERNATIONAL HUMANITARIAN AWARD

Nominations are open for the 2012 ARRL International Humanitarian Award. This award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual prize to recognize those radio amateurs who have used ham radio to provide extraordinary service to others in times of crisis or disaster. As one of the few telecommunication services that allow people throughout the world from all walks of life to meet and talk with each other, Amateur Radio spreads goodwill across political boundaries. The ARRL International Humanitarian Award recognizes the Amateur Radio Service's unique role in international communication and the assistance amateurs regularly provide to people in need. Read more here <http://www.arrl.org/news/arrl-invites-nominations-for-2012-international-humanitarian-award>.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: Solar activity quieted this week, with the average daily sunspot numbers down nearly 37 points to 58.4 and the average daily solar flux declining 27 points to 116.9. The predicted solar flux values are 105 and 100 for November 1-2, 95 on November 3-4, 100 on November 5-6, 105 on November 7, 120 on November 8-11, 125 on November 12-13, 130 on November 14 and peaking at 135 on November 15-20. It then drops to a minimum of 100 on November 29-December 1, then back to a high of 135 by mid-December. The predicted planetary A index is 20, 10 and 8 on November 1-3, 5 on November 4-5, 7 on November 6-7, then 10, 20 and 15 on November 8-10, back down to 5 on November 11-December 4, and 10, 20 and 15 again on December 5-7. A coronal mass ejection (CMA) hit the Earth's magnetic field at 1530 UTC on October 31. This contributes to the prediction of a planetary A index of 20 on November 1. Look for more on the ARRL website on Friday, November 2. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page

<http://www.arrl.org/propagation-of-rf-signals>.

==> + ARRL RECOGNIZES: JAMES KLITZING, W6PQL, WINS OCTOBER QST COVER PLAQUE AWARD

The winner of the October QST Cover Plaque award is James Klitzing, W6PQL, for his article "Solid State 1 kW Linear Amplifier for 2 Meters." Congratulations James! The QST Cover Plaque Award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the November issue today.

==> + 2012 ARRL FIELD DAY RESULTS NOW ONLINE

If you can't wait for your December issue of QST <http://www.arrl.org/qst> to arrive in the mail to see how you did in the 2012 ARRL Field Day, don't worry! The results -- including a copy of the QST article <http://www.arrl.org/files/file/ContestResults/2012/2012-FD-QST.pdf> (with line scores) and a results database <http://www.arrl.org/results-database?event_id=37444> -- are now available on the ARRL website. Be sure to also check out the 101 comments in the Field Day Soapbox <http://www.arrl.org/contests/soapbox>. It's not too soon to start making plans for next year -- the 2013 ARRL Field Day is scheduled for June 22-23, 2013. Just a note: The results from Wyoming are missing in print edition of QST; they will appear in the digital edition of QST, as well as online.

==> THIS WEEK IN RADIOSPORT

This week:

- November 2 -- NCCC Sprint
- November 3 -- IPARC Contest (CW)
- November 3-4 -- ARRL EME Contest <http://www.arrl.org/eme-contest>; Ukrainian DX Contest
- November 3-5 -- ARRL November Sweepstakes (CW) <http://www.arrl.org/sweepstakes>
- November 4 -- IPARC Contest (SSB); High Speed Club CW Contest; DARC 10 Meter Digital Contest
- November 6 -- ARS Spartan Sprint

Next week:

- November 9 -- NCCC Sprint
- November 10-11 -- Kentucky QSO Party; WAE DX Contest (RTTY); 10-10 International Fall Contest (Digital); JIDX Phone Contest; OK/OM DX Contest (CW)
- November 10-11 -- CQ-WE Contest
- November 11 -- SKCC Weekend Sprintathon
- November 12 -- NAQCC-EU Monthly Sprint

- November 14-15 -- CWops Mini-CWT Test
- November 15 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- November 3-4 -- ARRL Georgia State Convention
<http://www.arrl.org/hamfests/georgia-state-convention-stone-mountain-hamfest-computer-expo-1>,
Lawrenceville, Georgia
- November 4 -- ARRL Iowa Section Convention

Northampton County's Emergency Management Director Gives County Update:

Posted: 31 Oct 2012 05:03 PM PDT
http://www.eham.net/articles/29248

Municipalities across Northampton County are still struggling to reconnect with the surrounding community as officials attempt to assess the damage from superstorm Sandy. Bob Mateff, director of emergency management, said officials from utility companies, the National Guard and the Red Cross have gathered at the Northampton County 911 Center as organization efforts begin. Coordination among the various organizations has run smoothly, he said, but the widespread destruction left in Sandy's wake means it could be days before electricity and other services are restored. As of now, cellular phone and power service is spotty in some regions, Mateff said. Some municipalities are completely disconnected, and amateur radio operators have been sent to Wind Gap and Lower Saucon Township to so officials there can get into contact with the 911 center. Many area hospitals are operating on backup generators, and the 911 center is working to ensure they have fuel to keep them operating until power can be restored.

//
Amateur-Radio Emergency Services and Disasters:

Posted: 31 Oct 2012 05:02 PM PDT
http://www.eham.net/articles/29247

The second morning after Hurricane Sandy hit the East Coast seems like a good time for Electronic Design readers to think about ham radio and emergency response issues. I got involved in these issues myself when my neighbor, Dave, told me about his experiences after the Loma Prieta earthquake in 1989. Dave's a lawyer, so he was down at the Courthouse when the quake struck. At the time, the courthouse and the police station were co-located. The police station had (still has) a ham radio station (HF, VHF, UHF) on the premises. Those were both good things, because what there was of a public safety communications structure in Northern California came down with the quake, and for all anybody knew, so had the overpasses on 101 and I-280, the main north-south corridors. (They hadn't, but were rumored to.)

NZART Headquarters Infoline Issue 261

2 November 2012

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· Congratulations to Peter LAKE ZL2AZ

· VHF-UHF-SHF-EHF Contest Committee reminder

· ZL9HR DX'Pedition update

Debby says…I have had rather a hectic two weeks with the mail-out of some 3000+ promotional letters to non-members. Hopefully I will be just as hectic in the next couple with all acceptance replies J

On the subject of payments, I will soon be posting out reminder notices for those who have yet to pay the 2013 subscription and wish to take advantage of the early payment rebate, which runs out at the end of this month.

Please note I do not issue receipts unless specifically requested when you return your remittance advice.

With recent publication of Call Book, I have been advised of a number of silent keys. I appreciate you all letting me know of the silent keys still listed in there, but also would remind you, that while I am happy to release the call sign, I can only act on the proper authority. I have attached the appropriate form to this issue, which is required for me to do so.

Talk soon…Debby ZL2DL

Peter Lake ZL2AZ Chairman of IARU Region 3

NZART Council on behalf of all members wished to congratulate Peter Lake ZL2AZ on the unanimous election by the Directors of IARU Region 3 as their Chairman for their remaining term and offers full support to him.

FMTAG NOTES FOR HQ INFOLINE 261

PROPOSALS

Published for the information of, and seeking comments from, members.

Branch 69 Kapiti has applied to change the frequency of its 144.650 MHz Digipeater at Mount Field, located at TOPO50 BP32 775757. The proposed transmit and receive frequency is 144.575 MHz, in accordance with the band plan.

Branch 74 Wellington VHF has applied for a Digital Amateur TV Repeater at Belmont, located at TOPO50 BQ32 570.40 396.30.

FINAL RECOMMENDATIONS TO NZART COUNCIL

None this time.

LICENCE RENEWALS

In the next few days, FMTAG will be sending an Invoice, for $51.11 per licence, for repeaters owned by the following Branches:

05 Christchurch 26
Nelson

28 Whangarei 34
South Canterbury

37 Southland 38
Taumarunui

48 Wanganui 49
Westland

51 Eastern Bay of Plenty 56
Christchurch West

67 Kawerau 78 Far
North

82 Southern Wairarapa 84 Bay of
Islands

87 South Taranaki CARDS

Other Branches will receive their Invoices direct from RSM, by email, to the address registered in SMART. Many of these direct-billing Branches also have an RSM “Billing Month” of November. However, the “Billing Month” of a particular licence can be confirmed by the following method. Go to:

http://www.rsm.govt.nz/smart-web/smart/page/-smart/WelcomePage.wdk

Click on “Search Licences”.

Enter the transmit frequency in the box “Frequency (From)”.

Click on the “Search” button.

All stations on that frequency will be displayed.

Click on the blue underlined number, at the left-hand-side of the screen, of the appropriate station.

The Licence will appear.

The line “Fees paid on” displays the “Billing Month” of the Licence.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART website:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

VHF-UHF-SHF-EHF CONTEST NEWS

OCTOBER MICROWAVE CONTEST

Preliminary results – subject to audit

Congratulations to Steven, ZL1AVS, for a clean sweep of the 1296 MHz, 3400 MHz and 10368 MHz bands, in the Microwave Contest, held on the 6th and 7th of October 2012.

Following audit, the confirmed results will be sent by email to all contestants submitting a log, and will be published on the VHF Group website at:

www.vhf.org.nz

THE NEXT CONTEST

The next contest is the Field Day Contest, all bands 50 MHz and up, on Saturday the 1st and Sunday the 2nd of December 2012. The operating times are: Saturday 1700 to 2300 NZDST and Sunday 0700 to 1300 NZDST.

The contest after that is the DX Weekend Contest, all bands 50 MHz and up, on Saturday the 2nd and Sunday the 3rd of February 2013. The operating times are: Saturday 1700 to 2300 NZDST and Sunday 0700 to 1300 NZDST.

The Contest Rules are available at:

www.vhf.org.nz/VHF-UHF-SHF-ContestRules

All contest logs should be sent, to arrive within two weeks, to:

zl2wa@clear.net.nz

with Contest Log in the subject line.

Or by post to:

Contest Manager

Wellington VHF Group

P.O. Box 12-259

Thorndon

Wellington

Please include your email address if you wish to receive the results as soon as they are available.

ZL9HR Update

Campbell Island DX'Pedition activation is just a month away and all is on schedule. All the equipment has arrived at the storage facility in Invercargill New Zealand. Some of the team are already in New Zealand, others will arrive over the next few weeks. There will be a quarantine inspection of all of the gear and then it will be loaded onto the boat that will take the equipment and team down to Campbell Island.

It's not to late to vote for which bands and modes you will like to work ZL9HR on – go to www.zl9hr.com to vote and to find out all the details of this major DX'Pedition.

DX'Pedition data
Location - Campbell Island - IOTA OC-037 - 450 miles south of New Zealand in the Great Southern Ocean.
- 15th. most sought after DXCC location in the world (and an amazingly beautiful nature reserve).
Dates - 28th. November to 9th. December.
Group - Hellenic Amateur Radio Association of Australia with a team of experienced international operators.
Call Sign - ZL9HR
Website - www.zl9hr.com

WIANEWS WEEK COMMENCING NOVEMBER 4 2012.

pt0s - DXpedition to St. Peter and St. Paul Rocks 10 - 22 November.

cLUBS - by WIA Director Bob Bristow VK6POP

HURRICANE SANDY - The fictional Sandy 1997

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING NOV 04 2012.

Ready for the IARU Region 3 conference

Delegates are prepared for the International Amateur Radio Union Region 3
conference being held in Ho Chi Minh City, Vietnam.

The WIA delegate is Geoff Atkinson VK3TL, with Peter Young VK3MV.

Robert Broomhead caught up with Geoff who is getting ready to Head to 'Nam.

The 15th triennial conference, hosted by the Vietnam Amateur Radio Club,
is themed 'emergency communications' and reflects the frequent disasters
that involve amateur radio. Several papers on that theme are to be discussed.

In seeking to standardise privileges and licensing, the Directors have asked that consideration be given to one of their papers, which explores issues facing societies in working with their administration in the 21st century.

There are reports from the IARU Region 1 and 2, member societies, Amateur Radio Direction Finding, Monitoring Service, Beacons, Satellites, the Award and STARS or Support of The Amateur Radio Service in Region 3 program.

The delegates will also talk about regional finances and the constitution. The IARU Region 3 conference is in the Kimdo-Royal Hotel, Ho Chi Minh City from November 5 to 9.

(Jim Linton VK3PC, audio Robert Broomhead VK3DN)

Queensland's Treasurer and Minister for Trade, the Honourable Tim Nicholls has called for expressions of interest from parties wanting to participate in the Government Wireless Network project, which will enhance digital radio-communications.

Mr Nicholls said this new Qld Government Wireless Network would improve safety & security at major events such as the G20 summit in Brisbane and the 2018 Commonwealth Games on the Gold Coast by allowing for greater coordination between agencies.

(Projects Queensland website via VK4BAT)

The federal government will allocate only half the radio spectrum sought by emergency services, a move state premiers say puts lives in danger.

Under the preliminary plan announced Monday last by Attorney-General Nicola Roxon & and theACMA, emergency services
will be given 10 megahertz of total spectrum for their exclusive use - less than half the minimum police and fire services were demanding.

The spectrum will be offered in the same 800 megahertz band used by Telstra and Vodafone for its 3G networks.

(fin review)

This is Roger Harrison VK2ZRH

The battle over NSW planning restrictions on amateur radio antenna masts continues apace.

As I reminded listeners on last week's broadcast, the NSW Government is undertaking comprehensive reform to its planning laws - the first review in more than 30 years.

But the State's department of Planning and Infrastructure has told the Sydney Morning Herald that they're not planning any changes to amateur radio aerial regulation.

A spokesman told journalist Nicole Hasham from the Sydney Morning Herald that ''allowing higher aerials without a detailed development application process could cause unacceptable streetscape and neighbourhood safety issues''.

This is in a story published in the Sydney Morning Herald on page 5 of the Wednesday 31st October issue. You'll find a link on the WIA website. Or go to the SMH website and enter Amateur Radio into the search panel.

The story is headlined: "Amateur radio buffs battle to get messages through council red tape".

Amateurs of NSW, you need to tell the planning reform bureaucrats that this attitude makes you mad as hell and you're not going to take it anymore !

Many of you made submissions when the whole process opened up a year ago.

If you sent a submission last year, you need to do it again. And get all your mates to write and send a submission.

It isn't hard. Full details of how to do it are on the WIA website under "Antenna Masts in NSW - More Submissions Required".

It's time to express your disappointment at being left out of the planning reforms. You have until close of business on Friday 9th November - that's this coming Friday.

In the meantime, the WIA has lodged a submission to the Local Government Regulation Review, which is now on the WIA website news under "Antenna Masts in NSW". The submission has been published on the Independent Pricing and Regulatory Tribunal website.

Amateurs of NSW - the battle has only just begun. Get cracking !

There'll be more to do once you've sent this lot of submissions. I will reveal more in the weeks to come.

In the meantime, I'd like to thank those who helped get the Sydney Morning Herald story together: the St George, Manly-Waringah and Waverley Amateur Radio Societies, plus Mark Chapman VK2MP, Compton Allen VK2HRX and Jim Linton VK3PC.

This is Roger Harrison VK2ZRH

Radio Hams battle to get messages through council red tape

The Brisbane Times reports on the battle by radio amateurs against Council regulations that restricts the type of antenna they can put up

Far from simply a backyard hobby, amateur radio can be critical during natural disasters yet the council currently insists permission must be sought to erect aerials more than 1.8 metres above roof level, which can require an onerous development application.

Read the full story at
http://www.brisbanetimes.com.au/national/amateur-radio-buffs-battle-to-get-messages-through-council-red-tape-20121030-28hno.html

WIA BOARD TALK

President Phil Wait VK2ASD vk2asd@wia.org.au
Vice President Chris Platt VK5CP vk5cp@wia.org.au

Secretary David Williams VK3RU vk3ru@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Clubs are the backbone of organised Amateur Radio in any given location.

Although it's entirely possible to live a full and busy Amateur Radio life outside of a club, there are many reasons why joining and participating in a club are beneficial to you.

There is evidence that a person who has social capital will fare better in terms of their enjoyment of life and in their mental health.

What is social capital? It's pretty easy - you've probably worked it out already. It's the things you do together with other people, the clubs and groups that you participate in, and the friends and family that you engage with regularly.

So even before we look at the benefits to Amateur Radio, especially your Amateur Radio career, having social capital puts you in a good position to enjoy a socially healthy life.

Now let's look at clubs. By participating in a club, you get to share your own experiences and knowledge, and at the same time benefit from others sharing the same things.

A group of people working together in a club setting can bring about some great results that individuals would find it hard to achieve.

In these days of increasing restrictions on what we as Amateurs can do in our own backyards, we can look to Clubs to provide a shack and have a decent crop of antennas. Where your Amateur Radio activities may be restricted at home, in the club setting you're back in the good old days.

So there are lots of perfectly acceptable self-centred reasons for being a member of an Amateur Radio Club and a load of other reasons to be part of a sharing community.

So if you've not considered joining a club, or you've fallen away from club membership and wondering why your Amateur Radio life has dulled down, stop awhile and consider or reconsider your local clubs.

The Wireless Institute of Australia supports Amateur Radio Clubs by advertising them on its website, making affordable club insurance available, giving space in the Amateur Radio Magazine for club reports and activities, and the Club Grant Scheme.

I'm Bob VK6POP

HAMS ACROSS AUSTRALIA.

VK1

C.R.A.R.C. will shortly hold their Bi Monthly Foundation weekend course, this on the 10th and 11th November, also running concurrently, any upgrades that are required on the Saturday of the Foundation Course.

This will be CRARC's last course for this year, next scheduled Foundation course with Upgrade assessments will be 9th and 10th March 2013, BUT if you need an assessment before March, just email education@crarc.ampr.org with your requirements.

VK3
web service:- http://www.amateurradio.com.au/news/

A proposed new homebrew construction group will meet on Saturday, November the 10th from 2pm, with Rob Whitmore VK3MQ is the chair, at 40G Victory Boulevard, Ashburton.

Also at the venue on the following Tuesday, November the 13th, starting at 8pm, is the next quarterly speaker night meeting with the topic 'Demystify SWR' presented by Peter Cossins VK3BFG.

(Jim Linton VK3PC)

Sunday 25th November, the Southern Peninsula Amateur Radio Club (SPARC) will be holding its inaugural RadioFest at Rosebud on the beautiful Mornington Peninsula, less than an hour's drive from the southern and eastern suburbs of Melbourne.

The event will be held at the Eastbourne Primary School auditorium at Allambi Avenue, Rosebud, where off street parking is available.

Ticket sales and outdoor "Show and Tell" activities will commence at 8 am and the Auditorium will open to the public at 9.30 am with an entry fee of $5.

Catering for the event is being handled by the school's Parent and Friends Association and a large menu will be available at very reasonable costs.

Bring your partner and make a day of it on the Mornington Peninsula on the 25th November.

For further information including table bookings visit www.rosebudradiofest.com

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

USA

Hurricane Sandy knocked out a small number of 911 call centres, forcing the emergency service to be re-routed, the Federal Communications Commission's top official said on Tuesday.

Some of the rerouted calls came in without location information that police or fire-fighters need to find the caller, FCC Chairman told a news conference.

25 per cent of cell phone towers and other cell sites in the states hit by Sandy were knocked out of service while still more were running on backup power.

The FCC had three "roll call" teams ready with specialized equipment that can analyse which frequencies are still carrying signals and which

frequencies have gone dark. The information helps FEMA and state officials restore communications services.

In uptown Manhattan, data centres hosted in a "telecom hotel" that houses Google's New York headquarters were reporting outages as well, apparently because backup power failed when commercial power was cut Monday evening.

Renesys Corp., which monitors the pathways of the Internet, said New York is a major transit point for international telecommunications traffic, and the firm said carriers were scrambling to route traffic around it.

Amazingly, way back in 1997 Radio Hams prepared a Hurricane Sandy Drill

This a drill for Hurricane Sandy hitting the East Coast 15 years ago, in October 1997.

The Simulated Emergency Test was carried out by members of the American Radio Relay League in Westchester County, New York. They envisaged that a fictional Hurricane called Sandy would take a path that brought it through northern New Jersey and New York State.

The 1997 Hurricane Sandy Drill was based on a real hurricane that occurred in 1938.

The original web pages from the Hurricane Sandy drill are still available online at http://www.weca.org/SET/ as well as in the Internet Archive at http://www.archive.org/

Read the New York Observer story "The First Hurricane Sandy":- http://observer.com/2012/10/the-first-hurricane-sandy/

AS THE REAL HURRICANE SANDY WREAKS HAVOC ON EAST COAST, HAMS HEEDED THE CALL TO HELP

Even though Hurricane Sandy was declared a post-tropical cyclone by the time it made its final landfall -- just 5 miles southwest of Atlantic City, New Jersey at about 8 PM EDT on Monday, October 29 -- the storm still had winds in excess of 80 miles per hour. Hams across the region, from the Carolinas to Maine, responded to requests for assistance and activated local nets, supported the Hurricane Watch Net's and the VoIP Hurricane Net's operations, assisted their local and state Emergency Operations Centers and provided assistance at shelters and wherever needed.

arrl.org/news/as-hurricane-sandy-wreaks-havoc-on-east-coast-hams-heed-call-to-help

Amateur Radio Newsline Report 1838 for November 2 2012 has an excellent report:- Yes as Hurricane Sandy made her way across the Caribbean and then up along the U.S. East Coast ham radio operators had been tracking the storms every move.

When she made landfall on the New Jersey shore they were ready to respond.

Mark Abramowicz, NT3V reports with whats known so far on arnewsline.org

GERMANY;

Germany's national amateur radio society, the Deutscher Amateur Radio Club, or DARC, will be asking the German Commission for Electrical, Electronic & Information Technologies to oppose a new pan-European draft Power Line Transmission standard.

During its October 22nd meeting, the DARC Board discussed the pros and cons of the proposed draft standard. While it said that it recognizes the new draft provided for some non-binding commitments for notching out of certain frequencies in the amateur bands, it also noted that it fears the future ambitions of the manufacturers of other PLC products in the direction of higher limits for the emission of harmful electromagnetic or EMC interference.

This could lead to a weakening of the previous limits in other European EMC standards.

This new standard concerns the devices that people install in their homes to run data over their house wiring. It has nothing to do with PLC or BPL that is carried over the company power networks.

INDIA:

A group of students in Gujarat will reach out to the stars.

For the first time in India, about 500 students will have a live chat with Sunita Williams, KD5PLB, the Indian-origin astronaut aboard the International Space Station, through Ham radio set-up at Science City in Ahmedabad.

"We have got a go-ahead from National Aeronautics and Space Administration (Nasa) to organise the talk and are trying to hold the event on November 14, celebrated as Children's Day in India.

It is a great opportunity for the students as they would be talking to KD5PLB Sunita Williams in space. As she has roots in Gujarat, it is all the more special for us," said Ravi Saxena, additional chief secretary, department of science and technology.

The scientific community from the state contacted Nasa soon after Williams set off for her record-breaking journey in July this year.

==========

NEWS FROM ARNEWSLINE USA

CLOSURE OF TV CHANNEL 1 AND ZL ACCESS TO 6 METERS UPDATE

Changes will be coming to the 6 meter band
down-under, but not as quickly as some hams in
New Zealand had hoped for. Amateur Radio
Newsline's Jim Meachen, ZL2BHF, reports:

--

Amateurs across New Zealand may have to wait a
bit longer to get full access to the 6 meter

band. As previously reported, 50 to 51 MHz
down-under is to be returned to amateur radio
once all Channel 1 television has ceased using
the spectrum and the current management right for this band expires.

What may not be known by some hams is that the
last New Zealand channel 1 television transmitter
is not due to close down until November
2013. After that, the management right under
which it operates does not expire until August 2015.

Because of this, the New Zealand national amateur
radio society, NZART, is working with the
nations Radio Spectrum Management on arrangements
for the period between when all the Channel 1
transmitters are turned off and their management
right expires. In the meantime any New Zealand
amateur in an area where TV channel 1 is no
longer operating can apply for a permit to operate on the band.

For the Amateur Radio Newsline, I'm Jim Meachen,
ZL2BHF, down-under in Nelson, New Zealand

==========

IRTS NEWS DESK

IRTS Technical Panel

We at the IRTS are planning to launch a new service for our membership.
In our ongoing endeavours to engage more fully with our membership we have
identified an area we feel could be of significant benefit to them.

The IRTS Technical Panel is a group of volunteers who have expertise in,
or experience of, different aspects of amateur radio.

A single point of contact for communicating with the Panel and the aim is
to help radio amateurs with technical or operational problems.

The query will be distributed to all the members of the Technical Panel
and the resolution to the query e-mailed back to the member.

This another first from the IRTS.

OPERATIONAL NEWS - DATELINE 2012

WW JIDX Contest November 10-11
WW WAE RTTY November 10-11
WW CQ WW DX Contest CW November 24-25
VK Spring VHF / UHF Field Day November 24-25
WW ARRL 160 MTR CONTEST November 30
WW RTTY Melee December 1
WW ARRL 10 m Contest December 8- 9

November 24-25 is the SPRING VHF-UHF Field Day

The VHF-UHF Field Days provide VHF-UHF operators with the opportunity to "head for the hills" and see how far they can work.

The Field Days have separate sections for single and multiple operator stations. The duration of the Field Day is 24 hours, but there are also 8 hour sections for operators who may not be able to camp overnight.

Most club stations prefer to operate for the full 24 hours.

The Field Days also generate plenty of activity from home stations, so there is also a separate Home Station section.

The scoring is based on grid locator squares. Each new square worked gives quite a boost to the score, and this encourages the entrants to operate from locations in grid squares that normally don't have a great amount of amateur activity.

There are no mode restrictions, except that all contacts must be simplex so contacts through repeaters or satellites are not allowed.

It is possible to do very well with only modest antennas if you pick a good hilltop. Another option, if your station is easily transportable, is to operate from more than one grid square during the contest period.

The overriding aim is to get away for the weekend and have fun!

But next after that, the aims are:

to encourage more activity on VHF and microwave bands;

to encourage people to work greater distances than usual by operating portable and to provide opportunities for people to activate or work into new grid squares.

2012 Remembrance Day Contest Results and Report

Alan VK4SN, the WIA RD Contest Manager, has posted to the WIA website a full 18 page PDF RD report that includes the AR blurb and many more statistics and soapbox comments.

Alan advises that there is also a PDF file of state winner certificates available for downloading so you can print off your own certificate if you were lucky enough to come 1st, 2nd, or 3rd in your state/territory/P2 or ZL.

VK4SN also adds that all major place getters will be receiving a mailed certificate from the WIA National Office.

Finally, Alan wishes everyone best 73 and thanks you for your logs and participation.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

As part of the 50th Anniversary of Independence celebrations in Algeria several special stations are active until the end of 2012.
Prefix hunters will have the opportunity to work 7U50I, 7V50I, 7W50I and 7Y50I.
Details of a special award in connection with this event can be found on QRZ.COM

E I 25 D B Dublin Bus celebrates its 25th Birthday.

To celebrate the event a Special Event Station EI25DB will be aired between 1st July 2012 and 30th June 2013. The station will be operated by current and former employees of Dublin Bus led by Declan EI9HQ and Pete EI4GZB.

QSLs to Declan EI9HQ or on LOTW or HamLog.eu

PT0S - DXpedition to St. Peter and St. Paul Rocks

10 - 22 November.

QSL Manager is HA7RY.

The actual dates will depend on weather conditions.

There had been an official ban on Amateur Radio activities from PY 0 S. Although the ban, which was created for environmental and safety reasons, remains in place, a special permit by Brazil's S.E.C.I.R.M. the Brazilian Navy, Ministry of Environment and LABRE to conduct a two week long operation.

(SouthGate/IRTS)

F4CYZ is operational from Morocco as CN2YZ through years end. His activity will be from the city of Tangier especially on the weekends. The Mediterraneo DX Club is supporting his activities and is also providing a Web site with a log-check. It's in cyberspace at www.mdxc.org/cn2yz

THE QNEWS WORK BENCH - the nuts and volts report - Measure Twice cut Once.

100 MHz to 6 GHz Transceiver for $300 ?

Forbes reports on Michael Ossmann's latest project, an Open Source transceiver covering 100 MHz to 6 GHz.

Although not stated in the article, it is presumed the RF output from the transceiver may only be a few milliwatts.

Read the Forbes article at http://www.forbes.com/sites/andygreenberg/2012/10/19/darpa-funded-radio-hackrf-aims-to-be-a-300-wireless-swiss-army-knife-for-hackers/

Surprisingly this proposed Open Source transceiver does not use an FPGA and has a low resolution, however, it points to a future of flexible software defined transceivers at a low price point.

The National Instruments company Ettus Research, founded by a radio amateur Matt Ettus N2MJI, produces the popular USRP(tm) family of SDR products which are

Every three years, the Scouting movement has conducted a national Jamboree. The next one, known as AJ2013, is being held on the Fraser Coast at the Maryborough Showgrounds and Equestrian Park beginning 2nd January, next.

For about a fortnight this over 200 hectare site will be home to some 10,500 scouts and a total population exceeding 14,000 with leaders and contractors.

As has been announced on the Jamboree Facebook page, amateur radio will be one of the onsite activities and participation will help in gaining the special Jamboree Award.

(Follow the link from www.aj2013.scouts.com.au/)

For the amateurs, a special event call sign has been applied for and the word is going out amongst the locals that we would like amateurs to man the station. Previous recent experience with JOTA would help, as in Queensland and to meet Scouting Australia's requirements, volunteers must hold suitable working with children accreditation.

Keep tuned to WIA National News for further information.

For Maryborough Electronics and Radio Group, Inc. I'm Geoff, VK4ZPP

WW SPECIAL INTEREST GROUPS --- RADIO AMATEUR OLD-TIMERS
http://www.raotc.org.au

Hallo everyone, this is Clive VK6CSW with a reminder that tomorrow, Monday November 5th the Radio Amateurs Old Timers Club of Australia's monthly news and information bulletin will be broadcast on a number of HF and VHF frequencies.

The principal HF transmissions will be on 20 metres on 14.150 MHz USB at 0100 UTC beamed north from Melbourne for Eastern states listeners, and again at 0200 beamed West for Western Australia.

During tomorrow numerous local relays will also take place on various VHF and lower HF frequencies. To find a frequency and time for your area,

please visit the RAOTC website at www.raotc.org.au (repeat).

Everyone, RAOTC members and non-members alike, is invited to listen to this interesting half hour of Old Timer news, stories and anecdotes and to participate in the call backs afterwards.

Once again, the RAOTC monthly bulletin is scheduled for tomorrow, Monday November 5th, and we look forward to hearing from you during the call backs.

73 from Clive VK6CSW.

WICEN - the Community Service Arm of the Canberra Region Amateur Radio Club, is seeking people to assist with the "Shannon's Safari Rally" being run by the Light Car Club of Canberra (LCCC) on Saturday 17th November.

For this event CRARC have been asked to support 4 Competitive Car Rally stages with each being run twice (making a total of 8 stages in the rally). This year's event will be very similar to last year's Safari Rally with the running of "Pearces East" and "Tidbinbilla" Stages out along Paddy's River Road, "Blue Range" out at Uriarra and the close to town "Bluetts" near Coppins Crossing.

11 field stations, Plus 4 or so people in HQ.

If you can assist, could you please notify Matt VK1MA and Phil VK1PL the Deputy State Coordinator, WICEN ACT

Mobile weather for emergencies

A free session on the Mobile Emergency Weather Station is available to those who will be attending the Global Amateur Radio Emergency Conference in Malaysia.

It inventor Gregory Lee HS0ZHM, of the Rural Training Centre in Thailand, will cover the Weather Observation Log form, then the device set-up and its handbook.

Meaningful weather reports help the decisions by relief authorities and to improve helicopter flight operations.

The device enables hams to quickly gather weather data in a reliable manner for them to be reported by radio.

The session will be on November 11 at 10am in the Melaka House, Port Dickson. For more information contact Choy 9W2PCK choysegt@gmail.com

MYGAREC, from November 11 to 14, aims to involve those in amateur radio emergency communications.

It is their only annual meeting that delivers training, discusses what has occurred and includes new ideas of how to do things better in future.

RESCUE RADIO: HAM RADIO MEETS KILLER HURRICANE SANDY

As Hurricane Sandy made her way across the Caribbean and the up along the U.S. East Coast ham radio operators had been tracking the storms every move. When she made landfall on the New Jersey shore they were ready to respond. Mark Abramowicz, NT3V is here with whats known so far:

--

To be sure, the hams who responded to Hurricane Sandy will never, ever forget the destructive power of a superstorm that - to this point - has been unmatched in modern history.

It was New Jersey Gov. Chris Christie, who the day following the storm striking along the state's barrier islands, summed up the grit and determination for the people of his state...

"We have a long road ahead of us but I have complete confidence we're going to come out of this better and stronger than before," Christie said. "This state is too tough to give in to this type of devastation."

And, in the immediate aftermath of the storm, radio operators in southern New Jersey were put to the test, especially in Atlantic and Ocean counties.

The first is home to Atlantic City, which ended up under water as the storm passed, and the second, home to Long Beach Island and other well-known seaside communities where homes were ripped apart and boats thrown into piles like toys in a child's messy play chest.

Southern New Jersey hams will remain on the job with relief coming into Atlantic County for shelters still being manned by Red Cross personnel.

John Zaruba, K2ZA, is ARRL Section Emergency Coordinator for Southern New Jersey,

Zaruba says hams went active Saturday morning - days before the storm arrived - and began moving equipment into position.

He says by Sunday night as the rain bands from Sandy starting closing in on New Jersey and tge wind began kicking up, operators were already out..

"There was a lot of good ground intelligence," Zaruba says. "You know where people were trying to get places and there was a lot of reporting of, 'Okay this road's flooded, you can't go here. You have to re-route and go this way.' So there was a lot of real-time information coming back that way."

Zaruba says the Red Cross was operational with shelters in-land, away from the coastal areas, before the storm hit...

"In some of the counties, seven or eight shelters actually operating," Zaruba says. "But as the storm passed through. They started consolidating things, getting people out that could go back to their homes and other people that needed more long-term sheltering. They started moving them into more consolidated shelter facilities."

At one point, Zaruba says there was a need for more equipment and section officials contacted ARRL headquarters and a response came quickly...

"We were able to get six 'Go Kits' sent down from the League to Ocean County and that went a long way toward easing their operational burden," Zaruba says.

As for the modes of communication, Zaruba says it was all voice...

"Primarily, we were using 2-meter FM," Zaruba says. "And, I've been a big proponent of using digital communications. But, here, again, we've got a bit of a way to go to get people focused in on that's an available tool in our tool kit and let's utilize it.

"Right now, most of the mindset revolves around voice communication."

Zaruba says hams in south Jersey are standing down, for the most part, and he's proud of their dedication and response...

"They did an outstanding job, to a person," Zaruba says. "All went above and beyond the call of duty. The folks in Ocean and Atlantic counties were pulling some brutal shifts."

And, Zaruba says, some of the volunteer radio operators also suffered some devastating losses themselves...

"Some hams that were talking about shore houses that have 20-25 inches of water in the bottom," Zaruba says. "And, granted those folks didn't sound real happy but as long as there were no lives lost, the house and the contents are all replaceable."

Now, on to New York, where Sandy socked the city hard.

Mike Lisenco, N2YBB, is ARRL section manager for New York/Long Island.

He says during the storm itself, operations were hunkering down like everyone else, but quick sprung into action once it passed.

"Despite the tremendous devastation that the city has faced, the role amateur radio played in the five boroughs was relatively small, "Lisenco says. "We manned the emergency operations center at the American Red Cross in mid-town Manhattan."

But Lisenco says the devastation is far worse outside the city and its environs...

"In Nassau Couny, the response has been rather large because a good portion of the southern part the county has seen complete devastation, primarily because they are very close to the water," Lisenco says. "The Red Cross has run a rather large sheltering operation in Nassau County. We've been providing communications for the shelters

"They've been running a resource net as well as a net for passing traffic back and forth between the shelters and to, of course, Red Cross headquarters in Nassau County."

Lisenco says the many hams responding to help faced some challenges even getting into position...

"The biggest problem I think we faced was the fact that there's these widespread power outages," Lisenco says. "We're talking about millions of people without power in the area. And, also what damage that was done with downed trees, power lines, a tremendous amount of sand washed up on shore, houses displaced, a large problem would then be in terms of transporting oneself to a location that they're supposed to be manning, such as a shelter.

"Even just driving around Brooklyn we have a lot of areas where they have no power. Lights are out. Driving, even during the day is somewhat tenuous. So imagine having to do that at night."

Lisenco says the effort in Nassau County remains very fluid and active and he expects emergency operations will continue for the coming days as we go to air on Friday, Nov. 2.

Lisenco and Zaruba from the southern New Jersey section agree on one thing.

It's important for all amateurs to realize the role they can play in their communities in times of disaster.

Lisenco sums it up...

"It's very easy for people to grow complacent over time when they feel their services aren't needed," Lisenco says. "But they need to keep in mind that emergencies happen at any point in tie, anywhere.

"And, they need to be involved at some level in the emergency communications aspect of amateur radio. Amateur radio is both a service and a hobby. And we can't lose sight of that. And, in order to participate in the hobby aspect, you have to give something back."

So, while New Jersey and New York have a long way to go in coping with the aftermath of Sandy, Lisenco and Zaruba say communities can rest assured amateur radio will be there when needed.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Obviously, reports are still coming in and it will be some time before we know the full extent of the work of radio amateurs in response to this event that's been called the perfect storm. More in future Amateur Radio Newsline reports.

(ARNewsline)

**

RESCUE RADIO: HAWAII EMCOMM RADIO AMATEURS RESPOND TO TSUNAMI WARNING

Amateur radio operators in Hawaii responded to a tsunami warning on Saturday evening, October 27th. This by providing valuable information to emergency management officials after a magnitude 7.7 earthquake struck off the coast of British Columbia, Canada at 5:04 pm Hawaii Standard Tine.

At 7:14 pm, the Pacific Tsunami Warning Center upgraded an earlier bulletin to a warning with an estimated wave arrival time of 10:28 pm. At this point key members of Hawaii's emergency communications ham radio network were alerted by an automated text message system. One of them was Ron Hashiro AH6RH, is the Hawaii State Civil Defense RACES Coordinator.

--

AH6RH: "With the estimated wave arrival time of 10:28 pm, we really had to hustle because now we were within the three hour time limit that we would normally sound sirens and of coarse all of that notification was subsequently delayed. The telephone alert process took 22 minutes and from there we had to mobilize and it took 40 minutes to get on site at the state EOC.

--

Also alerted were ARES Emergency Coordinators on each island that make up the State of Hawaii. This lead to a call-up of various ARES and RACES nets. Hams were also dispatched to keep an eye on ocean levels

and report back:

--

AH6RH: " We had Kalani Ku, WH6KX, on the north side of Maui at Kahului Harbor and Dave Garrison, AL4A, on the South side reporting ocean level changes. At 10:53 pm Kalani reported that the water was receding from Kahului Harbor and shortly thereafter Dave reported the same.

"For the next two hours WH6KX and AL4A passed timely reports of ocean level changes ranging from plus 2 feet to minus 3 feet below normal. The ocean level reports were received by hams at all the EOC's and passed on to their respective EOC operations."

--

Once the Tsunami arrival time was well past, a determination was made to downgrade the warning to an advisory effective at 12:54 am. Nets stood down at about 10 minutes later.

AH6RH says that the only major incident that took place came in a notice from the Hilo EOC. Hams there reported that the receding water in Hilo Bay caused the bottom of boats to hit the floor of the bay. (ARNewsline(tm), AH6RH)

RESTRUCTURING: SARL PRESENTS AMATEUR RADIO'S NEEDS IN THE MICROWAVE BANDS AT HEARING

The South African Radio League was to discuss amateur radio's needs for allocation in the 2.3; 3.5 and 5 GHz bands at a hearing with that nations telecommunications regulator held on November 1st and 2nd. The hearing dealt with the draft frequency migration regulation and frequency migration plans for this spectrum. Prior to the meeting the South African Radio League had put forward its requirements for allocations in these bands in line with the IARU Region 1 spectrum requirements for amateur radio use of these bands. Like many parts of the world, this region is also looking into ways to make more spectrum available to broadband and other emerging technologies. (SARL)

**

RESCUE RADIO: MOBILE WEATHER TRAINING AT GAREC 2012

A free session on the Mobile Emergency Weather Station is available to those who will be attending the Global Amateur Radio Emergency Conference being held in Malaysia from November 11th to the 14th. Presented by its inventor Gregory Lee, HS0ZHM, of the Rural Training Centre in Thailand, the session will first cover the Weather Observation Log form and then take the trainees through the device set-up and its operation.

The Mobile Emergency Weather Station device enables hams to quickly gather weather data in a reliable manner for them to be reported by radio. Its ultimate goal is to provide meaningful weather reports from a disaster zone. This, to help in making the multitude of decisions by relief authorities and also to improve helicopter flight operations and safety.

The Mobile Emergency Weather Station session will be on November 11th at the Melaka House, in Port Dickson. For more information contact 9W2PCK by e-mail to choysegt (at) gmail (dot) com (VK3PC)

**

RESCUE RADIO: SANTA CLARITA CALIFORNIA RESCUES STRANDED HIKER

A stranded hiker has been saved in California. On Sunday, October 28th, at approximately 1:15pm the Santa Clarita Valley Sheriffs Station Search and Rescue Team along with Los Angeles County Fire Department responded and rescued a 54-year-old female hiker from the narrows portion of Towsley Canyon.

When located, the hiker was suffering from heat exhaustion and dehydration. She was airlifted by a Los Angeles County Fire Department helicopter and brought to a safe landing zone where she was medically checked out by Search and Rescue team members, and fire department paramedics. The hiker was then released to her family.

At the time the incident occurred the team was helping out with the haunted jailhouse fundraiser. This by teaching children about rescues along with demonstrating some of the most common gear used during a rescue. When they received an emergency call regarding a stranded hiker they quickly decided how many members would deploy to Towsley Canyon and how many members would remain at the haunted jailhouse event.

The Santa Clarita Search and Rescue team is made up of highly trained individuals from all walks of life, several of whom are ham radio operators. Their backgrounds range from school teachers to contractors, to film directors and even rocket scientists. For further information please visit www.scvrescue.com (nixle.com)

RADIO LAW: FCC PROHIBITS ROBOCALLING TO PUBLIC SAFETY ANSWERING POINTS

The government has put in place some rules to prevent automated telemarketing devices from calling emergency service providers. Jeff

Clark, K8JAC, has the details:

--

Emergency Service providers are getting government protection from unwanted robocalls that can tie up their phone lines. This through the establishment a specialized Do-Not-Call registry for Public Safety Answering Points and prohibiting the use of robocalling equipment to contact registered Public Safety Answering Point phone numbers other than for an emergency purpose.

Public Safety Answering Points are typically 911 call centers that receive emergency calls and route them to emergency service personnel. By some estimates, hundreds or even thousands of unwanted robocalls are made to these centers each day, tying up public safety phone lines and diverting critical first responder resources away from the provision of emergency services.

Specifically, the new rules released on October 17th allow Public Safety Answering Points to upload any number associated with the provision of emergency services or communications with other public safety agencies onto a specialized Do-Not-Call registry. They also prohibit operators of rob calling equipment from using such equipment to contact any number on the registry except for an emergency purpose and adopt specific monetary penalties for contacting or disclosing numbers contained in the registry. In the case of violations prohibiting disclosure or dissemination of registered numbers, the new law provides for monetary penalties of up to $1,000,000 per incident.

The rules also address concerns voiced by the public safety community in comments to the FCC about the potential problems unwanted texts to Public Safety Answering Points may pose in the future. For violations of the prohibition on robocall texting numbers on the registry, the law provides for monetary penalties that are not less than $10,000 per call or text or more than $100,000 per call or text.

For the Amateur adio Newsline, I'm Jeff Clark, K8JAC

--

For those that have never heard the term robocalling, those are the irritating automated telemarketing calls that seem to be growing in number each day. And in more and more instances the operators of these machines seem to be programming them to call back incessantly if you hang up and keep on doing so until you give some type of response. (FCC)

**

RADIO LAW: FBI AND STINGRAY VS PUBLIC RIGHT TO KNOW

Tracking cell phones by tricking them into operating on a bogus network is a law enforcement tactic shrouded in secrecy. Now the FBI is under pressure to release information about it-but the bureau doesn't want to

let go of 25,000 pages of documents on sophisticated cell surveillance technology.

In an Arizona court case last year it was made public that the FBI had used a cell-site simulator in order to track down a suspect. The portable equipment, sometimes described as either an I-M-S-I catcher or a Stingray, covertly sends out a signal that fools all phones within a specific area into connecting to a fake network. The spy tool can force targeted phones to release unique identity codes that can then be used to track a person's movements in real time.

But not everyone likes the idea of this type of law enforcement tool being used. Among them is the Electronic Privacy Information Center which is attempting to obtain internal FBI documents relating to the technology. In fact the Center is taking legal action to force the prompt disclosure of records concerning Stingray devices or other cell site simulator technologies. It alleges that the FBI has failed to comply with statutory deadlines by not handing them over quickly enough following a freedom of information request made last February.

For its part, the FBI says that it has found 25,000 pages of documents that relate to the request, about 6,000 of which are classified. Because of this the agency says that it may need up to three years to process the files before they can be released.

In light of the FCC's recent enforcement activities against cellular telephone jamming devices, it will be interesting to see if the regulatory agency can or will become involved in this controversial issue. (slate.com)

**

ENFORCEMENT: SATELLITE JAMMING TRACED TO SYRIA AND IRAN

According to European satellite operator Eutelsat, disruptions in satellite signals in the Middle East and Europe have been traced back to Syria and Iran. There has been speculation that the jamming is a reaction to changes in the regulations put forth by the International Telecommunications Union to comply with the European Union's increasingly tough sanctions on Iran.

The ITU altered its regulations at the World Radiocommunication Conference in Geneva after receiving complaints of repeated and deliberate interference in the reception of TV in Persian and Arabic. Because of these changes, Eutelsat no longer carries 19 radio and television channels broadcast by the Islamic Republic of Iran Broadcasting.

The European Broadcasters Union has now responded to the information by condemning it. In a press statement it's Director Ingrid Deltenre said that access to information is a universal human right and an essential component for democracy. As such the E-B-U deplores this attack on media freedom.

For its part, the International Telecommunications Union says that these recent incidents are not the first time that there have been allegations of Iran blocking communications from the outside world. The latest wave of interference has affected numerous radio and TV broadcasters including the BBC, France 24, Deutsche Welle and the Voice of America. (RW)

NAMES IN THE NEWS: M6GLD UNVEILS ISS APRS VIIDEO

Some names in the news. First up is Robert Broughton, M6GLD who has made available a new video demonstrating reception of amateur radio APRS signals from the International Space Station. The data shown in the clip is decoded using free online software and a soundcard connected from a receivers audio out to the computers audio in. For this demonstration the closest slant range to the I-S-S at zenith was around 1,350 miles line of sight with the space station transmitting on 145.825 Mhz. You can watch the video at tinyurl.com/iss-aprs-video (M6GLD)

**

NAMES IN THE NEWS: K6LCS RECEIVES SPECIAL PUBLIC SERVICE AWARD

Clint Bradford K6LCS of Jurupa Valley, California and his wife Karen have earned a special award from the Public Relations Society of America. This for their work in planning a space related educational event held back on April 19th.

Called "LIVE! . from outer space!" the operation gave students a chance to speak to an astronaut in the orbiting International Space Station." Some 120 students of Flabob Airport Preparatory Academy, more than 80 parents, community leaders and media representatives got to witness a live contact with the International Space Station. Flight Engineer Don Pettit was on the I-S-S to answer questions posed by some of the students via ham radio.

K6LCS initiated the event because of his volunteer position through Amateur Radio on the International Space Station or ARISS program which is allied to NASA's with Teaching from Space curriculum. The latter is available to any school that applies, but the typical wait-time from application to an actual contact with a member of the space station crew is three years.

According to K6LCS for the Flabob school contact it was 13 months of planning for 10 minutes of conversation. But adds Bradford, but, "oh, what a conversation!" (Southgate)

NAMES IN THE NEWS: LEAGUE SEEKING NEW MEDIA AND PUBLIC RELATIONS MANAGER

The ARRL is currently looking to fill the position of Media and Public Relations Manager at ARRL Headquarters in Newington. This following the recent retirement of Allen Pitts, W1AGP, from that position.

The ARRL Media and Public Relations Manager is responsible for explaining the value of the amateur radio service to the media and the general public, directly and through a corps of volunteers. Outstanding communications skills and the ability to train and motivate volunteers is also required.

For more information on this position and how to apply please viait the news paes at www.arrl.org. (ARRL)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

HAM RADIO IN SPACE: LARGEST CONTACT EVER WITH THE ISS

The largest contact in the history of the Amateur Radio on the International Space Station program has taken place in Florida. This as Florida Science Museum station WS4FSM hosted the largest school contact ever with the ISS. Take a listen:

--

Actual contact audio

--

The contact took place on Tuesday, October 30th, at 15:58 UTC when most of Palm Beach County's 187,000 students were watching live as 10 students and 2 teachers made the historic contact. The actual call was from the Motorola Theater at the museum. Both a tower mounted tracking antenna and a mast mounted Eggbeater were loaned to the club by area hams for making this contact. Eleven students and two teachers already asked their questions of Japan Aerospace Exploration Agency Astronaut Akihiko Hoshide, KE5DNI. Hoshide who has been on the International Space Station since mid-July, was quick to provide answers.

--

Actual contact audio

--

The event was to be televised live by closed circuit system to classrooms in all the county schools and streamed on the web as well as

on the school system's educational channel and Comcast Cable in South Florida. The final audience was expected to be over 250,000 live viewers.

The West Palm Beach Amateur Radio Group sponsors the station at the South Florida Science Museum as part of a permanent amateur radio exhibit. Club members and other volunteer hams in the area staff the station and exhibit on weekends, for school tours during the week, and during summer science camps. More about the club is on-line at www.wpbarc.com. (Southgate, Palm Beach Post, AJ4XM)

**

WORLDBEAT: DENMARK SETS DIGITAL RADIO SWITCHOVER DATE

The Danish government's new media policy has defined 2019 as the year for the country's digital radio switchover. This providing that at least half of all radio listening in the country is digital by 2018.

Uffe Elbak, the Danish Culture minister stated that this move is a normal progression. He said that the world is digital and therefore it is a natural continuation of previous efforts and policy decisions in the area that we now will speed up the digitization of radio, just as we did with the TV a few years ago. Elbak said that this will be accomplished by continuing to expand the nations digital radio network, and establishing, albeit with conditions, a date for the switch-off of analog FM. By setting a date Elbak says that his nation is sending a clear signal to both the industry and the Danish radio listeners about where digitalization of broadcasting is headed.

According to other reports, the national single-frequency Digital Audio Broadcasting or DAB block used by the public service broadcaster D R Multiplex will be exchanged for two DAB regional frequency blocks now occupied by a single commercial multiplex. This will take place in 2013. All Danish DAB transmissions will also transition from the original DAB standard to the DAB+ standard. (RW)

**

WORLDBEAT: MULTIPLE COPIES OF RAC REPORT E-MAILED

Radio Amateurs of Canada says that there have been issues with multiple copies of its R-A-C Report unintentionally going out via e-mail. Chief Information and Technology Officer Paul Burggraaf, VO1PRB, says that the society is working to fix this problem before the next issue is sent out. (Radio Amateurs of Canada)

DX

IN DX, the March, 2013 DXpedition to Clipperton Island has received the callsign TX5K to be used during the operation. So far the team has 23 members and one space remains available for another operator,

scientist, or other supporter who wishes to join the DXpedition. More information is on-line at www.cordell.org/CI,

DL1LLL is currently operational portable Zed-S-7 from Antarctica on the High Frequency Bands. His location is the Neumeyer Emergency base. QSL via DL5EBE.

VK6LC will be active from Vietnam in November as XV1LC. He will be operational on the High Frequency Bands using CW and SSB only. QSL direct via VK6LC.

JA1PBV will be on the air from Mauritania as 5T5BV until November 10th. His activity has so far been on 30, 12 and 10 meters using CW and RTTY. QSL via JA1PBV.

JH5GHM is currently on the air stroke V26 from Antigua Island on the High Frequency bands only. No mention of modes or times on the air. QSL via his home call or electronically using Logbook of the World.

JA1PBV is currently active from Mauritania as 5T5BV. Listen out for him on the High Frequency bands operating mainly CW. QSL via home call

DL8NU will be active from Mahe Island in the Seychelles November 9th to the 24th as S79NU He will be operational on the High Frequency bands mostly on CW. QSL via home call

Lastly, UA4WHX is currently active stroke EX from Kyrgyzstan. Hes been reported being heard on many o the High Frequency bands. His QSL route is direct to his home callsign.

(Above from various DX news sources

THAT FINAL ITEM: HAM RADIO CELEBRATES HOLLYWOOD

And finally this week, Ham Radio Celebrates Hollywood was the title of an all-band multi mode operation from Stage 9 at CBS Studio Center in Los Angeles, California on Sunday, October 28th. Stage 9 is currently the home of the hit sitcom Last Man Standing which features ham radio as one of the shows themes. Amateur Radio Newsline's Bill Pasternak, WA6ITF, stopped by the operation and has this report:

--

The callsign of the operation was K6H which stood for King-6-Hollywood. And maybe you were one of the lucky ones to make contact with members of the southern California-based PAPA repeater system who sponsored and staffed this fun event:

--

Actual 40 meter QSO

--

That was just one of several stations that were up and running at K6H. And while the majority of operators came from the PAPA System, the idea for the event was that of John Amodeo, NN6JA, who happens to be the producer of Last Man Standing:

--

NN6JA: "I think it came about because a while ago I was asked to do a forum at Dayton by the ARRL to talk about ham radio and the way it's treated in the media. That set me off to thinking how ham radio is often portrayed either inaccurately or negatively.

"I wrote a forum and performed it in Dayton and it went out very well. But I could see that there was a bigger audience to reach with the whole concept of ham radio and Hollywood. And I thought that a special event radio station might be fun.

"We have the stage and we have a lot of ham radio equipment on the stage to do that. And I'm a member of several radio clubs; in particular the PAPA group here in Southern California, the Great South Bay Radio Club on Long Island, and a member of B.E.A.R.S. which is the Broadcast Engineers Radio Club who are connected to D.E.A.R.S. who are the Disney amateur radio guys and DARI which is an interconnect repeater system ob the East coast.

"So I thought to myself that if we could get the PAPA people on the West coast, the B.E.A.R.S. guys on the East coast and maybe throw in IRLP and Echolink, I could cover much of the country."

--

The K6H event had a lot of pre-publicity in the ham radio media. Even so, there are always bound to be last minute changes. So to cover this, Amodeo and the PAPA group turned to another kind of communications; the social media:

--

WA6ITF: ".You have an official tweeter?"

NN6JA: "We have an official tweeter on the show. Billy is our Assistant Production Coordinator and also a ham radio operator. As some of your fans might know we have twelve ham radio operators on staff and Billy's one of them. And he is over there tweeting and Facebook'ing about the event so that people can follow the frequencies we are broadcasting on."

--

Ham Radio Celebrates Hollywood was only on the air for a few hours. Even so the operators racked up a good number of contacts using traditional modes like SSB voice as well as emerging technology that included Echolink and IRLP. But perhaps the most important aspect of K6H is that it let the world of amateur radio know that the hams of Hollywood are also, thinking about the hobby and thinking about them as

well.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles. Don.

--

While a final QSO count is not available at airtime, there is no doubt that Ham Radio Celebrates Hollywood was a rousing success.

And less we forget, an interview with Last Man Standing Producer John Amodeo, NN6JA, is on this week's Rain Report. You can hear it or download it at www.therainreport.com. (ARNewsline(tm))

Space Station Chat Fires up Students' Enthusiasm:

Posted: 01 Nov 2012 05:11 PM PDT
http://www.eham.net/articles/29268

A group of Palm Beach County students sought answers from above Tuesday - 300 miles above, to be exact. For eight minutes, 11 students posed questions to Japanese astronaut Akihiko Hoshide while he orbited above them aboard the International Space Station. "Everything looks beautiful from space," Hoshide said, his voice resonating from an amateur radio device in the South Florida Science Museum in West Palm Beach. "My favorite might be the clouds because you can see the different shapes of clouds and depending on the time of the day, you can even see the shadows of those clouds up here." The museum was one of the few organizations in the country slated to make contact with the space station this year. It partnered with the school district and used a county-wide essay contest to choose the lucky students. "It was just shocking for an astronaut to be right there and that he's so far away and we still got to talk to him," said 8-year-old Jerry Stegenga, of Boynton Beach. "Everything is so shocking, living in a zero-gravity environment, like eating when your fork could be flying somewhere else!"

//
Ham as a Hobby:

Posted: 01 Nov 2012 05:08 PM PDT
http://www.eham.net/articles/29267

From the basement of his Labadie home, Mike Shye was talking with a man from Tennessee last week -- not by telephone, cellphone, email or any of the modern forms of communication that might come to mind. He was using his own licensed radio station, K0AYF. Shye is what is known as a ham : an amateur radio operator. He's one of many in the Franklin County area. In

fact, there are over 50 who belong to the local Zero Beaters Amateur Radio Club (ARC). "We like talking with people. That's mainly what we do," said Shye. "We all have a love of radio, so we like to talk to others about it. Some have built their own equipment, their own antennas . . . "There's also a social aspect to it, a lot of friendships are made." Shye said he is what hams call a "rag chewer," someone who likes to get on and talk with others about their equipment, their location, the weather there . . . A few years ago, Shye made a trip to New Hampshire to meet and stay with some hams he'd been talking to on the radio most nights for some years. "We were instant friends," he remarked.

http://www.eham.net/articles/29266

The adopt a soldier program that began at the Sullivan Ham Radio Club a few years back has continued to grow from its meager start. The club adopted only one soldier in its first year but has continued to do more and more every holiday season, thanks to the growth of the club and its participation in adopt a soldier. There is an adopt a soldier branch in Sullivan, and many soldiers will be helped through the program this year, giving them gifts and holiday surprises while they are stationed overseas during Christmastime.

//
Red Tape Binds Aussie Ham Radio Operators:

Posted: 01 Nov 2012 05:07 PM PDT
http://www.eham.net/articles/29265

WITH just a wire antenna, a slice of the airwaves and his own technical guile, Compton Allen is a one-man radio mogul. He doesn't rely on the internet, or a mobile phone. From his home in Ryde, the amateur radio buff - call sign VK2HRX - can transmit messages to Parramatta or New York. Others contact the international space station, or even bounce signals off the moon. But one source of earthbound interference impedes Mr Allen, and many of the state's 4300 licensed amateur radio users - the burden of council red tape. ''[Council regulation] restricts the type of antenna I can put up \& I sometimes find it hard to talk to stations in northern Europe and Antarctica and some places in Australia,'' Mr Allen said. ''The application process for antenna towers can be long and laborious, cost considerable money and involve all sorts of technical requirements which are probably not necessary.''

//
ARRL Requests Hams Do Not Self-Deploy to Areas Affected by Hurricane Sandy:

Posted: 01 Nov 2012 03:04 PM PDT
http://www.eham.net/articles/29263

Amateur Radio operators who want to assist those Sections affected by Hurricane Sandy should not self-deploy to those areas. "There are many ARRL Sections involved in the impact area, and each has different requirements on how they locate, credential and deploy volunteers," explained ARRL Emergency Preparedness Manager Mike Corey, KI1U. "If a need for manpower is identified that cannot be met locally or in the Section, Section leadership may contact other Sections for assistance. If the need is still not met, Section leadership may then contact ARRL HQ for assistance."

On Saturday, October 27, radio amateurs in Hawaii responded to a tsunami warning, providing valuable and timely information to emergency management officials. The tsunami was triggered by a magnitude 7.7 earthquake which struck at struck at 5:04 PM HST (0304 UTC on Sunday,

October 28) in the Queen Charlotte Islands, located off the coast of British Columbia, Canada.

//
KD4OHZ, Missing at Sea After Sinking of Tall Ship Bounty; N6TQS, Rescued:

Posted: 01 Nov 2012 02:50 PM PDT
http://www.eham.net/articles/29258

Every DXer knows the story of the HMS Bounty and Pitcairn Island, VP6: In 1789, the HMS Bounty -- a small three-masted sailing vessel sent by Britain's Royal Navy to the Pacific on a supply expedition -- was roiled by tension between its crew and its captain, William Bligh. After landing in Tahiti and taking on a cargo of breadfruit, the Bounty set sail for the West Indies; it never reached that destination. Instead, Master's Mate Fletcher Christian led the men in a mutiny, eventually allowing Bligh and his loyalists to sail off in a longboat. After an arduous journey, they reached safety at the Dutch-owned port of Kupang. Christian and his followers ended up on Pitcairn Island where they burned the Bounty and settled on the island. Passing ships did not discover the enclave until after the turn of the century.

CQ WW SSB contest - where was Uganda, Kenya and Seychelles

Posted: 03 Nov 2012 05:22 AM PDT
http://forums.qrz.com/showthread.php?366989-CQ-WW-SSB-contest-where-was-Uganda-Kenya-and-Seychelles&goto=newpost

The bolletino 511 from the Italia DX group cited that these guys would be
contesting last weekend and the only one I ended up seeing and
unfortunately not working was the Seychelles. Any idea what happened with
these other entities. I only worked one new one on SSB the past weekend and
was lucky to get a new one on RTTY Mauritania on 12m. The contest was a bit
disappointing from a spot and ponce for new ones perspective. But then
again I was only on for about an hour and a half the entire contest.

Normal 0 false false false EN-US X-NONE
X-NONE
In November, 2012 Mongolia will celebrate Chinggis Khans 850th birthday.
November 14-21 Mongolian amateur radio operators will be active using
special event callsigns such as JU850AA, etc Qsl via qrz.com.

Chinggis Khagan Award will be issued free to those who make three contacts with three different event callsigns, i.e, JU850AA, JU850DA, JU850DN. Any mode, any bands. Please send your request with QSO detail information to MRSF at MRSF dot MN.

On April 16, 1162 (adjusted to our current calendars, the date is November) Temujin was born on the banks of the Onon River, in the heart of Mongolia. He came to power by uniting many of the nomadic tribes of Northeast Asia. In 1207, he established the Mongol Empire and was proclaimed "Chinggis Khan". Chinggis Khan and his descendants went on to stretch the Mongol Empire across most of Euroasia by conquering or creating vassal states out of all of modern-day China, Korea, the Caucasus, Central Asian countries, and substantial portions of modern Eastern Europe, Russia and the Middle East.

Chinggis Khan died in 1227.

SARL NEWS - SUNDAY 04 November 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEY

It is with regret that it is announced that the key of Joost Schuitemaker, ZS5S, went silent on the night of 29 October after battling cancer for a few months. For many years Joost provided email relays via packet BBS to mariners.

Our sincerest condolences to his wife Marjoke, ZS5V, relatives and friends.

SARL MEMBERSHIP AND AFFILIATED CLUBS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

EVER READ MUNITY ON THE BOUNTY?

Every DXer knows the story of the HMS Bounty and Pitcairn Island, VP6: In 1789, the HMS Bounty -- a small three-masted sailing vessel sent by Britain's Royal Navy to the Pacific on a supply expedition -- was roiled by tension between its crew and its captain, William Bligh. After landing in Tahiti and taking on a cargo of breadfruit, the Bounty

set sail for the West Indies; it never reached that destination. Instead, Master's Mate Fletcher Christian led the men in a mutiny, eventually allowing Bligh and his loyalists to sail off in a longboat. After an arduous journey, they reached safety at the Dutch-owned port of Kupang. Christian and his followers ended up on Pitcairn Island where they burned the Bounty and settled on the island. Passing ships did not discover the enclave until after the turn of the century.

On Monday, October 29, a replica of the Bounty -- built in 1960 for a remake of the 1962 film Mutiny on the Bounty -- sank off the coast of North Carolina as Hurricane Sandy made its way toward New Jersey. Of its 16 crew members, 14 were rescued by the US Coast Guard. Bounty Captain Robin Walbridge, KD4OHZ, never made it to one of the two deployed life rafts and is presumed dead. Claudene Christian, who claimed to be a direct descendent of Fletcher Christian, was unresponsive and passed away at a North Carolina hospital on Monday evening.

Doug Faunt, N6TQS, of Oakland, California, was one of the 14 who was rescued by the Coast Guard; Faunt served as a deckhand and was also the ship's electrician. A noted DXer and ARRL Life Member, he was part of the FO0AAA DXpedition crew in 2000 to Clipperton Island. He was also a member of the VP6DIA DXpedition to Ducie Island, and in 2007, he was part of the DXpedition to Lakshadweep.

According to Spud Roscoe, VE1BC, Faunt had satellite communications equipment and Winlink capabilities on board the Bounty, but he was not the ship's radio officer. "Sailing on replica ships was a hobby of Doug's," Roscoe told the ARRL. "He had previously sailed across the Great Australian Bight on a replica of the HMB Endeavour, Captain Cook's ship. He was an able seaman of the watch." Roscoe was the radio officer on the replica Bounty for its original voyage to France in 1962.

Faunt told the ARRL that the Bounty crew tried various methods, including a satellite phone, to call for help, "but we got nothing then tried calling out on HF. We tried calling the Maritime Mobile Net, but nothing was out there. We had Winlink on the ship that we used for e-mail and accessing the Internet to post to blogs and to Facebook, and we finally found an e-mail address for the Coast Guard. As a last-ditch effort, we used Winlink to e-mail the Coast Guard for help. Within an hour, we heard a C-130 plane, and later, a helicopter overhead. According to Faunt, it was Walbridge, as master of the ship, who sent out the distress messages.

"I don't know how I made it off the ship," Faunt recalled. "I had finished serving a long watch, and then we started going down. I was exhausted. I had to swim to get to the life raft. The water was full of rigging, and here I am, in my Gumby suit, trying to swim. It was so difficult. While swimming to the raft, I came up for air and a spar was coming at me. I finally found a raft and tried to climb into it, but I almost didn't make it, tired as I was. Through the help of my shipmates

who were already aboard the raft, I got on." The two life rafts were out about 100 miles from shore when they were rescued.

The vessel left Connecticut on Thursday, October 25 with a crew of 11 men and five women, ranging in age from 20-66. After being treated at a hospital in Elizabeth City, North Carolina, Faunt arrived back home in California on Wednesday, October 31. "I'm looking for a new boat to sail and a DXpedition to go on," Faunt told the ARRL. "Ham radio got me into my position on the Bounty, and ham radio got me out alive!" A remarkable story.

NEXT SUNDAY IS REMEMBRANCE DAY

Every second Sunday in November the SARL, in special church service transmitted in the last 15 minutes of Amateur Radio Today, remembers all those who lost their lives in defense of their country. The service will be first transmitted at 10:45 CAT on 11 November. The service will conducted by Dominee Jan Kramer, ZS6JRK. All amateur radio stations are requested to observe radio silence as a mark of respect.

111 CADIDATES PASS THE RAE

Gideon Jannasch says the waiting for the results of the October RAE is something of the past. A total of 111 candidates passed the RAE. Candidates who did not receive their call signs yet due to outstanding documents, must submit it as soon as possible.

The new call signs are published on the SARL webpage at www.sarl.org.za. Congratulations to every successful candidate, we hope to hear you on air soon. To all the radio amateurs who are already licensed, please be patient with all the newcomers and help them in a friendly manner.

A hearty welcome again to all the new amateurs and we ask please join the SARL if you have not done so yet. You receive free membership until 30th of June 2013.

SARL MEMBERSHIP AND AFFILIATED CLUBS

The SARL announces, with pleasure, that its membership now exceeds 1 500. This does not yet include the new members that passed the last RAE, they will be added to the list of members in the coming week.

The SARL welcomes Dennis Lightbody, ZSL1050, who joined the SARL as a member. We trust that he will enjoy a long and happy membership with the League.

During the past week the following clubs have affiliated to the SARL:

False Bay Amateur Radio Club, ZS1FRC Highveld Amateur Radio Club, ZS6HVB Overberg Amateurradioklub, ZS1OAR Sasolburg Amateur Radio Club, ZS4SRK Suid Kaap Amateur Radio Club, ZS1SKR Vaal Triangle Amateur Radio Club, S6VTB West Rand Amateur Radio Club, S6WR

This brings the total number of affiliated clubs to 28. For a complete list of affiliated clubs go to the SARL web page and click on Club Talk.

CONTEST NEWS

PEARS HF DX contest

Competitors please note that the date of 13 November as stated in the Contest bluebook for this contest is not correct. The correct date is the 11th of November.

Overberg Amateur Radio Club

On the week end of 17/18 November, it is the SARL Field Station contest. The Overberg Amateur Radio Club will be operating a field station at the QTH of John, ZS1DI, and Judy, ZS1JEG, at Stanford. This will be held in conjunction with our end of the year braai, boot sale, fox hunt and a display by the AWA where they hope to operate some of their equipment. There are camping and braai facilities. Visitors are welcome. For further details you can contact Andre, ZS1AZ, at 028-5142018 after 18:00 or Sam, ZS1OR, at 073 250 0428. This should be a fun week end.

CLUB NEWS

At the Annual General Meeting of the Free State Amateur Radio Club, held on 26 October, the following members were elected to the committee of the club: Chairman: Phillip Esterhuizen, ZS4PJ Vice Chairman: Charl Brittz, ZS4ATZ Secretary: Ellen de Bruin, ZS4EDB Hamnet: Johan van Zijl Additional members: At van der Walt, ZS4VS and

Danie de Bruin, ZS4DA.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the expected solar activity will be at low levels. All current visible sunspot regions are stable with nearly no flaring.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 45.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. There will also be frequent 10 m openings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 11 November - Pears HF DX contest. 17 November - SARL National Field Day will take place between 10:00 UTC on Saturday 17 November and 10:00 UTC on Sunday 18 November. 18 November - Log sheets for the RaDAR Contest to be in to Lichtenberg Amateur Radio Club (LARK), PO Box 410, Lichtenburg, 2740 or by email to zs6lrk@nwinternet.za.org.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 UTC on 4 895 kHz ((A new time and frequency!). Reception reports are invited. We are particularly interested in reports of the 4 895 kHz transmission on Mondays at 18:30 UTC as the frequency is close to the proposed new amateur allocation near 5 MHz. Reception reports from all areas in South Africa would be useful in our bid to ICASA for frequencies pilot studies. Send reports to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled by George Honiball, ZS6NE.

Thank you for listening, 73. /EX

Hams For Hurricane Sandy Relief

Posted: 02 Nov 2012 07:26 AM PDT
http://forums.qrz.com/showthread.php?366898-Hams-For-Hurricane-Sandy-Relief&goto=newpost

Everyone. I just came up with a great idea. I originally started out with
amateur radio

operators in mind, but here's how it works.....

Hams For Hurricane Sandy Relief

I've come up with an interesting idea. I just don't know how to start it or
how to get the ball rolling so I figured I'd post here for ideas.

Naturally people know how a bucket brigade works. One person fills a bucket
full of water and it gets passed to the next person in line until the water
reaches the fire.

In this case, if hams on the west coast start putting together a small care
package, it doesn't matter what it is, socks, toiletries, clothes....then
they contact a ham east of them and pass the box along, and so on, until
the box reaches the hurricane victims on the east coast.
http://www.ready.gov/ has a list of things that would be useful to people.
Me, I think with the water levels as high as they got, clothes would be
needed, as well as batteries, non-perishable food, etc. The Government, as
large as it is can't do it alone. With all the hams in this country, we
could send quite a lot of things. We have the resources of eham and qrz.com
to look for hams near each of us. Even if you don't know that particular
ham, it's a way to meet new people too. Most towns have a Goodwill or some
sort of Salvation Army store in them. Lots of good wearable clothes can be
bought there quite inexpensively. That's a source of supplies..... I'm
curious as to what people think of this idea. If we can do it with messages
via NTS, why can't we do it with tangible needed things like socks etc.?

It's called the Amateur Radio Service. Well, here's the chance to showcase
the service part. I don't know if this is a dumb idea or not, but I figured
I'd post. Thank you all for reading.

So people on the west coast find someone EAST of them, pass along their box,

and the box either gets bigger or becomes two boxes on the way etc. etc.

Ham Radio Expedition Heads to Remote Island Once Used by Navy:

Posted: 02 Nov 2012 05:13 PM PDT
http://www.eham.net/articles/29273

First contact: Ham radio expedition heads to remote island once used by Navy in support of USAP: An international team of ham radio operators will take part in an expedition to a remote island that was once a regular stop for U.S. Navy ships that supported the U.S. Antarctic Program. I have been invited to join the adventure, which will take place at the end of the year, returning to Campbell Island after almost 45 years since last setting foot there while a young sailor working aboard U.S. Navy radar picket ships. Between 1957 and 1968, the U.S. Navy deployed Destroyer Escort (DE) class ships to 60 degrees south latitude for weather reporting and navigation beacons for the planes flying between Christchurch, New Zealand and McMurdo Station on Ross Island. During those sailings, we stopped at Campbell Island to deliver and pick up mail, as well as to ferry the New Zealand scientists who lived on the island back and forth from Dunedin. Gene Spinelli is headed back to Campbell Island this month. New Zealand's Campbell Island was a manned weather station from the mid 1950s until 1995. Scientists living on the island performed daily weather reporting duties and other scientific activities. Early in the program, these reports were integral to the then Operation Deep Freeze aircraft flying between Christchurch and McMurdo. In 1995, the weather reporting process was automated and the island again became uninhabited. Since 1995, non-native wildlife was eradicated and the island has since been designated a UNESCO World Heritage Site . Landing on the island is controlled by the New Zealand Department of Conservation. The worldwide amateur (ham) radio community also has great interest in this part of the world, and that's where the ZL9HR Campbell Island 2012 Expedition comes into the picture.

//
Tinkerer Invents iPhone Interface for Ham Radios:

Posted: 02 Nov 2012 05:13 PM PDT
http://www.eham.net/articles/29272

NEW YORK -- In a far-off corner of the Maker Faire at the New York Hall of Science in Queens on Sept. 29, between a cheering crowd around a small racetrack and the blaring music of a party booth, Thomas Tumino sits calmly, and to any interested passersby points at a small white box and says, "that's an iPhone interface." The white box isn't your usual iPhone

interface though. It's an iPhone interface that lets you use your iPhone over a ham radio. The iPhone is plugged into one end, the radio into the other. The white box converts the commands from the iPhone into audio information. For Tumino, vice president of the Hall of Science Amateur Radio Club, whose call sign is N2YTF, it's all very simple "If you can imagine it, it can be done," Tumino said, noting that he built it himself without plans as reference. The radio iPhone plug works just like dial-up modems did. "It used to be that if you dialed up onto the Internet, you'd have a modem and you'd connect your computer into the telephone lines," Tumino said. "The modem took digital information and made it into sound."

We congratulate the winners of EPC Russia DX Contest 2012

Posted: 04 Nov 2012 05:07 AM PST
http://forums.qrz.com/showthread.php?367110-We-congratulate-the-winners-of-EPC-Russia-DX-Contest-2012&goto=newpost

The results of the Forth EPC Russia DX Contest - 2012 were published on
November 4, 2012. We congratulate the winners and prize-winners with the
deserved achievements and wish them to continue the improvement of their
equipment and aerials, as well as skills of work in PSK-contests to
compete successfully in our next contests in fair and uncompromising
struggle.

epcrudxc_logo2.jpg754 logs of participants from 67 DXCC countries have
been received. We must note the increase in the number of contesters who
have become more responsible towards their work in PSK mode, as well as
to compilation of a report and its timely submission. Inspection by robot

and downloading logs via the Web-site UA9QCQ helped many contesters to learn to compile their logs in Cabrillo properly. We hope that there will be even more participants in ontest-2013. Even despite the fact that from the next year the deadline for the reception of reports for all EPC-contests was reduced to 5 days (120 hours) after the end of contests. In EPCRUDXC it was not possible to play as yet only one prize - a Plaquette for 1,000th participant. That is why this award is transferred to the next year. The Contest Committee has begun distribution of diplomas and certificates, ordered plaques and other prizes about which we announce additionally.

We note the well-deserved victory SOAB-WORLD by Paolo Emanuelli IN3VVK. Using the SO2R technology (single operator - two radios) he has achieved amazing results - 1087 announced and 989 confirmed QSOs and 2,646,700 points. In MOAB-WORLD the team from Germany DF9DD (Eckhard Schnaare DF9DD and Julia Schnaare DG9BVB) defeated with a modest score of 141 QSOs and 80, 727 points. In SOHF-WORLD Lev Kuznetsov UN7DA was the first to came to thefinish - 681 QSOs and 1,471,851 points. There was no equal to Dmitry Starinets UT3N in SOLF-WORLD - 413 QSOs and 420,043 points.

Due to good propagation during the contest, some of the participants managed to carry out radio contacts with six continents. The best result on their continents showed in SOAB, SOHF and SOLF respectively: in Africa - EA8CYQ and D2QV; in Asia - BA1PK, UN7DA and UN7EW; in Europe - IN3VVK, ON6NL and UT3N; in North America - VP9/OH2MQ and CO2AJ; in South America - PY2SHF and LU2DC; in Oceania - VK3FM and YD1OCG.

The expedition members who work in ETPA program have also supported our contest. Nicholas Stamenov LZ1NJS/p showed the best result in the subgroup SO-ETPA among six participants - 466 QSOs and 759,402 points. Reports and photos of these expeditions were presented in the news on our website, such as LZ1NJS/p EPC-RUSSIA-DX - equipment against operator.

Vladimir Sharpar RT3P has won in separate SOAB-RU among the russian participants with result of 824 QSOs and 1,374,572 points. Three years running there are no equal in MOAB-RU to operators of RK4WWQ - Alexey Galichanin UA4WAU, Dmitry Labygin UA4WKK and Egor Sentjakov from Junior Club of Izhevsk - with result of 945 QSOs and 1,650,439 points. The youth club RK3DXW from p.Beloozersky is recognized the best where only students were the participants - Sergey Semikov UB3DBA, Fjodor Khomyakov UB3DCX, David Rubashkin R3D-304-KO - with result of 476 QSOs and 501,909 points. Nikolay Denisov RL6MA was the best on low bands in SOLF-RU - 412 QSOs and 261,051 points. Victor Dmitrienko UC0A has the highest score in SOHF-RU - 671 QSOs and 1,048,080 points. Vladimir Arkhipov UA0CNX, Vladimir Kondratyev RA9SKL, Alexander Ustavnikov RA1ALC, Sergei Timotin RX6FQ, Alexander Varganov RD9OA, Yuri Volobuyev UA9AFS, Vladimir Sharpar RT3P and Sergei Sergeev R7MM have become the winners of the eight federal districts in subgroup SO-RU-FO.

Hams from 65 regions, territories and republics of Russia competed in our contest. In SO-RU-OBL subgroup the largest number of participants were represented: Moscow - 19, Voronezh region - 13, Moscow region - 12,

Sverdlovsk region and Krasnodarsky kraj by 11 callsigns. Sergei Trufanov UB3AEB showed the best score in SO-RU-UB subgroup among the stations of 3rd category. We are pleased to note the newcomers in EPCRUDXC. There were 23 callsigns which have been heard in our contest: My first EPCRUDXC.

To see more and download the results and UBN-report, please click here: Results of EPC Russia DX Contest 2012.

We thank the Staff of the Club for active help and hope to see you all in good health in the EPC Russia DX Contest 2013!

73! - Contest Committee EPCRUDXC

**** EDITOR'S COMMENT: If you were on Daylight Saving Time (DST), did you remember to turn your clock back an hour?

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 28th-October, through Sunday, 4th-November there were 228 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, JA, JD/m, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S5, S7, SM, SP, ST, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

7Q, MALAWI. David, WA1LBP/7J6CBQ, seems to be a new operator in Malawi and was issued the callsign 7Q7DFC on October 10th. He has been in Malawi since mid-September. There have been reports that he has been on 10 and 6 meters. QSL via OE4VIE. David has a Twitter at: https://twitter.com/DavidinMalawi/status/262098485699047424

9Y, TRINIDAD AND TOBAGO (Cancelled). Jim, N6TJ, has canncelled his activity as 9Y4W from Scarborough, Tobago Island (SA-009, WLOTA 0412), for the CQWW DX CW Contest (November 24-25th). His host on Tobago has a broken tower and there is no time to fix it before the contest.

A3, TONGA. Jacek, SP5EAQ, will be active as A3EAQ from Tongatapu Island (OC-049) between March 26th and April 16th. Activity will be on 80-10 meters SSB only. QSL via SP5EAQ, direct or by the Bureau. For more details and updates, watch: http://sp5drh.com/a3eaq

A5, BHUTAN. Zorro, JH1AJT, will be active as A5A between November 8-15th. Activity will be on 40-10 meters but with limited spare time operations. QSL via his home callsign, direct or by the Bureau.

CO8LY (Lost Home and in Trouble). Dennis, K7BV, received the following from Eduardo, CO8LY, a long time HF and 6m op who has given so many their No.1 Cuba contact [edited]: "Dear Friends, I have sad news, the hurricane Sandy destroyed my house. I've lost everything, I need all I ask for help, please communicate with my manager EA7ADH or send me SMS to my cell 52400814.
My mother is very ill and my situation is very difficult. Sorry for the inconvenience. My city Santiago de Cuba was destroyed by the hurricane. Big hug, Eduardo, CO8LY, I'm using tractuctor excuse the bad english." Dennis states, "I am going to be sending Eduardo some help. Rather than load Eduardo up with a lot of SMS charges, I would be happy to serve as a collection point for others wishing to send help. He is going to need a complete station, accessories, etc. too, it appears. Thanks for your consideration. Drop me a private note if you would like to send something to our buddy..... 73 Dennis Motschenbacher K7BV
PS: Spread the word please."

CY0, SABLE ISLAND (Update). PRESS RELEASE - date October 28th [edited]: "Ron/AA4VK and Murray/WA4DAN were forced to leave Sable Island around 1915z on Saturday due to the dangerous East Coast storm. The effects of the storm were already being felt on the island as the sand landing area was flooding due to the rising tide and large breakers.
Naturally we were very disappointed to cut short the DXpedition by four days. We had little choice as we could have been stranded on the island for weeks. Traveling to Sable is always a challenge no matter what time of year it is. We certainly have first-hand knowledge of this! During the 4.5 days of the DXpedition, Ron and Murray logged approximately 13,000 Q's. This DXpedition was highly focused on 10,12 and 15 meters where the most demand existed. Our mono-band yagi's and vertical antennas performed very well in the very strong winds. We had to double stake the guy lines for the antenna masts.
We would like to thank Gerry Forbes, the officer-in-charge on Sable Island, and Maritime Air for safely getting us off the island.

73, Ron/AA4VK and Murray/WA4DAN"
ADDED NOTE: Alan, VE1AWW, is expected to be active again as CY0/VE1AWW sometime this past week or very soon. On his QRZ.com page he stated on October 30th, "Sorry to one and all for the great delay in QSL replies and email replies. My laptop with logs died just after I was shut down late last June. I now have the computer and logs back. I am headed back to CY0 later this week. I will sort through the backlog out there and post them on my return to the mainland (late December). I will post here (QRZ.com) when back on the island." His bands of activity are unsure, but he likes to operate on SSB and PSK. QSL via his home callsign, direct or by the Bureau.

EL, LIBERIA (Update). Look for the VooDoo Contest Group to once again be active from here between November 17-27th. This is their 24th straight year. Operations will be from a location just South of Monrovia, the capital of Liberia. Their main goal is to be an entry in the CQWW DX CW Contest (November 24-25th) as a Multi-Multi category using the callsign EL2A. Outside of the contest the operators will use their own personal callsigns. Operators mentioned are Ned/AA7A (EL2ES), Roger/G3SXW (EL2A), Fred/G4BWP (EL2WP), John/G4IRN (EL2RN), Mike/KC7V (EL2MF), Lee/KY7M (EL2LF) and Bud/N7CW (EL2CW). QSL via their home callsign, except EL2WP via G5LP. Logs will be uploaded to LoTW and ClubLog (w/OQRS available) as soon as possible, probably after their return home.

ET, ETHIOPIA (Special Event/Press Release). ET3AA - Ethiopian Amateur Radio Club Announcement - "In celebration of our dear mentor's passing, Mr. Sidney May (ET3SID), our club will make 10,000 QSOs starting on Tuesday, October 29, 2012, and will end once the QSO count has been achieved. In March 2012, Sid was instrumental in having the ET3AA - Ethiopian Amateur Radio Club set-up as a formal organization. With the students receiving US Ham Radio Call-Signs and four students becoming ARRL VE's, this allowed the ET3AA call sign to be transferred from Sid May's name to the club, therefore allowing the club to continue using the ET3AA call sign. The club is officially re-opened.
Mr. David Collingham (K3LP), working with the Ethiopian Amateur Radio Club, will prepare a color QSL card with our club input and will pay for the cost for printing the QSL cards. Mr. Bob Schenck (N2OO) has agreed to be our QSL Manager for this event. Please do not send prior QSL requests to Bob since he does not have the ET3SID or ET3AA logs except for the brief K3LP visits in Aug. 3-5, 2011 and Dec. 8-13, 2011.
We are in the process of setting up a new PO Box for the club and will add the new address information to our website once available.
Please the use the DX Code of Conduct. Please be kind and work with our students as we learn and improve of radio operating skills.

Sincerely,
ET3AAA - Ethiopian Amateur Radio Club
Dagmawit Solomon
http://et3aa.com/ "

EA8, CANARY ISLANDS. Jyrki "Jay", OH6CS, will be active as EA8CUU from G�ldar, Gran Canaria (AF-004, DIE S-005, WLOTA L 0969), during the CQWW DX CW Contest (November 24-25th) as a Single-Op/Single-Band (??) entry. QSL via OH6CS direct. Outside of the contest, look for Jay to do some 50 MHz CW/SSB-activity as EA8/OH6CS (QTH loc. IL28DD) between November 22-28th. For more details about the station, see: http://personal.inet.fi/cool/sierra/ea8.htm

EF8, CANARY ISLANDS. Luis, EA8AY, will use the special callsign EF8USA from Tenerife Island (IOTA AF-004, DIE S-012, WLOTA 1276, EAA TF) during the ARRL DX CW Contest (February 16-17th) as a Single-Op/All-Band/High-Power entry. QSL via W2GR. Visit his Web site at: http://www.ea8ay.com/ef8x

FM/TO7, MARTINIQUE. Dimitry, UT5UGR, will be active as FM/KL7WA from Martinique (NA-107) between November 19-26th. Activity will also include the CQWW DX CW Contest (November 24-25th) signing TO7A as a Single-Op/Multi-Band entry. QSL via UT5UGR.

FM/TO5, MARTINIQUE. Valery, R5GA, will once gain be active as FM/R5GA from FM5BH's QTH between February 11-17th. Activity will include the ARRL DX CW Contest (February 16-17th) as a Single-Op/All-Band/High-power entry and using the callsign TO5X. Outside of the contest, his activity will probably be on CW mainly and on 160-10 meters, especially on the 30/17/12 meters. QSL via LoTW or via UA3DX.

FM/TO5, MARTINIQUE (NA-107). Al, F5VHJ, will once again be active as TO5A, from FM5BH's QTH during the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/All-Band/High-Power entry. QSL via F5VHJ, direct or by the Bureau. Logs will be uploaded to LoTW.

GJ/MJ0, JERSEY. Mat, MJ0ASP (aka-F5SHQ), will be active as GJ2A during the ARRL DX CW Contest (February 16-17th) as a Single-Op/All-Band entry. QSL via the LoTW.

HI, DOMINICAN REPUBLIC. Sergey, R4WAA, will be active as R4WAA/HI7 between November 21-30th. Activity will be on 40-10 meters and the CQWW DX CW Contest (November 24-25th). QSL via his home callsign by the Bureau.

IOTA NEWS.....
SA-018. Javier, CD6713, indicates that he has "a legal as Aspirant's license", and can transmit on bands of 10, 40 and 80 meters and VHF, from the Chiloe Island. QSL only direct. See details and pictures of his station on QRZ.com.

SA-087. Members of the R�a Deseado Radio Club, who were expected to be active this past week as LT0X from Penguin Island, had to reschedule their DXpedition due to weather. The operation is postponed one week. Activity will now take place between Friday, November 9th and Sunday, November 11th. There has been no activity from this island for 12 years. Activity will be on 80/40/20/15/12/10 meters, possibly 6 meters, using CW, SSB and PSK31, with three stations active on the air. QSL via LU7DSY.

SA-096. (NEW IOTA) It was announced this past week that operators Cezar/VE3LYC and Johan/PA3EXX, along with two Argentinian operators, plan to activate Escondida Island in the Chubut Province North IOTA Group early January 2013. Activity will be for four days using two stations. Bands, modes and callsign were not mentioned or provided. QSL via VE3LYC, direct or by the Bureau. Hopefully, more details will be forthcoming.

ISWL CALLSIGNS (For November). The following ISWL club callsigns will be used throughout the month of November:
GX4BJC/A - Operated from Great Missenden, in Buckinghamshire, by John, G8XTJ. (/A WAB Square ►P80 - England & IOTA ►U-005).

MX1SWL/A - Operated from Hartford, in Cambridgeshire, by Tom, G3RPV. (/A WAB Square ►L27 - England & IOTA ►U-005).

ALL QSLs will be handled by Herbie, G6XOU, and NOT the individual operator. The I.S.W.L. is a member of the European PSK Club. All QSL info is on <www.iswl.org.uk> or <www.qrz.com> or via <www.eQSL.cc>. NO LoTW. I.S.W.L. Awards are available to all Hams and SWLs, see <www.iswl.org.uk> for full details. The eQSL.cc cards ARE welcomed for their awards.

JU850, MONGOLIA (Special Event). Baterdene, JT1CS, reports to look for special event stations to be on the air to celebrate Chinggis Khan's 850th birthday between November 14-21st. Mongolian amateur radio operators will be active using special event callsigns such as JU850AA, etc... QSL via info on QRZ.com. A "Chinggis Khan Award" will be issued free to those who make three contacts with three different special event callsigns, i.e, JU850AA, JU850DA, JU850DN.... on any mode or bands. Please send your request with QSO detail information to: MRSF at MRSF.MN

KH0, MARIANA ISLANDS. Operators Jussi-Pekka/OH6RX and Esa/OH7WV will be active from Saipan Island (OC-086) during the CQWW DX CW Contest (November 24-25th) as a Multi-2 entry. Callsign and QSL info will be announced later. Time permitting, some operating outside of contest one day before and one day after may take place. Operators have the Saipan Rental Shack

for November 22-27th, and will probably use the callsigns KH0/homecall outside of the contest. For more details about the Saipan Rental Shack, see the following Web page at:
http://saipan.rental-shack.com/english/index.html

NEWS RELEASE ("DXER'S IDEAS SOUGHT FOR MEETING INCREASING DXPEDITION COSTS"): "LEICESTER, NC, Oct. 31 --- The DX Magazine, whose current issue features an article, 'Dealing with the skyrocketing costs of DXpeditions,' is asking DXer's for their ideas on how to increase the level of funding for future major DXpeditions.
Carl Smith, N4AA, Editor and Publisher of the DX Magazine, says 'Major DXpeditions to entities in the top ten of the most wanted list can cost 500,000 USDs or more to activate. This poses a major fund raising challenge to organizers, with costs rising rapidly for such big ticket items as logistics, including transportation, licensing, and permits, along with inflation,' he said. Specific costs are documented in the article appearing in the November-December issue of The DX Magazine.
Smith said, 'DXer's are invited to send their ideas to the DX Magazine, which will be reporting the results in a future issue. All suggestions are welcome, and may be either anonymous or identified by the contributor's name and call.'
Send ideas and comments to: DXpedition Costs Survey, c/o D.E. 'Dee' Logan, W1HEO, 9901 Cypress Circle, Mentor, OH 44060-7221. E-mail to: deverelogan@gmail.com "

OH0, ALAND ISLAND. Operator Tomi, OH6EI, will once again be active as OH0Z during the CQWW DX CW Contest (November 24-25th) as a Single-Op/ All-Band/High-Power entry. QSL via W0MM.

PJ5, ST. EUSTATIUS. A team of JA operators will be active as PJ5J from St. Eustatius (NA-145) between November 30th and December 12th. Activity will be on 160-10 meters using CW, SSB and the Digital modes. Operations will emphasize the lower bands, especially 160m, and working stations from AS/JA. They will participate in the ARRL 10m Contest (December 8-9th) and possibly other contests during that period. The team plans on at least one station on the air for 24 hours day, and possibly another one or two stations to operate simultaneously according to the band openings. Two stations will have 500w amps and another will operate barefoot. Antennas will be verticals for the low bands (w/beverage) and a Spiderbeam for the higher bands. Operators mentioned are Takayuki/JA1MZL (team leader), Yutaka/JJ1LIB, Naoki/JN1RVS, Hideyuki/JJ1CBY, Katsu/JA1DXA, Toshihiko/ JN1HOW and Isao/JH1ROJ. QSL Manager will be Nao, JA1HGY. Logs will be updated daily to ClubLog and to LoTW after the operation. A OQRS will be available. No Web page was mentioned.

PT0S, ST. PETER AND ST. PAUL ROCKS (Update). As per the PT0S Web page dated October 31st, from George, AA7JV [edited]: "Most of the PT0S team is now in Natal. Fred, PY2XB, is going to join us on November 3rd. All our gear has made it and is being stored at the local radio club. Because importation into Brazil can be difficult and slow, we feel that we have passed one of the most worrisome hurdles we've faced. We are now procuring

supplies and items that we decided to purchase locally, such as car batteries, camping gear, etc. Local HAM-s, especially Mauricio Barreto, PS7RK, have been incredibly generous helping us to buy supplies and make the final preparations.
We are on schedule to leave for St. Peter and St. Paul Archipelago on November 5th. The weather forecast is favorable, which is good news, as seas can be rough along the 620 nautical mile passage. We -- and all our gear -- will be travelling on the 70 foot fishing boat Transmar II, along with 8 fishermen. It will be tight and the lighter the seas the more bearable the passage will be.
We are hoping for a good and productive operation, where in addition to getting a lot of calls into the log, the entire community will have fun. We will soon start publishing operating tips and advice on how to work us best. In the meantime, please keep the following in mind: 'THE DX'ERS CODE OF CONDUCT'." -- which is listed on their Web page at: http://pt0s.com

PZ, SURINAM. Yuri, VE3DZ, will be active as PZ5T from Surinam between November 20-27th. Activity includes the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band entry. Outside of the contest, look for him to be on CW, SSB and RTTY. QSL via his home callsign.

8P6DR QSL STATUS. Richard, G3RWL, reports on:
October 29th - "I have written cards for the bureau. Tomorrow I'll start on 86 direct cards."
October 31st - "All direct cards received will be mailed today. Awaiting TQSL certificates for LOTW upload."

NEW QSL ROUTE. Rex, NR6M, reports that he is now the QSL Manager for H44RK. His address and instructions are available on QRZ.com.

NEW QSL ROUTE. Ron, AC7DX, reports that he is now the QSL Manager for D2ZR in Angola. QSL only direct; no Bureau Please. See QSL mailing info for AC7DX on QRZ.com.

NEW QSL ROUTE. Ralph, H44RK, is now the QSL Manager for H44A and H40A which are expected to be club callsigns for an Amateur Radio Club on Guadalcanal.

NEW QSL ROUTE CHANGE. Dave, G4FRE/WW2R, informs OPDX that as of October 1st, 2012, the ONLY QSL route for the following callsigns are now G4FRE and not WW2R. Callsigns are: MW2I, GW0FRE, GC0FRE, WW2R, N4FRE, 9H3MX, 9H3MW, ZB2IQ, PJ4/WG3I, WG3I/C6A, ZF1IQ, ZB2IQ, VK2IDR, VR2EK, ON8QK and EI4VCH. The direct address for G4FRE is available on QRZ.com.

QSL RECEIVED VIA LoTW: 5U8NK, AY4DX, BU2AW, CU3AC, D4A, EA1DR, EI5JQ, EI80IRTS, GI4SJQ, GI7AXB, HG7T, J43J, KH8/DL3DXX, KL7KY, KL7RA, KP4RV, LA7DHA, LR3M, LZ2HM, MI0AYR, MM0AMW, MM0TFU, MW0RLJ, OZ5E, P43E, PY1PL, PY1RJ, S57AL, SJ2W, UA2FR, UA6DX, VE3CX, VE3YAA, VE4VT, VK3TDX, VO1TA, WP2Z, XE2B and ZL1BYZ

QSLS RECEIVED VIA MAIL: 3C0E, 4J5A, 7O6T, 5T0JL, 9M2FB, HL3ERJ, JA1NLX/VK4, KP2/KW5E, T77C, VA7AQ/NLF, VK9CS, VP8LP, VU7M, ZA/OK2BOB, ZD9UW, ZG2FX and ZS7/DL1LLL

QSLS RECEIVED VIA THE BUREAU: 1B/DH8WLA, 3A/AI5P, 401A, 403A, 6W/LX1DA, 8P9MS, 9H3YM, 9H9OB, 9L7NS, 9X0CW, AH2L, C56E, C91TK, CN2A, CT9/DJ6TF, CT9/DL3KWF, EL2ES, FP/KV1J, FR/DJ7RJ, HK3DC, HR9/EA1APV, HR9/AI5P, HZ1AN, J7DM, KH6/K9FD, KL7/DL3LAB, KL7/K6VVA, KP2/AB1NL, KP2/AG1LE, OX/DL1RTL, PJ2/W5XU, PJ2/W0NB, PJ4R, PJ5/K1XM, S9DX, SV9/WB2GAI/P, TK/DL9YBY, TX3D, V21ZG, V5/DK1CE, VK9N/AI5P, VP2MDG, VP5T, VP5/WA2VYA, VP9BO, VP9/N1SV, WP4JCF, WP4NTJ, XE2MX, XU7MWA, XV4YY, ZD9AH, ZK3YA

RI1, ANTARCTICA. RI1ANF/P is quite often active from the Russian Priroda Refuge (WAP RUS-15) which is not too far away from Bellingshausen Base, on South Shetlands. On his previous visits to Priroda Refuge (last Oct. 21-22nd and Oct. 25-28th), Oleg made over 1200 QSOs operating as RI1ANF/P. He will try to activate Priroda Refuge again until the first week of November, so ... stay tuned! QSL via RK1PWA. ADDED NOTE: Oleg Neruchev, ZS1OIN (UA3HK), will replace Oleg Sakharov as new Chief of Bellingshausen Base (WAP RUS-01) and will be active on all bands, mostly CW, after February 12th as RI1ANU instead of the normally used RI1ANF callsign. More info about the Antarctica is available on the WAP Web site at: http://www.waponline.it

S7, SEYCHELLES. Hardy, DL8NU, will be active as S79NU from Mahe Atoll (AS-013) between November 9-24th. Activity will be on the HF bands and mostly on CW. QSL via his home callsign.

SATELLITE/VHF TIDBITS.....
* Yuri, UT1FG/MM, reports having a very rare (Grid FK69ow -> GG24PL) 5217km 144.300 MHz contact with Alberto, ZP9SC, on November 2nd, at 2359z . Yuri monitors 50.110 and 144.300 MHz and is currently in the Atlantic (GL05) headed for the English Channel. When not on 6 and 2 meters, he is working the FM and SSB satellites with his

Elk and "CJU" antennas, and an IC706 from rare wet grids.

* Larry, VY0HL, in FP53 is back on the satellites. He favors VO-52
and is in the rare Canadian Territory of Nunavut.

* Daniel, AL7RS, in AP65 and in Teller, Alaska (on the Bearing Sea),
likes CW on FO-29. E-mail him for a schedule.

T6, AFGHANISTAN. Ilian, LZ1CNN (ex-YI9LZ), will be active as T6LG from
Kandahar during the CQWW DX CW Contest (November 24-25th) as a Single-Op/
All-Band/Low-Power entry. Ilian will be here until February 2013. Activity
is usually on 80-6 meters using CW and SSB. QSL Manager is LZ1ZF. Postal
address since September 1st, 2012, for LZ1ZF is: G. Vodenicharov, P.O.
Box 25, 3600 Lom, BULGARIA. All QSOs will be uploaded to LoTW. Also, the
log for T6LG is now available on ClubLog.

TF, ICELAND. Siggi, TF3CW, has announced that he will be active as TF2CW
in the CQWW DX CW Contest (November 24-25th) as Single-Op/All-Band entry.
QSL via LX1NO. QTH is the TF2LL Borgarnes station.

TK, CORSICA. Paul, G4BKI (W4/VP9KF), will be active as TK/G4BKI from
Corsica between April 4-18th (2013) from various locations. QSL via
W4/VP9KF.

TX5, CLIPPERTON ISLAND (Update). The 2013 Cordell Expedition to Clipperton
Island posted on November 1st that Roman, US5WDX, has joined the TX5Q
team: http://www.cordell.org/CI/CI_pages/CI_Team.html

VU3/P, ANTARCTICA (Update). Gianni, I1HYW, informs OPDX that Bhagwati
Prasad is still active as VU3BPZ/P from the new Indian Base 'Bharati'
(WAP IND-04) in Antarctica, until November 22-23rd. The new team will
be there around November 15th, and Bhagwati (VU3BPZ) will move on board
the "P/S Ivan Papanin", soon after he hands over the Bharati radio equip-
ment. He should be ready to operate as VU3BPZ/MM between December 5-6th
and January 2nd (2013). At the moment, during the day light, he is busy
doing several duties and Bharati station activities, so it could be that
sometimes he cannot operate the radio as per schedule. However, when he
gets spare time, he will be on the frequencies as per the following table:
15M Band 21260 +/- 2 0915-1000z EU, ASIA & Pacific
17M Band 18150 +/- 2 1015-1200z JA, VU, Asia and Pacific
20M Band 14180 +/- 2 1400-1500z EU, ASIA & Pacific
17M Band 18150 +/- 2 1530-1615z EU, North America & ASIA
20M Band 14180 +/- 2 1630-1745z EU, South America
20M Band 14242 0130-0300z North & South America

Operations will be SSB for the above times/frequencies. The Bharati
Station (Larsemann Hills, Antarctica) is actually getting 19 hours of
daylight; sunrise 2126z, sunset 1554z and Local time +TC+5 hrs. QSL
for VU2BPZ/P is in the printing process. QSL Manager I1HYW will start
to QSL about November 15th.

ZL7, CHATHAM ISLAND. Just a reminder that Hiro, JF1OCQ/W1VX/ZL1WY, is now
active as ZL7A from the Chatham Islands (OC-038) until November 9th.

Activity will be on 80-6 meters using CW, SSB and the Digital modes, with an emphasis on 80 and 6 meters. A beacon will be on 50.117 MHz around the clock. Hiro will use a TS-590S w/ACOM1000 into a Husler vertical for HF, and a FT-100 without a Linear Amp into 4 element yagi for 6 meters. QSL via JF1OCQ, direct (see QRZ.com) or by the Bureau (E-mail requests available) or LoTW. NO eQSL. For more details, see:
http://w1vx.net/pedition/zl7/2012ZL7.htm

ZL9, CAMPBELL ISLAND (Press Release). Ed, VK2ARE, Australian publicity Officer for ZL9HR, sent out the following on October 26th: "Thanks for your support of ZL9HR - Campbell Island. This update will be short [edited]:
"Current Status:
Everything is on schedule; the team is excited and ready to begin their journey to New Zealand. Team members will begin arriving in Invercargill, NZ, on November 22nd.
The majority of our equipment arrived at a storage facility in Invercargill on Oct 18th.

Current Schedule:
November 23rd - The equipment will be taken to the NZ Department of Conservation (DoC) Quarantine Inspection station.

November 24th - Everything will be unpacked and inspected; including personal items, once inspected everything will remain at the station until departure.

November 25th - The team returns to the inspection station for DoC briefings on: safety, landing permit conditions and working around the islands wildlife.

November 26th - The team again returns to the DoC inspection station for inspection of personal items not processed on Nov. 24th.
- Equipment will be trucked to Bluff, NZ, and loaded aboard the boat for departure, currently scheduled at approximately 12:00 (local).
- Several local hams have offered to assist with loading the boat.

With good weather we estimate the voyage will take 40 hours, arriving at Perseverance Harbor sometime between midnight and 06:00 (local) on November 28th.
During the DX-pedition daily traffic with the team will be handled by the designated Pilot stations. We ask the DX community to direct their compliments / suggestions / concerns to the Pilots who will summarize and forward to us via E-mail. We plan to upload photos and logs on a daily basis. The Pilots are listed on the Team page of our web site at:
http://www.campbell2012.com
Team member Dave, K3EL, updated his ZL9HR blog on Oct. 21st at:
http://k3el.wordpress.com
Initially we had a band / mode survey page on the web site; due to

some Internet pranksters the survey was removed. However, we did collect
enough data to get a view of needed bands / modes.
In closing we want to again thank the corporate sponsors, clubs,
foundations and individuals who have provided products and funding to
make the activation of Campbell Island a reality after a long radio
silence.
That's it for now; safe travels to the ZL9HR team as they begin their
journey. Our next update will be in November from New Zealand.
73, Gene, K5GS, for the ZL9HR team"

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 4th November 2012

CQ WW DX Contest

The CQ World Wide DX SSB contest took place over last weekend, ensuring that most of the SSB parts of the contest bands were busy for the full weekend. Plenty of EI stations were heard and many have posted reports of their efforts. The higher bands were in great condition: Ark EI9KC tells us that more than 50% of his QSOs were on 10 metres, while the single-band entry by Adam EI5JQ shows almost 2,000 QSOs on 10 metres. Niall EI4CF also entered the single-band category, concentrating exclusively on 40 metres, and Doug EI2CN reports almost 2,500 QSOs for his single-band entry on 15 metres.

As previously reported, Olivier, using the call sign EI1A, had hoped to operate for the duration of the contest using only renewable energy: he almost achieved this aim, using sun and wind power for most of the contest, however he did have to use the generator for a period when his battery voltage dropped below a safe level.

East Cork Amateur Radio Group, EI7M, had their new antennas up and running for the contest. With 7 operators they achieved an impressive QSO total of in excess of 9,000. Also in the multi-operator category we heard EI9E - Network Southern Area Radio Experimenters Club - operating from Wexford.

Foyle & District Amateur Radio Club's Annual Rally

Today Sunday 4th November

White Horse Hotel 68 Clooney Road Londonderry BT47 3PA

Doors Open 11.30am

The usual trade stands and some new trade stands. Special Interest Groups. Crafts, RSGB Books and QSL Cards. IRTS stand. Bring and buy plus a raffle.

Tipperary Amateur Radio Group

The Annual General Meeting of the Tipperary Amateur Radio Group will take place on Wednesday the 7th of November in Raheen House Hotel,Raheen Road, Clonmel at 8:30 pm all are welcome.

South Eastern Amateur Radio Group

The South Eastern Amateur Radio Group's Christmas get-together will take place this year on Friday the 7th December in Kilkenny city. It will be a very unofficial get-together and will probably involve getting some food and having a few drinks. We will be staying the night in Kilkenny. There will also be a raffle on the night with a few spot prizes and top prize of a radio. Any groups or individual who would like to join us are very welcome. Further details can be got from the club's P.R.O Sean EI2HZB on 083-1379764 or by email at seargpro /at/ hotmail.com. You can also get in touch with Sean through the SEARG page on Facebook.

The group are intending to run a CW course in early 2013. No set plans are in place yet but it will probably consist of 2 or 3 classroom classes and the rest of the course will be done over the radio. Brush up courses is also planned for those wishing to re-sit the licensing exam in early 2013. More information regarding both these courses will be published as soon as details are finalized.

The next monthly meeting of the club will take place in Roanmore Social and Sports Centre, Cleaboy Road, Waterford at 8.30 p.m. on Monday the 26th November. The meeting will be preceded by a committee meeting at 8.00 pm. New members are always welcome. For up-to-date news about the club you can check our website www.searg.com and you can follow us on Facebook and Twitter.

Opportunity for Young Ham Radio Operators

Amateur Radio Supplies in Haverhill, Massachusetts, USA have contacted us with news of a fantastic new program to support youth activity on the HF bands. They seek to help a few lucky young hams get on the HF bands and make some contacts! Do you know any deserving young hams? They will be giving away 3 complete HF stations per year in order to support activity on the ham bands. Full details can be found at the following link http://www.amateurradiosupplies.com/youth-s/222.htm or by contacting Ger McNamara EI4GXB, IRTS Youth Coordinator.

DX News

Hiro JF1OCQ is celebrating the 40th anniversary of obtaining his amateur licence in 1972 by making a return trip to Chatham Island. He was previously there in 2010 and he is reactivating his ZL7A callsign until 9 November. He is operating all bands 80-6m using SSB, CW, RTTY and PSK. The Islands on the Air reference is OC-038 and QSLs go via JF1OCQ.

Paul, formerly G4BKI, will be active as VP9KF in Bailey's Bay, Bermuda from 5 - 19 November. He has been active in Bermuda twice a year since 2006 and has built up a total of almost 20,000 QSOs. QSL info is direct to his address in Tampa, Florida - see QRZ.COM for full details.

Eric SM1TDE will be holidaying in Kenya from 5 - 22 November. He will operate CW only as 5Z4/SM1TDE on all bands 40 -10m. QSLs go via his home call and logs will also be uploaded to Logbook of the World.

Four amateurs will travel to St Peter and St Paul Rocks off the coast of Brazil and operate as PT0S from 10 - 22 November. Special permission for this DXpedition has been given by the Brazilian authorities as there is an official ban on amateur radio activities due to environmental and safety reasons from this rare DXCC entity. QSL Manager is HA7RY.

Dundalk Amateur Radio Society

Final call for Radio Theory classes commencing Monday 5th November at club QTHR, 20.00. Everyone welcome. Registration terms and conditions available on the night.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Scouts Learn Survival Skills at Camporee:

Posted: 03 Nov 2012 05:40 PM PDT
http://www.eham.net/articles/29276

At 10 a.m. Saturday, Oct. 20, briskets were braising on the campfire grill at Alcove Spring as leaders prepared a stew for 140 hungry campers later that day. Boy Scouts and Webelos from several troops in the Oregon Trail District of the Jayhawk Council worked up an appetite throughout the annual Fall Camporee Friday, Saturday and Sunday near the actual path of the Oregon Trail. The boys stopped at a series of stations set up to teach them various skills such as walking across a rope bridge, building a forest shelter, and fire starting with various impromptu tools. The Marshall County Amateur Radio Club of ham radio operators were also set up in Grace's Meadow at Alcove Spring for a Jamboree on the Air. They helped the young Scouts talk with a troop in Iowa and other ham radio operators as far away as Germany.

//
A Satellite That Spells Messages for Earthlings with Morse Code:

Posted: 03 Nov 2012 05:38 PM PDT
http://www.eham.net/articles/29275

As satellites become smaller and launching them becomes more affordable, people are putting all sorts of wacky things into space. The Space Age has never been smaller. The era of mini (and micro, nano, and pico) satellites is upon us. After the last century of government-funded, multi-billion jaunts into space, the costs of space travel are coming within reach of the (almost) average citizen. Interorbital Systems claims it will launch TubeSat kits, "literally a satellite in a can," with hardware to "capture videos, send e-mail from space, and conduct experiments" for $8,000. The initial launches are scheduled to leave Spaceport Tonga in the Pacific Ocean. For those wishing to place their ashes into space, you (or your remains) can reach suborbital altitude for about $1,000 and deep space at a bargain basement price $13,000. But the plummeting costs and widening accessibility are inspiring more playful approaches to space travel as well. Takashi Tanaka, aeronautics proessor at the Fuzhou Institute of Technology in Japan, recently launched a microsat, called the FITSAT-1 or Niwaka, to flash Morse code messages to Earth using high-powered LEDs. The small, three-pound satellite has beamed a flashing message, "Hi this is Niwaka Japan" in dots and dashes visible around the world. FITSAT-1

launched aboard an unmanned supply vessel to the International Space Station and entered orbit this September. After about 100 days (and circling the earth 16 times daily), it will burn up in the atmosphere.

GB2RS NEWS

Sunday 4th November 2012

The news headlines:

* IRTS also opposes draft Power Line Transmission standard

* RSGB Extraordinary General Meeting

* GB3GC, a new six metre repeater

Following the news last week that the German National Society, DARC, now oppose a new pan-European draft Power Line Transmission standard, we have heard that the Irish Radio Transmitters Society, like the RSGB, also opposes the Standard. In their magazine they say that "the draft Standard accepts that the PLT devices do not, in effect, meet the essential requirements of the EMC Directive as it prescribes measures to mitigate interference by permanently or dynamically excluding frequencies in the amateur, aeronautical mobile and broadcast bands." The IRTS Committee took the unanimous view that it would not be appropriate to support a draft Standard that sought only to protect selective sensitive frequencies in the HF spectrum without regard to the levels of interference that could be caused by the equipment concerned on the remainder of the HF spectrum. If you would like more information on this subject, the RSGB laid out their views some weeks ago. Details are in the October RadCom and on the RSGB website.

RSGB Members are encouraged to vote on the new governance arrangements for the Society, proposed in the November RadCom and shown on the RSGB website, whether by post, online or in person at the EGM. If you are attending the EGM on 17 November in Stratford, you will be interested to hear about the afternoon informal session. Visitors will learn about the plans for our forthcoming centenary year, and hear a fascinating presentation of some of the highlights of our history as we dip into the archives. With 100 years of history to celebrate, 2013 will be full of events for the Membership as well as the world-wide amateur community. Our history also provides a wealth of events from the momentous to the quirky and you will hear more about these on 17 November. If you are planning to attend please register your interest on the RSGB website.

A new six metre repeater, GB3GC, is up and running in south east Cornwall, on the same site as the 2m repeater GB3PL. This 6m repeater has its input on 51.230MHz FM and 500kHz spacing for its output at 50.730MHz. The CTCSS tone is 77Hz. Any enquiries should be directed to

Roger, 2E0RPH, whose details are correct on QRZ.com.

Radio amateurs around the world will not have missed the devastation caused by Hurricane Sandy to the Caribbean and then the Eastern Seaboard of the United States. The ARRL report on the role played by amateur radio is on their website at www.arrl.org/news. Sadly, on 29 October, a replica of the Bounty that was built in 1960 for a remake of the 1962 film Mutiny on the Bounty, sank off the coast of North Carolina as Hurricane Sandy made its way toward New Jersey. Of its 16 crew members, 14 were rescued by the US Coast Guard. Bounty Captain Robin Walbridge, KD4OHZ, never made it to one of the two deployed life rafts and is presumed dead. Doug Faunt, N6TQS, of Oakland, California, was one of the 14 who was rescued by the Coast Guard; Faunt served as a deckhand and was also the ship's electrician. Our thoughts go to the family and friends of KD4OHZ and all others who have been affected by Hurricane Sandy.

There have been no confirmed reception reports since the F-1 amateur radio CubeSat was deployed from the International Space Station on 4 October. The team is focusing on reception of the backup UHF transmitter, on 437.485MHz, plus or minus 10kHz Doppler shift. This FM beacon should transmit Morse code for 20 seconds every minute during daylight. The team would appreciate any reports of the beacon, which can be sent to Thu Trong Vu, XV9AA, by email to thuvt@fpt.edu.vn. Further information can be found on the AMSAT-UK website, www.amsat-uk.org.

Copyright © RSGB 2012. Not for public release before Monday 5 November 2012 except as a GB2RS broadcast. And now for the details of rallies and events for the coming week

Today, 4 November sees the Holsworthy Amateur Radio Rally taking place at Holsworthy Community College, Victoria Hill, Holsworthy EX22 6JD. For more information, send an e-mail to gsowter@talktalk.net.

Also today, the Foyle & District ARC Rally will be held in the White Horse Hotel, 68 Clooney Road, Londonderry BT47 3PA. Doors open at 11.30am and there will be trade stands, special interest groups, an RSGB book stand and a Bring & Buy. More information from Philip, MI0MSO, by e-mail to mi0mso@yahoo.co.uk.

On Saturday 10 November the Rochdale & District ARS Traditional Radio Rally will take place at St Vincent's Church Hall, Cutgate, Rochdale OL12 7QL. Doors open at 10.30am and admission is £2.50. There will be a Bring & Buy. Details from Dave, G0PUD on 01706 346 517.

On 11 November, the West London Radio & Electronics Show, otherwise known as the Kempton Rally, will be held at Kempton Park Racecourse, Staines Road East, Sunbury on Thames TW16 5AQ. There is free car parking and the doors open at 10am. Visitors will find trade stands, a Bring & Buy, special interest groups as well as a lecture programme. Details from Paul, M0CJX on 08451 650 351.

Now for the news of special events

GB4WLR will be on air on 11 November as part of the Remembrance Sunday commemorations. A World War One locomotive is expected to be in steam on the West Lancashire Light Railway at Hesketh Bank. The locomotive served behind the front lines during WW1 and is named Joffre. Also taking place that day is the annual BBC Children in Need fund raising day. QSL direct to Pam 2E1HQY or via the RSGB Bureau. More information can be found on QRZ.com.

And now the DX news compiled from 425 DX News and other sources

DL1LLL is currently operational portable as ZS7 from Antarctica on the HF bands. His location is the Neumeyer Emergency base. QSL via DL5EBE.

JA1PBV will be on the air from Mauritania as 5T5BV until 10 November. His activity has so far been on 30, 12 and 10m using CW and RTTY. QSL via JA1PBV.

DL8NU will be active as S79NU from Mahe Island in the Seychelles, IOTA AF -024, from 9 to 12 November. He will be operational on the HF bands mostly on CW. QSL via his home callsign.

Walter, HB9MFM will be active as J79WTA from the Tamarind Tree Hotel near Salisbury in Dominca until 17 December. Activity is holiday style on 10 through to 160 metres, using SSB, RTTY, PSK as well as SSTV, if possible. QSL via his home callsign, direct or via the Bureau.

Kazu, 7L4XDT and Masa, K1GI will be active as PJ7XK and PJ7I, respectively, from 18 to 24 November from Sint Maarten, NA-105. Activity will be on 6 through to 160 metres using CW, SSB and the digital modes. QSL PJ7XK via 7L4XDT and PJ7I via JG2BRI.

Now the contest news

The Marconi CW Contest is the first VHF event of November and it finishes at 1400UTC today, 4 November. There are 6- and 24-hour sections for Open and Single-op Fixed entries. It's CW only on the 144MHz band, with the exchange being signal report, serial number and locator.

The 144MHz UK Activity Contest takes place on 6 November from 2000 to 2230UTC. Using all modes the exchange is signal report, serial number and locator.

Copyright © RSGB 2012. Not for public release before Monday 5 November 2012 except as a GB2RS broadcast. On 10 November it's the very popular Club Calls Contest from 2000 to 2300UTC. Using SSB only on the 1.8MHz band the exchange is signal report, serial number and your club code.

For the whole 48 hours of next weekend, 10 and 11 November, the WAE DX RTTY Contest should keep the RTTY parts of the HF bands buzzing. Everybody can work everybody on RTTY. In WAE events reports of a previously conducted contest QSOs can add significantly to your total score, so it's well worth investigating in advance of the event how

they work. Using the 3.5 to 28MHz bands, the exchange is signal report and serial number.

And now the solar factual data for the period from Friday the 26th of October to the 1st of November compiled by Neil Clarke, G0CAS on Friday the 2nd of November.

Only four new sunspots groups appeared during the week, these, like the other visible sunspot groups, were mostly quiet, with only occasional small C class solar flares taking place on some days. On the 29th, 30th and the 1st, solar activity was at very low levels, with no C class solar flares taking place. Solar flux levels declined every day from 131 units on the 26th to 98 by the 1st. The average was 112 units. The 90 day solar flux average on the 1st was 120, that's two units down on last week. X-ray flux levels declined from B5.1 units on the 26th to B2.2 by the end of the period. The average was B3.9 units. Geomagnetic activity was quiet every day, except for the 1st when activity increased due to a coronal mass ejection that departed the Sun on the 29th. The Ap index on the 1st was 24 units. The average was 7 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline to a slow 260 kilometres per second by the 30th. Wind speeds then increased to 380 kilometres per second on the arrival of the disturbance. Particle densities were low but increased to 60 particles per cubic centimetre on the 31st. Bz varied between minus 3 and plus 2 nanoTeslas on the quiet days and between minus and plus 12 nanoTeslas during the disturbance. A weak radio aurora took place during the afternoon of the 1st, which extended down to northern Scotland during the afternoon.

And finally the solar forecast for the coming week. This week the quiet side of the Sun is expected to be looking our way. Solar activity is expected to be low, however, activity could decline further to very low levels on some days. Solar flux levels should be at their lowest for the next few days and be in the 90's but later in the week levels should increase. Geomagnetic activity could be unsettled at first due to a small coronal hole disturbance, but by midweek quiet levels should return. MUFs during daylight hours at equal latitudes should be above 30MHz, especially early in the week until the coronal hole disturbance arrives, when MUFs could decline. Darkness hour lows should be around 9MHz. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of around 35MHz. The optimum working frequency with a 90 per cent success rate will be about 27MHz. The best time to try this path will be between 1100 and 1500 hours UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Wythall Radio Club is holding club net on 145.225MHz today and next Sunday. On Monday the Advanced course continues, and there's a talk on wire antennas for dummies by Callum, M0MCX on Tuesday. Friday sees the shack social, and on Saturday it's the 160m Club Calls Contest in the shack. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications Club is running a club net on Monday from 7pm on 144.165MHz USB, vertical polarisation. There's a club meeting on Tuesday to which non members and short wave listeners are warmly invited. On Wednesday there is a M3+M6 club net on GB3FR and on Friday there is a simplex club net on 145.450MHz FM. Contact the FELCC Information Line on 07554 362 020 for more information.

South Birmingham Radio Society is on the air and preparing for its AGM on Monday. The AGM is in the main hall on Wednesday, stating at 8pm. On Thursday there are training classes with Dave Murphy, G8OWL, and Friday sees shack and aerial work. Contact Don, on 01214 581 603.

Central Radio Amateur Circle is running its Intermediate course via Skype on Tuesday. On Thursday there's a night on the air from 8pm on 145.375MHz. Details from Martin Hallard, G1TYV, by email to radio-circle@live.co.uk.

Lincoln Short-Wave Club is taking part in the 144MHz UK AC on Tuesday. Wednesday sees G5FZ on the air from the shack and a natter night at the BSA club. The club net is on 145.375MHz from 8pm on Thursday. The Saturday surgery in the shack starts at 9am, followed by the 1.8MHz Club Calls contest from 8pm until 11. For more information contact Pam Rose, G4STO, on 01427 788 356.

South Notts Amateur Radio Club is taking part in the 144MHz UK AC on Tuesday. On Wednesday there's a talk on the oscilloscope by G4EDX. Details from Robin, G4NDM, on 01159 372 942.

Midland Amateur Radio Society is having a late Bonfire Night BBQ and training classes on Wednesday. Next Sunday sees a visit to the Kempton Park Rally. Details from Norman, G8BHE, on 07808 078 003.

Now we return to the traditional listing in date order. On Monday Aldridge & Barr Beacon Amateur Radio Club is having a talk on radio datamodes. Contact Albert, G0KFS, on 01922 614 169.

On Monday Gloucester Amateur Radio & Electronics Society is having a radio related junk sale. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday Welland Valley Amateur Radio Society has a club net on 145.275MHz FM. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Tuesday Derby & District Amateur Radio Society is holding a junk sale. Contact Richard Buckby, by email to radio@dadars.org.uk.

Copyright © RSGB 2012. Not for public release before Monday 5 November 2012 except as a GB2RS broadcast. On Tuesday Loughborough & District Amateur Radio Club is having a talk on Kegworth Steam Carnival by Peter Haywood. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday South Kesteven Amateur Radio Society is running a club net on 145.525MHz from 8pm. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday Telford & District Amateur Radio Society is holding a committee meeting. GX3ZME on the air HF/2m. Contact Mike, G3JKX, on 01952 299 677.

On Friday Coventry Amateur Radio Society is holding its Great Egg Race. Contact John, G8SEQ, on 07958 777 363.

On Saturday Gloucester Amateur Radio & Electronics Society is taking part in the Club Calls Contest. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

NEWS FOR THE NORTH OF ENGLAND Wakefield & District Radio Society is sad to announce the passing of a very well known and popular amateur, David Whelan, M0LAG. Dave had been in hospital for several weeks and finally succumbed on Saturday 27 October. The funeral will be held at Huddersfield Crematorium, Fixby Road, Huddersfield HD2 2JF on Tuesday 6 November at 1030 and afterwards at the Peacock Inn, Leeds Road, Huddersfield HD2 1XL. Family flowers only please, however donations are invited to Kirkwood Hospice. Dave was a very popular local amateur in West Yorkshire with a wicked sense of humour. Earlier in his life, he was an HGV driver and toured many parts of the country, popping up on repeaters everywhere. He will be particularly missed by the users of GB3YW in West Yorkshire on which he was a regular. Dave also spent quite a considerable amount of time fundraising for the Five Towns Repeater Group, who run GB3YW, GB3WY and GB3WC, at the Northern Cross Rally and others. He was a great guy who will be sorely missed.

On Monday Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Sheffield Amateur Radio Club is having a talk on the art and Heartache of DXing by Andrew, G0HSA. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday Workington and District Radio and IT Group is holding a club meeting and is on the air. Contact Barry Easdon, G0RZI, on 01946 812 092

On Tuesday Chester & District Radio Society is watching a DVD on operating the K3. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday Halifax & District Amateur Radio Society is continuing its tests with PSK31. Details from Martin, M0GQB, on 01422 341 317.

On Tuesday Morecambe Bay Amateur Radio Society is having a film night. Contact Sheila, on 07867 516 836.

On Wednesday Denby Dale Radio Club is having an open meeting to discuss its 40th Anniversary celebrations in 2013. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday Hornsea Amateur Radio Club is having a talk by G3XYF. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Wednesday Mid-Cheshire Amateur Radio Society is on the air on 2m. Contact Peter Paul Fox, G8HAV, on 01606 553 401.

On Thursday Wakefield & District Radio Society is having a talk on Morse code by Dave, G4CLI. Details from Ken, G8FSO on 07900 563 117.

Copyright © RSGB 2012. Not for public release before Monday 5 November 2012 except as a GB2RS broadcast. On Thursday South Manchester Radio and Computer Club is holding an antenna clinic with Ron, G3SVW. Details from Ron, G3SVW, on 01619 693 999.

On Saturday Hornsea Amateur Radio Club is taking part in the Club Calls contest. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Saturday Wakefield & District Radio Society continues its Intermediate course continues from 13:30 with Chris, M0KJP. Details from Bill 2E0IPC on 07905 178 845.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND Today and next Sunday West of Scotland Amateur Radio Society is having a club night with talks, quiz and a raffle. On Friday there's project work and learning. More information from Sam, GM4BGS, on 07771 554 035.

On Wednesday 7 November Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. Worthing & District Amateur Radio Club has its monthly breakfast meeting today from 9am at The Goring Caf©. On Wednesday there's a talk on the science and technology of skateboarding and longboarding by Jonathan Hare, G1EXG, and next Saturday it's the Club Calls Contest. Contact John, G8FMJ, on 01273 593 232.

Farnborough & District Radio Society has a CW net on Monday at 1pm on 3.570MHz, then a Top Band net on 1.995MHz at 8pm. The 2m net on Friday is on 144.675 MHz at 8pm. Details from Neville, G3SPD, on 01252 404 816.

Now we return to the traditional listing in date order. On Monday Braintree & District Amateur Radio Society is holding a junk sale. For more information contact John, M5AJB, on 01787 460 947.

On Monday Burnham Beeches Radio Club is having a broken equipment evening with Jeremy, G8MLK. Contact Dave, G4XDU, on 01628 625 720.

On Monday East Kent Radio Society is having a talk on screen reading computers by Brian, M0DCO. Details from Karl Davies, M1DFM, on 01227 710 120.

On Monday Surrey Radio Contact Club is having a talk on cryptanalysis by Peter, G3ZPB. Contact John, G3MCX, on 02086 883 322.

On Tuesday Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday Leiston Amateur Radio Club is holding its AGM. Details from Andy, G3ZYP, on 01394 460 441.

On Wednesday Banbury Amateur Radio Society is having a talk on working satellites, AMSAT & FunCube. Details from John, G8OZH, on 07774 525 818.

Copyright © RSGB 2012. Not for public release before Monday 5 November 2012 except as a GB2RS broadcast. On Wednesday Chesham & District Amateur Radio Society is holding a general meeting. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday Norfolk Amateur Radio Club is having an introduction to Club Log by Michael Wells, G7VJR. Details from Chris Danby, G0DWV, on 01603 898 678.

On Thursday Bredhurst Receiving and Transmitting Society is having a club night, with CW practice from 8:30 - 9pm Contact Charles, G4VSZ, on 07982 244 788.

On Thursday Edgware & District Radio Society is holding a round table discussion on the diversity of amateur radio. More information from Mike, G4RNW, on 02089 500 658.

On Thursday Huntingdonshire Amateur Radio Society is on the air on VHF. Contact David Leech, G7DIU, on 01480 431 333.

On Thursday Lowestoft & District PYE Amateur Radio Club is having a talk by Peter Best on Clansman radios. Details from Tim Ward, 2E0TJW, on 07810 481 182.

On Thursday Reading & District Amateur Radio Club has its construction contest, organised by Robin Caine, G4IWS. Details from Pete, G8FRC, on 01189 695 697.

On Thursday Vange Amateur Radio Society is watching a DVD. Contact Steve, G0KVZ, on 01268 552 606.

On Thursday Verulam Amateur Radio Club is having a social evening with the GB3VH repeater group. Contact Ralph, G1BSZ, on 01923 265 572.

On Friday Cambridge & District Amateur Radio Club is holding a computer question time with Mark, M1MPW. Contact Ron, G3KBR, on 01223 501 712.

Chelmsford Amateur Radio Society has had to move its November meeting day and venue due to building work at the Marconi Social Club. The November meeting will be on Friday at Great Baddow Parish Hall, CM2 7DW, from 7.30pm, when Louis Poli, N3OL, will give a talk on classic valves, vintage equipment and an amateur experimenter's valve radio station. Contact Martyn, G1EFL, on 01245 469 008 for more information. The CARS training courses are not affected and continue as normal at Danbury Village Hall. To find out more about the training courses speak to Clive, G1EUC on 01245 224 577.

On Friday Itchen Valley Amateur Radio Club is having a talk on RAYNET by David, M0XIX. Details from Liz, M0ACL, on 02380 254 599.

On Friday Radio Society of Harrow is having a talk on QRSS and digital modes by Carl. More information from Linda, G7RJL, on 02083 868 586.

On Friday Wimbledon & District Amateur Radio Society is on the air. Contact Andrew Maish, G4ADM, on 02083 353 434.

On Saturday Newbury & District Amateur Radio Society is taking part in the Club Calls contest. Contact Rob, G4LMW, on 01635 862 737.

Copyright © RSGB 2012. Not for public release before Monday 5 November 2012 except as a GB2RS broadcast.

NEWS FOR THE SOUTH WEST Exeter Amateur Radio Society has its Monday HF net at 19.45 on 3.675MHz. The Tuesday 2m net is on 145.575MHz at 19:45 and on Thursday it's the 4m net on 70.425MHz from 19:00. Contact Nick, 2E0NRJ, on 01363 775 756.

On Monday Weston Super Mare Radio Society is on the air. Details from Paul, G3SDH, on 01761 221 206.

On Wednesday Cornish Radio Amateur Club is holding a committee meeting. Details from Steve, G7VOH, on 01209 844 939.

On Wednesday Thornbury & South Gloucestershire Amateur Radio Club is having a talk on magnetic loop aerials by Paul, M0SSJ. Contact Tony, G0WMB, on 01454 417 048.

On Wednesday Trowbridge & District Amateur Radio Club is judging entries for the G2BQY & G4UNU Constructor's Cup. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday South Bristol Amateur Radio Club is holding a committee meeting. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday Swindon & District Amateur Radio Club has an activity night. Contact Den, M0ACM, on 07810 317 750.

On Friday Poole Radio Society Club is having a speakers' night. Contact Bill Coombes, G4ERV, via email to secretary@g4prs.org.uk

On Friday Torbay Amateur Radio Society is having a natter night and running the TARS 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Monday Dragon Amateur Radio Club is holding a surplus sale. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Tuesday Carmarthen Amateur Radio Society is having a back to basics evening. Details from Lloyd, 2W0LLT, on 01239 711 297.

On Tuesday Wrexham Amateur Radio Society is having a build night, offering a chance for soldering practice. Contact Frank Bailey, M1EYH, by email to fcbailey20@btinternet.com.

2195. Weekly Highlights of Solar and Geomagnetic Activity, 29 October - 04 November 2012

Newsgroup: rec.radio.amateur.misc
Date: 2012-11-05 16:30:07 UTC
From: SWPC.Webmaster@noaa.gov
Message-ID: <20121105163001.592DB33C53@panix2.panix.com>

```
:Product: Weekly Highlights and Forecasts
:Issued: 2012 Nov 05 0312 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
29 October - 04 November 2012

Solar activity was at very low to low levels. The largest flares of
the period were a pair of C1 flares from Regions 1596 (N07, L=150,
class/area Eho/460 on 21 October) and 1598 (S12, L=111, class/area
Dki/420 on 23 October) at 0507 UTC and 1139 UTC on 31 October,
respectively. Other activity of note was a 24 degree long filament
eruption centered at S32E07 that occurred from 0640-0855 UTC on 30
October. No Earth-directed coronal mass ejections (CMEs) were
observed during the reporting period.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
moderate levels on 29-30 October and again on 01 November. High
levels were reached on 31 October. Normal background levels were
observed from 02-04 November.

Geomagnetic field activity was at quiet to active levels with major
to severe storm periods observed at high latitudes. The period began
with quiet conditions until a sudden increase in solar wind speed at
the ACE spacecraft from 290 - 360 km/s occurred at approximately
31/1445 UTC. A sudden impulse (13 nT) was observed at the Boulder
magnetometer at 1539 UTC on 31 October. This initial activity was
due to a pair of CMEs resulting from filament eruptions on 27 and 28
October. The geomagnetic field responded with a unsettled period
during the 1500-1800 UTC period on 31 October. At approximatly
31/2348 UTC, the total magnetic field (Bt) increased from 9 to 15 nT
while the Bz component rotated to a southward (negative) component
for approximately 20 hours (maximum deflection of 11 nT). The
geomagnetic field responded with quiet to active levels with major
to severe storm periods observed at high latitudes on 01 November.
By 02 November through the rest of the reporting period, quiet
conditions prevailed.
```

Forecast of Solar and Geomagnetic Activity
05 November - 01 December 2012

Solar activity is expected to be very low to low until 08 November.
>From 08-21 November, a chance for M-class flares exist as old Region
1594 (S27, L=199) rotates across the visible disk. From 22 November
until the end of the forecast period, very low to low levels are
expected.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is
expected to be at high levels from 09-24 November. Normal to
moderate levels are expected from 25 November through 01 December.

Geomagnetic field activity is expected to be quiet to unsettled
through the forecast period. Unsettled conditions with a chance for
active periods are expected from 08-11 November and again on 13
November due to activity from a recurrent coronal hole high speed
stream.

2199. Re: Hurricane Sandy and ARES

Newsgroup: rec.radio.amateur.misc
Date: 2012-11-06 15:58:46 UTC
From: John Ferrell <W8CCW@arrl.net>
Message-ID: <2pbi9897epohdl1m9j7c3sq0aab3fqgfd1@4ax.com>
Source record: 1666

This situation has more heads than the legendary Hydra and is
requiring multitudes of small but coordinated incidents. A single huge
operation is not called for. In many areas it will take days or more
to pump out or provide a safe area to enter. Your local ARES or Red
Cross can probably provide guidance on how you can help.

What is not needed is independent action at this time. Unidentified
personnel in any disaster site must be considered looters and dealt
with accordingly.

ARES is alive and well. They are flexible problem solvers but the very
nature of the work can requires some mistakes are made on their part.

I am not a member because I have an active role in Public Safety that
requires my attention at the same time they are needed most!

Thank you for asking, it gave me a chance to express my gratitude to
those who volunteer so many hours in Public Safety.

On Sun, 04 Nov 2012 21:06:28 -0500, Klystron <xxx@yyy.zzz> wrote:

> I haven't heard any ARES activity related to the hurricane. Were

AMSAT NEWS SERVICE

ANS-309

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the

activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating

through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor at amsat.org

President's Update Given at AMSAT-NA Annual Meeting in Orlando

AMSAT President Barry Baines, WD4ASW gave a presentation to members at the 30th Space Symposium and Annual General Meeting in Orlando, Florida on Saturday, October 27.

Barry noted the significant strides AMSAT has accomplished in the area of education outreach reflected by the appointment of Mark Hammond, N8MH, as AMSAT's VP-Educational Relations. Over the past year Mark has been developing a team to enhance our capabilities in this area and worked with the ARRL to develop new approaches to STEM education that will translate into future opportunities in space.

Barry provided a summary of additional accomplishments for 2012:

Fox selection by NASA for an ELaNa Launch based on our STEM educational activities.The Fox-1 project is on schedule planning for launch in the 2nd half of 2013.The Engineering Team has developed a capable and motivated staff.Evolving partnerships for future launch opportunities are under way.AMSAT has continued to deal with ITAR issues. The publication of the Fox design in the Symposium Proceedings book opens the path to placing the work in the public domain which is expected to relieve many ITAR issues going forward.Appointment of Frank Bauer, KA3HDO as VP-Human Spaceflight will allow AMSAT to develop additional opportunity in this area.Implementation of the new ARISS school selection process.Re-establishment of the AMSAT store on-line.Steps are being taken to revive the AMSAT Journal. Appointment of JoAnne Maenpaa, K9JKM as the new Editor.ANS is a world-class distributor of information about amateur radio in space. One new ANS Editor has joined the weekly rotation with openings for additional volunteers.

Many details of AMSAT's future partnerships for launch opportunities will be published in the AMSAT Journal. A link to the President's Report will be added to our http://www.amsat.org web page.

[ANS thanks AMSAT President Barry Baines, WD4ASW for the above information]

Update on AO-27 Recovery Work

AO-27 Command Station Michael Wyrick, N3UC provides updates on the team's attempts to recover the satellite on their web page. They are

working to return AO-27's FM repeater back to service after it stopped responding on October 5.

In early October AO-27 was restored back to running on its primary Bootloader. Control operators were able to turn on the Transmitter for a short time on several occasions. Also required were multiple recoveries the stuck AFSK modem which was one of the initial symptoms of the problems.

During recovery efforts AO-27 crashed once again on October 16. The command team once again recovered to the bootloader state, recovered

from another occurrence of the AFSK modem problem and once again performed another software upload.

On October 18 the transmitter was left ON in an attempt to discharge the batteries with the hope that faults could be cleared. Once the battery was recharged last week the high-level EOS software aboard AO-27 ran for a few seconds before locking up. The team was able to reset it back to the bootloader. Dumps indicate it is locking up while fetching telemetry from the hardware. Michael, N3UC, wrote, "It does not look like there will be a quick resolution to this crash."

ATTENTION OPERATORS: To prevent interfering with the command team's recovery efforts, if you can't hear AO-27 in Analog mode, please

don't transmit to it.

The latest AO-27 news is posted on its webpage:

http://www.ao27.org/AO27/index.shtml

Successful ARISS School Contacts

Japan

Meikei High School in Tsukuba, Japan participated in an Amateur Radio on the International Space Station (ARISS) contact on Tuesday, October 23. Students from the science club, who are studying orbital mechanics and amateur radio satellite communications, used their own radio station, JJ1YAF to make the call to on-orbit astronaut Akihiko Hoshide, KE5DNI, an alumnus of the school. The contact was conducted in Japanese. Approximately 60 people were in attendance and media coverage included 4 newspapers as well as the Japan Broadcasting Corporation, NHK.

Massachusetts

On Friday, October 26, students from East Falmouth Elementary School in East Falmouth, Massachusetts took part in a successful Amateur Radio on the International Space Station (ARISS) contact with Sunita Williams, KD5PLB. Students asked 18 questions concerning what it is like to live in space and the experiments conducted on the Space Station. The contact was integrated into science lessons about the solar system, global climate changes on Earth and the advances in science and technology generated by space exploration. Over 100 students and guests were in attendance and reporters from two newspapers were present. Video of the event is posted at: http://tinyurl.com/ARISS-Falmouth (YouTube)

Three Successful ARISS Contacts on October 30

South Florida Science Museum (SFSM), West Palm Beach, Florida had a successful Amateur Radio on the International Space Station (ARISS) contact on Tuesday, October 30. SFSM and the West Palm Beach Amateur Radio Club, WPBARC, which maintains a radio station within the museum, worked with area teachers to provide educational content to students emphasizing NASA, the ISS and amateur radio. Read the details of the wide media coverage of this event as reported in ANS-302:
http://amsat.org/pipermail/ans/2012/000661.html

An Amateur Radio on the International Space Station (ARISS) contact was successful with the Southern Tier Catholic and Archbishop Walsh Academy, Olean, New York on Tuesday, October 30 via telebridge station IK1SLD in Italy. The contact was part of a comprehensive education curriculum which will pique students' interest in Science, Technology, Engineering and Mathematics (STEM).

Cumberland Elementary School, West Lafayette, Indiana had a successful Amateur Radio on the International Space Station (ARISS) on Tuesday, October 30. The contact was integrated into a curriculum covering topics on space research, robotics and engineering. Other activities planned include night sky observations, model rocketry and electrical circuit projects.

[ANS thanks Carol, KB3LKI, and the Amateur Radio on the International Space Station (ARISS) Status Report for the above information]

Flabob Airport Preparatory Academy ARISS Contact Wins PR Award

As Clint Bradford, K6LCS of Jurupa Valley said, "It was 13 months of planning for 10 minutes of conversation, but, oh!, what a conversation!"

"'LIVE! from outer space!' Students speak to an astronaut in the orbiting International Space Station" was the special event on April 19, 2012 that earned an award for Karen and Clint Bradford in annual competition by the Public Relations Society of America. The event was planned for the 120 students of Flabob Airport Preparatory Academy and more than 80 parents, community leaders, media representatives and interested persons.

Clint initiated the event because of his hobby in ham radio and volunteer position with NASA through Amateur Radio on the International Space Station (ARISS): He provides school technical support for students in North America to talk to astronauts aboard the orbiting space station. NASA's "Teaching from Space" program is available to any school that applies, but the typical wait-time from application to event is three years.

He approached Kathy Rohm, vice president and director of community relations at Flabob Airport Preparatory Academy, which is supported by the Tom Wathen Center. She was enthusiastic to sponsor the literally out-of-this-world, once-in-a-lifetime special event to inspire students. More than 2,900 emails flew between Clint, Kathy, NASA, Flabob staffer Nina Bentham and ARISS volunteers to produce the event.

NASA-Houston flight director Phil Engelauf, who grew up in Rubidoux and whose mother, Beverly, still lives here, was invited to the event.

His duties prevented him from attending, but he sent warm regards to the students in a special message that is posted at the event's Web site - http://iss-flabob.com (on the blog).

The event went according to plan, except for a momentary glitch with audio quality, despite having tested the system for three days preceding the event. Clint quickly figured out a solution, although he later said that he was only 90 seconds from NASA terminating the call if he had not succeeded.

"When we looked around the hangar at the conclusion of the contact, hearing the students' whoops of happiness, we saw more than a few adults wiping at their eyes us included," Karen said. "We felt intensely rewarded to think how our students may feel throughout their lives when they look up in the sky and remember the thrilling day when Flight Engineer Don Pettit answered their questions."

Student Brittany Cain had asked, "Besides missing your family and friends, what is the biggest adjustment you have made for this mission?" The assembled group laughed when Pettit replied he missed not being able to take a bath for six months!

The mission of Flabob Airport Preparatory Academy is to use aviation as a tool to motivate students to achieve their personal, academic, and career goals.

Current statistics reveal that American students severely lag behind their foreign peers: In a study of 31 countries, the Organization for Economic Cooperation and Development ranked Americans 21st in science and 25th in math. Consequently, President Obama launched the Educate to Innovate Campaign in 2009 to unite teachers, parents, businesses and students toward excellence in STEM (science, technology, engineering and math) studies.

Karen is a current member and past president of PRSA's California Inland Empire Chapter. There are more than 80 local members.

[ANS thanks the Public Relations Society of America and Clint Bradford, K6LCS for the above information]

Hurricane Damage Delays First Cuba National Satellite Meeting

The first National Meeting of Cuba's new □Grupo de Radioaficionados para Operaciones Satelitales□, GROS which was scheduled for November 8-11 has been delayed due to the severe impact caused by Hurricane Sandy last week to the eastern provinces of Cuba. Raydel Espinet CM2ESP reports the meeting will now be delayed to January, 2013.

The Meeting location at Camagüey did not receive any damage but the provinces of "Santiago de Cuba", "Holguín" and "Guantánamo" were badly affected and many houses, schools and factories loss their roofs or were damaged by fallen trees. Several ham radio operators lost their houses.

Most of the state resources are now been prioritized to assist to the people of this three provinces that lost their houses. Under this circumstances we were asked to reschedule the National Meeting and the Coordination Board agreed with the request as a solidarity to our colleagues.

Many other activities the National Amateur Radio Federation (F.R.C.) had scheduled were also postponed included its National Council.

We are working on possible dates not sooner than January. We sorry for all of the inconvenience and the G.R.O.S. Coordination Board (Grupo de Radioaficionados para Operaciones Satelitales) will announce the new date when possible.

We still have great hopes with this First Meeting and during this extra months we will work harder to improve our work and make it better.

When the meeting convenes there are plans for a special callsign T47G, which will be active every day on HF and satellites, in the FL11 grid. There are 4 conferences, 4 workshops, 1 exposition and as many demonstrations as passes currently scheduled.

In the meantime the G.R.O.S VHF FM Net devoted entirely to the Amateur Radio Satellites continues to meet on 145.550 MHz. The net will be on the air every Friday from 19:00 to 20:00 local time in Havana. CM2ESP is the Net Control Station.

They are looking forward to hear about Hector□s (CO6CBF) experience and stories about his participation in the AMSAT Symposium in Orlando

during this First Meeting. The Group also wants to thanks to Patrick, WD9EWK, and all the people at AMSAT for their very important support to Hector. We want to send a big congrats to Hector too.

[ANS thanks GROS Coordinator Raydel Abreu Espinet, CM2ESP for the above information]

Special Symposium Visitor Hector Martinez, CO6CBF Back Home

Hector Martinez, CO6CBF traveled from Cuba to the AMSAT Symposium in Orlando last week. AMSAT had extended an invitation for Hector to attend and to make a presentation. Thanks to the work done by Patrick Stoddard, WD9EWK/VA7EWK, Hector was able to obtain a visa to come to the United States for the Symposium.

Patrick, WD9EWK posted an update, "On my way home from the airport, I called Hector. He made it home OK, and is now in the process of clearing the gear he brought back from Florida through the processes of Cuban Customs and the Cuban communications ministry. This is normal, and he was confident he could get everything cleared without incident. Hector also said he hopes to be able to post a message to thank everyone that helped make his trip to Florida possible."

Patrick says he incurred expenses related to bringing Hector to the Symposium totaling $2413.30. Upon returning home he found he has received

contributions totaling $1960.00 for the "Hector fund". He wrote, "If there are other contributions in the mail, I will add that to my spreadsheet and post an update later. I don't think I will need any other contributions toward this effort. THANK YOU ALL!"

Video of Hector's presentation at the Symposium, "Working Satellites With a Homebrew Setup, Cuban Style" is posted on-line at: http://www.youtube.com/watch?v=eocmIubIBQ4

Hector, CO6CBF wrote, "It was a wonderful trip! Thanks very much to everyone who helped to come true this wonderful dream. I will never forget your help, solidarity and good wishes on this long process. I really appreciate it! My special thanks to the AMSAT Board of Directors and to Patrick WD9EWK who did an exceptional job on this process. The amateur radio by satellites is more than interchange gird locators; the AMSAT community is like a big family. Thanks very much again."

[ANS thanks Patrick Stoddard, WD9EWK/VA7EWK and Hector, CO6CBF for the above information]

F-1 Amateur Radio CubeSat Update

News posted on the AMSAT-UK web reports Thu Trong Vu XV9AA has provided this update on F-1:

The attempts to recover the CubeSat are now focusing on reception of the backup UHF FM channel 437.485 MHz (+/-10 kHz Doppler shift). This FM beacon should transmit Morse Code for 20 seconds every minute during daylight.

The team would appreciate any reports of the beacon which can be sent to Thu Trong Vu XV9AA at thuvt@fpt.edu.vn

November 2, 2012, FSpace laboratory, FPT University issued an official report stating that no signal is heard from F-1 CubeSat after its deployment to space from the International Space Station (ISS) a month ago. However, the project team confirms that they are working to troubleshoot the problem.

According to Thu Trong Vu XV9AA, Project Manager, □As soon as F-1 was deployed from the ISS, FSpace□s ground station in Hanoi and other amateur radio stations around the world have been listening on F-1□ frequencies 145.980 MHz and 437.485 MHz but so far nothing heard except for a few uncertain reports of a weak signal during the first few days.

Preliminary analysis points to failure of the satellite□s power supply subsystem as the cause of the problem. At the moment FSpace team together with US partner NanoRacks are collecting information, analyzing different scenarios that could happen to the satellite in orbit and experimenting with the Engineering Model (an identical backup unit) of F-1 CubeSat in the laboratory to determine the problem. The team is also planning to send uplink commands to the satellite in an effort to restart the onboard microcontroller. However, the chance of recovery is slim, the team acknowledged.

Currently, F-1 CubeSat is orbiting the Earth at an average altitude of 400km (perigee 390 km, apogee 410 km) and being tracked by NORAD as object #38855. Its altitude decreases with time due to friction with the atmosphere (atmospheric drag) and summarized in the following table. According to orbital analysis, the satellite has an orbital lifetime of about 5 months (until March 2013) before descending low and burn up completely in the atmosphere.

F-1□s mission goals are to □survive□ the space environment, taking photos of the Earth and communicating with the ground control station at a speed of 1200 bit per second. Mr Thu said: □Although we haven□t heard from F-1, during the course of the project team members have learned valuable knowledge and gained practical experience in developing a pico-satellite. This is an important stepping stone for us to move forward in the long journey to the stars□.

F-1 frequencies:

145.980 MHz: main channel, 1.0W RF output, FM, AFSK 1200bps, one telemetry packet every 30 seconds, operates in the dark by default (but can be commanded later to operate in sunlight as well)437.485 MHz: backup channel, 0.2W RF output, FM, PWM CW beacon, each beacon transmission lasts about 20 seconds then 60 seconds delay, only operates in sunlight

More information and guide to download F-1 telemetry decoder can be found at http://fspace.edu.vn/?page_id=27. Decoded data can be sub-mitted to us via the telemetry decoder or by sending directly to: thuvt at fpt.edu.vn. Audio recordings are highly appreciated.

Read the full article at: http://www.uk.amsat.org/?p=11280 - and -http://www.uk.amsat.org/?p=11322

[ANS thanks AMSAT-UK and the F-1 CubeSat Team for the above information]

2013 CanSat Competition Applications Due November 30

Applications currently are being accepted for the 2013 CanSat Competition.

This annual competition is open to university and college students from the United States, Canada, Mexico and other countries. Teams of three to 10 students must design, build and launch a sensor payload called a CanSat. Each CanSat is slightly larger than a soda can and must be built according to the specifications released by the competition organizing committee.

All teams entering the CanSat competition are required to have a faculty adviser. The faculty adviser will oversee and be responsible for the conduct of the team at all times during the competition. The advisor is strongly encouraged to accompany the team to the competition.

Applications are due Nov. 30, 2012.

For more information about the competition and to download the application, visit http://www.cansatcompetition.com/.

Questions about this competition should be directed to:
questions@juno.nrl.navy.mil.

[ANS thanks NASA Education Express for the above information]

NASA Offers Spot The Space Station Service Via Text or E-mail

WASHINGTON -- On the 12th anniversary of crews continuously living and working aboard the International Space Station, NASA announced

Friday a new service to help people see the orbiting laboratory when it passes overhead. "Spot the Station" will send an email or text message to those who sign up for the service a few hours before they will be able to see the space station.

"It's really remarkable to see the space station fly overhead and to realize humans built an orbital complex that can be spotted from Earth by almost anyone looking up at just the right moment," said William Gerstenmaier, NASA's associate administrator for human exploration and operations. "We're accomplishing science on the space station that is helping to improve life on Earth and paving the way for future exploration of deep space."

When the space station is visible -- typically at dawn and dusk -- it is the brightest object in the night sky, other than the moon. On a clear night, the station is visible as a fast moving point of light, similar in size and brightness to the planet Venus. "Spot the Station" users will have the options to receive alerts about morning, evening or both types of sightings.

The International Space Station's trajectory passes over more than 90 percent of Earth's population. The service is designed to only notify users of passes that are high enough in the sky to be easily visible over trees, buildings and other objects on the horizon. NASA's Johnson Space Center calculates the sighting information several times a week for more than 4,600 locations worldwide, all of which are available on "Spot the Station."

Nov. 2 marks 12 years of continuous human habitation of the space station.

To sign up for "Spot the Station," visit: http://spotthestation.nasa.gov

For information about the International Space Station and a full list of sightings, visit: http://www.nasa.gov/station

ANS thanks NASA for the above information]

Satellite Shorts From All Over

Jan Poppeliers, ON7UX has put together a short video compilation of the AMSAT-UK Colloquium held in Guildford September 14-16:http://tinyurl.com/Colloquium-ON7UX (Southgate). Video of all of the Colloquium presentations can be found at: http://www.uk.amsat.org/?page_id=10953Video of the launch of the Progress 49 cargo craft headed for the ISS can be viewed on-line at: http://www.youtube.com/watch?feature...&v=HItD7pg4htU This flight took

advantage of the new abbreviated four-orbit rendezvous with the ISS. This flight was slated to bring a new VHF amateur radio handheld to the ISS. Due to crew scheduling the new radio is not planned to be activated until early 2013.Update your keps! Russian Mission Control said the orbit of the International Space Station (ISS) was raised on Thursday by one kilometer to avoid a possible collision with US Iridium-33 satellite debris. The maneuver to adjust the station's orbit lasted about seven minutes. The orbital readjustment was made using the thrusters of Russia's Progress-M-16M spacecraft, docked with the station.A report on Space-Travel.com says "Japan Plans to Launch New Carrier Rocket in 2013." JAXA announced the Epsilon carrier rocket to replace their M-5 Rocket. Epsilon's goal is to have an inexpensive rocket to launch compact low-cost satellites into orbit. Read the full story posted at: http://tinyurl.com/Japan-Epsilon.South Korea sets new window for rocket launch. South Korea said Monday it would make another atempt to send a satellite into space sometime during a November 9-24 window from the Naro Space Centre on the south coast next month after a scheduled rocket launch last week was cancelled because of a technical glitch. Read the full story posted at: http://tinyurl.co/SK-Launch-DelayEnjoy a video that will take you from the Big Bang to our current human state in 90 seconds at: http://tinyurl.com/Life-in-90 seconds (UniverseToday.com)+ NASA TV posted a video segment filmed from an altitude of 254 statute miles using external cameras on the ISS as it captured views of Hurricane Sandy on October 29, 2012 as it barreled toward a landfall along the New Jersey coastline: http://tinyurl.com/ISS-Sandy (YouTube)A timelapse video of NASA GOES-13 weather satellite photos of Sandy can be viewed at: http://tinyurl.com/goes13-Sandy (YouTube)Prior to a successful splash down of the first commercial cargo delivery to the ISS, SpaceX posted a video of Dragon's departure. The frames are speeded up 15X to show the entire departure sequence from the ISS: http://tinyurl.com/SpaceX-Departure (YouTube)13-14 November - total solar eclipse in a narrow band of the Earth□s surface, running across northern Australia and into the South Pacific and across the international dateline. The eclipse peaks at 22:11 UT. Observers in all of Australia, New Zealand, and parts of southern Chile will see a partial solar eclipse (with proper solar filters, of course). Details posted at: http://eclipse.gsfc.nasa.gov/SEplot/...2012Nov13T.GIFThe next Hudson Valley Satcom net date is Thursday, November 8 at 9 PM EST (UTC-5) on the 146.97 MHz MBARC Repeater (PL 100). An echolink connection is available on the N2EYH-L node. More information at: http://www.hvsatcom.org. (Stu, WA2BSS)

[ANS thanks everyone for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information. And with that, please keep in mind that Sgr-A*, the 26,000 light-year distant black hole in the middle of our Milky Way galaxy, is consuming a gas cloud so large that it will take a decade, 2010 to 2020, to complete the encounter. Currently the dust in the cloud is approximately twice as hot as the surface temperature on Earth. The hydrogen gas in the cloud is twice as hot as the surface of the sun. A year from now temperatures in the cloud will become detectable to radio and X-ray telescopes on Earth as well as orbiting satellites such as NASA's Chandra X-ray Observatory.

LU, ARGENTINA, SA-008
"End of the World, Railway station" is a special event that will be
activated from Tierra del Fuego (SA-008, WAP ARG-23, WFF LUFF-034,
WLOTA 2448) on Nov 10. Several stations will be on the air and this is
a good opportunity to collect points for WAP-WACA and WAP-WADA awards.
Operators will be: Cecilia,LU3XUC, Cristian,LU5XUC, Jaime,LU4XPE,
Gerardo,LU3XUJ, Hector,LU3XUH, Omar,LU5XTS, Pablo,LU4XUP, Luli,LU4XUL,
Guillermo,LU6XSG, Guillermo,LU9XPR, Diego,LU5XWA, Mariana,LU5XTI,
Erica,LU4XUE, Miriam,LU3XUM, Cintia,LU3XYL, and Guillermo,LU7XX.
They will append /XP to their homecalls. As most of them hold novice
licenses they will work on 10m from 28.300-28.350 MHz and on 80m on
3.650 MHz. QSLs via homecalls.

W, USA
The Tuckerton Wireless Amateur Radio Club, the Old Barney Amateur
Radio Club and the South Jersey DX Association are celebrating the
100th anniversary of the "Tuckerton Wireless" (WSC). Members will use
W2WSC/100 from their home stations while W2WSC/WSC will be used from
the last operating site of the Marine Coastal Radio Station WSC in
West Creek, NJ. Furthermore W2WSC/40 will be activated from the
Giffordtown Museum on Nov 17 (1500-2100 UTC) to commemorate the
40th anniversary of the Tuckerton Historical Society. QSLs via W2WSC.

YB, INDONESIA, OC-021
The special event station YB26SEAG will be activated by members of the
YB Land DX Club (YBDXC) in all modes on all bands from Nov 11-17 during
the 26th South East Asia Games (SEAG) taking place in Jakarta from
Nov 12-22. QSL via YB1GJS.

OP wanted: Bill,N6MW, is looking for another operator to join a DXpedition
to KH8 from Mar 19-28, 2013. See also: http://n6mw.jimdo.com

New IOTA Checkpoint: Alejandro Valdez, XE1EE (iota.mexico@gmail), is the new
IOTA checkpoint for Mexico, Central America and the Caribbean Islands
(islands belonging to the USA and France excluded) starting on Nov 1.

Hurricane damage and trouble: Dennis,K7BV, was contacted by Eduardo,CO8LY,
stating that hurricane Sandy destroyed his house and everything he had.
His mother is very ill as well. Dennis is willing to serve as a
collection point for others wishing to send help.
Eduardo can be contacted also via his QSL manager EA7ADH.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Nov 10/11 Worked All Europe (WAEDC) Contest, RTTY
Nov 10/11 JA International DX Contest
Nov 10/11 OK/OM DX Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AF-024, S7, Inner Islands: Hardy,DL8NU, will be QRV as S79NU mainly in CW
on the HF bands from Mahe Island (WLOTA 3286) from Nov 9-24.
QSL via DL8NU (bureau/direct).

AF-090, 5R, Madagascar's Coastal Islands East: Eric,F6ICX, is active again
as 5R8IC from Nosy Boraha (WLOTA 0491) between Nov 10 and Dec 9. He is
working holiday style in CW, SSB, RTTY and PSK63. QSL via F6ICX.
Photos of earlier 5R8IC DXpeditions can be found on:
http://f6kbk.free.fr/5r8ic/5r8ic.htm

AN-010, VP8/SH, South Shetland Islands: Oleg,RI1ANF/p, was working from the
Russian Prirode Refuge (WAP RUS-015) for several time recently. He is
planning another activity from there during the beginning of November.

Oleg,ZS1OIN (UA3HK), will be the new chief of the Russian base
Bellingshausen (WAP RUS-01) and plans to become active as RI1ANU.

Nick,RK1PWA, has returned home and started to confirm his direct QSL
requests for RI1ANF. QSL fuer RI1ANF via RK1PWA (bureau/direct).
See also: http://www.waponline.it

AS-003, 4S, Sri Lanka Island: Peter,DC0KK, is travelling again to
Sri Lanka (WLOTA 0762, Loc MJ96xk) and plans to hit the airwaves as
4S7KKG in CW and digital modes between Nov 9 and Mar 9, 2013.
QSL via DC0KK (bureau/direct/LoTW).

AS-004, 5B/ZC4, Cyprus Island: Mike,5B/DL4ABO, and Martin,5B/DC8MH, are
planning a DXpedition to Cyprus from Nov 10-14 and want to work in
SSB, CW, RTTY and PSK on the HF bands. QSLs via homecalls.
See also: http://www.dc8mh.de

Correction to DXNL 1803: The QSL route for the contest station P3F
is 5B4AHJ and NOT via the operator M0DXR.

NA-066, W6, California State South (Orange/San Diego County) group:
Rich,W6VX, Don,N6IC, Frank,N6FH, Gary,NY6Y, Skip,KJ6Y and Jim,N6KZ,
will be QRV as homecalls/p from Santa Catalina Island (USi CA016S,
WLOTA 2912) in CW and SSB on 80m-10m from Nov 9-12. QSLs via homecalls.

NA-099, KP4, Puerto Rico: Members of the Puerto Rico Amateur Radio League
(PRARL) plan to activate Isla Cabras (USi PR031, Loc FK78ef) as KP4ES
on Nov 11. Activities shall take place on the usual IOTA frequencies.
QSL via NP3O (d).

OC-009, T8, Palau Islands: Toshiharu,JA3JND, plans to show up as T88ON from
Koror Island from Nov 9-13. Listen for him CW, SSB and digital modes
on HF. QSL via JA3JND. See also: http://palau.rental-shack.com/english

OC-013, E5, Rarotonga Island: Rudi,ZL2KBR, plans an activity from Rarotonga
from Nov 12-19. He will work in SSB, RTTY and PSK31 on 20m-10m signing
E51KBR in holiday style. QSL via ZL2KBR (bureau/direct).

OC-083, E5, Aitutaki group: A group of Swiss HAMs including Frank,HB9BXU,
will spend their holidays on Aitutaki from Nov 12-30. Listen for E51C,
E51ABS, E51BZD and E51CHX in CW, SSB and PSK31 from 1900-1200 UTC on:
CW: 3505, 7020, 10104, 14024, 18080, 21024, 24894, 28024 kHz
SSB: 3799, 7070, 14190, 18145, 21290, 24950, 28490 kHz
PSK31: 3580, 7035, 10139, 14070, 18100, 21070, 24920, 28120 kHz
QSLs via HB9BXU.

OC-088, V8, Borneo: Members of the Mediterraneo DX Club are planning a
DXpedition to Brunei (WLOTA 1628, Loc OJ74) from Nov 11-23. 18 team
members want to activate up to five stations at the same time signing
V84SMD in CW, SSB and RTTY on 160m-6m. QSL via IK2VUC (bureau/direct).
An OQRS will be installed as well and the log will be uploaded to the
LoTW by the end of March 2013. See also: http://www.mdxc.org/v84smd

OC-170, VK6, Western Australia State (South Coast) East Centre group:
Nigel,VK6NI, Steve,VK2SJK, Reinhard,DF4TD, and Wally,VK6YS, will be
QRV as VK6WDI from Woody Island from Nov 9-13. They will work with two
stations on 40m-10m. QSL via VK6YS (d). See: http://www.westozdx.net or
http://www.westozdx.net/IOTAS/OC170/OC170.html

OC-271, YB8, Babar Islands: Correction: The QSLs for YB8XM/6 (via YB9BU)
can be sent only direct unfortunately.

SA-006, PJ4, Bonaire Island: Marco,PE2MC, Peter,PJ4NX, and Bert,PE2KY,
will be QRV as PJ4X from Bonaire Island (WFF PAFF-024, WLOTA 1279)
from Nov 9-16. They will work holiday style in digital modes and some
SSB on the HF bands. QSL via PE2MC (bureau/direct).
See also: http://www.pe2mc.nl/bonaire-here-we-come-pj4pe2mc

SA-014, PY0S, St Peter and St Paul Rocks: The Araucaria DX group plans a
DXpedition to St Peter and St Paul Rocks (DIB OC-03, WFF PYFF-064,
WLOTA 0003, Loc HJ50). Fred,PY2XB, Peter,PP5XX/PY5CC, George,AA7JV, and
Tomi,HA7RY, will hand out IOTA and DXCC points as PT0S from Nov 10-22.
They will focus on the lowbands with one station working only on 160m.
Another station will be active on 80m and 40m during the nights. During
daylight they will use two stations on the high bands.
QSL via HA7RY (bureau/direct). OQRS will be set up as well.
See also: http://pt0s.com

SA-087, LU, Santa Cruz Province North group: Update: The DXpedition of LT0X
to Penguin Island has been posponed to Nov 9-11.

Walter Raymond McGugan Jr. W3FG (SK):

Posted: 05 Nov 2012 04:24 PM PST
http://www.eham.net/articles/29285

Walter Raymond McGugan Jr. Walter Raymond McGugan Jr. of Crownsville, Md., passed away Wednesday, Oct. 31, 2012, at Anne Arundel Medical Center in Annapolis, Md. He was 61. Walt was born Dec. 16, 1950, in Philadelphia, to the late Walter Raymond McGugan Sr. and Salome (Greatrex) McGugan. Walt was an active amateur radio operator and member of the Potomac Valley Radio Club, with his call sign of W3FG. He enjoyed planning and taking road trips, and researching current events on the computer. Walt is survived by his wife of 42 years, Marge McGugan of Crownsville, Md.; two children, Dennis McGugan and his wife, Jennifer, of Rutland, Mass., and Kathy McGugan of Fairfax, Va.; his grandson, Patrick; and sister, Salome Hamby and her husband, Ronald of Frisco, Texas. He also is survived by his extended family and friends.

Kids Send Out SOS at Morse Code Workshop:

Posted: 05 Nov 2012 04:24 PM PST
http://www.eham.net/articles/29284

LOCAL children sent out an SOS and many other recognised Morse code signals at a workshop in the Museum at the Mill recently. The workshop taught the children the internationally recognised code in a new fun and innovative method invented by storyteller Kathleen O'Sullivan. She along with fellow storyteller Billy Tear tour the length and breadth of Ireland using traditional, modern and original stories, to demonstrate how to engage and stimulate children. To mark the recent Titanic commemorations they decided to look into techniques used on board the fated liner. Kathleen takes up the story: "We were looking at storytelling ideas for the Titanic and of course they used Morse code for communication and to send out their distress signals. "I looked at learning and found that there were very complicated abstract and boring ways of learning it and I thought I would never get it. So I developed a series of drawing and illustrations centred around the alphabet. "Basically if you know your ABCs you can learn our methods of teaching Morse code. It really is very simple. She went on: "People have been surprising themselves about how quickly they can pick it up. "We started by telling the children that if they could pick up five signals in an hour they would be doing good, but they can pick them up in five minutes. "Once they learn one, they want to learn another and another until they are very good at it after an hour."

//
SRI Engineer Munsch an Expert On Radio Noise from Power Lines:

Posted: 05 Nov 2012 04:23 PM PST
http://www.eham.net/articles/29283

Growing up as an only child in Refugio, George Munsch filled his days relentlessly scouring science books and magazines. After earning a degree in physics and taking a position with Southwest Research Institute, Munsch's childhood fascination grew into a career. As an employee with SRI, he traveled the world as an electrical engineering consultant who mainly served the U.S. Navy by helping the military maintain optimal communication. Known as the go-to guy, Munsch often was called in as a last resort when the cause of power line interference could not be established, said his son, Randy Munsch. "He enjoyed problem solving. He didn't always have the answers, but he knew the techniques for finding the answers," recalled long-time colleague, Roger Chiodo. "He had a lot of pride in what he did, but his demeanor was always humble." Munsch died Wednesday of natural causes. He was 77. In 1993, Munsch co-authored a handbook for the Navy, which offered guidance on how to locate power line noise sources at radio receiving sites around the world to ensure receivers functioned properly. "Power-Line Noise Mitigation Handbook for Naval and other Receiving Sites," is the Navy's main document on solving noise interference and establishing lines of clear communication, Chiodo said. Munsch achieved the position of principal scientist at SRI, before retiring after 31-years of service, Chiodo said. For more than five decades, Munsch enjoyed connecting with folks around the world as a ham radio operator. After retirement, he continued his hobby -- establishing countless friendships with fellow enthusiasts. "He was a very outgoing and friendly person -- really interested in people and learning from them -- so that was a natural hobby for him," Chiodo said. "It was about both the friendships and the

quest for knowledge."

Solar Activity from 2012 to 2013: Sunspots Lingering Under Cycle Forecasts:

Posted: 04 Nov 2012 04:41 PM PST
http://www.eham.net/articles/29277

About a year ago we took a look at the NASA forecast for the Sunspot Cycle 24 (meaning the 24th recorded cycle since the year 1755 - it is as random as that) which started with the sunspot minimum of (somewhere around) the year 2008. In about a year from now the solar maximum of the current cycle is forecast to reach its peak. NASA predicts this maximum will lie at a sunspot number of 73 - NOAA (shown below) thinks the Sun will be just a little bit more active - and predicts a sunspot maximum of 80.

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

November 7, 2012

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- QRV for QTC? - Worked All Europe RTTY
- Old-Timers Game - Homebrew and Oldtime Contest
- A Year's Worth of Contests
- Looking at the World
- Catch the Wave in 1925
- Field Day Fun Final Filed
- Where's True North? The Shadow Knows!
- Professional Hints and Kinks
- Xtremely-Fun Contesting

NEW HF OPERATORS - THINGS TO DO

If you are into the digital modes, try for some RTTY DX in the final
Worked All Europe weekend. The special "QTC" rule gives the WAE a
special flavor all its own. Sweepstakes resumes on the following
weekend by filling up the phone bands. Make sure you have the latest
logging software to get full credit for all four of the new VE3
sections!

BULLETINS

This is a generic bulletin - don't forget to send in your logs! The
deadlines for all of the major contests have been made much shorter and
with all the big events in November, it is too easy to lose track of
things.

BUSTED QSOS

No particularly notable errors in the previous issue.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

November 10-11
```

- Worked All Europe DX Contest--RTTY
- 10-10 Fall Digital QSO Party
- Japan International DX Contest--Phone
- OK-OM DX Contest--CW
- Kentucky QSO Party
- CQ WE (Western Electric)
- SKCC Weekend Sprintathon--CW

November 17-18

- ARRL November Sweepstakes--Phone
- CWops Monthly Mini-CWT Test--CW (Nov 14)
- NAQCC Monthly QRP Sprint--CW (Nov 15)
- LZ DX Contest
- Feld-Hell Turkey Shoot Sprint
- All Austria 160 Meter Contest--CW
- Collegiate ARC Championship--Phone
- RSGB Second 1.8MHz Contest--CW
- Homebrew and Oldtime Contest--CW
- Run For the Bacon--CW (Nov 19)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

How many contests are there throughout the year? Well, there are rather a lot! In 2012, the Contest Corral database tracks 440 different contests. The online WA7BNM and SM3CER contest calendars have even more, especially sprint and regional contests in Europe. Of the 440 tracked in Contest Corral, 326 (74%) are HF-only and 35 (8%) only use the VHF+ bands. 73% feature CW - the most popular contest mode by nearly 2-to-1 over Phone (46%) and Digital (37%). Even though there are 22 more contests this year, the proportion of CW:Phone:Digital remains almost exactly the same.

During "our" domestic CW Sweepstakes, you may have heard other stations around the world engaging in their own events, such as the Worked All Germany and the Ukrainian DX Contest. There are two new contests sponsored by the Amateur Radio Society of India <http://www.arsi.info/contests/international> that you should also know about: the Himalayan Contest which took place over the Sweepstakes weekend and the VU International DX Contest coming up on Dec 3rd and 4th. While communications between North America and India is over a long polar path, even modest stations can bag a VU QSO by watching for gray line (see "Working the Gray Line <http://www.qsl.net/w2vtm/grayline.html>" by NA5N) and long-path propagation (Thanks, Prasad VU2PTT)

Due to the devastation and power outages throughout the North East resulting from Superstorm Sandy, the NYQP Organizing committee has decided to extend to deadline for log submissions for the New York QSO Party an additional 10 days. Therefore the log submission date will be November 15th at 0000Z. (Thanks, NYQP Committee members Brent KC2QLJ and Paul K2DB)

The California QSO Party <http://www.cqp.org/> (CQP) is also extending their deadline for log submission in response to the problems created by Hurricane Sandy. The new deadline is November 10. Electronic logs are strongly encouraged. Paper logs may be mailed to K6SRZ's QRZ.com <http://qrz.com/> address. (Thanks, 2012 CQP Chair, Alan K6SRZ)

>From a recent ARRL Propagation Bulletin <http://www.arrl.org/w1aw-bulletins-archive-propagation> by Tad K7RA we learn, "NASA has a revised forecast <http://solarscience.msfc.nasa.gov/predict.shtml> for the peak of Cycle 24, and it looks very interesting. Instead of a peak in Spring 2013 with a smoothed international sunspot number of 60, the peak is now predicted for Fall 2013, with the smoothed sunspot number prediction revised to 76, about 27% higher. Perhaps Cycle 24 will have a double peak, the first being in Fall 2011 and the second in Fall 2013." The unusual behavior of this cycle appears to be caused by internal processes in Ol' Sol's north and south hemispheres getting progressively more out of phase.

On the 12th anniversary of crews continuously living and working aboard the International Space Station, NASA announced the "Spot the Station <http://spotthestation.nasa.gov/>" email service to help people see the orbiting laboratory when it passes overhead. The free service will send an email or text message to those who sign up for the service a few hours before they will be able to see the space station. When the space station is visible -- typically at dawn and dusk -- it is the brightest object in the night sky, other than the Moon. On a clear night, the station is visible as a fast moving point of light, similar in size and brightness to the planet Venus. Even though the ISS trajectory passes over more than 90 percent of Earth's population, it is striking to learn how few people have noticed it or if they did see it, knew what it was. (Thanks, AMSAT <http://amsat.org/> Bulletin ANS-309)

Web Site of the Week - Here is a great present for young readers with an interest in maps and why they look the way they do. Seeing Through Maps - Many Ways to See the World by Wood, Kaiser, and Abramms is published by ODT <http://www.odt.org> which also offers many other interesting map-related products for hams.

WORD TO THE WISE

Retired Emergency Room physician, Alan K6SRZ writes, "Here's my contest advice: take a baby aspirin before putting your butt in the chair for an extended period." An enteric-coated low-dose aspirin also helps. Why? "Deep venous thrombosis [a blood clot - Ed] can definitely cut into your score."

==> SIGHTS AND SOUNDS

Wave (Beverage) antennas were used at the Radio Corporation of America radio relay station 1XAO in Belfast, Maine in the early 1920s. The antenna length designed to receive 1600 meter signals from England was

a few feet short of 10 miles in length. Many of the state-of-the-art station's engineers were hams and in March 14, 1925 they made history by broadcasting a musical program from England with a double relay on each end. Bruce, K1FZ has placed one of the recordings of the transmission <http://www.qsl.net/k1fz/1925recording> online for all of us to experience long-wave AM radio reception "across the pond" - amazing even with the poor audio quality, QSB, and occasional QRN of those early days of wireless!

Be a sight and sound yourselves - be sure to send in your soapbox comments, contest stories, and especially photos to the contest sponsors! With so much contest activity, let the contest managers hear from you! You can read some of the remarks by other contesters in the Soapbox collections <http://www.eskimo.com/~mwdink/3830/> by Dink N7WA.

Dennis N6KI writes, "I have been a regular for ARRL Sweepstakes CW and SSB from W6YI <http://www.n6win.com/index_files/W6YICQWWSSB2012.htm> the past 6 or 7 years and we have won our Multi-Single, High Power category the past 5 or 6 of those years. (It) looks like we are on track for 2012 as we are in first place so far for the Sweepstakes CW this past weekend." The website has quite a few excellent pictures of this superb station!

Why is D4C so loud? Well, take a look at this online YouTube video <http://youtu.be/i4L_BTwfdsA> of the site. What a location! (Thanks, Randy K5ZD)

==> RESULTS AND RECORDS

Yes, I know Field Day is not really a contest - although anything can be made into one if you are the competitive sort - but Dan N1ND's annual pun-packed-parcel <http://www.arrl.org/contest-results-articles> summarizing the Field Day results is now online. How did your club do this year?

24 hours after the end of the contest, the CQ WW committee had received well over 4000 log submissions. In 48 hours, the total exceeded 5100 logs. And as of yesterday, they had received 7712 logs containing 5.2 million QSOs - that's just awesome! I'd say that the new shorter log submission deadline has not proven to be a barrier to participation or sending in a log. (Thanks, CQ WW Director, Randy K5ZD and CQ WW Committee member Ken K1EA)

WRTC-2014 Event Scores <http://www.wrtc2014.org/qualifying/qualification-standings/> based upon the official published results from the Russian DX Contest <http://www.rdxc.org/> are now posted online. Official results for 33 of the 55 qualifying events are now included and almost 25,000 different operators have submitted scores in those events. 13 qualifying events have taken place for which official results are not yet available. (Thanks, WRTC-2014 Team Selection Director, Dan K1TO)

OPERATING TIP

Numerous comments following the first Worked All Provinces of China contest and then the CQ WW SSB contest have me thinking that we need to develop a set of phonetics suitable for Chinese-speaking hams who may not be familiar with English phonetics yet. I asked David BA4RF if there was a preferred set of English phonetics. He suggests that we use simple words, such as "Boy", "Dog", or "Fox". The word "Sugar" is easier to understand than "Sierra" which is an unfamiliar term to a Chinese speaker.

==> TECHNICAL TOPICS AND INFORMATION

Here's a good description by Roger K8RI of the "shadow method" for finding true north using a line from the tower to its shadow. "With your watch synchronized to WWV...mark the end of the shadow right on the count for solar noon (and) you should be within seconds for actual accuracy. Even doing it with a good inexpensive watch, you can be well under one degree or even under a minute of angle." This method also indicates true south in the southern hemisphere. The line from the tower to the marked point can be extended as far as necessary to allow good alignment of an antenna with the line. Perhaps a "true north tree" or building can be identified in the far distance to be used any time.

The use of a high-pass or broadcast band notch filter is common to allow antenna analyzers with wideband detectors to operate in the presence of strong broadcast signals. These filters do affect the impedance reading, however. With vector network analyzers <http://www.dxzone.com/catalog/Technical_Reference/Vector_Network_Analyzer/> (VNA) such as the AIM4170 <http://www.arraysolutions.com/Products/AIM4170.htm> becoming more common, you can take advantage of the VNA's ability to calibrate through the filter and feed line, effectively subtracting out the effects of the filter. (Thanks, Guy K2AV)

Can you use regular signal relays at RF? Larry W0QE recently ran some fairly extensive tests <http://www.w0qe.com/Technical_Topics/small_signal_relays_at_rf.html> on common signal relays at RF frequencies. This is interesting as these relays are as fast as vacuum relays and can hot-switch medium power levels.

Modern radios almost define "mixed signal" - a combination of analog and digital technologies. With signals so small and so large and so sensitive to linearity, laying out the signal return traces, logic-level grounds, ground planes, and power circuits is very important to top-notch performance. EDN magazine has published a pair of articles (Part 1 <http://www.edn.com/design/analog/4394761/Successful-PCB-grounding-with-mixed-signal-chips---Part-1--Principles-of-current-flow> and Part 2 <http://www.edn.com/design/analog/4395817/Successful-PCB-grounding-with-mixed-signal-chips---Part-2--Design-to-minimize-signal-path-crosstalk?cid=Newsletter+-+EDN+on+Analog>) to help the designer accomplish just that.

Roger K8RI also contributed a method of attaching guy ropes to a vertical antenna or mast. "I use Plexiglass or Lexan and two hole saws to make a ring that just fits over the section where I want to mount the guys. I cut the OD first, then use the center hole as a guide for the saw to cut the ID. I mark off the location for the guys at 120 degrees and drill holes just large enough to insert the guys. Either ½" Lexan or Plexiglass (two 1/4" sheets epoxied together will work) for taller and larger verticals or just 1/4" thick pieces for 40m 1/4-wave verticals. 1/4" should work with 3/16" line for 66' verticals."

QRM is by no means limited to the amateur bands - it is a growing problem for commercial satellite services, too. For a look at how those folks view the problem, read "Tackling Satellite Interference <http://www.microwavejournal.com/articles/18088-tackling-satellite-interference>" in the August 2012 issue of Microwave Journal. Getting a look at a familiar problem from an unfamiliar perspective - such as 0.75-degree beamwidth antennas - is often refreshing and productive!

Technical Web Site of the Week - Engineers have their "Hints and Kinks" columns, too. Contest Update readers will recall my having mentioned items from Electronic Design <http://electronicdesign.com> magazine's "Design Ideas" column - tasty treats from readers around the world, solving various problems, often in unusual ways that make me think, "I never thought of doing it that way!" Well, that column - possibly inspired by QST - is celebrating six decades of ideas - you can sample some of the savvy from yesteryear online at 60 Years of Ideas for Design <http://electronicdesign.com/article/articles/60-years-ifds-74497?NL=ED-04&Issue=ED-04_20121008_ED-04_911&YM_RID=hwardsil@gmail.com&YM_MID=1344542&sfvc4enews=42>. While you're there, the articles "The Rise And Fall Of Heathkit--And Rise Of SparkFun <http://electronicdesign.com/article/articles/rise-fall-heathkitand-rise-sparkfun-74498>" and "Benford's Law <http://www.edn.com/electronics-blogs/anablog/4399245/Benford-s-Law?cid=EDNToday>" make good reading, too.

==> CONVERSATION

Xtreme-ly Fun Contesting

Brian N9ADG and friends Dick K7BTW and Adam K7EDX decided to give the CQ WW contest's Xtreme category <http://www.cqww.com/rules_xtreme.htm>a try this year. While they usually did a multi-op effort, none could be on full-time and all needed to be near home. The Xtreme category gave Brian an opportunity to create a "distributed multi-op" that turned out to be a lot of fun. Here is a summary of his story - look for the full writeup in a future National Contest Journal <http://ncjweb.com/> article.

73, Ward N0AX

"While we (N9ADG, Dick K7BTW, and Adam K7EDX) normally would have gotten together to do a multi effort, none of us were able to commit to

the entire contest period, and we all needed to be near our homes. How could we all work together on a multi? The Xtreme category! How about if we do an Xtreme 'distributed multi multi'? An email to the CQ WW Contest Committee resulted in a 'go for it' from Doug K1DG.

"The plan was to have each of us use our own home stations as one of the stations in the multi-multi, run N1MM, and connect together securely over the internet. Each of us could connect and get on, see where the other folks were, and choose a different band to operate as our weekend schedule allowed. We could send coordination messages to each other through N1MM.

Brian used Amazon's web services - a.k.a. "the cloud" - to host a Linux server and a Windows 2008 PC with a virtual private network (VPN) and developed an N1MM configuration that allowed all three stations to communicate as if they were all in the same room connected by a LAN. The hosting charge - hold on to your wallets - was a mighty 11.5 cents per hour! The final configuration consisted of four N1MM machines (one at each of three stations, one in the cloud), and one Linux VPN server.

"During the contest, it was easy to see where each station was by using N1MM's info window; the operator, frequency, and run rate for each station are listed, and there's a space for typing a message to one or all of the other operators. We all got very used to hitting the Control-E key to send quick messages to each other during the contest to coordinate band changes or status. [Trash talk and pithy remarks between stations is one of the true pleasures of multi-op contesting - Ed.] If one of the stations dropped off the network, we were able to quickly re-synchronize the 'dropped' computer's log with the others, and continued on, the same as if we had a computer dropoff on a LAN.

"In the days leading up to the contest, we briefly discussed how we would operate, but didn't formalize a plan. Our stations are equipped differently -- only one station had 160, two had 80, but all had very reasonable 40-10 capabilities. The key for us was to adapt to the conditions that presented themselves. In the Pacific Northwest, that can mean being able to work South America and Asia simultaneously in the afternoons, working as many EU stations as possible if the 20m or higher is open, and looking for long path openings in the mornings to EU and Asia.

"As we entered the last few hours of the contest all three of us were able to be on simultaneously, and we had terrific runs on 10 and 15 meters. Keeping the motivation level high, we speculated we could reach 2.6M points, then passed it. 3.0M was the new goal. Each of us closely watched our scoring window wanting to make THE contact that would put us past this mark. K7BTW made the QSO that pushed us past this arbitrary mark about an hour before the contest's end.

"What did we learn from our experience? From on operating perspective, all of the technology "just worked" and faded into the background as we concentrated on the contest. We all commented on that we operated MORE

than we thought we would during the weekend; since we could see and feed off each other's progress, that spurred us to sit down and operate for small intervals throughout the weekend contest period. Having the chat capability allowed 'situational awareness' to be communicated well ("Just was on 20m, it was a zoo. You should try it").

"This was a good way to get three stations separated by tens of miles to work together effectively, and enable three friends that enjoy operating together to do so despite their other commitments. It would be fun to have more people as part of the effort the next time!"

==> CONTESTS

November 7 through November 20, 2012

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL November Sweepstakes--Phone, from Nov 17, 2100Z to Nov 19, 0300Z. Bands (MHz): 1.8-28. Exchange: Serial, category, call, check, ARRL/RAC sec. Logs due: Dec 4. Rules <http://www.arrl.org/contests>

Worked All Europe DX Contest--Digital, from Nov 10, 0000Z to Nov 11, 2400Z. Bands (MHz): 3.5-28. Exchange: RST and serial (see web for QTC rules). Logs due: 2 weeks. Rules <http://www.waedc.de/>

10-10 Fall Digital QSO Party--Digital, from Nov 10, 0001Z to Nov 11, 2359Z. Bands (MHz): 28. Exchange: Call, name, 10-10 number, S/P/C. Logs due: Nov 26. Rules <http://www.ten-ten.org/>

Japan International DX Contest--Phone, from Nov 10, 0700Z to Nov 11, 1300Z. Bands (MHz): 3.5-28. Exchange: RST and JA prefecture or CQ Zone. Logs due: 30 days. Rules <http://jidx.org/>

OK-OM DX Contest--CW, from Nov 10, 1200Z to Nov 11, 1200Z. Bands (MHz): 1.8-28. Exchange: RST and serial or OK/OM district. Logs due: Dec 1. Rules <http://okomdx.crk.cz/>

Kentucky QSO Party--Phone,CW,Digital, from Nov 10, 1400Z to Nov 11, 0200Z. Bands (MHz): 1.8-28, 50, Frequencies (MHz): CW--1.815, 3.550, 7.050, 14.050, 21.050, 28.050, 50.090; SSB--1.855, 3.820, 7.240, 14.280, 21.390, 28.390, 50.190. Exchange: RST and KY county or S/P/C. Logs due: Dec 31. Rules <http://www.wkdxa.com/>

CQ WE (Western Electric)--Phone,CW,Digital, from Nov 10, 1900Z to Nov 12, 0500Z. Bands (MHz): 1.8-28, 50-440. Exchange: Call, name, Bell QTH, yrs of service. Logs due: Dec 1. Rules <http://cqwe.cboh.org/>

SKCC Weekend Sprintathon--CW, from Nov 11, 0000Z to Nov 11, 2359Z. Bands (MHz): 3.5-28. Monthly beginning on the second Saturday local

time. Exchange: RST, S/P/C, name, SKCC nr or "none". Logs due: 5 days. Rules <http://www.skccgroup.com/>

CWops Monthly Mini-CWT Test--CW, from Nov 14, 1300Z, multiple operating periods, see website, twice monthly on 2nd and 4th Wed. Bands (MHz): 1.8-28. Frequencies (MHz): 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

NAQCC Monthly QRP Sprint--CW, from Nov 15, 0130Z to Nov 15, 0330Z. Monthly on 2nd Tuesday or 3rd Wednesday local time (alternating). Bands (MHz): 3.5-14. Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

LZ DX Contest--Phone,CW, from Nov 17, 1200Z to Nov 18, 1200Z. Bands (MHz): 3.5-28. Exchange: RST and ITU Zone or LZ district. Logs due: 30 days. Rules <http://lzdx.bfra.org/>

Feld-Hell Turkey Shoot Sprint--Digital, from Nov 17, 1600Z to Nov 17, 1800Z. Bands (MHz): 3.5-28. Monthly on 3rd Saturday. Exchange: RST, S/P/C, Feld-Hell member nr. Logs due: 5 days. Rules <http://www.feldhellclub.org/>

All Austria 160 Meter Contest--CW, from Nov 17, 1600Z to Nov 18, 0700Z. Bands (MHz): 1.8. Exchange: RST, serial, OE district. Logs due: Dec 31. Rules <http://www.oevsv.at/>

Collegiate ARC Championship--Phone, from Nov 17, 2100Z to Nov 19, 0300Z. Bands (MHz): 1.8-28. Exchange: See ARRL Sweepstakes. Logs due: Dec 4. Rules <http://www.collegiatechampionship.org/rules/>

RSGB Second 1.8MHz Contest--CW, from Nov 17, 2100Z to Nov 18, 0100Z. Bands (MHz): 1.8. Exchange: RST, serial, UK district. Logs due: Dec 3. Rules <http://www.rsgbcc.org/>

Homebrew and Oldtime Contest--CW, from Nov 18, 1300Z to Nov 18, 1700Z. Bands (MHz): 3.5-7. Exchange: RST, serial, and category. Logs due: Dec 18. Rules <http://www.qrpcc.de/contestrules/hotr.html>

Run For the Bacon--CW, from Nov 19, 0200Z to Nov 19, 0400Z. Bands (MHz): 1.8-28. Monthly on 3rd Sunday night (local). Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.org/>

VHF+ CONTESTS

Kentucky QSO Party--Phone,CW,Digital, from Nov 10, 1400Z to Nov 11, 0200Z. Bands (MHz): 1.8-28, 50, Frequencies (MHz): CW--1.815, 3.550, 7.050, 14.050, 21.050, 28.050, 50.090; SSB--1.855, 3.820, 7.240, 14.280, 21.390, 28.390, 50.190. Exchange: RST and KY county or S/P/C. Logs due: Dec 31. Rules <http://www.wkdxa.com/>

CQ WE (Western Electric)--Phone,CW,Digital, from Nov 10, 1900Z to Nov 12, 0500Z. Bands (MHz): 1.8-28, 50-440. Exchange: Call, name, Bell QTH, yrs of service. Logs due: Dec 1. Rules <http://cqwe.cboh.org/>

Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted twice monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Must have been a slow news day..

But I will say that this is a perfect example of all the three tier scheme has done to amateur radio in this country. A Nuham surrounded by retro equipment that he salivated over back in his CB days when he couldn't get a licence, hooked up to an Antron 99 of course. The text book usage of NATO phonetics (sic) and CB speak, "much qsb" not forgetting of course a desk awash with morse keys as if this somehow gives him credibility. You couldn't make it up.

Amateur Radio Club Looking for 'Hams':

Posted: 06 Nov 2012 04:06 PM PST
http://www.eham.net/articles/29291

The Comox Valley Amateur Radio Club (CVARC) is looking for new members to learn a little bit about radio operations, share a common interest and maybe even help out in an emergency. The club has existed in the Valley for years, but until recently it was all but inactive. Now a few radio enthusiasts are working to get it off the ground once more. Their next meeting, open to anyone with an interest in amateur radio and any level of experience, is Thursday, Nov. 8 at 7: 00 p.m. at the Comox Fire Hall. Club president Bob Stroud and member Morris Thompson both developed a love of radio early. For Thompson, his grandfather instilled that love when he used Morse Code to communicate with the youngster from the other end of the house. Stroud got in to the hobby in high school because a teacher was an amateur operator. Licensed amateur radio operators, known as 'hams,' use their radios to communicate with people all around the world. Through voice, typing or Morse Code, hams chat with one another about everything from the weather to current events. "We can talk to anybody, pretty well anywhere in the world," said Stroud. "The difference is that with a cell phone, you know who you're calling."

//
Hamming It Up:

Posted: 06 Nov 2012 04:05 PM PST
http://www.eham.net/articles/29290

A pathologist, an aircraft technician, a doctor, a farmer, a minister of religion and a plumber are among the people who belong to the Marlborough Amateur Radio Club. Talk to any of them on the other end of a radio signal, though, and they are just another voice. "On radio, everyone is exactly the same," says committee member Grant Simpson. "You could even be talking to royalty." Royal radio operators may not share their identity signals with commoners, but anyone can respond to a voice "calling CQ" (meaning "calling all long-distance radios") on an open air frequency. Helen Harris is another Marlborough club member who, with husband Ron, was drawn to amateur radio to make life easier on their Mount Adde farm in lower Awatere. It takes four hours to herd sheep from one end of the farm to the other, she says. "So if [men] call at a named gateway I can go round by road and pick the dogs up so they don't have to run all the way home." When work is done,

the couple put their radio to other uses. "The [radio] repeater goes on in our house 24-7." Fellow radio club members may be travelling in the area and making requests for weather reports, directions to somewhere they want to visit, or maybe just to swap a memorable story. Chat is silenced, however, if there is an emergency. "[Then] we can go on to our repeater and request people don't use it so we can handle an emergency. "I really enjoy emergency [communications]. I do search and rescue, civil defence and fires." Rural Fire use amateur radio operators who can provide a frequency base for police, helicopter and fire teams to use. "We co-ordinate it all, log all the calls," Helen says. Accepting such responsibilities comes with getting a radio licence.

//
NPA Sixth-Graders Study Sun:

Posted: 06 Nov 2012 04:05 PM PST
http://www.eham.net/articles/29289

VOLUNTEERS FROM THE COCONINO AMATEUR RADIO CLUB, Coconino Astronomical Society and Lowell Observatory Director Jeff Hall helped out Kaci Heins' sixth-grade science class at Northland Preparatory Academy. They had eight telescopes with white light and hydrogen alpha filters. This allowed students to see sun spots and solar prominences.

//
Why I've Built My Own Satellite:

Posted: 06 Nov 2012 04:05 PM PST
http://www.eham.net/articles/29288

The technology-obsessed artist has built his own satellite, but is finding it much harder to sell T-shirts to pay for the launch You have built your own satellite as part of your Open Source Satellite Initiative. What will it do? It will communicate down to Earth and people can talk to it using amateur radio equipment. Anyone can send it a message, which it will transmit in Morse code using LED lights bright enough to be seen from Earth with bare eyes or binoculars. I'm trying to raise the attention of the general public about the space programme, and give them a chance to look at the sky one more time.

//
Scientists Puzzled -- What's Wrong with the Sun?

Posted: 06 Nov 2012 04:04 PM PST
http://www.eham.net/articles/29287

Scientists are puzzling over the sun and why its activity is low when it should be much higher. Despite the predictions of an active sun for 2012 and 2013, the sun is quite pacific leaving scientists to wonder over what appears to be the sun's quietest period over the last century. It is an established fact that the sun has cycles. Every 11 years, the sun completes a cycle of activity, becoming alternatively active, then quiet during that span. Right now, the sun should be active, but it isn't. It's nearly as

quiet as it is during its minimum, which has scientists scratching their heads.
Solar activity can only be generally predicted and has fluctuated considerably in the past. Solar minimums, represented by weak activity are generally correlated with cold periods in Earth's history. The "Little Ice Age" that lasted somewhere between 1550 and 1850, saw temperatures well below average normals and has been correlated to a decline in solar output. That period of solar decline is known to scientists as the "Maunder Minimum." The Little Ice Age was typified by unpredictable weather and colder summers in northern Europe. The region was beset with sporadic famines. Glaciers crept down from mountains and consumer farms and villages, while lakes and ponds froze over across Europe so that people could skate on them. The current level of solar activity is still well above Maunder Minimum levels, but it could portend the start of a general decline. Such a decline could affect Earth's climate for several centuries.

New Callsign Search Engine at QRZ

Posted: 07 Nov 2012 10:09 AM PST
http://forums.qrz.com/showthread.php?367527-New-Callsign-Search-Engine-at-QRZ&goto=newpost

Some folks may have noticed that the behavior of the QRZ callsign search engine has changed. That's because we've just completed a major rewrite of the callsign search function and are pleased to announce several new features. These include:

Support for prefix and suffix lookups using the star (*) character, e.g. try "AA*"The ability to find partial callsigns (e.g. *7x*)Improved USA County searchThe ability to list all of the QRZ callsigns for a given DXCC entityThe ability to search by both major and minor grid squares

To see the new features, which include help info, just click on the search button at the top of the page, without filling in the search box. You will be brought to a new search box having all the aforementioned options.

This software update has also introduced more performance improvements and a general rewrite of many key functions. The callsign pages are now lighter (having fewer bytes to transfer) and some features are now loaded on demand instead of by default. One feature, however, which we called Notes, did not make the cutover. We're reviewing the usefulness of this feature which at its core was a Twitter-like capability that didn't work as well as Twitter. We're going to reevaluate the feature to see if it continues to make sense. Our sense is that the majority of our users didn't make use of it.

HAMRADIONOW.tv

Episode 31: Hurricane Sandy Follow-Up

Hurricane Sandy is gone. What did Ham Radio do? What did we learn?

In this episode, Southern New Jersey ARRL SEC John Zaruba K2ZA returns,

and is joined by ARRL Emergency Preparedness Manager Mike Corey KI1U

to discuss how it went, and what we learned to do even better next time.

Watch this episode at our web site, www.HamRadioNow.tv.

==> + FCC NEWS: FCC REJECTS MARYLAND HAM'S PLAN FOR AMENDING MESSAGE
FORWARDING SYSTEM RULES

On Monday, November 5, the FCC issued a letter dismissing a Petition
for Rulemaking filed in February 2012 by Rolan Clark, W3FDK, of
Adamstown, Maryland. In his Petition, Clark had asked the FCC to amend
Section 97.219, specifying that control operators of the first
forwarding station in a message forwarding system of stations should
not be obligated to authenticate the identity of a station from which
the message forwarding system accepts messages, and that the first
forwarding station should not accept accountability for any violative
```

content of the messages put into the system, Read more here
<http://www.arrl.org/news/fcc-rejects-maryland-ham-s-plan-for-amending-messag
e-forwarding-system-rules>.

==> + PUBLIC SERVICE: DO NOT SELF-DEPLOY TO AREAS AFFECTED BY HURRICANE
SANDY

Amateur Radio operators who want to assist those Sections affected by
Hurricane Sandy should not self-deploy to those areas. "There are many
ARRL Sections involved in the impact area, and each has different
requirements on how they locate, credential and deploy volunteers,"
explained ARRL Emergency Preparedness Manager Mike Corey, KI1U. "If a
need for manpower is identified that cannot be met locally or in the
Section, Section leadership may contact other Sections for assistance.
If the need is still not met, Section leadership may then contact ARRL
HQ for assistance."

==> + IARU: IARU ADMINISTRATIVE COUNCIL PLANS FOR WRC-15 AT ANNUAL
MEETING

The Administrative Council (AC) of the International Amateur Radio
Union (IARU) held its Annual Meeting November 2-4 in Ho Chi Minh City,
Vietnam. The AC -- which consists of the three IARU International
Officers and two representatives from each of the three IARU regional
organizations -- is responsible for the policy and management of the
IARU and. According to IARU Secretary Rod Stafford, W6ROD, the meeting
was a somber occasion due to the passing of IARU Region 3 Chairman
Michael J. Owen, VK3KI. Owen had been a member of the Administrative
Council for most of its existence, and had been a longtime contributor
to the efforts of IARU to promote and preserve Amateur Radio. Read more
here
<http://www.arrl.org/news/iaru-administrative-council-plans-for-wrc-15-at-ann
ual-meeting>.

==> + W1AW ANNOUNCES 2012-2013 WINTER OPERATING SCHEDULE

With the switch from Daylight Saving Time to Standard Time this past
weekend, W1AW Station Manager Joe Carcia, NJ1Q, has updated the W1AW
operating schedule to reflect the change. The standard times have not
changed, but the UTC times have. Read more here
<http://www.arrl.org/news/w1aw-announces-2012-2013-winter-operating-schedule>
.

==> + LOGBOOK OF THE WORLD EXPECTED TO BE BACK ONLINE ON NOVEMBER 9

ARRL Information Technology Manager Michael Keane, K1MK, is
reporting that while Logbook of The World (LoTW
<http://www.arrl.org/logbook-of-the-world>) system is currently down,
it is expected to be back up by 9 AM EST (1400 UTC) on Friday, November
9. "While the system is temporarily down, radio amateurs are not able
to access LoTW or upload their logs," Keane explained. "No data has
been lost, and everyone's records are intact. We understand the problem
and we are in the process of restoring service to LoTW. Since both the

Logbook of The World service and the Online DXCC
<http://www.arrl.org/news/online-dxcc-application-to-debut-april-2>
service are connected to the ARRL Awards System, radio amateurs are not
able to access either service until the system is restored. We
apologize for any inconvenience this may cause, and want to assure the
amateur community that the ARRL is working diligently to restore
service to these popular programs."

==> ARRL EXECUTIVE COMMITTEE EXAMINES REGULATORY MATTERS,
ORGANIZATIONAL ISSUES AND MORE AT SEPTEMBER MEETING

The ARRL Executive Committee (EC) held its second 2012 meeting
Saturday, September 29 in Denver, Colorado. The EC is responsible for
administering the League's affairs in between Board meetings. According
to the ARRL Articles of Association, the EC meets during the intervals
between meetings of the Board of Directors. It meets at the call of the
President, but no less often than semi-annually; the last meeting of
the EC was March 24, 2012.

At the meeting, the EC discussed the lack of visibility of Amateur
Radio enforcement actions, the FCC's study of the Amateur Radio study
mandated by Congress, the status to the followup of the report of the
ARRL's National Broadband Plan Committee, the future implementation of
the secondary MF allocation of 472-479 kHz and the Notice of Proposed
Rulemaking -- expected, but yet not released at the time of the meeting
-- that seeks to change the way Amateur Radio licenses are administered
and granted, as well as a change to the TDMA rules. The Committee also
discussed the upcoming Centennial Celebration and voted to approve
conventions and affiliated radio clubs, and recognized new ARRL Life
Members. Read more here
<http://www.arrl.org/news/arrl-executive-committee-examines-regulatory-matter
s-organizational-issues-and-more-at-september-mee>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY

This feature is a concise monthly update of some of the things that
the ARRL is doing on behalf of its members. This installment -- which
covers the month of October -- takes a look how affected ARRL Sections
handled the effects of Hurricane Sandy, the 2012 ARRL National
Convention in California, the annual ARRL On-Line Auction, new ARRL
publications, W1AW activities during JOTA, reports from the Official
Observer Desk and more. Read more here
<http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-51>.

==> ARRL ATLANTIC DIVISION PRESENTS "VIRTUAL" CONVENTION

The Atlantic Division Leadership is turning the traditional
convention model on its head! This year -- through the use of
multimedia -- the Division will host its convention on the Internet
<http://www.atldiv.org/convention> on Saturday, November 10. ARRL
President (and former Atlantic Division Director) Kay Craigie, N3KN,
will be the keynote speaker at the 2012 Atlantic Division Convention!

"We will be doing the convention as an educational event," explained ARRL Atlantic Division Director Bill Edgar, N3LLR. "We have some world-class presenters and topics for the convention, including NBEMS; an emergency communications discussion panel, information on stealth antennas, a DX forum and a forum on RF propagation." Find information and the presentations schedule for the convention here <http://www.atldiv.org/convention>. There is no cost for registration and Edgar said that there are still some seats available, but registration will close when there are no more seats available.

==> + ARRL SAYS "THANK YOU" TO VETERANS

On Sunday, November 11, here in the US and abroad, we will celebrate Veterans Day, also called Remembrance Day or Armistice Day. Originally a holiday that marked the end of World War I -- the "War to End All Wars" -- this day has been set aside to honor all who have served their country. It was on November 11, 1918, on the 11th hour of the 11th day of the 11th month, that Germany signed the Armistice, formally ending the hostilities that had been ongoing since 1914.

The ARRL would like to take this opportunity to thank our service veterans. Whether they served on active duty or reserve, during peacetime or time of conflict, they served their county with honor. We also would be remiss if we did not remember the families of those veterans who kept the home fires burning bright; without their love and support, our veterans would have indeed been alone.

ARRL Headquarters has its share of service veterans: Assistant VEC Manager Perry Green, WY1O (Army); Technical Editor Joel Hallas, W1ZR (Army); News Editor S. Khrystyne Keane, K1SFA (Coast Guard); Instruction and Resource Coordinator Nathan McCray, K9CPO (Navy); DXCC Manager Bill Moore, NC1L (Army); Reprints Specialist Tony Nesta, AA1RZ (Navy); Membership and Volunteer Programs Manager Dave Patton, NN1N (Navy); Technical Relations Specialist Jon Siverling, WB3ERA (Army); Field and Regulatory Correspondent Chuck Skolaut, K0BOG (Air Force), and Education & Technology Program Coordinator Mark Spencer, WA8SME (Air Force).

Thank you for your service -- your sacrifice and the sacrifice of your fellow service members is not forgotten.

==> + USPS SEEKS TO PHASE OUT IRCS

If the US Postal Service (USPS <https://www.usps.com/>) gets its way, it will no longer sell International Reply Coupons (IRCs) after January 27, 2013. According to the October 23 edition of the Federal Register <https://www.federalregister.gov/articles/2012/10/23/2012-25992/international-mailing-services-proposed-product-and-price-changes#h-88>, there is not sufficient demand for the USPS to continue offering IRCs to customers; however, per the Universal Postal Union (UPU <http://www.upu.int/en.html>) regulations, the USPS must continue to

exchange and redeem IRCs that have been purchased in foreign countries and presented at USPS facilities. Comments on this proposed change will be accepted <http://www.regulations.gov/#!submitComment;D=USPS-2012-0101-0001> through November 23, 2012. IRCs provide foreign addressees with a prepaid means of responding to inquiries, solicitations or other types of communications -- such as QSL cards -- that are initiated by US senders. IRCs are exchangeable for postage stamps by postal administrations in member countries of the UPU. Each IRC is equivalent in value to the destination country's minimum postage price for an unregistered airmail letter. The purchase price is in the US is currently $2.20 per IRC. -- Thanks to The Daily DX <http://www.dailydx.com/> for some information.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: Solar activity retreated again this week, with the average daily sunspot numbers declining 8.7 points to 49.7, while the average daily solar flux was down nearly 20 points to 97.2. The latest forecast shows solar flux at 100 on November 8-9, 105 on November 10-11, 100 on November 12-13, 95 on November 14-15, 115 on November 16-17, and 110 on November 18-20. The planetary A index forecast predicts an index of 9 on November 8, 5 on November 9-10, 7 on November 11-12, 5 on November 13-18, 8 on November 19, and back down to 5 on November 20-December 10. Look for more on the ARRL website on Friday, November 9. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>.

==> NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll:

- Will you be participating in the ARRL 160 Meter Contest <http://www.arrl.org/160-meter> on November 30?
- Do you make a special effort to perform maintenance on your antenna system in preparation for winter?
- How many computers do you own (desktop, laptop or tablet)?
- How long do you keep your print editions of QST?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the February 2013 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> THIS WEEK IN RADIOSPORT

This week:

- November 9 -- NCCC Sprint
- November 10-11 -- Kentucky QSO Party; WAE DX Contest (RTTY); 10-10 International Fall Contest (Digital); JIDX Phone Contest; OK/OM DX Contest (CW)
- November 10-11 -- CQ-Western Electric Contest
- November 11 -- SKCC Weekend Sprintathon
- November 12 -- NAQCC-EU Monthly Sprint
- November 14-15 -- CWops Mini-CWT Test
- November 15 -- NAQCC Straight Key/Bug Sprint

Next week:

- November 16 -- NCCC Sprint; YO International PSK31 Contest
- November 17 -- CQ SA SSB Contest; Feld Hell Sprint
- November 17-18 -- LZ DX Contest; All Austrian 160 Meter Contest; RSGB 2nd 1.8 MHz Contest (CW)
- November 17-19 -- ARRL Sweepstakes Contest (SSB) <http://www.arrl.org/sweepstakes>; North American Collegiate ARC Championship (SSB)
- November 18 -- EPC PSK63 QSO Party; Homebrew and Old Time Equipment Party
- November 19 -- Run for the Bacon QRP Contest

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. FCC Rejects Maryland Ham's Plan for Amending Message Forwarding System Rule

Posted: 08 Nov 2012 06:37 AM PST
http://www.eham.net/articles/29307

On Monday, November 5, the FCC issued a letter dismissing a Petition for Rulemaking filed in February 2012 by Rolan Clark, W3FDK, of Adamstown, Maryland. In his Petition, Clark had asked the FCC to amend Section 97.219, specifying that control operators of the first forwarding station in a message forwarding system of stations should not be obligated to authenticate the identity of a station from which the message forwarding system accepts messages, and that the first forwarding station should not accept accountability for any violative content of the messages put into the system.

//
Do Not Self-Deploy to Areas Affected by Hurricane Sandy:

Posted: 08 Nov 2012 06:36 AM PST
http://www.eham.net/articles/29306

Amateur Radio operators who want to assist those Sections affected by Hurricane Sandy should not self-deploy to those areas. "There are many ARRL Sections involved in the impact area, and each has different requirements on how they locate, credential and deploy volunteers," explained ARRL Emergency Preparedness Manager Mike Corey, KI1U.

//
IARU Administrative Council Plans for WRC-15 at Annual Meeting:

Posted: 08 Nov 2012 06:36 AM PST
http://www.eham.net/articles/29305

The Administrative Council (AC) of the International Amateur Radio Union (IARU) held its Annual Meeting November 2-4 in Ho Chi Minh City, Vietnam.

//
Logbook of The World Expected to Be Back Online on November 9:

Posted: 08 Nov 2012 06:35 AM PST
http://www.eham.net/articles/29304

ARRL Information Technology Manager Michael Keane, K1MK, is
reporting that while Logbook of The World (LoTW) system is currently down,
it is expected to be back up by 9 AM EST (1400 UTC) on Friday, November
9. "While the system is temporarily down, radio amateurs are not able
to access LoTW or upload their logs," Keane explained. "No data has
been lost, and everyone's records are intact. We understand the problem
and we are in the process of restoring service to LoTW.

//
ARRL Executive Committee Examines Regulatory Matters, Organizational Issues

Posted: 08 Nov 2012 06:34 AM PST
http://www.eham.net/articles/29303

The ARRL Executive Committee (EC) held its second 2012 meeting
Saturday, September 29 in Denver, Colorado. The EC is responsible for
administering the League's affairs in between Board meetings. According
to the ARRL Articles of Association, the EC meets during the intervals
between meetings of the Board of Directors. It meets at the call of the
President, but no less often than semi-annually; the last meeting of
the EC was March 24, 2012.

ARRL In Action: What Have We Been Up To Lately?

Posted: 08 Nov 2012 06:33 AM PST
http://www.eham.net/articles/29302

This feature is a concise monthly update of some of the things that
the ARRL is doing on behalf of its members. This installment -- which
covers the month of October -- takes a look how affected ARRL Sections
handled the effects of Hurricane Sandy, the 2012 ARRL National
Convention in California, the annual ARRL On-Line Auction, new ARRL
publications, W1AW activities during JOTA, reports from the Official
Observer Desk and more.

ARRL Atlantic Division Presents 'Virtual' Convention:

Posted: 08 Nov 2012 06:32 AM PST
http://www.eham.net/articles/29301

The Atlantic Division Leadership is turning the traditional
convention model on its head! This year -- through the use of
multimedia -- the Division will host its convention on the Internet
on Saturday, November 10. ARRL
President (and former Atlantic Division Director) Kay Craigie, N3KN,
will be the keynote speaker at the 2012 Atlantic Division Convention!
"We will be doing the convention as an educational event," explained

ARRL Atlantic Division Director Bill Edgar, N3LLR.

//
ARRL Says 'Thank You' to Veterans:

Posted: 08 Nov 2012 06:31 AM PST
http://www.eham.net/articles/29300

On Sunday, November 11, here in the US and abroad, we will celebrate Veterans Day, also called Remembrance Day or Armistice Day. Originally a holiday that marked the end of World War I -- the "War to End All Wars" -- this day has been set aside to honor all who have served their country. It was on November 11, 1918, on the 11th hour of the 11th day of the 11th month, that Germany signed the Armistice, formally ending the hostilities that had been ongoing since 1914.

//
USPS Seeks to Phase Out IRCs:

Posted: 08 Nov 2012 06:31 AM PST
http://www.eham.net/articles/29299

If the US Postal Service gets its way, it will no longer sell International Reply Coupons (IRCs) after January 27, 2013. According to the October 23 edition of the Federal Register, there is not sufficient demand for the USPS to continue offering IRCs to customers; however, per the Universal Postal Union regulations, the USPS must continue to exchange and redeem IRCs that have been purchased in foreign countries and presented at USPS facilities.

RAC Bulletin 2012-065E - Bob Nash VE3KZ appointed to Hall of Fame
2012-11-08

The Board of Trustees of the Canadian Amateur Radio Hall of Fame is pleased to appoint Robert Nash VE3KZ of Milton, ON to the Hall of Fame. Bob will be presented with this award at a meeting to be arranged in Toronto in early 2013, at which time a more detailed summary of his contributions to amateur radio will be published in The Canadian Amateur magazine.

Nominations for the Hall of Fame must be submitted by Sept. 30th annually. The appointment is to recognize an amateur for outstanding achievement for sustained service to amateur radio in Canada, or amateur radio at large. The Board of Trustees consists of an amateur radio representative from each province of Canada.

Radio Amateurs of Canada congratulates Bob Nash on this award.

IARU ADMINISTRATIVE COUNCIL PLANS FOR WRC-15 AT ANNUAL MEETING

The Administrative Council (AC) of the International Amateur Radio
Union (IARU) held its Annual Meeting November 2-4 in Ho Chi Minh City,
Vietnam.

The AC -- which consists of the three IARU International Officers
and two representatives from each of the three IARU regional organizations
is responsible for the policy and management of the IARU and according to
IARU Secretary Rod Stafford, W6ROD, the meeting was a somber occasion due
to the passing of IARU Region 3 Chairman Michael J. Owen, VK3KI.

VK3KI had been a member of the Administrative Council for most of its existence, and had been a longtime contributor to the efforts of IARU to promote and preserve Amateur Radio.

In memory of Michael, the IARU Administrative Council announced that the new "Michael J. Owen VK3KI Award" had been established to recognize an individual or individuals that best exemplify the dedication and hard work of IARU volunteers.

Thanks to the ARRL and WIA you read more here

(txt versions only)

This is Roger Harrison VK2ZRH

The battle over NSW planning restrictions on amateur radio antenna masts continues.

The deadline for making submissions to the latest phase of the NSW planning review closed on Friday last, 9 November.

Thank you to all those who made the effort to file a submission to the department of Planning and Infrastructure.

I note that a number of you also filed submissions to the Local Government Regulation Review being conducted by the Independent Pricing and Regulatory Tribunal. Thanks to you, too, and well done.

Now, our battle has to enter a new phase. The political campaign phase.

Yes, just as you immediately thought, this means taking our cause to your local member of the NSW Parliament. But - rein-in your enthusiasm for a moment - this phase needs to proceed in a considered way or our efforts will be lost amongst the clutter of other issues.

This coming week, I want you to do some homework. If you know who your local member is, gather his or her contact details and keep them to hand. The address and phone numbers of their electoral office, their postal address and their contact email address. If you don't know which state electorate you live in, I'll have instructions on how to find out posted in the WIA website.

wia.org.au

Preparing a letter to your local member requires a different approach to writing a submission to a government department. I'll have guidelines on how to approach it posted to wia.org.au soon, so look out for it.

Last week, I told you about what a spokesman from the NSW department of Planning and Infrastructure told the Sydney Morning Herald and quoted in an article on NSW amateurs' troubles with red tape over antenna masts. He said that ''allowing higher aerials without a detailed development application process could cause unacceptable streetscape and neighbourhood

safety issues''.

We have to change that view.

In the meantime, here's how the department is promoting the planning reform, and I want you to think it over "The NSW Government is creating a planning system for the 21st century. A planning system focused on the public interest. A planning system that places people and their choices at the heart of planning decisions about their future."

Radio amateurs are people! We chose to get a licence. In NSW we're being excluded from the planning decisions of the future!

And that goes for future radio amateurs in NSW, too.

This is Roger Harrison VK2ZRH. I'll see you further down the log.

HAMS ACROSS AUSTRALIA.

VK1

CRARC's next Members Meeting will be the 28th November which will be the Annual Christmas Bash BBQ and a Trash and Treasure Night.

If you are contemplation going, take along any of your surplus gear as CRARC is looking at bringing along more of their surplus gear too so that you can really make a feast of it!

All are welcome, whether you are a member or not, bring a likeminded guest along and enjoy the festivities

Please check events web page on www.crarc.ampr.org

SARC RECEIVES C'WLTH VOLUNTEER GRANTS SCHEME $3,350.

SARC received the massive $3,350.00 grant under the Commonwealth's Volunteer Grants Scheme.

This for various items to assist Summerland to improve facilities and training capabilities at the Lismore Clubrooms.

www.fahcsia.gov.au

FOOD FOR THOUGHT

Illawarra Amateur Radio Society has been holding its meetings at the Wollongong Bowling Club. However, due the popularity of a recently introduced $5 Schnitzel night the Society's meeting area has been taken over by hungry schnitzel lovers.

Consequently, a new meeting place was sought and found, with all future meetings of the Society now to be held at the Coniston Community Hall on Bridge Street, between Bridge Theatre and Coniston Railway Station.

(vk2wi)

Next Sunday, the 18 th November, Amateur Radio NSW will conduct a one day Foundation course at the VK2WI site, 63 Quarry Road, Dural.
Start time 0830 hours.

The following Sunday, 25th will be assessments for all license grades.

Inquiries and bookings to education@arnsw.org.au

Sunday the 25 th November is also the last of the Trash and Treasure events for the year at the VK2WI site. It will get underway about 0930 hours. Major items on offer are to be found under Disposals on the ARNSW web site www.arnsw.org.au

Busy time ahead for Amateur Radio Victoria

The next quarterly speaker night is this Tuesday, November the 13th, at 8pm.

It will be presented by Peter Cossins VK3BFG who will be taking the mystery out of SWR.

This very interesting talk is at 40g Victory Boulevard, Ashburton.

The Keith Roget Memorial National Parks Award special weekend kicks off Friday November the 16th and runs through to Sunday the 18th.

A master list of National Parks to be activated and the award rules are on the Amateur Radio Victoria website.

(Jim Linton VK3PC)

WHAT WAS ON AT NERG

Mark Harrison, VK3BYY, NERG NEWS Editor says that their meeting held on Thursday 8th saw Peter VK3TBN talking about Software Defined Radios.

Peter has been playing with a USB DVB-TV receiver stick.

These cheap devices are designed to receive digital TV, FM and DAB broadcasts on a PC. With open source software however, they become a general purpose VHF/UHF Software Defined Radio receiver for many other modes such as SSB, AM, FM, PSK, TETRA, as well as a Spectrum Analyser covering a range of up to 64MHz - 1.7GHz.

If you have a USB DVB-TV stick based on the Realtek RTL2832 chip then all you need to get going on digital radio is to install one of the many free software packages such as HDSDR, or GNU Radio.

VK5

Some ham fests are never publicised and the organisers wonder why year after year their numbers, both in attendance and in mainstream commercial sellers diminish.

Others are well aware of publicity and advising when their next HamFest will take place..

Like Adelaide Hills Amateur Radio Society who just hours after their successful 2012 event have announced the date for NEXT YEAR!

November 3rd 2013.

Visit www.wia.org.au and under clubs click the Adelaide Hills Amateur Radio Society for contact details.

VK6

Peel Amateur Radio Group have a special Anniversary coming - they are celebrating their 30th Anniversary.

The President of PARG, Michelle VK6MLW reports that to help celebrate they will be using a specially assigned call sign VI6 ARG 30. PARG will be operating until the 18th of November. QSLs card will be issued for stations worked. Further details can be found on QRZ.com

PARG will also be having celebrations today and next week, the 18th of November which will include the club setting up in a local park In Mandurah. Everyone is welcome to swing past and say hello or look for them on air.

BYO Picnic, please contact for further details or head to their club page on wia.org.au

www.wia.org.au/clubs/vk6/PeelAmateurRadioGroup/

PARG is a growing club with approx. 20 members and embrace all areas from Kwinana though to Waroona, incorporating Rockingham and Mandurah in VK6.

PARG has been working on a Mobile Communications Trailer for the past couple of years which was obtained through generous donations from sponsors such as SES Mandurah, Mayday and Alcoa. Their trailer is primarily used for emergency radio communications back-up to the SES in Mandurah and Club field days.

PARG is currently in early stages of sourcing a suitable club house in the Peel region.

VK6MLW says: "Please do not hesitate to contact any one of our committee members for more information on us and our activities."

The format will start by having simple QSOs and evolve from there.

So, anyone interested in learning Morse, or in brushing up on their skills, please join in.

(VK7FB and on behalf of VK7AD)

DISCUSSION POINT

What use is an f-call? (20120401)

As an amateur you have access to a whole range of frequencies. When I started in this hobby, I chose to buy an all-band set which allows me access to the main amateur bands, 160m through to 70cm. As I talk to other amateurs it occurred to me that apart from having a radio that can do those bands, it turns out that there are amateurs who favour particular bands.

Of course, some of the preference for a particular band comes from having a suitable antenna since not everyone has access to space where you can put up an antenna farm or a large dipole to access some of the lower bands.

Those considerations aside, while real, only show part of the picture. It turns out that within Amateur Radio there are some who stay on their particular band, or sometimes even "their frequency" and are happy to do so.

Having participated in a few contests over the past year, I can say that talking to new and varied people on a variety of bands has given me much joy. I've now tuned across and spoken on most amateur bands, either with my own call-sign, or as a contest participant with a club-sign.

If you "only have access" to a hand-held radio capable of 2m and 70cm, I'd like to encourage you to find a friend with a station capable of using HF and spending a little time perusing the bands. And if you're a died in the wool HF participant, tune your gear to UHF and VHF once in a while, you might be surprised.

I'm Onno VK6FLAB

(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

TODAY SUNDAY IS REMEMBRANCE DAY

Every second Sunday in November the SARL, in special church service transmitted in the last 15 minutes of Amateur Radio Today, they remember all those who lost their lives in defence of their country.

The service will be first transmitted at 10:45 CAT on 11 November.

The service will conducted by Dominee Jan Kramer, ZS6JRK.

All amateur radio stations have been requested to observe radio silence as a mark of respect.

In the UK Special Event Station GB 4 WLR will be on air today the 11th November as part of the Remembrance Sunday commemorations.

A World War One locomotive is expected to be in steam on the West Lancashire Light Railway at Hesketh Bank.

The locomotive served behind the front lines during WW1 and is named Joffre.

In the USA, the ARRL SAYS:-

"Sunday, November 11, in the US and abroad, we will celebrate Veterans Day, also called Remembrance Day or Armistice Day.

Originally a holiday that marked the end of World War I, the "War to End All Wars" this day has been set aside to honour all who have served their country.

It was on November 11, 1918, on the 11th hour of the 11th day of the 11th month, that Germany signed the Armistice, formally ending hostilities that had been ongoing since 1914.

The ARRL would like to take this opportunity to thank our service veterans. Whether they served on active duty or reserve, during peacetime or time of conflict, they served their county with honour. We also would be remiss if we did not remember the families of those veterans who kept the home fires burning bright; without their love and support, our veterans would have indeed been alone."

WIA National News a few weeks back made mention of Satellite jamming in the Middle East.

Well according to European satellite operator Eutelsat, disruptions in these satellite signals in the Middle East and Europe have been traced back to Syria and Iran.

There has been speculation that the jamming is a reaction to changes in the regulations put forth by the International Telecommunications Union to comply with the European Union's increasingly tough sanctions on Iran.

The ITU altered its regulations at the World Radiocommunication Conference in Geneva after receiving complaints of repeated and deliberate interference in the reception of TV in Persian and Arabic. Because of these changes, Eutelsat no longer carries 19 radio and television channels broadcast by the Islamic Republic of Iran Broadcasting.

For its part, the International Telecommunications Union says that these recent incidents are not the first time that there have been allegations of Iran blocking communications from the outside world. The latest wave of interference has affected numerous radio and TV broadcasters including the BBC, France 24, Deutsche Welle and the Voice of America.

NEWS FROM ARNEWSLINE USA

BRITISH SOPRANO SARAH BRIGHTMAN NEXT VISITOR TO THE ISS

The British songstress who created the role of
Christine Daae in Sir Andrew Lloyd Webbers
musical stage classic The Phantom of the Opera
will be the next space tourist to
visit the International Space Station.

Amateur Radio Newsline's Bill Pasternak, WA6ITF, has the details:

It has been announced in Moscow, world famous
soprano Sarah Brightman had passed the required
mental and physical examinations to permit her fly to the ISS.

In a video of the press conference made public by
the Russian Space Agency Roscosmos, and the
singer herself, Brightman described how as a
child she was inspired by the Apollo 11 landing on the moon.

Brightman: "When I look back, my mind's eye
brings me to a rush of images from all of the
incredible things that I have been privileged to
experience in my life. But if I keep tracking
back, my thoughts eventually come to rest on a
flickering TV screen in 1969. There as a small
and incredulous child I watched a man bound
gently from the steps of a rocket ship and land on the surface of the moon.

"This really was an adventure. It was something miraculous.

"For me it was an epiphany. From that moment I
began looking into the future. I began to dream
about what life might hold in store for me and of what I could accomplish."

--

During her comments, Brightman said the trip
would serve as a way to promote environmental
awareness and to encourage women's education by
helping to close the gender gap in the
sciences. For this she has called on the United
Nations Educational, Scientific and Cultural
Organization, better known as UNESCO, to join with her to make it happen:

--

Brightman: "There are two key areas that we have
identified which unify my personal passions,
UNESCO's objectives and my spaceflight. Both are
inexplicably linked and both relate to issues of sustainability."

--

After completing an upcoming world tour to promote her new album appropriately called Dream Chaser, Brightman will undertake six months of training at Star City in Moscow in preparation for her mission to the International Space Station. Once on-orbit she is expected to take part in several educational ventures as just mentioned but it is not yet known if she will obtain an amateur radio license or has any plans to make any ham radio contacts from the ISS.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

FBI AND STINGRAY VS. PUBLIC RIGHT TO KNOW

Tracking cell phones by tricking them into operating on a bogus network is a law enforcement tactic shrouded in secrecy. Now the FBI is under pressure to release information about it—but the bureau doesn't want to let go of 25,000 pages of documents on sophisticated cell surveillance technology.

In an Arizona court case last year it was made public that the FBI had used a cell-site simulator in order to track down a suspect. The portable equipment, sometimes described as either an I-M-S-I catcher or a Stingray, covertly sends out a signal that fools all phones within a specific area into connecting to a fake network. The spy tool can force targeted phones to release unique identity codes that can then be used to track a person's movements in real time.

But not everyone likes the idea of this type of law enforcement tool being used. Among them is the Electronic Privacy Information Centre which is attempting to obtain internal FBI documents relating to the technology. In fact the Centre is taking legal action to force the prompt disclosure of records concerning Stingray devices or other cell site simulator technologies. It alleges that the FBI has failed to comply with statutory deadlines by not handing them over quickly enough following a freedom of information request made last February.

For its part, the FBI says that it has found 25,000 pages of documents that relate to the request, about 6,000 of which are classified. Because of this the agency says that it may need up to three years to process the files before they can be released.

In light of the FCC's recent enforcement activities against cellular telephone jamming devices, it will be interesting to see if the regulatory agency can or will become involved in this controversial issue.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

World DX Club to close down.

It has been announced that the World DX Club (WDXC) is to close, a final issue of Contact magazine is to be published in December.

For 44 years the club have published their newsletter Contact magazine every month, containing station logs, news, information and comment about radio and radio broadcasts, both current and historical, primarily, but not exclusively, international shortwave radio.

Regretfully due to health reasons Arthur and Olive Ward have had to step down from their club duties in charge of membership subscriptions, dispatch of bulletins as well as many contributions to the content of Contact over the years.

Arthur became club printer in July 1974 and added his secretarial role in December 1979.

This leaves the club with too few voluntary staff for the work involved and it has been decided to cease publication of Contact.

It is understood that outstanding subscriptions are to be transferred to the British DX Club for UK and overseas members outside of North America and to the North American Shortwave Association for North American members.

www.worlddxclub.org.uk/

The ARRL report that 14 year old radio amateur Tom Jose, VU3TMO, has just achieved his Digital DXCC award.

First licensed when he was 13 years old in December of 2011, VU3TMO is a 3rd generation ham operator in his family along with his parents.

VU3TMO is a member of India's National Institute of Amateur Radio and the Dayton Amateur Radio Association. He is reported to be one of the youngest hams in the sub-continent.

Petition to save RCI Sackville from being dismantled.

Thomas Witherspoon K4SWL has launched a petition to save Radio Canada International's Sackville site from being dismantled.

K4SWL says:

"Could you please take a few moments out of your day to sign this petition I started? Your voice will be added to the petition and it will automatically email the appropriate Canadian politicians who could, at the very least, put a halt to the destruction of the RCI Sackville site. Canada-indeed, the world-needs this vital shortwave resource.

I have more information about this on my blog
http://swling.com/blog/2012/10/petition-to-save-rci-sackville-from-being-dismantled/

You can sign the petition by clicking on this link
http://chn.ge/TRgSCX

KRML, Carmel, California.

KRML is the AM station made famous in Clint Eastwood's 1971 movie,
"Play Misty for Me," in which Eastwood plays a jazz DJ stalked by a
disturbed listener.

The station on both 1410 AM signal and a translator at 102.2 has
dropped the jazz/blues format and is playing a Hit Radio stunt.
It's airing the same 10 top 40 tunes repeatedly and has - at least
temporarily - positioned itself as "102.1 Radio Yummy."

THE QNEWS WORK BENCH - the nuts and volts report - Measure Twice cut Once.

Phone has built-in VHF / UHF transceiver

Don't use this one in Australia!

The Puxing PX-D03 operates as a dual-band VHF/UHF transceiver as well as
being a GSM mobile phone.

The transceiver covers 136-174MHz and 400-470MHz FM with 1,8 watts output.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

Spot the Space Station over your backyard with new NASA service

On the 12th anniversary of crews continuously living and working aboard the
International Space Station, NASA has announced a new service to help people
see the orbiting laboratory when it passes overhead.

'Spot the Station' will send an email or text message to those who sign up
for the service a few hours before they will be able to see the space station.

"It's really remarkable to see the space station fly overhead and to realize
humans built an orbital complex that can be spotted from Earth by almost
anyone looking up at just the right moment," said William Gerstenmaier,
NASA's associate administrator for human exploration and operations. "We're
accomplishing science on the space station that is helping to improve life on
Earth and paving the way for future exploration of deep space."

When the space station is visible -- typically at dawn and dusk -- it is the
brightest object in the night sky, other than the moon. On a clear night, the
station is visible as a fast moving point of light, similar in size and
brightness to the planet Venus. "Spot the Station" users will have the
options to receive alerts about morning, evening or both types of sightings.

The International Space Station's trajectory passes over more than 90 per cent
of Earth's population. The service is designed to only notify users of passes

that are high enough in the sky to be easily visible over trees, buildings and other objects on the horizon. NASA's Johnson Space Centre calculates the sighting information several times a week for more than 4,600 locations worldwide, all of which are available on "Spot the Station."

November 2 marked 12 years of continuous human habitation of the space station.

To sign up for "Spot the Station," visit:
http://spotthestation.nasa.gov

WICEN

NTARC WICEN co-ordinator Norm VK7KTN reports that thanks largely to a fine effort by VK7DC in signing on communications volunteers for the Tasmanian State Equine Endurance Championship to be held at Sassafras over the Friday night and Saturday 30 November/1 December, WICEN will be able to support the event.

Norm would be pleased to hear from any NTARC member who may be able to assist at Sassafras.

On the IARU-R1 site Greg G 0 DUB reports on HAMNET involvement in the search for a missing aircraft

HAMNET, the Amateur Radio Emergency Communications Organisation for South Africa has concluded its involvement in a cross-border Search and Rescue operation for a missing aircraft.

A South African light aircraft, on a flight from Malawi to Lanseria in South Africa, failed to make regular radio contact over Mozambique. The South African Air Rescue Control Centre (ARCC) was advised and requested to assist. HAMNET received a call from the ARCC asking for communications support between O R Tambo Airport in Johannesburg and Beira in Mozambique to assist with the co-ordination of the search efforts and the request went out to HAMNET members to form a team to travel to Beira and provide a HF communications link between the two countries using frequencies in the 30m and 20m bands.

Sadly the search for the missing plane and its occupants was unsuccessful and was scaled back. The ARCC team met with the family on Sunday and there is a possibility that through Diplomatic channels, the family will continue the search on a private basis.

The HAMNET team has now returned home and a full debrief will take place shortly. While the outcome of the search was not what anyone would like, the ability of amateur radio to deliver critical communications to where it is needed was proven again and the ARCC were very happy with the services provided.

REWIND

WHAT EVER HAPPENED TO THE PRINCIPALITY OF SEALAND

Do you remember Sealand?

That's the self-proclaimed principality that also once claimed to be a DXCC entity. Well its still there but changes are in the wind.

Amateur Radio Newsline's Cheryl Lasik, K9BIK, takes a look back into recent history:

"Sealand is a former United Kingdom anti-aircraft tower legally known as Roughs Tower. Its located in the North Sea some 7 nautical miles off the shore of Suffolk, England. In 1967 the tower was occupied by a retired army major named Paddy Roy Bates along with his family in 1967. On September 2nd of that year Major Bates declared the fort an independent sovereign state from the UK and renamed it Sealand. He went on to establish Sealand as a nation in 1975.

Sealand had its own constitution, flag, national anthem, stamps, passports and currency. There were even a few DXpeditions to Sealand. This included a operation by a group of German DX'ersin 1982 using Sealand's self proclaimed and unofficial callsign prefix of S-1-A. Later, in 2000 there was the Dutch-lead 1SLA1 operation, but neither of these was awarded DXCC status.

Now comes word that Major Bates passed away on October 9th, in a senior care home Essex England at the age of 91. This, after a long battle with Alzheimer's.

But the Sealand saga is far from over. His wife Joan is now expected to take over the rule of the self proclaimed nation. Also, with Sealand is managed by the Bates family as if it were a recognised sovereign entity, and they are its hereditary royal rulers. Bates son is known as "His Royal Highness Prince Michael." He has also been referred to as the "Prince Regent" by the Bates family since 1999. In this role, he apparently serves as Sealand's acting "Head of State" and also its "Head of Government". Also, at a micro nations conference hosted by the University of Sunderland in 2004, Sealand was represented by Michael Bates' son James, who was

referred to as "Prince Royal James".

Butr whomever takes on the leadership of Sealand,
one thing is fairly certain. Mounting a
DXpedition to Sealand in the hope of
establisghing it as a new DXCC entity, woyuld
likely be a very expensive waste of time.

For the Amateur Radio Newsline (On VK1WIA),
I'm Cheryl Lasik, K9BIK, in Zion, Illinois.

FINAL FINAL

One of the most important DXpeditions of the year is about to start.

ZL9HR will be active from the UNESCO World Heritage Campbell Island
which is 650Km south of New Zealand in the Great Southern Ocean. This
Sub-Antarctic island is sought after not only for DXCC and IOTA (OC-037)
awards but I have been informed by August HB9TZA, also for the World
Flora and Fauna radio award where the island has the reference ZLFF-019.
Please checkout www.wff44.org for details of that competition.

I am glad to report all plans are still on schedule and ZL9HR will be
active on all bands from 160m to 6m from November 28th to December 9th.
from Campbell Island. Here's hoping for mild weather and good
propagation for the event. As always please refer to the DXpeditions
website zl9hr.com for all details and latest updates.

Thanks, this is Ed VK2JI Australian Publicity Officer for ZL9HR.

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only

be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh 'and always if the news room is to read your item write in the 3rd person.

==========

WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit material and do not necessarily reflect those of the rebroadcasters, nor the National WIA, but are broadcast in the spirit in which they were submitted.

Material may be reproduced in whole or in part, in any form, a credit to WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

Amateur Radio Newsline(tm) Report 1839 - November 9 2012

Amateur Radio Newsline report number 1839 with a release date of November 9, 2012 to follow in 5-4-3-2-1.

The following is a QST. The German Space Agency nixes a ham radio mission to Mars but AMSAT-DL is not giving up on launching the probe. Also Ireland's national amateur radio society takes a stand against a proposed pan-European broadband over powerline standard and a Los Angeles radio personality says he will donate a kidney to a station engineer. Find out the details are on Amateur Radio Newsline(tm) report number 1839 coming your way right now.

HAM RADIO IN SPACE: GERMAN SPACE AGENCY REJECTS AMSAT DL MARS MISSION

Germany's space exploration plans will not support a proposed ham radio mission to the red planet. We have more in this report:

--

After five years of discussions and negotiations with the German space agency, AMSAT-DL reports that nation's space exploration group has withdrawn its support for the amateur satellite organization's plan to send a ham radio satellite to Mars. This is the so-called P 5 or Phase 5 satellite mission.

According to the AMSAT News Service, the agency advised the group that P5's mission was not financially feasible. Also that compared with the current Mars missions the scientific attraction was simply not there. You can read that as being of insufficient interest to the formal scientific research community.

The decision by the German Space Agency also affects plans for a geostationary Earth-orbiting ham radio satellite. This being the so called Phase 3 E which was to be part of the overall P 5 program. None of this is good news for amateur radio's future exploration of the final frontier.

For the Amateur Radio Newsline, I'm Burt Hicks, in Los Angeles.

--

AMSAT-DL officials sat that they are not giving up hope for these missions. They note that their organization recently had some interesting meetings in China adding that if it cannot do rocket science in Germany, that it will have to look for other countries. (ANS)

**

RADIO POLITICS: IARU REGION 3 CONFERENCE IN HO CHI MINH CITY

Delegates are likely preparing to return home from the International Amateur Radio Union Region 3 conference that was held in Ho Chi Minh City from November 5th to the 9th. This 15th triennial conference was hosted by the Vietnam Amateur Radio Club and was themed emergency communications as reflected in the frequent disasters that involve amateur radio communications.

In seeking to standardize privileges and licensing, the organizations directors have asked that consideration be given to one of their papers. This is one that explores issues facing amateur radio societies in working with their administration in the 21st century.

There were also reports from the IARU Region 1 and 2, from Region 3 member societies, Amateur Radio Direction Finding interests, the IARU Monitoring Service, along with beacon and satellite representatives. The delegates also talked about regional finances and the organizations constitution. (VK3PC)

**

RADIO LAW: IRTS ANNOUNCES OPPOSITION TO PROPOSED EUROPEAN PLT STANDARD

Ireland's Irish Radio Transmitters Society is the latest national ham radio organization to line up in opposition to a newly proposed pan-European draft digital Power Line or PLT transmission standard. Jeremy Boot, G4NJH, has more:

--

Following the news last week that the German National Society, DARC, now opposes a new pan-European draft Power Line Transmission standard, we have heard that the Irish Radio Transmitters Society, like the RSGB, also opposes the standard.

In their magazine they say that "the draft Standard accepts that the PLT devices do not, in effect, meet the essential requirements of the EMC Directive as it prescribes measures to mitigate interference by permanently or dynamically excluding frequencies in the amateur, aeronautical mobile and broadcast bands."

The IRTS Committee took the unanimous view that it would not be appropriate to support a draft Standard that sought only to protect selective sensitive frequencies in the HF spectrum without regard to the levels of interference that could be caused by the equipment concerned on the remainder of the HF spectrum.

For the Amateur radio Newsline, I'm Jeremy Boot, G4NJH, in Nottingham in the United Kingdom.

--

As previously noted here on Amateur Radio Newsline, this new standard concerns the devices that people install in their homes to run data over their house wiring. It has nothing to do with PLC or BPL data that is carried over the over company powerline networks. (GB2RS)

**

RESCUE RADIO: CANADIAN RADIO CLUB WANTS WEATHER TRANSMITTER IN MINDEN

A Canadian amateur radio club is lobbying for a new severe weather alert transmitting station in the county it serves. The Minden Times reports that on October 26th the Minden Amateur Radio Club members of the club which is one of the oldest in Haliburton County, gathered for their weekly meeting. At that time club President Dorian Young, VE3YBG, put forth the idea of getting a transmitter in Minden for the purpose of emergency weather alert situations.

One of the special guests at the gathering was Gord Maybee of Weatheradio Canada who connected the group via a conference call to Denis Paquette of Environment Canada. Paquette told the group the average amount of time it takes to get a transmitter is two years, after specifics such as scouting a location and installation are factored in.

At the meeting VE3YBG noted that there have been two weather emergencies in the past few years, one being a massive snowstorm and a the other wind storm. He noted that with Minden hosting the Pan Am Games in 2015 it would be a wonderful addition to have a weather transmitter in the area. Young added that the radio club is eager to make this happen.

Currently, the closest transmitter is in Orillia, however, members of the club argued Haliburton County does not receive adequate or timely information from that location. While there used to be a transmitter in nearby Algonquin Park that unit is no longer operational.

More is on-line at tinyurl.com/minden-weather-radio (Minden Times, Minden Amateur Radio Club)

**
RESCUE RADIO: CLARK COUNTY NEVADA DROPS HARRIS DESERT SKY RADIO SYSTEM

After two years of battling dropped calls and dead zones in the department's new radio system, Nevada's Clark County Sheriff Doug Gillespie has opted to drop the Harris Desert Sky police radio system.

On October 11th, Gillespie informed the Chief Executive Officer of Harris Corporation that his company's Desert Sky radio system cannot meet his department's needs.

Unveiled in the summer of 2010, the $42 million Desert Sky digital system is based on Harris' OpenSky digital communications technology. While Desert Sky's data capabilities have seen mixed results, the voice communication between officers is the bigger problem. Gillespie says that while things have improved in the past two years, the system still is not up to the standard for an agency whose officers talk on the radio 50,000 times every day.

The most common complaints are common among patrol officers who say the faulty system endangers their lives. In his statement Sheriff Gillespie noted that he believed that his department had given Harris every opportunity to make the system work, but it's just not reliable. The full story is on-line at tinyurl.com/DesertSkyDumped. Clark County, Nevada encompasses the city of Las Vegas and surrounding areas. (CGC, Las Vegas Review Journal)

**

INTERNATIONAL LAW: INTERNATIONAL REPLY COUPONS MAY SOON BE PASSED OUT IN THE USA

International Reply Coupons may soon be a thing of the past. At least here in the United States with word that the U.S. Postal Service has proposed doing away with them due to what it says is a very low demand.

The Postal Service says that even if it stops selling International Reply Coupons that it will continue to accept those purchased in foreign countries and presented at its U.S. facilities.

International Reply Coupons have long been a staple in the DX community used to help offset the cost of DX'ers to provide QSL cards especially from some of the words rarer DX locations. They have also been used to assist hams in nations where sending in foreign currency is not allowed. (USPS, QRZ)

**

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Cal-Net Link serving all of California.

(5 sec pause here)

**

RESCUE RADIO: HAMS SHOULD NOT SELF DEPLOY FOR HURRICANE SANDY RELIEF

The ARRL is warning hams who want to assist those regions affected by Hurricane Sandy to not self-deploy to those areas. According to the League there are many ARRL Sections involved and each has different requirements as to how they locate, credential and deploy volunteers. If a need for manpower is identified that cannot be met locally or in a given ARRL Section, its leadership may contact other ARRL Sections for

assistance. If the need is still not met, Section leadership may then contact ARRL Headquarters for the needed assistance. But the bottom line is that you not go to any devastated area unless you are specifically asked to do so. (ARRL)

**

RESCUE RADIO: UNSUNG HEROES OF THE VoIP HURRICANE NET

Some of the most important messaging during Hurricane Sandy or any other hurricane was handled by the unsung heroes of the VoIP Hurricane Net. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is here with their story:

--

They truly are the unsung heroes of ham radio that few in the hobby know about. But they do the kind of volunteer work that is needed to assist the National Weather Service and other served agencies when disaster is near. And during Hurricane Sandy their contributions were immense. Take a listen:

--

Net audio: "WB1BOX from N1OU. Seeing a dramatic increase in the amount of wires down, trees taking out transformers and powerlines here in the city of Meriden Connecticut."

--

That's the sound of the sound of the VoIP SKYWARN and Hurricane Nets. Their primary objective is to help save lives and property thru the identification and field evaluation of threatening or dangerous weather conditions. At the same time facilitate the timely gathering and dissemination of this information.

--

Net audio: "We are very concerned about Rhode Island for coastal storm surge flooding basically from the Dartmouth -New Bedford area West is our big concern coming up here. So we are going to try to do the best we can to try to get some data. A lot of those areas are going to be closed off so we are going to see what we can come up with to gather data there that I know is extremely critical."

--

The VoIP SKYWARN and Hurricane Nets operate by combining both Echolink and IRLP linked repeater networks over the Internet. This they say provides for more efficient and effective utilization of available resources while handling critical wide area communications during major severe weather events.

To learn more about the efforts of the VoIP Hurricane Net, you are invited to join the VOIP-WXNET Yahoo Group or visit voipwx.net on the

World Wide Web.

For the Amateur Radio Newsline, Im Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

More on Hurricane Sandy and ham radio relief efforts in future Amateur Radio Newsline reports. (ARNewsline)

RADIO LAW: FCC TURNS DOWN PETITION TO CHANGE RESPONSIBILITY OF CONTENT IN MESSAGE FORWARDING SYSTEMS

The FCC has denied a petition to change Part 97.219 of the Amateur Service rules filed by Rolan O. Clark, W3FDK, of Adamstown, Maryland. This regarding the responsibility of control operators in message forwarding systems for retransmitted messages that violate the Commission's rules. Amateur Radio Newsline's Heather Embee, KB3TZD, has the details:

--

In his rule making request, Rolan O. Clark, W3FDK, had asked that the phrase - quote -- "except as noted in paragraph (d) of this section, for stations participating in a message forwarding system" be removed from Section 97.219(c) and that Section 97.219(d) be removed completely.

In his filing, Clark stated that he believed that the control operator of the first forwarding station in a message forwarding system - quote -- "should have the same standing as the control operator of a repeater that inadvertently retransmits communications that violate the rules. This, because the intent to accomplish communications consisting of text and/or voice communications is the same.

Clark also claimed that Section 97.219 (d) is ambiguous as it gives no direction to the method and degree of processes and or procedures needed to define the degree of authentication. He said that it implies that there would have to be a visually obtainable copy of the suspected violation otherwise it becomes hearsay.

Clark proposed to address these differences between a message forwarding system and a repeater by conforming Section 97.219 to Section 97.205(g). Specifically, he suggested requiring that the originator of a message that is entered into a message forwarding system be the only licensee responsible for its content.

But in its November 5th ruling turning down Clark's rule change petition the FCC noted that it had considered and rejected requirements such as he proposed when it adopted the message forwarding system rules back in 1994. It went on to say that Clark's present petition did not demonstrate or even suggest that any relevant circumstances have

changed such as to merit reconsideration of this decision. As such the Commission says that Clark's current proposal does not demonstrate that revising this rule would provide the ongoing oversight of message forwarding systems that must be present. To the contrary, the regulatory agency suggests that Clark's proposal asks for an accommodation for message forwarding systems that commenter's said should not apply to these systems.

For the Amateur Radio Newsline, I'm Heather Embee, KB3TZD, in Berwyck, Pennsylvania.

--

At airtime its unknown if Clark plans to appeal the Commissions dismissal of his rule making request. (FCC)

**

RADIO PRODUCTS: NEW HT WITH GSM PHONE NOT LEGAL IN USA

A mainland China company called Puxing has announced what might be the ultimate in hand held two-way gear, but the chances are that you will never see one in the United States. At least not legally and the reason for this is simple.

The PX-D03 combines a GSM cellular telephone with a dual-band two-way radio and as a bonus can also be used as an MP3 player for your favorite tunes. And under the current FCC rules, combining a two-way radio with a cellphone makes the unit illegal to import, buy, sell or use in the U-S-A or its possessions.

According to the specifications posted on-line by one China-based mail order retailer, the PX-D03 covers 136 to174 and 400 to 470 MHz as a full dual band two-way transceiver with a total of 128 memory channels. It can be computer programmed and features what Puxing calls a human-based operational interface.

On the cellphone side, the GSM-based unit carries dual S-I-M cards, has text messaging, and a built-in front-facing camera. And if that were not all, the unit also contains an FM radio that receives the 87.5 to 108 MHz broadcast band, the afore mentioned MP3 player plus other entertainment including several games.

As being advertised, the PX-D03 comes with a 3.7v Lithium-Ion battery, a charging stand and power supply for the country the purchaser lives in; two antennas, a soft case and a remote plug in earpiece. According to one of the websites advertising the unit, the total cost is $151 shipped world-wide. (Southgate)

**

RADIO FUNDING: DX MAGAZINE ASKS HOW TO GET INCREAEED FUNDING FOR RXPEDITIONS

The current issue of DX Magazine features an article titled Dealing With the Skyrocketing Costs of DXpeditions and is is asking its readers for their ideas on how to increase the level of funding for future major DX operations

Carl Smith, N4AA, is the Editor and Publisher of the DX Magazine. He says that major DXpeditions to entities in the top ten most wanted list can cost $500,000 or more to activate. This poses a major fund raising challenge to organizers, especially with costs rising rapidly for such big ticket items as transportation, licensing, and permits.

Specific costs are documented in the article appearing in the November-December issue. Smith said that DXer's and others are invited to send their ideas to the DX Magazine, which will be reporting the results in a future issue. All suggestions are welcome, and may be either anonymous or identified by the contributor's name and call.

If you want to lend your thoughts to solving this problem please send your ideas and comments to the DXpedition Costs Survey, % Dee Logan, W1HEO, 9901 Cypress Circle, Mentor, Onio, 44060. E-mail submissions to deverelogan (at) gmail (dot) com are also welcome. (DX Magazine, Southgate)

**

NAMES IN THE NEWS: NEWSLINE'S WA6ITF TO APPEAR ON ECHOLINK NET NOV. 17

Amateur Radio Newsline producer Bill Pasternak, WA6ITF, will be the featured guest on the Saturday night, November 17th edition of the Echolink Newsline Net. The net meets every Saturday at 9 p.m. Eastern on the Dodropin conference server which is Echolink Node number 355800. According to Steve Sercrest, W8WFO, this is not the original name for the gathering. Rather, because it's been running our weekly report for such a long time that those signing in began calling it the Amateur Radio Newsline or Newsline network.

Again, you are welcome to join in the net conference at Echolink node 355800 on Saturday night, November 17th at 9 p.m. Eastern to hear Newsline's Bill Pasternak, WA6ITF, talk about numerous things in ham radio and do is best to answer your questions. Bill says he hopes to meet many of you there. (W8WFO)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

EMERGING TECHNOLOGY: MORE TESTING AT WWVB

WWVB, the 60 kHz station most often used as our nation's time and frequency standard, is continuing to test its phase modulated mode and may switch between their legacy AM mode and their new phase modulated mode in the days and weeks ahead. Stay tuned and keep listening on 60 kHz for their ongoing experiments. (CGC, WWVB)

**

EMERGING TECHNOLOGY: OZ7IGY NEXT GENERATION 6 AND 2 METER BEACONS ON THE AIR FROM DENMARK

The first two Next Generation Beacons have come to the airwaves. On October 30th the latest two OZ7IGY came to 6 and 2 meters from Slettebjerg, Denmark.

OZ7IGY is the world's oldest beacon system in the world having begun operation in the International Geophysical Year in 1957. From its start on 144 MHz it has ever since been on air continuously. Now the newest beacons can be heard on 50.46973 MHz and 144.46973 MHz respectively.

And by way of background, the Next Generation Beacon platform is open to other users and the software can easily be adapted to other modulation types and sequences. And as the new platform is frequency and time locked to GPS signals the frequency accuracy is better than 5 milli-Hertz.

More information is on the web at www.oz7igy.dk. (GB2RS)

**

RADIO IN SPACE: SPOT THE ISS SERVICE FROM NASA

A new service from NASA called Spot the Station will send you a text message when the International Space Station is within visual range of your house.

The service will only notify users if the station is easily visible above trees, buildings, and other objects. Spot the Station will calculate the station's proximity to more than 4,600 positions on Earth, updating its information several times each week.

The International Space Station is usually at peak visibility at dawn and dusk. When skies are clear, it typically appears as fast-moving point of light.

You can sign up for the service on line by visiting spotthestation.nasa.gov. (NASA, N6ZXJ)

**

HAM RADIO IN SPACE: STILL NO SIGNAL FROM F1 CUBESAT

There have still been no confirmed reception reports since the F-1 amateur radio CubeSat was deployed from the International Space Station

on 4th October. Its command team is now focusing on reception of the backup UHF transmitter on 437.485 MHz, plus or minus 10 kHz Doppler shift.

This FM beacon should transmit Morse code for 20 seconds every minute during the satellites daylight. The team would appreciate any reports of the beacon be sent by email to thuvt (at) fpt (dot) edu dot) vn. Further information on F1 can be found at www.amsat-uk.org. (Southgate)

HAM RADIO IN SPACE: FIRST TIME EVER INDIA TO ISS STUDENT CONTACT

A group of students in Gujarat, India will reach out to the stars. For the first time in that nation's history about 500 students will have a live chat with Sunita Williams, KD5PLB, the Indian-origin astronaut aboard the International Space Station, using an amateur radio station at the Science City facility in Ahmedabad.

Ravi Saxena is an Assistant Chief Secretary of the Department of Science and Technology. He says that because Williams has roots in India, it is all the more special to them.

The contact is currently slated for November 14, celebrated as Children's Day in India. To arrange this Q-S-O, India's scientific community from the state of Ahmedabad contacted NASA soon after Williams set off for her record-breaking journey in July of this year. (WIA)

ON THE AIR: THE 850 BIRTHDAY OF CHINGGIS

On the air keep an ear open for special event callsigns with a J-U-850 prefix that will be on the air November 14th to the 21st from Mongolia. This to celebrate 850th birthday emperor Chinggis Khan.

A Chinggis Khan Award will be issued free to those who make three contacts with three different event callsigns. These include JU850AA, JU850DA, JU850DN and can be made using any mode on any band. If you make contact with any of the commemorative JU850 stations please QSL via the information found for each call on QRZ.com.

By way of background, Chinggis Kahn, called in some parts of the world as Genghis Khan, came to power by uniting many of the nomadic tribes of Northeast Asia. In the year 1207 he was the founder and great leader of the Mongol Empire, which became the largest contiguous empire in history after his demise in 1227. (JT1CS)

DX

In DX, word that JH1AJT will be on the air from Bhutan through the 15th of November as A5A He will be active on 40 through 10 meters using

various modes. QSL via home call

ARRL Awards Branch Manager Bill Moore, NC1L, has announced that the August 2012 VU7M Lakshadweep Islands and the ZD9UW operation from Tristan Da Cunha and Gough have been approved for DXCC credit. If you worked them feel free to submit your cards for DXCC checking for these two.

R4WAA will be active from Dominican Republic November 21st to the 30th signing stroke HI7. He will be working on 40 through 10 meters and will definitely be on for the CQ World Wide DX CW Contest November 24th and 25th. QSL via home call call direct or via the bureau.

G7COD will be on the air 8Q7AK from Embudu Island in the Maldives for three weeks in February of 2013. He's expected to be operating holiday style on 30, 17 and 12 meters using CW and SSB. QSL him also via his home callsign, direct or via the bureau.

DF2WO is currently operational from Cape Verde as D-44-T-W-O. He is reported to be active on the High Frequency Bands. QSL via his home call

Lastly, SP5EAQ will be active from Tongatapu Island in the Kingdom of Tonga 26 from March 26th to April 16th as A3EAQ He will be operational on 80 through 10 meters using SSB. QSL via SP5EAQ.

(Above from various DX news sources)

THAT FINAL ITEM: A TRUE ACT OF TRUE HUMANITY

And finally this week, it isn't often that you hear a story like this, but when you do it makes one proud to be a member of the human race. Amateur Radio Newsline's Bruce Tennant, K6PZW reports:

--

Gene "Bean" Baxter is a personality of CBS Radio's KROQ-FM in Los Angeles. He has entertained L.A. audiences since 1990 alongside on-the-air partner Kevin Ryder, as part of the "Kevin and Bean" morning show team.

In addition to making a multitude of over the air friends, Bean, as he is known, has also created longstanding relationships with those inside the KROQ offices. In that vein he recently announced that he will become a kidney donor to help a longtime staffer. The recipient of Bean's generosity will be Scott Mason, N1CBS, who is the Director of Engineering for CBS radio on the West Coast, and who has been with the company in a variety of capacities since 1979.

On November 13th, the two will go to Cedars Sinai Medical Center which is one of only four hospitals in the country that have the ability to match Mason's blood type to that of Bean and give him the much needed

organ. Bean then plans to take a few weeks off from work, and expects his remaining kidney to function at about 80%.

Out of this whole process, Bean hopes that people will see how easy it is to become an organ donor. He also believes that if he recovers quickly and is back to work in a short time, it may deliver an even stronger message, changing the minds of some and raising awareness of organ donation.

This will be the second transplant for Mason, who has had kidney problems for most of his adult life. He underwent a previous transplant from a cadaver in 1999 that lasted about 10 years. He currently undergoes daily dialysis and calls Bean's decision to donate a kidney to him as a game changer. Bean Baxter calls it a no-brainer.

Wishing them both Mason and Bean a quick recovery from this upcoming and life changing surgery, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Scott Mason has been on a waiting list for a kidney, which sometimes is a six to 10 year wait, when Bean offered his kidney. For Bean Baxter, it was an educational process and a decision based on math, not emotions. He said that Mason has zero kidneys and that he has two. You can hear the full discussion with Bean Baxter and Scott Mason on Kevin and Bean audio archive at tinyurl.com/radio-kidney-donation

(RBR, KROQ Audio Archive, ARNewsline)

Propagation Forecast Bulletin #45 de K7RA:

Posted: 09 Nov 2012 07:03 AM PST
http://www.eham.net/articles/29314

Again this week solar activity retreated. Average daily sunspot
numbers declined 8.7 points to 49.7, and average daily solar flux
was down nearly 20 points to 97.2. The latest forecast (from Thursday,
November 8) shows solar flux at
105 and 110 on November 9-10, 115 on November 11-17, 110 on November
18-20, 105 and 100 on November 21-22, 105 on November 23-24, and 100
on November 25-26. Flux values then drop below 100 on November 27
through December 2.

Wellington High Student Makes an Important Call -- to Space:

Posted: 09 Nov 2012 12:31 AM PST
http://www.eham.net/articles/29313

It isn't every day that one gets to interact with an astronaut traveling
17,000 miles per hour nearly 261 miles above Earth on the International
Space Station using a ham radio. But that is just what 11 students and two
teachers from throughout Palm Beach County did on Oct. 30 at the South
Florida Science Museum when they spoke to astronaut Akihiko Hoshide.

//
Unsung Operators:

Posted: 09 Nov 2012 12:29 AM PST
http://www.eham.net/articles/29312

I was contacted by several ham operators who read your recent article
regarding Hurricane Sandy response by the Southern Regional High School
shelter workers. As always, the media fail to mention the fact that amateur
radio has been positioned in this event since the first winds kicked up and
has been positioned in the Red Cross shelters as operators 24/7. Many of us
have also lost our homes and power and sacrificed like many others, but we
continue to volunteer because the shelters have requested our presence.

SARL NEWS - SUNDAY 11 November 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEY

It is with regret that it must be announced that the keys of three radio amateurs became silent recently. They are:

That of Joachim G�ldner, zs6ahj, on November 1 at the age of 84 years.
He was an honorary life member of the Centurio Amateur Radio Club.

That of Oppie Opperman, ZS1OP, on Sunday 4 November, at the age of 83. Oppie was since 1993 a member of the SARL and the Boland Amateur Radio Club.

The 3rd one is that of Pieter Botha, ZS4PB (old man Push Button) on the 7th. Pieter moved out to his farm some time back to be with his beloved "rooi beeste" but during the past few months his health deteriorated.

Our sincerest condolences to the relatives and friends of the deceased.

(PAUSE)

IN THE NEWS TODAY:

T0DAY IS REMEMBRANCE DAY

IARU ADMINISTRATIVE COUNCIL MET IN VIETNAM

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

T0DAY IS REMEMBRANCE DAY

At approximately 05:00 on Monday, 11th November 1918, 94 years ago today, the Armistice was signed in a railway carriage of Marshall Foch's special train located in the forest at Rethondes on the western front in France. At 11:00 on this Monday the 11th November 1918, the roar of guns ceased and peace and silence finally descended on the western front, ending the First World War. It is estimated that close to 9,5 million soldiers, sailors and airmen of all sides died in the Great War.

Every second Sunday in November the SARL remembers all those who lost their lives in defence of their country in a special church service transmitted in the second half of Amateur Radio Today. The service will be first transmitted at 10:40 CAT on 11 November. The service will conducted in Afrikaans and English by Dominee Jan Kramer, ZS6JRK. Thanks to Marten, ZS6ZY, for the arrangements. All amateur radio stations are requested to observe radio silence as a mark of respect.

Clubs wishing to transmit the service on their local repeater or on HF can download the audio file from www.sarl.org.za, select Amateur Radio Today from the left hand menu and follow the links.

IARU ADMINISTRATIVE COUNCIL MEET IN VIETNAM

The Administrative Council of the International Amateur Radio Union held its Annual Meeting November 2-4 November in Ho Chi Minh City, Vietnam. The AC -- which consists of the three IARU International Officers and two representatives from each of the three IARU regional organizations -- is responsible for the policy and management of the IARU.

According to IARU Secretary Rod Stafford, W6ROD, the meeting was a somber occasion due to the passing of IARU Region 3 Chairman Michael J. Owen, VK3KI. Michael had been a member of the Administrative Council for most of its existence, and had been a longtime contributor to the efforts of IARU to promote and preserve Amateur Radio.

The Administrative Council acted on the following items:

The Council reviewed the successes achieved at the 2012 World Radio Communication Conference including the new secondary allocation at 472-479 kHz to the Amateur Radio Service, the avoidance of frequency sharing with HF radiolocation services and an agenda item for WRC-15 relating to an amateur allocation at 5 MHz.

The agenda items for WRC-15 were reviewed and initial IARU positions were formulated on the agenda items to the Amateur and Amateur-Satellite Services.

The working document that sets out the spectrum requirements of the Amateur and Amateur-Satellite Services was reviewed and updated.

The AC received the final report of the IARU 2025 Committee. Due to the current economic climate, the Committee was unable to develop a viable financial model that would permit the implementation of its proposed

new organizational structure for the IARU. The Committee did complete proposed revisions to guidelines for the election of IARU President and Vice President; these were adopted by the AC.

The consultative process for the election of IARU President and Vice President was initiated for the 2014-2019 terms of office.

The International Telecommunication Union meetings where IARU representation will be required for the coming year were identified, and plans for representation at these meetings were reviewed.

The Michael J. Owen, VK3KI, Award was established to recognize an individual or individuals that best exemplify the dedication and hard work of IARU volunteers.

The Council reviewed the work of the Committee responsible for drafting an updated handbook for experts and representatives attending meetings on behalf of the IARU. The handbook will be completed by spring 2013 and will be distributed to IARU volunteers on completion.

The theme Amateur Radio: Entering Its Second Century of Disaster Communications was adopted for the next World Amateur Radio Day, April 18, 2013.

A revised IARU website was introduced. International Secretariat staff, along with ARRL Digital Content Coordinator Magdalena Owczarska, W1MGZ, was thanked for their efforts in revising the website.

Dale E. Hughes, VK1DSH, and Colin J. Thomas, G3PSM, were selected by the AC as IARU Technical Representatives. Technical Representatives represent the IARU at ITU and other international meetings.

The budget for 2013-2015 as presented by the International Secretariat was reviewed and adopted. The budget is based upon anticipated financial contributions from IARU Regions 1, 2 and 3 to defray a portion of the expenses, in accordance with previously adopted policy.

The report of the Monitoring System Committee (MSC) was reviewed and accepted. With the establishment of the MSC, the position of Monitoring System International Coordinator is no longer required. ARRL Field Regulatory Correspondent Chuck Skolaut K0BOG, who had served as the Monitoring System International Coordinator for the last four years, was thanked for his service.

Reports of the IARU International Coordinators and Advisers were received. They are International Beacon Project Coordinator Peter Jennings, AB6WM/VE3SUN; Satellite Adviser Hans van de Groenendaal, ZS6AKV; EMC Adviser Christian Verholt, OZ8CY; International Coordinator for Emergency Communications Hans Zimmermann, F5VKP/HB9AQS, and Monitoring System International Coordinator Chuck Skolaut, K0BOG.

The next scheduled in-person meeting of the AC will be held in the vicinity of Cancun, Mexico, in September 2013, in conjunction with the IARU Region 2 Conference.

CLUB AFFILIATION

This week 2 more clubs have affiliated with the SARL. We welcome Magalies Radioamateurklub and Noord Natal Amateurradioklub This brings the total number of affiliated clubs to 30. For a complete list of affiliated clubs go to the SARL web page and click on Club Talk.

COMPETITION NEWS

The ZS4SRK Heritage Day results were published and are as follows: 1 ZS4DZ 378 2 ZS6OY 198 3 ZS6MHH 192 15 Stations entered, and if weather had not been as bad in Durban, the ZS5D team would have won! Monday, 24 September, Heritage day turned out to be very strongly windy here in Durban making it unpleasant to operate from the proposed site on top of the Bluff. This is unusual weather for this time of the year.

Another station that made an effort was ZS6OY, they operated from Rand Airport Aviation Museum. Lovely QSL cards were sent out by them to all their contacts. Please answer all the QSL's you received, it is the best gift you can give a fellow radio amateur!

The heritage site in the Eastern Free State near Ficksburg also made history. This was the first time the Sandstone Estate hosted an amateur radio station. With the permission of Wilfred Mole, Johan van Zijl, ZS4DZ, operated the station from the farm. Sandstone Estate is a world heritage site that is most known for the impressive steam locomotive collection and railway that exist on the farm. Congratulation to Johan for taking the time and then also winning the contest!

The Sasolburg Radio Club contest committee thanks everyone for their participation. Certificates to all the entrants are being prepared. The certificates for the ZS4 Sprint are also being prepared to be mailed before the end of November.

Durban Amateur Radio Club 80 Metre QSO Party.

The results of the second leg of the 80 m QSO Party: 1st, Pieter Jacobs, ZS6XT 385 points 2nd, Warren Reilly, ZS4W 315 points 3rd, Andre Le Roux, ZS1JEN 265 points

Results, 1st Leg and 2nd Leg combined for 2012: 1st Pieter Jacobs ZS6XT 815 2nd Warren Reilly ZS4W 315. 3rd Nic Dreyer ZS6NCK 310.

Congratulations to Pieter Jacobs, ZS6XT.

The Senior Scout Cedarberg Adventure will be taking place from 10 to 22 December 2012. The SARL will host the Radio Base from Matjiesrivier. Contact Riaan, ZS4PR, if you would like to become part of the base staff. For further details send e-mail to zs4pr@qsl.net.

CLUB NEWS

The new committee for the Sasolburg Radio Club is: Chairman: Riaan Greef,f ZS4PR Vice-Chairman: Erich Jannasch, ZS4VW Secretary/Treasurer: Amanda Greeff, ZR6AGS QRX, SA-QSL and Contests: Jaco Le Roux, ZS6PX

Technical manager: Ockerd Taljaard, ZS4LZ

All of the best for the team that has been elected at the recent AGM held 2012:10:13.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the spell of low solar activity was broken during the week when a new sunspot unleashed an M1.7-class flare. There are also possibilities of further flaring.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 53.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. There will also be frequent 10 m openings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 11 November - Pears HF DX contest. 17 November - SARL National Field Day will take place between 10:00 UTC on Saturday 17 November and 10:00 UTC on Sunday 18 November. 18 November - Log sheets for the RaDAR Contest to be in to Lichtenberg Amateur Radio Club (LARK), PO Box 410, Lichtenburg, 2740 or by email to zs6lrk@nwinternet.za.org.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 UTC on 4 895 kHz ((A new time and frequency!). Reception reports are invited. We are particularly interested in reports of the 4 895 kHz transmission on Mondays at 18:30 UTC as the frequency is close to the proposed new amateur allocation near 5 MHz. Reception reports from all areas in South Africa would be useful in our bid to ICASA for frequencies pilot studies. Send reports to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

Radio Club Recreates Historical Chess Match:

Posted: 09 Nov 2012 04:28 PM PST
http://www.eham.net/articles/29315

The world is at the fingertips of students, only one click of the mouse or press of the button away. But for the students of Texas A and M University in 1973, the world wasn't so close. On March 23, 1973, the chess clubs of Texas A and M and the University of Texas competed with the assistance of their campus amateur radio club. On Nov. 11, this event will be re-created with a chess match between teams from Texas A and M and the University of Tennessee with the assistance of W5AC -- A and M 's amateur radio club -- and AA4UT, the University of Tennessee's.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3A, MONACO (Update). Operators Max/ON5UR and Marc/ON8AK are now active as 3A/homecall from Monaco until November 17th. Activity will be on 80-10 meters, SSB only and with one station (possibly two) on the air. QSL via

M0URX. They now have a Web page online at:
<www.united-radio.be/united-radio/en/home>

3W, VIETNAM. Ukrainian operators Serge/UU5WW, Pavel/UU0JR and Serge/UT5JCW will be active as a 3W2J from Vung Tau between November 22-28th. Activity will be on 40-10 meters and an entry in the CQWW DX CW Contest (November 24-25th) as a Multi-Single entry. Also, they will be watching for openings 6 meters. QSL via K2PF, direct or by using the OQRS on the ClubLog Web page. All QSOs will be uploaded to LoTW after the DXpedition. They will send bureau QSLs for all QSOs in the log sometime after the DXpedition. Please DON'T SEND your QSLs to them via the Bureau. For more details and a survey on band needs, see the 3W2J Web page at: http://www.3w2j.com

4K, AZERBAIJAN. Alim, 4K6FO, will be active during the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band entry. QSL via 4K6FO (see QRZ.com).

5T, MAURITANIA. Jean, ON8RA/5T0JL, at the age of 85, will once again be active from Nouakchott starting November 16th. Activity will be on 80/40/20/15/12 meters and mainly on CW. QSL via ON8RA (see QRZ.com for new QSLing practices). ADDED NOTE: Jean will also join the 5T0SP DXpedition team between November 24th and December 10th.

5X, UGANDA (2013/Update). Members of the F6KOP team expected to be active between February 6-18th, 2013, from a location some 20 Km from Entebbe airport, have announced a callsign change. Instead of being active as 5X1C as first announced, they will now be active as 5X8C. For more details see OPDX.1081. An updated list of operators mentioned are Franck/F4AJQ (Team Leader), Seb/F5UFX (Team Leader, WebMaster), Alain/F6ENO (Team Leader), Bob/N6OX, Dave/K4SV, Michel/FM5CD, G&#65533;rard/F2JD, Uwe/DL8OBF, Francois/ON4LO,
Flo/F5CWU, Jean Jacques/F5NKX, Norbert/DJ7JC, Eric/ON7RN, Michel/F5EOT, John/F5VHQ, Jean Paul/F8BJI, Gerard/F2VX, Hans/DL1YFF, Valery/RG8K/UT7CR, Patrick/F2DX, Mike/UA9KGH, Jean-Marc/F8IXZ, Lars/DF1LON and Jean-Louis/ F5NHJ. Their pilot station will be Andre, V51B, from Namibia. Yann, F1NGP, will be their QSL Manager (100% OK Direct, ClobLog's OQRS, Bureau and LoTW). For more details and updates, see: http://www.5x2013.com

7P8, LESOTHO (Update to OPDX.1051/1077). An international team of operators will arrive in Lesotho on November 21st, and leave on December 4th. The operation will take place between November 23rd and December 3rd, using the callsign 7P8D. Activity will be on 160-10 meters using CW, SSB and RTTY with a minimum of three stations (possibly 5 stations) on the air 24/7. Suggested frequencies are in OPDX.1077. It was announced this past week on their Web that "Well all the bags are packed and we are ready to go. We are proud to welcome as a late joiner to the group Bill, VE7XS. We are very excited and looking forward to getting the show on the road." QSL ONLY direct via: LESOTHO DXPEDITION 2012, P.O. Box 29169, Sunridge Park, 6008, SOUTH AFRICA (w/2 USDs - Please no IRC as it is difficult to convert at the post office). They state, "NO BUREAU QSLS will reach us!!" A OQRS system (PayPal) will also be implemented just before the expedition. Logs

will be uploaded to LoTW within 6 months after the DXpedition has ended. For more details, visit: http://www.zs2dl.co.za/7P8D.html

A3, TONGA. Members of the Yamato Amateur Radio Club will be active from Tonga with their own individual callsign until November 15th. Operators are Shigeo/JA1JQY (A31JY), Kaoru/JA3MCA (A31MA), Kunio/JA8VE (A31VE) and Nakayama/JA1KJW (A31KJ). This is bascially the same group that operated from Bhutan in June. Activity will be on 160-10 using CW, SSB and RTTY. QSL via their home callsigns.

A5, BHUTAN (Update). By the time you read this, Zorro, JH1AJT, should be active as A5A until November 15th. OPDX was informed that before Zorro left for Bhutan, he cracked a bone in his left wrist while he was packing the equipment. This may cause some limitations to his antenna construction while in Bhutan. Activity will be on 40-10 meters but with limited spare time operations. QSL via his home callsign, direct or by the Bureau.

A641, UNITED ARAB EMIRATES. Look for special event station A641ND to be on the air to celebrate the 41st anniversary of independence (December 2nd, 1971) and National Day of the United Arab Emirates. QSL via IZ8CLM.

C5, The GAMBIA. Pedro, ON7WP/AA9HX, will be active as C5WP from The Gambia between November 11-18th. He is part of a locally managed tourist organization there. Activity will be on 40-6 meters SSB with a an IC-706 running 50 watts into dipoles or an MP1 vertical located close to the Atlantic Ocean. Suggested frequencies are: 7145, 14345, 18145, 21345, 24945 and 28445 kHz. He is planning future operations. QSL direct only via ON7WP.

D3, ANGOLA. After a two week vacation in the Maldives, Mike, UA1QV, will be heading back to work in Vila de Catoca (LOC KI00dn), about 30 km from Saurimo, the capital of the province Lunda Sul, Angola, starting November 15th. He will once again be active as D3AA until he leaves on February 15th (2013) for another vacation. Reports indicate that he is taking with him on this trip a two element 40 meter rotatable quad and a fixed two element 80 meter quad antenna. QSL via UA1QV.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
5X1EME -Uganda; 2012 Operation
TT8TT – Chad; 2012 Operation. Also, a certificate for LoTW has been approved.
VU7M – Lakshadweep Islands; August 2012 Operation
ZD9UW – Tristan Da Cunha & Gough; 2012 Operation

E5, SOUTH COOK ISLANDS (Reminder). By the time you read this, Rudi, ZL2KBR, will be active as E51KBR from Rarotonga Island (OC-013) until November 19th. Activity will be holiday style on 20-10 meters using SSB, RTTY and PSK31. QSL via ZL2KBR.

E5, SOUTH COOK ISLANDS (Reminder). By the time you read this, operators Frank/HB9BXU, Bruno/HB9ABS, Albert/HB9BZD and Peter/HB9CHX will be active as E51C, E51ABS, E51BZD and E51CHX, respectively from Aitutaki Island

(OC-083) until November 30th. Activity will be holiday style on 80-10 meters including the 30/17/12 meter bands, between 1900-1200z, using CW, SSB and PSK31. Suggested frequencies were in OPDX.1081. QSL via HB9BXU.

GU, GUERNSEY (EU-114). Dick, GU4CHY, will be active during the CQWW DX CW Contest (November 24-25th) as a Single-Op/Single-Band (10m)/High-Power entry. QSL via his home callsign, direct (preferred) or by the Bureau (long QRX).

H40 & H44, TEMOTU AND SOLOMON ISLANDS (Update). Sigi, DL7DF, will once again lead a group of operators on a 2013 DXpedition which is being called a "Two Entities DXpedition - Solomon 2013". Sigi states on his Web page that they have chosen two destinations. The first destination will be the Guadalcandal (OC-047), Solomon Islands (H44), where the team will sign H44G between March 8-25th, 2013. During the time between March 12-23rd, part of the group will be active as H40T from Nendo (OC-100), Temotu Island (H40). Activity will be on 160-6 meters using CW and SSB. They will have several stations on the air. One station on each destination will be exclusively dedicated to RTTY, PSK31 and SSTV. Their station equipment on each destination consists of 4 transceivers (3 x K2, 1 x FT857D), 3 power amplifiers, a lowband vertical for 160/80m, a deltaloop for 40, a deltaloop for 30, a Spiderbeam for 20/17/15/12/10, a 5 element Yagi for 6m, some Beverage antennas as well as some laptop computers. Operators mentioned are Manfred/DK1BT, Georg/DK7LX, Wolf/DL4WK, Reiner/ DL7KL, Sigi/DL7DF, Juergen/DL7UFN, Frank/DL7UFR, Jan/SP3CYY and Leszek/ SP3DOI. Pilot station is Bernd, DF3CB. QSL route is via DL7DF, direct or by the Bureau. For more details and updates, visit: http://www.dl7df.com/h4/index.php

IOTA NEWS.....
EU-016. Sergio, IZ3NXC, will be active as 9A/IZ3NXC from Lastovo Island (IOCA CI-051) between November 11-12th, weather permit- ting. QSL via IZ3NXC, direct, by the Bureau or LoTW. No eQSL.

OC-248. Hide, JM1LJS, plans to be active as T80W from the rare Sonsorol Islands during mid-April 2013 (possibly April 11-15th). For more details, see: http://blog.rental-shack.com/?eid"4

SA-096. (Update/NEW IOTA) Operators Cezar/VE3LYC, Johan/PA3EXX, Alex/LU5WW and possibly more Argentinian operators will be active as LU6W (pending) fom Escondida Island in the Chubut Province North IOTA Group early January 2013. Activity will be for four days using two stations. Activity will be on 40-10 meters using CW and SSB. QSL via VE3LYC, direct or by the Bureau. See their Web page below for more details. There is now a Web page available at: http://lu6w.yolasite.com

JW, SVALBARD. Operators Jorn/LA1U, Borge/LA4KQ and Olav/LA9OI will be active as JW1U, JW4KQ and JW9OI, respectively, from the JW5E club station in Longyearbyen on Spitsbergen Island (EU-026) between November 22-26th. Activity will include the CQWW DX CW Contest (November 24-25th) using the callsign JW5E as a Multi-Single entry. QSL the operator's individual

callsigns via their home callsigns and JW5E by the Bureau or direct. To see the JW5E station, visit: http://jw5e.com

KH2, GUAM. Yoshi, JK2VOC, will be active as KH2/JK2VOC from Guam (OC-026) between November 23-27th. Activity will include the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/Low-Power entry. QSL via JK2VOC direct.

KH0, MARIANA ISLANDS. Akira, JR1VAY/AH2J, is now active as AH2J/KH0 from the Saipan Rental Shack, Northern Mariana Islands (OC-086, USI NI002S, WLOTA 1333), between now and November 12th. He was expected to be in the JIDX-SSB and WAEDC RTTY Contests this past weekend. QSL via JR1VAY, by the Bureau.

LOTW UPDATE. Some may have noticed that the "Logbook of The World" (LoTW) went off-line early last week. The ARRL Letter explains, "ARRL Information Technology Manager Michael Keane, K1MK, is reporting that while Logbook of The World (LoTW) system is currently down, it is expected to be back up by 9 AM EST (1400 UTC) on Friday, November 9. 'While the system is temporarily down, radio amateurs are not able to access LoTW or upload their logs,' Keane explained. 'No data has been lost, and everyone's records are intact. We understand the problem and we are in the process of restoring service to LoTW. Since both the Logbook of The World service and the Online DXCC service are connected to the ARRL Awards System, radio amateurs are not able to access either service until the system is restored. We apologize for any inconvenience this may cause, and want to assure the amateur community that the ARRL is working diligently to restore service to these popular programs.'"

P4, ARUBA. Andy, AE6Y, will once again be active as P49Y from Aruba (SA-036) during the CQWW DX CW Contest (November 24-25th). His operating class is TBD. QSL via AE6Y or LoTW.

PJ5, ST. EUSTATIUS (Update OPDX.1085). A team of JA operators will be active as PJ5J from St. Eustatius (NA-145) between December 1-12th. Activity will be on 160-10 meters using CW, SSB and the Digital modes.

The group now has a Web page available for more details and updates
at: http://www.ndxa.net/pj5j

PT0S, ST. PETER AND ST. PAUL ROCKS (Update). Look for the PT0S team to
be active in the CQWW DX CW Contest (November 24-25th) as a Multi-Single
entry. QSL via HA7RY. For updates, visit their Web page at:
http://pt0s.com
LATEST PT0S UPDATE FROM THEIR WEB PAGE:
PT0S Team on the Rocks, One Station QRV (11-11-2012 from AA7JV)

Nov 11, 2012, St. Peter and St. Paul
"We landed on SPSP yesterday morning. After many difficulties we have
raised our main antenna and have one station operational. Spent last
night on 160 with mixed results. Local noise on the main TX antenna is
S9+10 dB and we can only work stations with signals above that. It is
like listening to the output of a switching power supply. Will try to
build RX antenna today. Conditions are too rough to build the planned
remote RX antenna. We must wait for calmer conditions to swim to the
remote rock called Cabral. We have very limited Internet access so
updates will be kept short..... AA7JV"

PY0F, FERNANDO DE NORONHA. Renner, PY7RP, will be active from Fernando
de Noronha (SA-003) between December 6-10th. He informs OPDX that he has
requested the callsign PY0FRP which is still pending. His activity will
include the ARRL 10M Contest (December 8-9th) as a Single-Op/Mixed-Mode/
Low-Power entry. Outside of the contest, he will be on 40-10 meters using
FT450D w/100w into 4 element OWA yagi and a G5RV. QSL via his home
callsign, direct or via his OQRS (see QRZ.com).

E73Y QSL INFO. It has been confirmed that Boris, E73Y, will QSL direct and by the Bureau. He also states, "I accept Bureau QSL requests with full QSO data sent to my E-mail, and that postage payment (2.00 USD) can be done by Paypal." Address and E-mail is "OK" on QRZ.com.

IRCS TO BE DISCONTINUED IN THE U.S.? It seems that the United States Postal Service (USPS) will (or try to) follow what the U.K. is going to do with IRCs. The USPS has proposed to discontinue the sale of International Reply Coupons (IRCs) due to the "low quantity demand by customers" but will "continue to exchange (redeem) international reply coupons purchased in foreign countries and presented at U.S. Post Office facilities". You can read more in the Federal Register at:

https://www.federalregister.gov/articles/2012/10/23/2012-25992/internationa
l-mailing-services-proposed-product-and-price-changes#h-13
Comments on this proposed change will be accepted through November 23rd, and can be voiced/filed at:
http://www.regulations.gov/#!submitComment;D&#65533;PS-2012-0101-0001
It has been suggested that the amateur radio operators should try to make a the case for retaining IRCs on the <usps.com> store only. IRCs are currently available at <usps.com> so there is no need to have them stocked or ordered at a local post office. It costs literally nothing to have them in the online store. If the sale of IRCs are discontinued here in the U.S., you will have to buy them from another country.

NEW QSL ROUTE. Sergey, D2HD, has selected Buzz, NI5DX, as his QSL Manager. A card must be designed and printed. Please allow 4-6 weeks for the cards to arrive from the printer. Sergey will provide Buzz with the log every week, so there will be very little wait for the cards to be processed and mailed.

NEW QSL ROUTE. Tim, M0URX, is now the QSL Manager for JX5O. Tim states, "I have now received the log. OQRS will soon be opened." For more details, especially on old QSL request, see Tim's Web page at: http://www.m0urx.com

POSTAL RATE WEB SITE. Here's a helpful site regarding Postage Rates worldwide: http://www.k4hb.com/postage.html

QSL RECEIVED VIA LoTW: NONE REPORTED THIS WEEK! See "LOTW UPDATE" above for details.

QSLS RECEIVED VIA MAIL: 1A0C, 3C6A, 5C13IG, 5C13KD, 5C13YR, 5U8NK, 7O6T, 8Q7OE, A51PN, ER1LW, J28NC, PJ5/K3TRM, RI1FJ, VP5/WA2VYA, VK9CS, VK9XS, VU7M, YY4DNN and ZD9UW

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

SILENT KEYS.....
* Marjoke (Mary), ZS5V, the XYL of Joost, ZS5S, informs OPDX that her husband became a Silent Key (SK) on October 29th after a 3 month battle with metastase malignant melanoma. He died peacefully at home.

* It has been reported that Pieter Botha, ZS4PB, at the age of 86, became a Silent Key (SK) on November 7th. ZS4PB was known for his topband activities, also widely known as "The African Cowboy", and was one of Africa's best known DXers in the last 60 years.

OPDX and its readers would like to send out our deepest sympathy to the family and friends of the above mentioned.

T6, AFGHANISTAN. Mike, KI4MRH, is now active as T6MH from Afghanistan. He tells OPDX that he expects to be there until October 2013. Activity will be on 80-10 meters (no 30m) using SSB and the Digital modes (PSK-31/ PSK-63/JT-65). He will use 100 watts (SSB) and 30 watts (Digital) into a 40 meter Inverted Vee and a 20 meter vertical. Current QSL is via eQSL. He is currently setting up an account for LoTW and has made his own QSL cards that he will be filling out and sending to E-mail and through postal service.

T8, PALAU. Ryosei, JH0IXE, will once again be active as T8CW from the "VIP Guest Hotel (Free Radio Room) on Koro Island, Palau (OC-009), between December 24th and January 6th (2013). Activity will be on 160-6 meters with operations this time mainly on the Digital modes (RTTY, PSK31, JT65A). QSL via JA0FOX. Visit his Web page at: http://jh0ixe.idou.net/t8cw

TF, ICELAND. Operators Phil/G3SWH, Tom/N3ZZ, Andrew/UA3AB, Mike/WA6O, Oskar/TF3DC, Yngvi/TF3Y and Thorvaldur/TF4M will activate the TF4M Rhombic Farm club station in Otradalur, using the callsign TF4X during the CQWW DX CW Contest (November 24-25) as a Multi-2 entry. QSL via G3SWH. For more on the TF4M station, see: http://www.tf4m.com

TJ, CAMEROON. Nicolas, F8FQX (ex-5T5SN and ex-TN5SN) is now in Yaounde (Grid JJ53SU), Cameroon, and he will be there for about 3-4 years. He is currently waiting for his permission to operate and has requested the callsign TJ3SN. No other details were provided. Stay tuned!

TX5, CLIPPERTON ISLAND (Update). Reports indicate that Lance, W7GJ, has been invited to be a 6 meter operator for the TX5Q 2013 Cordell Expedition to Clipperton Island - provided he can pay the standard personal participation fee of 6500 USDs before November 26th. He is asking the 6m community if you are interested in having Clipperton activated on 6m to please help fund his trip. Complete details are available at: http://www.bigskyspaces.com/w7gj/TX5K.htm

UNIQUE SPECIAL EVENT FROM ALASKA AND THE YUKON! "Yukon John", KL7JR, informs OPDX: "Time frame is June or July, 2013. If you were planning a trip to Alaska or the Yukon, bring the family and make a vacation out of it. Special event will be 2 or 3 days long with other operating locations available (VE8RST etc.)... spend a day or as long as you wish! Callsigns used will be KL7RST and VY1RST. Several ways to get there: fly up to (Anchorage, Juneau or Whitehorse) and rent a car, drive up, ferry up from Bellingham, WA....etc. etc. I especially need a ham with CW or digital experience (prefer PSK-31) to man his own station. There is a hotel nearby so that's another possibility. I may come up solo in a

motor home...not sure yet but could have room for someone to share expenses. One thing for sure, we will have an exciting time and I promise this will be UNIQUE!!! This could just be that mini-DXpedition you always dreamed of!!! Please pass on to anyone who may be interested. Specific details will be released later. Contact Yukon John, KL7JR if interested (kl7jrATyahoo.com)."

V8, BRUNEI (Reminder/Update). By the time you read this, members of the Gemilang Amamteur Radio Club (GEMILANG Radio) and the Mediterraneo DX Club will should be active as V84SMD from Brunei (OC-088, WLOTA 1628) until November 23rd. Activity will be on 160-6 meters, including the 30/17/12 meter bands, using CW, SSB and RTTY. There will be 23 operators with 4 to 5 stations on the air 24 hours. Team members include Norbert/ DJ7JC, Heye/DJ9RR, Andy/DL3GA, Henri/F1HRE, Gerard/F2JD, Michel/F5EOT, Jean-Luc F6BIV, Marco/HB9OCR, Gabriele/I2VGW (Co-Team Leader), Pino/I8YGZ, Fabio/IK2LTR, Dario/IT9ZZO, Paolo/IW2ETR, Marco/IZ2GNQ, Stefano/IZ5GST, Antonio/IZ8CCW (Team Leader), Karl/OE3JAG, Eric/ON7RN, UZ2HKC, Lan/V85AVE, Nizam/V85AX, Ayub/V85TX, Adhi/YB3MM, Feri/YO5OED and Ovidiu/YO9XC. QSL via IK2VUC, direct, by the bureau or the OQRS. Logs will be uploaded to LoTW 4-5 months after the activity. Further information can be found on their website at: http://www.mdxc.org/v84smd

VP8/S. SOUTH GEORGIA. Mike, GM0HCQ/MM, onboard the "Royal Research Ship James Clark Ross, is scheduled to possibly be active again as VP8SGK from King Edward Point Base station, South Georgia (AN-007), on November 18th. Activity will only be a few hours and SSB only. QSLing is only direct for all contacts. All contacts will be on e-QSL or LoTW. Full details on QSLing is available at: http://www.gm0hcq.com/qsl.htm Details about Mike and the "James Clark Ross" are avaialble at: http://www.gm0hcq.com

YN, NICARAGUA. Mike, AJ9C, will once again be active as YN2CC from Granada, Nicaragua, between November 20-29th. Activity will be on 160-6 meters using CW, SSB and RTTY. Also, Mike will be in the CQWW DX CW Contest (November 24-25th) as a Sinlge-Op/All-Band/Low-Power entry. QSL via LoTW or direct to his home callsign.

ZL9, CAMPBELL ISLAND (Press Release #10). Ed, VK2ARE, Australian publicity Officer for ZL9HR, sent out the following on November 8th: "One of the most important DX'peditions of the year is about to start.
ZL9HR will be active from the UNESCO World Heritage Campbell Island which is 650Km south of New Zealand in the Great Southern Ocean. This Sub-Antarctic island is sought after not only for DXCC and IOTA (OC-037) awards but I have been informed by August, HB9TZA, also for the World Flora and Fauna radio award where the island has the reference ZLFF-019. Please checkout <www.wff44.org> for details of that competition.
I am glad to report all plans are still on schedule and ZL9HR will be active on all bands from 160m to 6m from November 28th to December 9th from Campbell Island. Here's hoping for mild weather and good propagation for the event.
As always please refer to the DX'Pedition's website <zl9hr.com> for

all details and latest updates."

ZS7, ANTARCTICA. Adam, ZS7V, will be the new operator at the SANAE Base
(South African National Antarctic Expedition) as a Radio Technician and
Team Leader starting at the end of December 2012. Activity will not
start until the end of February 2013 once the supply ship departs for
Cape Town. He will remain at the SANAE Base until February 2014. His
activity will be SSB only. His QSL Manager is ZS1HF. Look for more details
to be posted to QRZ.com.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 11th November 2012

Silent Key : GI3GGY

We are sorry to have to report the death of one of Northern Ireland's best known radio amateurs, Jimmy Porter GI3GGY, who also held the call sign EI3JC. Jimmy grew up in Derry and lived there for most of his life, running a TV and Radio business for many years. He was first licensed 64 years ago and was one of the longest-serving RSGB newsreaders, reading the news from 1954 up to quite recently. Jimmy had three sons who are also licensed Radio Amateurs: John GI4JVP, James GI0GGY and Brendan MI0GGY.

GI3GGY's station included a massive log-periodic antenna that had previously been part of the White House / Kremlin hotline system which was established at the height of the Cold War.

Mayo Rally

A reminder that next Sunday, 18th November, the Mayo Radio Experimenters Network rally takes place at the Welcome Inn in Castlebar. Doors open at 11 a.m. and the usual traders will be in attendance.

Ahead of the rally, on Saturday evening the 17th, two of Ireland's most experienced amateurs who will talk on their respective topics: Commencing at 7 p.m. Thos Caffrey EI2JD (IRTS Contest Manager) will speak on contesting and working DX. Thos is an experienced single operator and multi-operator contester and is one of Ireland's leading DXers. Not to be missed!

Following at 9 p.m. will be John Tait EI7BA. John is a leading DXer and an avid home constructor - some interesting and practical topics will be covered in this lecture.

More information, including details of special accommodation deals are on www.ei7mre.org the Mayo Radio Experimenters Network web site.

New EI DXCC award holder

Cork based radio amateur Anthony Cummins EI3GAB is the latest EI call sign holder to achieve the DXCC award. This brings the number of EI calls with the DXCC award to almost 70. See www.irts.ie/dxcc for a complete list of award holders.

Summits On The Air

Most of us will remember much of October as a wet and windy month, with few enough days when a trip to the mountains would seem attractive. However, Phil ON4TA was activating the hills of Antrim, Tyrone, Donegal and Mayo during October. Active on both HF and VHF, Phil reports that VHF contacts were few and far between but he did make an effort to use VHF and managed some 4m and 2m FM QSOs. 20 metres was by far the best band, with good contacts into Europe. He included a visit to Aranmore, off the coast of Donegal, where the somewhat rare IOTA reference combined with the equally rare "EJ" prefix brought in plenty of DX - which included Thailand on 20 metres phone, using just 25 watts to a wire dipole attached to a fishing pole.

Phil's web site at filip.rogister.eu includes plenty of interesting detail on the hills he climbed as well as those he was unable to access for a various reasons.

Standard for Power Line Telecommunications

Many of you will have heard of or read about the controversy surrounding a proposed new standard for Power line Telecommunications (PLT) devices. These devices allow computer networking and the distribution of data over house mains wiring using frequencies in the HF spectrum. To do this the devices need to use power levels in excess of those permitted by the present standard. It is probable that the amateur bands will be adequately protected by a requirement in the proposed standard to provide notches to mitigate interference to amateur, aeronautical mobile and broadcast frequencies to a level at least the same as that in the existing standard. Outside these frequencies, interference levels from PLT devices are likely to be very high. The fact that interference mitigating measures are required by the proposed standard means that PLT devices will produce unacceptable levels of interference outside the 'protected' frequencies.

IRTS and some other Societies, decided that it would not be appropriate to support a standard that only sought to protect amateur, aeronautical mobile and broadcast frequencies without regard to the levels of interference that could be caused by PLT devices to the remainder of the HF spectrum. Allowing in unacceptable levels of interference anywhere in the HF spectrum now could create a demand in the future for the raising of permitted signal levels in what are now the 'protected' frequencies.

Validate Your UK Licence

If you are the holder of a UK amateur radio licence received between November 2006 and August 2007 and have not since validated your licence with Ofcom, then you should do so now. This can be done using the online licensing system at www.ofcom.org.uk/licensing/olc -see page 8 of the November issue of RadCom.

Limerick Radio Club

The next meeting of Limerick Radio Club will take place on Wednesday 14th November at 1930 in the Limerick Institute of Technology. Liam EI7DSB will give a talk on building Arduino kits.

Galway Radio Experimenters Club

Galway Radio Experimenters Club are having their AGM today, 11th November, in the Anno Santo Hotel, Salthill at 3 pm. Tom (EI3ER) will also give a short lecture and PowerPoint presentation on the Marconi Clifden station as featured on BBC Coast. Refreshments will be served afterwards.

DX News

Hardy DL8NU is QRV from Mahe in the Seychelles until 24 November. He is using the callsign S79NU and is mainly on CW. QSLs go via his home call.

Eric F6ICX is reactivating his 5R8IC callsign from Madagascar. He will be on the island of Sainte-Marie which counts as AF-090 for the Islands on the Air award.

An international team of 23 operators from 9 countries will be active from Brunei from 11 - 23 November. They will use the callsign V84SMD with seven stations on all bands 6 - 160m. QSL manager is IK2VUC.

Prefix hunters should look out for the special Mongolian prefix of JU850 during the period 14 - 21 November. The regular JT prefixes can be replaced to celebrate the 850th birthday of Genghis Khan.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Emergency Radio Service Aided by $7,000 Donation:

Posted: 11 Nov 2012 03:14 AM PST
http://www.eham.net/articles/29319

PORTER -- The Niagara County Radio Amateur Civil Emergency Service received a $7,000 donation from Waste Management, parent company of the CWM Chemical Services hazardous waste landfill here. The money came courtesy of the company's local golf tournament. Jim Callahan of Waste Management, this year's golf chairman, handed over the check that will provide the group with equipment for expanding and enhancing its services to Niagara County in the event of a disaster. "These guys are unsung heroes. They are the ones prepared to help us communicate to get through any emergency situation, when other means of communication may be down," Callahan said.

//
Death of 'Sunday' Radio Ham Jimmy Porter:

Posted: 11 Nov 2012 03:13 AM PST
http://www.eham.net/articles/29318

Tributes have been paid to local man Jimmy Porter, the licensed radio amateur best known for taping the military and RUC radio traffic on Bloody Sunday, who died on Wednesday aged 92. Campaigner John Kelly, whose brother Michael was one of 14 men murdered on January 30, 1972, told the 'SUNDAY' that the Bloody Sunday families were "very sad" to hear about Mr Porter's passing and they wish to pass on their condolences to his family. "We've always appreciated what Jimmy had contributed to the campaign over the years, especially through the army messages he recorded which become so vitally important to the inquiry's evidence," Mr Kelly said. "He also had the foresight to safeguard the material by hiding it from the British Army after many raids on his home because he knew that this material could be used in the future - and he was proved right." Jimmy Porter's love of amateur radio began when he discovered electronics aged 15, and he later become a leading radio ham and was also involved in Radio Free Derry. During the Troubles, Porter owned a television and radio shop at William Street and regularly listened in on security force radio communications after civil unrest erupted on the streets in the late 1960s.

We don't want cooking oil.

If transformer oil is toxic, the MSDS would say so.

NZART Headquarters Infoline Special Issue 35s

12 November 2012
NZART Website: www.nzart.org.nz

Amateur Digital Television Transmissions

Many of you will by now have seen the proposed application by the Wellington VHF Group for a Digital Amateur Television Repeater. Information missing from the proposal was the frequencies to be used. Many of you have also asked why has this suddenly appeared? Do we have a new frequency for an ATV repeater to replace the Channel 39 allocation? Has the Channel 39 allocation been retained?

The following background and information will, I hope, provide you with some answers.

Our old allocation for analogue television transmissions at 615.25 MHz (Channel 39) has been re-allocated in most parts of the country and will not be available in the future for amateur television use. The frequency now forms part of the new UHF digital terrestrial spectrum. We were advised in 2009 that Government decisions did not provide for Amateur digital television transmissions in the UHF bands, but there was spectrum available post digital switch-over (DSO) of VHF spectrum around 60 MHz (Channel 2). In early 2010 the licence renewal process found only three parties seeking Amateur TV repeater (analogue) licences and these were provided on a temporary basis until DSO.

You may be aware that negotiations have been underway for some time with our regulatory authority, the Ministry for Business, Innovation, and Employment’s Radio Spectrum Policy and Planning and Radio Spectrum Management Groups to evaluate some portion of the UHF spectrum for use by radio amateurs for transmitting digital television signals. These negotiations have now reached the stage where the Ministry has been advised that there are a number of interested groups around New Zealand who want to participate and the Ministry has requested evidence that we can in fact transmit digital television signals without causing interference to the holders of the adjacent spectrum.

At the time of publication in Infoline 261, the Ministry’s Radio Spectrum Management (RSM) had not allocated a transmit frequency for such a repeater. On the 7th of November, as the result of a meeting between FMTAG Secretary Doug Ingham ZL2TAR and the RSM, a frequency band from 502 MHz to 510 MHz has been chosen to allow the evaluation of amateur digital television transmissions to take place. The input

frequency of the repeater will be the same as previously used for analogue television transmissions, 431.25 MHz. However, for the spectrum compatibility tests, requested by RSM, a local ident generator will be used which will generate an output signal.

Selection of this frequency band for amateur digital television transmissions means that our “neighbours” in terms of spectrum use is the Land Mobile band extending up to 502 MHz on the lower side and the bottom channel of the Freeview Television spectrum which begins at 510 MHz on the upper side.

The application from Branch 74 is intended to prove to the RSM and adjacent spectrum users that radio amateurs in New Zealand do have the capability to successfully design, construct and operate a digital television transmitter in the band 502 to 510 MHz without producing interfering out-of-band emissions or degrading the signal to noise ratio of stations in the adjacent land mobile band. As such it will assist in developing licence conditions or other RSM requirements for future use.

The Wellington VHF Group has members with the necessary competence and technical ability to produce the UHF digital television transmitter and to conduct the trial and evaluation of emitted digital television signal. The location, in Wellington for the test transmissions, is also convenient in that those users of the land mobile spectrum who have an interest in ensuring that the amateur television transmissions will not cause interference or degradation also have their head office engineering sections in Wellington. The technical requirements for a digital television transmitter which meets the out-of-band radiation conditions of a commercial digital television licence in New Zealand is not easily achieved. A high level of output filtering is required to meet the stringent technical standard.

Branch 74’s aim is to prove that the required performance can be achieved and your Council has every confidence that this will be the outcome. So please bear with us as these trial transmissions take place. The successful outcome may permit other groups around New Zealand to go ahead with the design and construction of similar equipment.

Vaughan Henderson ZL1TGC

NZART President

Next NZART Official Broadcast is on Sunday 25th November 2012. Next HQ-Infoline e-mailed on FRIDAY 16th November 2012. Closing date for this is Thursday 15th November

GB2RS NEWS

Sunday 11th November 2012

The news headlines:

Norway gets new allocations

RSGB voting deadlines approaching

Straight Key Century Club to hold Remembrance Day event

The Norwegian P & T Authority has made changes to the Norwegian amateur licence regulations. The major changes are that permission has been given to use 472 to 479kHz with a maximum 1W EIRP. The former permission to use 493 to 510kHz has been stopped. Permission has been given to use 70.1875 to 70.2625MHz, except in the three Norwegian southwest counties of Hordaland, Rogaland and West-Agder, where there still is commercial traffic within this frequency segment. Other segments allowing 100W transmitter power and maximum 16kHz bandwidth include 70.0625 to 70.0875MHz, 70.3625 to 70.3875MHz and 70.4125 to 70.4625MHz

RSGB Members are reminded that the deadline for voting online or by post on the new governance arrangements for the Society is noon on 15 November. Votes can be cast in person at the EGM in Stratford upon Avon on 17 November. Following the EGM and a free lunch there will be a presentation on the RSGB Centenary plans and an opportunity to dip into the archives to hear about the work going on to preserve the history of the Society. If you are planning to attend the EGM, you can register your interest on the RSGB website at www.rsgb.org/egm.

Call it Veterans Day, Remembrance Day or Poppy Day, but today, November 11 holds a special place in the pantheon of annual national holidays as a time to honour all of those who have served in their countries' armed forces. At least 20 countries around the world celebrate the day. The Straight Key Century Club holds an event for 24 hours today, 11 November, to mark this day. Full details are on their website, www.skccgroup.com.

At the IARU Region 3 Conference held last week, delegates heard that at the IARU Administrative Council meeting held earlier, the Michael J Owen VK3KI Award was established to recognise an individual or individuals that best exemplify the dedication and hard work of IARU volunteers. It was further proposed at the conference by the WIA that an annual award or trophy be introduced in his name for the highest

IARU Region 3 individual operator score in the IARU HF Contest. It was warmly received and the details are to be announced later.

Last week the Logbook of The World system was out of action, although it should be back in use by the time of this news broadcast. The ARRL assure users that no data was lost and everyone's records are intact.

And now for the details of rallies and events for the coming week

Today, 11 November, the West London Radio & Electronics Show, otherwise known as the Kempton Rally, will be held at Kempton Park Racecourse, Staines Road East, Sunbury on Thames TW16 5AQ. There is free car parking and the doors open at 10am. Visitors will find trade stands, a Bring & Buy, special interest groups as well as a lecture programme. Details from Paul, M0CJX on 08451 650 351.

The Halton & District Radio Amateurs Rally will take place on 17 November at The Heath Business & Technical Park, Runcorn, Cheshire WA7 4QX. Doors open at 10.30am and admission is free. There will be trade stands and a Bring & Buy. More information from George Low, G0RLF on 01928 897 591, daytime only please.

Copyright © RSGB 2012. Not for public release before Monday 12 November 2012 except as a GB2RS broadcast. The Mayo Radio Experimenters Network Radio Rally will take place on 18 November at the Welcome Inn, Castlebar, Co Mayo. Doors open at 11am and admission is 5 per person (children are free). The usual traders will be in attendance. For those staying at the hotel for the weekend there is a Saturday evening lecture programme. IRTS Contest Manager, Thos Caffrey, EI2JD will speak on contesting and working DX and John Tait, EI7BA will have some interesting and practical topics in his lecture. More information about the rally can be found on the clubs website www.ei7mre.org.

Now for the news of special events

GB4WLR will be on air today, 11 November, as part of the Remembrance Sunday commemorations. A World War One locomotive is expected to be in steam on the West Lancashire Light Railway at Hesketh Bank. The locomotive served behind the front lines during WW1 and is named Joffre. Also taking place that day is the annual BBC Children in Need, fund raising day. QSL direct to Pam 2E1HQY or via the RSGB Bureau. More info on qrz.com.

And now the DX news compiled from 425 DX News and other sources

JH1AJT will be on the air from Bhutan until 15 November as A5A. He will be active on all bands between 10 and 40m using various modes. QSL via home callsign.

Frank Pulfer, HB9BXU and a team of Swiss amateurs will activate the island of Aitutaki, IOTA OC-083, from 12 to 30 November. This island belongs to the Cook Islands and is situated in the Polynesian Triangle of the Southern Pacific area. They plan to be active on all bands from

10m to 80m, including WARC bands, using SSB, CW and PSK31. The DXpedition is holiday-style.

Paul Evans will be active as VP9KF in Bailey's Bay, Bermuda, IOTA NA-005, from 5 to 19 November. He has been active in Bermuda twice a year since 2006 and has built up a total of almost 20,000 QSOs. QSL info is direct to his address in Tampa, Florida. See QRZ.COM for full details.

Eric, SM1TDE will be holidaying in Kenya from 5 to 22 November. He will operate CW only as 5Z4/SM1TDE on all bands from 10 to 40m. QSLs go via his home callsign and logs will also be uploaded to Logbook of the World.

Now the contest news

The WAE DX RTTY Contest finishes at 2359 tonight, 11 November. It should keep the RTTY parts of the HF bands buzzing. Everybody can work everybody on RTTY. In WAE events reports of a previously conducted contest QSOs can add significantly to your total score, so it's well worth investigating in advance of the event how they work. Using the 3.5 to 28MHz bands, the exchange is signal report and serial number.

The 432MHz UK Activity Contest takes place from 2000 to 2230UTC on 13 November. Using all modes the exchange is signal report, serial number and locator.

The following day, 14 November, it's the ever-popular 80m Club Sprint from 2000 to 2100. Using SSB the exchange is serial number and name.

Finally for this week, the weekend of 17 and 18 November sees the 2nd 1.8MHz contest take place starting at 2100UTC on the 17th and finishing at 0100 on the 18th. Using CW only, the exchange is signal report, serial number and District code.

And now the solar factual data for the period from Friday the 2nd to the 8th of November compiled by Neil Clarke, G0CAS on Friday the 9th of November.

Solar activity was mostly very low but increased to low on the 5th when a single C class solar flare took place, and moderate on the 8th when a M1 solar flare took place rather unexpectedly. Solar flux levels declined to 93 units on the

Copyright © RSGB 2012. Not for public release before Monday 12 November 2012 except as a GB2RS broadcast. 3rd but then increased every day to 104 units by the 8th. The average was 98 units. The 90 day solar flux average on the 8th was 117 units, that's three units down on last week. X-ray flux levels varied little day to day and the average was B2 units. Geomagnetic activity was quiet every day except for the 7th, when a small coronal hole disturbance took place. The Ap on the 7th was 11 units and the average was Ap 5 units. Solar wind data from the ACE spacecraft saw solar wind speeds around 300 kilometres per second until

speeds increased to 540 kilometres per second on the 7th. Particle densities were low but increased to 24 particles per cubic centimetre on the 6th. Bz showed little variation whilst the magnetic field was quiet, but fluctuations of minus and plus 12 nanoTeslas took place on the 7th during the disturbance. For an explanation of the terms used in this report, refer to page 136 of the 2013 RSGB Yearbook.

And finally the solar forecast for the coming week. This week the slightly more active side of the Sun is expected to rotate into view. Solar activity should increase to low levels most days with also a chance of moderate levels on some days. Solar flux levels should increase and be in the 120s later in the week. Geomagnetic activity is expected to be quiet every day, however later in the week a coronal hole disturbance could take place. MUFs during daylight hours at equal latitudes should be around 33MHz for the south and 30MHz for the north. Darkness hour lows should be about 9MHz. Paths this week to Japan should have a maximum usable frequency with a 50 per cent success of around 24MHz. The optimum working frequency with a 90 per cent success rate will be about 20MHz. The best time to try this path will be between 0700 and 1000 hours UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Midland Amateur Radio Society is visiting the Kempton Park Rally today. On Wednesday there's a committee meeting and training classes. Details from Norman, G8BHE, on 07808 078 003.

Wythall Radio Club is holding club net on 145.225MHz today and next Sunday. On Monday the Advanced course continues, and on Tuesday there's a committee meeting. The RSGB 80m Club Sprint SSB Contest is on Wednesday and Friday sees the shack social. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications Club is running a club net on Monday from 7pm on 144.165MHz USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR and Friday sees a club net, also on GB3FR. Contact the FELCC Information Line on 07554 362 020 for more information.

Central Radio Amateur Circle is running its Intermediate course via Skype on Tuesday. On Thursday there's a meeting at the Turf Tavern pub. Details from Martin Hallard, G1TYV, by email to radio-circle@live.co.uk.

South Birmingham Radio Society has an open meeting and rag chew on Monday. On Thursday there are training classes with Dave Murphy, G8OWL, and Friday sees shack and aerial work. Contact Don, on 01214 581 603.

Lincoln Short-Wave Club is taking part in the 432MHz UK AC on Tuesday. Wednesday sees G6COL on the air from the shack and a video night at the BSA club. The club net is on 145.375MHz from 8pm on Thursday. The Saturday surgery in the shack starts at 9am, followed by a visit to the RSGB AGM. For more information contact Pam Rose, G4STO, on 01427 788 356.

South Notts Amateur Radio Club is having a talk on JT65 HF by M0RIA on Wednesday. Saturday sees the start of the club Advanced weekend. Contact Robin, G4NDM, on 01159 372 942.

Now we return to the traditional listing in date order. On Monday 12 November Gloucester Amateur Radio & Electronics Society is operating on VHF. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday Stratford Upon Avon District Radio Society is having a surplus equipment sale hosted by John, G8HJS. Contact G0CHO, on 01608 664 488.

On Tuesday Derby & District Amateur Radio Society is holding a committee meeting. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday Loughborough & District Amateur Radio Club is holding a junk sale, hosted by Mick, M0GDW. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

Copyright © RSGB 2012. Not for public release before Monday 12 November 2012 except as a GB2RS broadcast. On Wednesday Telford & District Amateur Radio Society is holding a surplus sale, with Jim, G8UGL wielding the gavel. Contact Mike, G3JKX, on 01952 299 677.

On Friday Coventry Amateur Radio Society has a committee forum. Contact John, G8SEQ, on 07958 777 363.

On Friday Melton Mowbray Amateur Radio Society is having a talk on the work of the Leicestershire Repeater Group by Geoff, G4AFJ. For more information contact Geoff, G3STG, on 01664 480 733.

NEWS FOR THE NORTH OF ENGLAND On Monday Angel of the North Amateur Radio Club is having a talk by David Stansfield on valves and how to use them effectively. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Bolton Wireless Club is having a talk on homebrew PSUs by Glenn, G6HFF. For details, send an email to boltonwireless@gmail.com.

On Tuesday Chester & District Radio Society is holding a committee meeting. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday Halifax & District Amateur Radio Society is continuing its tests with PSK31. Contact Martin, M0GQB, on 01422 341 317.

On Tuesday Morecambe Bay Amateur Radio Society is having a talk on glass by Chris. Contact Sheila, on 07867 516 836.

On Wednesday Denby Dale Radio Club is having a night on the air from 1930 on 145.575MHz. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday Hornsea Amateur Radio Club is taking part in the 80m Sprint SSB and having an update on M1MM. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Wednesday Mid-Cheshire Amateur Radio Society is taking part in the 80m Club Sprint. Contact Peter Paul Fox, G8HAV, on 01606 553 401.

On Thursday South Manchester Radio and Computer Club is having a talk on home construction by Ged, G8RSI. Details from Ron, G3SVW, on 01619 693 999.

On Thursday Wakefield & District Radio Society is holding a committee meeting and is on the air from the shack Details from Ken, G8FSO, on 07900 563 117.

On Saturday Hornsea Amateur Radio Club 2nd 1.8MHz Comp. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Saturday Wakefield & District Radio Society continues its Intermediate course with Chris, M0KJP. Details from Bill, 2E0IPC, on 07 905 178 845.

NEWS FOR NORTHERN IRELAND We have advance notice that Mid-Ulster Amateur Radio Club will be running a Foundation course on Friday 14 and Saturday 15 December. Information on fees and how to apply is online at www.muarc.com, or contact Bertie, 2I0RGD, via email to robert.gilliland@btopenworld.com. Applications and payment must be received no later than 28 November.

Copyright © RSGB 2012. Not for public release before Monday 12 November 2012 except as a GB2RS broadcast.

NEWS FOR SCOTLAND Tonight and next Sunday West of Scotland Amateur Radio Society is having a club night with talks, quiz & raffle. On Friday there's project work & learning. Contact Sam, GM4BGS, on 07771 554 035.

On Wednesday Livingston & District Amateur Radio Society is having an operating evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday Lothians Radio Society has its President's Address by Andy, MM0FMF. Contact Alan J Masson, GM3PSP, on 0131 623 4580.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. Farnborough & District Radio Society has a CW net on Monday at 1pm on 3.570MHz, then a Top Band net on 1.995MHz at 8pm. On Wednesday there is a talk by Derek, G3HEJ. The 2m net on Friday is on 144.675MHz at 8pm. Details from Neville, G3SPD, on 01252 404 816.

Chelmsford Amateur Radio Society has a 2m net on GB3DA from 8.30 on Tuesday. There's a committee meeting at Danbury Village Hall 7.30pm on Wednesday. Contact Martyn, G1EFL, on 01245 469 008.

Now we return to the traditional listing in date order.

On Monday Braintree & District Amateur Radio Society is running a 2m club net. For more information contact John, M5AJB, on 01787 460 947.

On Monday Coulsdon Amateur Transmitting Society is having a talk on microcontrollers by Denis, M0NDJ. Details from Steve Beal, G3WZK, by email to secretary@catsradio.org.

On Monday West Kent Amateur Radio Society is having a presentation on radio control models by Darren, M0PRV. Details from Keith, G4JED, via email to westkentars@googlemail.com.

On Tuesday Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday Harwell Amateur Radio Society is having a talk on amateur radio astronomy by Brian Coleman, G4NNS. Details from Malcolm, G8NRP, on 01235 524 844.

On Tuesday Radio Society of Harrow is having an informal meeting at Rayners Lane. More information from Linda, G7RJL, on 02083 868 586.

On Tuesday South Essex Amateur Radio Society is holding its AGM. Contact Dave, G4UVJ, on 01268 697 978.

On Wednesday Chesham & District Amateur Radio Society is having a quiz night with AVRS at the White Hill Centre, Chesham. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday Darenth Valley Radio Society is on the air and having a natter night. Contact Bob, M0RAW, on 01322 663 804.

On Wednesday Fareham & District Amateur Radio Club is having an inter club quiz. More information from Derek Clarkson, G4JLP, on 01329 823 405.

On Wednesday Harwich Amateur Radio Interest Group is having a talk on extraterrestrial life by David Warrington from North Essex Astronomical Society. Details from Kevan, 2E0WMG, on 07766 543 784.

Copyright © RSGB 2012. Not for public release before Monday 12 November 2012 except as a GB2RS broadcast. On Wednesday Norfolk Amateur Radio

Club is having a talk on flexible whispering plus JT65 by Peter Richmond, M0HBL. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday Southgate Amateur Radio Club is holding a surplus sale. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Wednesday Worthing & District Amateur Radio Club is holding a discussion evening and taking part in the 80m SSB Sprint contest. Contact John, G8FMJ, on 01273 593 232.

On Thursday Bredhurst Receiving and Transmitting Society is having a talk. Details from Charles, G4VSZ, on 07982 244 788.

On Thursday Colchester Radio Amateurs Club is having an activities discussion evening. More information from Kevan, 2E0WMG, on 07766 543 784.

On Thursday Cray Valley Radio Society is having a talk on ADS-B and AIS positioning systems by Richard, G8ITB. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday Horndean & District Amateur Radio Club is having 15-minute talks by members. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday Horsham Amateur Radio Club is having a social at The White Lion Inn, Thakeham. Details are on the web at www.harc.org.uk.

On Thursday Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Contact Tim Ward, 2E0TJW, on 07810 481 182.

On Thursday Shefford & District Amateur Radio is closed. Details from John Burnett, M6JBU, on 07860 804 793.

On Thursday Sutton & Cheam Radio Society is having a talk by Gavin Nesbitt, M1BXF and Rob Chipperfield, M0VFC on the Cambs Hams DXpedition to the Isle of Mull. Details from Darren, M0PRV, on 07525 753 702.

On Thursday Vange Amateur Radio Society is having a talk. Contact Steve, G0KVZ, on 01268 552 606.

On Friday Mid-Sussex Amateur Radio Society is holding its construction contest. Contact Rob, 2E0RJA, on 01444 232 129.

On Friday Wey Valley Amateur Radio Group Club is holding its construction contest. Details on the web at www.weyvalleyarg.org.uk.

On Sunday Bromley & District Amateur Radio Society continues its Intermediate course. Details from Andy, G4WGZ, on 01689 878 089.

Copyright © RSGB 2012. Not for public release before Monday 12 November 2012 except as a GB2RS broadcast.

NEWS FOR THE SOUTH WEST Exeter Amateur Radio Society is holding HD DX Club operations in the Moose Centre on Monday at 1900. The Tuesday 2m net is on 145.575MHz at 19:45 and on Thursday it's the 4m net on

70.425MHz from 19:00. Contact Nick, 2E0NRJ, on 01363 775 756.

On Monday Riviera Amateur Radio Club is having a club night. Contact Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

On Monday Weston Super Mare Radio Society is having a natter night and Morse class. Details from Paul, G3SDH, on 01761 221 206.

On Tuesday Plymouth Radio Club is preparing for the Plymouth Radio Rally, having a natter night & putting the shack on the air. Details from Rob James, 2E0ONO, via email to Robert-james@virginmedia.com.

On Wednesday Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417 048.

On Thursday South Bristol Amateur Radio Club is having a QSL card evening. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday Swindon & District Amateur Radio Club is having a members equipment sale. Contact Den, M0ACM, on 07810 317 750.

On Friday Poole Radio Society continues its Intermediate course and is having an activity night. Contact Bill Coombes, G4ERV, by email to secretary@g4prs.org.uk.

On Friday Torbay Amateur Radio Society is having a natter night and the TARS 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES No news items have been received for Wales this week.

Not cooking oil; vegetable or animal derived oils will go rancid over
time and don't handle really high temperatures very well. Mineral oil is
much more appropriate.

> transformer oil can be toxic and is difficult to find

Traditional transformer oil contained PCBs. The new stuff doesn't.

MFJ sells 1 gallon bottles for $30.

:Issued: 2012 Nov 12 0405 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
05 - 11 November 2012

Solar activity ranged from very low to moderate levels. On 05
November, low levels were observed due to a C2 X-ray flare from a
unnumbered region around the southeast limb at 05/1839 UTC. Solar
activity remained at very low levels until 08 November when a long
duration M1 flare was observed at 08/0223 UTC from Region 1611 (N13,
L=240, class/area Eso/270 on 09 November). Associated with this
event was a Type II radio sweep (784 km/s) and a non-geoeffective
coronal mass ejection (CME) off the East limb. Also on 08 November,
a full halo backsided CME was observed in SOHO/LASCO imagery from
old Region 1598 (S12, L=111). By 09 November, solar activity
returned to low levels with a single C1 flare from Region 1604 (N08,
L=322, class/area Bx0/010 on 03 November) at 09/0151 UTC. Also on 09
November, a 12 degree long filament, centered near S16E03, erupted
at approximately 09/1230 UTC which resulted in an Earth-directed CME
first observed in SOHO/LASCO C2 imagery at 09/1524 UTC. By 10
November, multiple low level C-flares were observed including a long
duration C2 flare from Region 1608 (S20, L=286, class/area Hrx/020
on 06 November) at 10/0504 UTC. An Earth-directed CME was observed
in association with this C2 flare in STEREO A COR2 imagery at
10/0539 UTC and SOHO/LASCO C3 imagery at 10/1054 UTC. By 11
November, solar activity increased to moderate levels due to an M1
flare from Region 1614 (N15, L=193, class/area Dso/110 on 11
November) at 11/0233 UTC with an associated Type II radio sweep (659
km/s).

An enhancement of the greater than 10 MeV proton flux at
geosynchronous orbit was observed beginning at approximately 08/1400
UTC likely associated with flare activity and the associated CME
from old Region 1598. A peak enhancement of 2.4 pfu was observed at
09/0420 UTC and remained slightly enhanced through the end of the
reporting period. No event thresholds were exceeded.
```

The greater than 2 MeV electron flux at geosynchronous orbit was at normal background levels throughout the reporting period.

Geomagnetic field activity was at quiet levels until 07 November when a coronal hole high speed stream (CH HSS) moved into geoeffective position. At 06/2119 UTC, the phi component of the interplanetary magnetic field changed from positive to negative with corresponding increases in density, temperature, and speed in ACE spacecraft data indicating a solar sector boundary crossing followed by a co-rotating interaction region and CH HSS. Solar wind speed increased from approximately 300 km/s to a peak of near 525 km/s by 07/1538 UTC. Total field (Bt) reached a maximum of 14 nT at 07/0031 UTC with a maximum deflection of the Bz component southward to -12 nT at 07/0039 UTC. The geomagnetic field responded with quiet to active periods on 07 November. By 08 November, conditions returned to quiet levels and remained that way through the end of the reporting period.

Forecast of Solar and Geomagnetic Activity
12 November - 08 December 2012

Solar activity is expected to be low with a chance for M-class flares through 24 November when Region 1614 is due to rotate off the west limb. Very low to low conditions are expected from 12 November until 27 November. On 28 November, and through the end of the forecast period, very low to low conditions with a chance for M-class activity is expected with the return of old Region 1598.

There is a slight chance for a greater than 10 MeV proton event from 28 November through the end of the reporting period due possible flare activity from old Region 1598.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal levels on 12 November. Moderate to high levels are expected from 13-24 November due to CME activity and recurrence. Normal levels are expected from 25 November through 03 December. Moderate to high levels are expected from 04-06 December due to CH HSS activity. By 07 December through the end of the forecast period, normal levels are expected.

Geomagnetic field activity is expected to be unsettled to active with a chance for minor storm periods starting around mid-day on 12 November and continuing through 13 November as the 09 and 10 November CMEs are expected to become geoeffective. Unsettled levels are expected on 14 November as CME activity wanes. Mostly quiet conditions are expected from 15-18 November. Quiet to unsettled conditions are possible on 19 November due to a possible solar sector boundary crossing. From 20 November through 02 December, mostly quiet conditions are expected. On 03-04 December, a recurrent CH HSS is expected to become geoeffective causing quiet to unsettled with isolated active conditions. A return to mostly quiet conditions is expected from 05 December through the end of the forecast period.

2249. New Membership Benefit: Free QST App for iPad iPhone iPod

Newsgroup: rec.radio.amateur.misc
Date: 2012-11-12 16:47:42 UTC

There's been no PCB's in transformer oil (or anything else
sold...) since 1979. GE is still trying to clean up the Hudson
River.

>http://www.mfjenterprises.com/Product.php?productid=MFJ-21

Thank you. This is the coolant for the motor controller
we built; for an electric Miata we've named QAR. The heat
sinks have copper tubing embedded in them. We need thermal
conductivity and electrical isolation since the heat sinks are
200V apart, and are not referenced to the frame.

We tried mineral oil but the viscosity is way too high.
Fluorinert would be ideal but would likely cost more than all we
have spent to date. We're looking at DOT5 brake fluid as well.

I'm old enough that products introduced in 1979 still count as "new
stuff."

Another option is to check your local animal-feed store.

Light, food-grade mineral oil is sold as a laxative for horses and
cattle.

One online source I just checked, lists it at $22 for a two-gallon tub.

If you've got a feed store near you, it might be a significantly less
expensive source for this sort of oil - cheaper than MFJ per gallon
and you could save the (considerable) shipping cost.

Only some xfmr oil is mineral-based. I'm not sure what kind of
transformer oil MFJ is selling, and have a query in with them.

Amateur Radio Association Serves Community, Works with Local Scouts:

Posted: 11 Nov 2012 04:09 PM PST
http://www.eham.net/articles/29320

With Hurricane Sandy raging last week along the East Coast, families in California were reminded to always be prepared for an emergency. While the beach cities won't likely see a hurricane, an earthquake or a tsunami are potential threats. When the "big one" comes, it is expected that Southern California cities will be without power for several days, and emergency help may only be available via helicopter, according to reports Mayor Jeff Duclos and Mayor Pro Tem Kit Bobko shared in September after attending California emergency preparedness meetings. Luckily, one room on the corner of Pacific Coast Highway and Pier Avenue stands tall and ready to serve the community.

Mentor Guides NMSU Engineering Students As They Construct Amateur Radios:

Posted: 12 Nov 2012 04:17 PM PST
http://www.eham.net/articles/29322

LAS CRUCES -- A group of New Mexico State University electrical engineering students has succeeded in building ultra-low power radio transmitters that reach as far as Australia and New Zealand, with less than 200 milliwatts of power. Working under the leadership of faculty adviser Robert Hull, Professor Vojin G. Oklobdzija and mentor David Hassall, the group is fulfilling a senior capstone project requirement. Growing up in northern New Mexico, Hassall wanted to study engineering at NMSU after his stint in the U.S. Navy, but could not afford it. He is now achieving his goal of being part of the university community, through his work with the electrical engineering students. He and Oklobdzija met through their amateur radio activities. "I immediately recognized the potential Hassall can bring to our students with his life-long experience in electronics, as well as long career as a communication officer in the U.S. Navy," Oklobdzija said. "The most important challenge we face here is motivating our students. The reason for the lack of motivation is because the students do not see the applications and the value of the material we are teaching. "I decided to bring Hassall in and start a very challenging project with the help of a group of enthusiastic students selected for this task. With this project, we are challenging everything they have learned." Said Hassall: "All of the students were new to this. They had to obtain their Federal Communications Commission amateur radio licenses to operate the equipment. This was uncharted territory for them, but they got it done, got their radios working. All four of them built their transmitters from scratch."
Hassall's FCC-issued call sign is WA5DJJ.

Indiana ARRL Convention - Fort Wayne Hamfest & Computer Expo Nov 17 - 18, 2012

Posted: 13 Nov 2012 07:52 AM PST
http://forums.qrz.com/showthread.php?368221-Indiana-ARRL-Convention-Fort-Wayne-Hamfest-amp-Computer-Expo-Nov-17-18-2012&goto=newpost

The Allen County Amateur Radio Technical Society is pleased to host the 2012 Fort Wayne hamfest and Computer Expo on November 17 and 18. The Fort Wayne hamfest is the largest in Indiana and hosts the Indiana Section ARRL Convention all indoors at the Fort Wayne Memorial Coliseum. This year's hamfest has an added attraction of an Emergency Communications Roundup display area. ARES/RACES teams from around the state will have displays and demonstrations including two mobile command trailers.

More details, maps, speaker forums, and participating vendors can be found at ACARTS.com

Thousands of hams from Indiana and surrounding states attend each year. Hope to see you at the Fort Wayne hamfest!

Editor
---
*What is a digital edition?
*The digital edition of /QST/ is an electronic form of the journal. All
ARRL members have access to the digital edition of /QST/...a way to read
and interact with the current issue of /QST/ anytime, anywhere. Each
issue includes unique, digital-edition-only content such as video, audio

features and extra content. Members can also access the digital archive for access to previous issues.

H*ow do I access the digital edition?*
/QST/ can be read online or downloaded onto some devices. Members must have a valid ARRL website login to access this benefit. You can always find a link to the current digital edition and archives at www.arrl.org/qst <http://www.arrl.org/qst>. Apple iOS device users (iPhone, iPad and iPod touch) can also access the digital edition from a dedicated /QST/ app. The app is free in Apple's App Store <https://itunes.apple.com/us/app/qst/id531766442?mt=8>.

To login or register, go to www.arrl.org/myarrl <http://www.arrl.org/myarrl>.

Forgot password? Go to www.arrl.org/forgot-password <http://www.arrl.org/forgot-password> to reset your password.

Not a member? Join today <http://www.arrl.org/join/QDF> and get access to the current digital edition, now.

Need help? Visit the digital edition help page <http://www.arrl.org/digital-qst-faq> for frequently asked questions. Need more help? Contact Member Services by telephone 860-594-0200 or 888-277-5289 (US only) or email circulation@arrl.org <mailto:circulation@arrl.org>.

Go Green! Go Digital-Only.
You can choose to opt-out* of the mailed, print edition of /QST/ at any time. Complete our online opt-out form <http://www.arrl.org/QST-print-edition-opt-out-form>. Due to the lead time required to prepare /QST/ for mailing, you may receive one last printed issue.
* Disclaimer: Choosing to opt-out of the print edition of /QST/ is voluntary and will not result in a refund or reduction of ARRL membership dues. Any savings will be used to extend the ARRL's reach in the areas of public service, education, advocacy, technology and membership.

About this email
You are subscribed to receive monthly notification of the digital edition of /QST/. If you have an ARRL website user account, you can manage all of your e-mail preferences at www.arrl.org/myarrl <http://www.arrl.org/myarrl>.

NRA Special Event Station K7NRA

Posted: 13 Nov 2012 08:19 AM PST
http://forums.qrz.com/showthread.php?368222-NRA-Special-Event-Station-K7NRA&goto=newpost

The Yavapai Amateur Radio Club will operate a special event station November 17, 2012, in celebration of the NRA□s 141st birthday. The station will operate from the Gunsite Academy□s 2,000-acre campus north of Prescott, AZ. The special event call sign will be K7NRA, an FCC-licensed amateur radio station. It will conduct operations on the following amateur frequencies from 1500Z to 2400Z. The event will operate on 7.250, 14.050, 14.250 and 21.335 MHz. A unique NRA/Gunsite certificate will be provided to those stations contacted during the event. QSL with a 9" x 12" self-addressed, stamped envelope to:

W7YRC,

PO Box 11994

Prescott, AZ 86304

More Info can be found at www.w7yrc.org. See you on the Air

(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

5T, MAURITANIA
Jean,ON8RA, will be active as 5T0JL from Nouakchott on Nov 16. He will be part of the 5T0SP DXpedition (Nov 24-Dec 10). QSL via ON8RA.

9M2, WEST MALAYSIA
Before going to VK9 (see below) Seppo,OH1VR, and Henri,OH3JR, will be QRV as 9M2/homecalls in CW, SSB and RTTY on 160m-6m until Nov 15.
QSLs via homecalls, unfortunately only direct (SAE + IRC or 2 USD).

A3, TONGA
Mat,JA1JQY (A31JY), Sasi,JA1KJW (A31KJ), Karl,JA3MCA (A31MA), and Kuni,JA8VE (A31VE), are working in SSB, CW and RTTY on 160m-10m until Nov 15. QSLs via homecalls.

C5, GAMBIA
Pedro,ON7WP/AA9HX, is active as C5WP from Sami (Loc IK13uj) until Nov 18. Due to his QRL (installing a local tourism organization) he is only sporadically QRV from his QTH with a free view over the Atlantic.
He uses an IC706 with 50 watts, dipoles or MP1 on 40m-10m especially on 7145, 14345, 18145, 21345, 24945 and 28445 kHz.
QSL via ON7WP, unfortunately only direct, donations are welcome for:
http://www.africajeepsafari.com/

D2, ANGOLA
After a two week vacation in the Maldives, Mike,UA1QV, will be heading back to work in Vila de Catoca (LOC KI00dn) about 30 km from Saurimo.
Once again he will be active as D3AA from Nov 15 until Feb 15.
Reports indicate that he is taking with him a 2 ele 40m rotatable quad and a fixed 2 ele 80m quad antenna. QSL via UA1QV.

E5, SOUTH COOK ISLANDS, OC-013
Henrik,OZ6TL, will be active in holiday style signing E51TLA from Rarotonga (OC-013) in CW and RTTY between Nov 18 and Dec 8.

QSL via OZ6TL, LoTW.

EL, LIBERIA
the VooDoo Contest Group is active again from the capital Monrovia
for the 24th time from Nov 17-27. They plan to join the WWDX CW Contest
in the M/M category as EL2A. Outside of the contest the operators will
use their own personal callsigns Ned,AA7A (EL2ES), Roger,G3SXW (EL2A),
Fred,G4BWP (EL2WP), John,G4IRN (EL2RN), Mike,KC7V (EL2MF),
Lee,KY7M (EL2LF), and Bud,N7CW (EL2CW). Logs will be uploaded to LoTW
and ClubLog (with OQRS) as soon as possible.
QSLs for EL2WP via G5LP, all others via their homecalls.

F, FRANCE
Rodrigue,F8DFO, and Jeremy,F4DVJ, are going to activate the special
event station TM2VD until Nov 18, from Dec 7-12 and from Jan 2-4, 2013,
in memory of Robert Delrue, F3VD. Operations will take place in CW,
SSB and digital modes on 80m-10m. QSL via F8DFO.

I, ITALY
The special event station II5TNA remembers the 10th anniversary of the
death of Roberto,I5TNA, until Nov 30. QSL via IZ5JLW.
See also: http://www.ariversilia.it

JT, MONGOLIA
Mongolian HAMs are celebrating the 850th birthday of Chinggis Khan
with several special event stations using the special prefix JU850
from Nov 14-21. They have also a special award.
See: http://www.mrsf.mn/index.php?option=com_content&view=article&
id=85&Itemid=101&lang=en

P4, ARUBA, SA-036
John,W2GD, is active as P40W from Nov 18-29, incl. the WWDX CW Contest.
He will be QRV in SSB on 30m/17m/12m before and after the contest.
QSL via N2MM, LoTW.

PJ4, BONAIRE, SA-006
Kelly,N0VD, Scott,W4PA, and maybe also other OPs will show up as PJ4D
in all modes on all bands from Bonaire (SA-006, WLOTA 1279, Loc FK52nc,
WFF PAFF-024) from Nov 18 until Dec 1. PJ4D was activated during the
"New DXCC Entity Activation" with almost 36.000 QSOs in Oct 2010.
They plan to join the WWDX CW Contest as well.
QSL via W3HNK, unfortunately only direct. See also: http://www.n0vd.com
---
John,PJ4/K4BAI, Jeff,PJ4/KU8E, Paul,PJ4/K1XM, and Al,PJ4/W1FJ, will be
QRV from Ricon on Bonaire (SA-006, WLOTA 1279, WFF PAFF-024) from
Nov 20-27. Listen for PJ4A in the WWDX CW Contest.
QSLs for PJ4A, PJ4/K4BAI and PJ4/KU8E via K4BAI;
PJ4/K1XM and PJ4/W1FJ via homecalls, both unfortunately only direct.
See also: http://www.pj4g.com

PJ7, SINT MAARTEN, NA-105
Kazu,7L4XDT (PJ7XK), and Masa,JN3NFQ (PJ7I), are going to visit

Sint Maarten (NA-105) from Nov 18-24 and will be QRV with two stations
in CW, SSB and digital modes on HF and 6m.
QSLs for PJ7XK via 7L4XDT, QSLs for PJ7I via JG2BRI.
Logsearch available at ClubLog. See also: http://www.qsl.net/pj7i

PY, BRAZIL
Several Brazilian HAMs will activate the special event station ZV7O
from the FLIPORTO 2012 (Festa Literaria Internacional de Pernambuco)
on Nov 17/18. They have issued a special award as well. QSL via PY7JN.
See also: http://www.fliporto.net/fliporto2012/en/fliporto-2012 and
http://labre-pe.spaceblog.com.br/

PZ, SURINAME
Yuri,VE3DZ, will be QRV as PZ5T from Nov 20-27 and in the WWDX Contest.
He will work in CW, SSB and RTTY before and after the contest.
QSL via homecall.

SV, GREECE
All licensees in Greece are allowed to work on HF now, CW knowledge is
not necessary anymore. The current SW prefixes of the former VHF/UHF
HAMs are changed to SV while keeping the suffix, SW1XYZ is SV1XYZ then.
The J4 special callsigns will expire at the end of the year and will
not be issued anymore. Instead they will use SW prefixes, SW9C was QRV
already. One fo the last chances to work J43J (most likely on 10m)
will be during the WWDX CW Contest. QSL for J43J via DJ5JH.

TJ, CAMEROON
Nicolas,F8FQX (ex-5T5SN, ex-TN5SN), will stay in Yaounde (Loc JJ53su)
for the next three or four years. At the moment he is waiting for his
licence, he has applied for TJ3SN. Details are not known. Stay tuned!

VK9/LH, LORD HOWE ISLAND, OC-004
Seppo,VK9/OH1VR, and Henri,VK9/OH3JR, are planning to activate
Lord Howe Island (OC-004, VKFF-295, Loc QF98) in CW/SSB/RTTY on 160m-6m
from Nov 17-27, including the WWDX CW Contest.
QSLs via homecall, unfortunately only direct (SAE + IRC or 2 USD).
See: http://personal.inet.fi/private/oh3jr and http://www.oh1vr.net

YA, AFGHANISTAN
Mike,KI4MRH, is working as T6MH on 80m-10m (not on 30m) in SSB and
digital modes (PSK-31/PSK-63/JT-65) until Oct 2013. He runs 100 watts
in SSB and 30 watts in digital modes with 40m Inverted Vee and
20m vertical. Only eQSLs available at the moment but Mike wants to
create a LoTW account as well. Paper QSLs only direct via homecall.

YN, NICARAGUA
Mike,AJ9C, announced to be QRV as YN2CC from Grenada in Nicaragua
(Loc EK71au) from Nov 20-28, incl. the SOLP category of the WWDX CW.
He works in CW, SSB and RTTY (with 3 ele Quad for 6m @ 65') on 160m-6m.
QSL via homecall (QRZ.com).

STAMPS: Those who think US Dollars are too unsafe and IRCs are too expensive
should consider the use of a SASE. Stamps can be obtained from a stamp

dealer or at the following webshops: http://herrickstamp.com
http://www.arvelo.net/N2MZZ/N2MZZ-V02/nomenu-w-plum-site.html
http://www.briefmarken-schneider.ch

CW OPs wanted: Two CW op's are needed for D4C during the ARRL 10m Contest.
If you are interested please contact Fabio,I4UFH. See: http://d4c.cc

DXCC: Following DXpeditions of 2012 were approved for DXCC credit:
5X1EME, TT8TT, VU7M, ZD9UW

LoTW: After some maintenance the LoTW is now back online since Nov 9.
No data was lost.

SILENT KEYS: Frank Scotland, ZF1GC, passed away at the age of 94.
Marjoke (Mary),ZS5V, XYL of Joost,ZS5S, informs us that her husband
became a silent key on Oct 29 after a 3 month battle with cancer.
He died peacefully at home.
Pieter Botha ("The African Cowboy"),ZS4PB, passed away on November 7,
aged 86. Pieter was a Topband DXer and one of the best known African
DXers of the past 60 years.
Our condolences and sympathy are with their families and friends.
We do not want to be sad that we lost them, but grateful that we could
get to know them as a radio friend. We will always keep them in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

Nov 16 UFT-YL-CW Contest (80m)
Nov 17 South America SSB Contest
Nov 17 UFT-YL-CW Contest (40m)
Nov 17/18 RSGB 1.8 MHz Contest
Nov 17/18 LZ DX Contest
Nov 17/18 All Austrian 160m Contest 2012
Nov 18 HOT Party
Nov 24/25 CQ WWDX Contest, CW

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AF-003, ZD8, Ascension Island: Oliver,W6NV, will be QRV as ZD8W on all HF
bands from Ascension Island (WLOTA 1491) from Nov 18-30, incl. WWDX CW.
QSL only direct via W6NV.

AF-014, CT3, Madeira Archipelago: Arno,DL1CW, Ulf,DL5AXX, Frank,DL8WAA,
Uli,DJ2YA, Falk,DK7YY, Gena,UA9MA, Mike,UA9PM, and Ruslan,UA9ONJ,
plan to show up as CT9/homecalls from Santana on Madeira (AF-014,
DIP MA-001, PIP MD-001, DPRN FF-101, WFF CTFF-030, WLOTA 0053) from
Nov 20-27. They will sign CR3L in the M2 class of the WWDX CW Contest.

QSLs via homecalls, CR3L via DJ6QT.

AN-007, VP8/SG, South Georgia Islands: Like announced before Mike,GM0HCQ/mm,
is active from onboard the Royal Research Ship "James Clark Ross" from
the South Atlantic. Whilst in Antarctic and Falkland Islands waters he
uses the call VP8CMH/mm, at all other times he uses GM0HCQ/mm. The ship
will stop at the base "M" (WAP GBR-24/WFF GFF-023) at King Edward Point
on South Georgia (AN-007) on Nov 18/19. Mike hopes this will be an
overnight stop which would increase the time of being active as VP8SGK.
He works only in SSB. QSLs for all calls only direct via GM0HCQ.
See also: http://www.gm0hcq.com

EU-026, JW, Spitsbergen Island: Jorn,LA1U, Borge,LA4KQ, and Olav,LA9OI, are
going to hit the airwaves from the QTH of JW5E on Svalbard signing
JW1U (Jorn), JW4KQ (Borge) and JW9OI (Olav) from Nov 22-26.
Nevertheless they will join the WWDX CW Contest as JW5E.
Their own QSLs via homecalls. QSLs for JW5E direct (see QRZ.com).
See also: http://www.jw5e.com

NA-002, VP5, Caicos Islands: Dave,W5CW, will again be QRV from the VP5JM
"Hamlet" on Providenciales Island (NA-002, Loc FL31vs) signing VP5/W5CW
in CW and SSB on 160m-6m from Nov 20 until Dec 11. Dave's main focus
will be the upcoming WWDX CW Contest (Nov 24/25), using the call VP5CW.
On 6m he will monitor 50.125 MHz USB.
QSLs for VP5/W5CW and VP5CW only direct via W5CW.

NA-018, OX, Greenland: Henning,OZ1BII, will sign XP2I from Kangerlussuaq
(Sondrestromfjord, WLOTA 0072, WFF OZFF-006, Loc GP47pa) on Nov 17/18,
during the LZ DX CW (SOABLP). He plans to show up in CW on 80m and the
Top Band on Nov 18 around 2200 UTC and on Nov 19. QSL via OZ1BII.

NA-021, 8P, Barbados: Dave,WJ2O, will be QRV as 8P9DF mainly in Cw on the HF
bands from the Surfsong Resort on Barbados (WLOTA 0999, Loc GK03gd)
from Nov 20-28, including the WWDX CW. Before and after the contest he
prefers to work on the WARC bands. QSL via WJ2O (d).
See also: http://www.wj2o.com

NA-080, C6, Little Bahama Bank group: Bob,N4BP (C6AKQ), Tim,N4UM (C6ARU),
and Mike,K4RUM (C6AUM), want to hand out a few IOTA points from
Grand Bahama Island (WLOTA 0527, Loc FL06pm) between Nov 20 and Dec 11.
This operation includes activities during the WWDX CW, ARRL 160m and
ARRL 10m Contests. Before and after the contests Tim,C6ARU, will focus
on the digital modes (e.g. PSK31, Olivia and RTTY) and Bob,C6AKQ, will
be active in CW on 160m-6m.
QSLs for C6AKQ via N4BP (d), C6ARU via N4UM (bureau/direct) and
C6AUM via K4RUM (bureau/direct).

NA-101, J7, Dominica: Thomas,K7ZZ, is staying on Dominica again for 14 days
starting on Nov 14. Listen for J75Z on the HF bands including the
WWDX CW Contest. QSL direct via K7ZZ. Logs will be uploaded to LoTW.

NA-105, FS, St. Martin: John,FS/K9EL, and Nick,FS/K9NB, will be QRV from
St. Martin (DIFO FS-001, WLOTA 0383) in CW/SSB/RTTY on 80m-10m from

Nov 20-28, including the WWDX CW Contest. Logs will be uploaded to LoTW
and Clublog after his return home. QSLs via homecalls.
See also: http://www.k9el.com

NA-107, FM, Martinique: Dimitry,UT5UGR, is going to visit again Ducos on
Martinique (DIFO FM-001, WLOTA 1041) and plans to become active as
FM/KL7WA from Nov 19-26. He will join the WWDX CW as TO7A.
QSLs for both calls via UT5UGR (d). See also: http://www.ut5ugr.com

SA-014, PY0/S, St. Peter and St. Paul Rocks: The PT0S DXpedition announced
in last DXNL extended its stay to join the WWDX CW Contest as well.

SA-036, P4, Aruba Island: Valery,R5GA, will be QRV again from the QTH of
P49V on Aruba (WLOTA 0033, Loc FK52am) signing P4/R5GA from Nov 18-26.
He will sign P40F in the WWDX CW Contest.
QSLs for both calls via UA3DX (bureau/direct).

Flagler Students to Radio Astronauts in Space:

Posted: 13 Nov 2012 04:18 PM PST
http://www.eham.net/articles/29327

PALM COAST -- Students learning about amateur radio will get to speak to astronauts in space.
This week, Indian Trails Middle School will use an amateur radio speak to one of the astronauts orbiting Earth on the International Space Station. The school was selected based on a proposal from the Flagler Palm Coast Amateur Radio Club.

//
Chadron Man has a Passion for Ham Radio:

Posted: 13 Nov 2012 04:16 PM PST
http://www.eham.net/articles/29326

Entering Ron Cashon's favorite room in his small house on Belle Fourche St. in Kenwood can seem a bit like stepping back in time, to a point when radio shack referred not to a national chain of electronics stores but to a place where a hobbyist sat in front of lighted dials and glowing vacuum tubes, tuning in distant voices from around the world through static filled background noise. Parts of the tiny room fits that nostalgic picture perfectly. A chair pulled up to a crowded desk faces a bank of black faced radios, with dials and switches galore. Two walls are covered with certificates, some yellowing with age, attesting to participation in a variety of amateur radio activities. A couple of cabinets bulge with card files, recording the contacts Cashon has made over his 54 years as a 'ham' radio operator. But a computer set up on a small tray next to the desk, and the digital readouts on many of the radios show that not everything in Cashon's hideaway dates from an earlier era of electronic communication. And the aftermath of natural disasters like the 'super storm' called Sandy that hit the East Coast last week, Cashon believes, shows the relevance of ham radio operators and their equipment in the age of cell phone and internet communications.

//
The 11-Year Solar Cycle Continues During Prolonged Sunspot Minima:

Posted: 13 Nov 2012 04:14 PM PST
http://www.eham.net/articles/29325

Drawing on two independent ice core records, Owens et al. modeled the open solar flux back to 1610, a period that includes the Maunder Minimum, a 65-year stretch starting in 1650 when astronomers observed hardly any sunspots. They find that during this period, beryllium-10 isotope concentrations continued to oscillate following the roughly 11-year solar cycle, despite the dearth of sunspots.

NASA said that the sun emitted a mid-level solar flare on Tuesday that has the potential of causing some radio blackouts. The solar flare reached a classification of M6, which falls into the weakest flares that are still able to cause some space weather effects near Earth. According to the National Oceanic and Atmospheric Association's Space Weather Scales, this M-class flare can cause a radio blackout categorized as R2, or moderate. The sun is entering a new cycle, heading towards solar maximum, which is expected to peak in 2013. This cycle will see increased solar activity. Humans have been tracking this solar cycle continuously since it was first discovered in 1843, and it is normal for there to be many flares a day during this activity.

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

MMMonVHF Newsletter No. 1/ WEEK 46 2012

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2012-11-15
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

Hello all,
I am looking if someone is interested in a VHF dxpedition next
summer. Years ago i worked LA1EKO in the Northsea. Last years there
was no activity in the Northsea. Should be time to organize something.
Which HAMS are interested to participate in an expedition? Who can help
me with the right contacts? Looking forward to hear from you, dl8ye@web.de.
Thanks in advance
73
chris, DL8YE

Dayton Hamvention Announces DX To Be 2013 Theme

Posted: 14 Nov 2012 12:27 PM PST
http://forums.qrz.com/showthread.php?368387-Dayton-Hamvention-Announces-DX-To-Be-2013-Theme&goto=newpost

BREAKING NEWS FROM AMATEUR RADIO NEWSLINE (tm)

"DX Hamvention" Theme for Hamvention® 2013

When the Dayton Hamvention® opens May 17, 2013, at Hara Arena for its sixty-second consecutive year the theme, "DX Hamvention" will reflect an important part of ham radio, the distant contact, according to Charles Kaiser, KD8JZR, General Chairman for the event. ☐Hamvention is often an important DX destination for amateurs from all over the globe. Working DX is often a mix of magic, conditions, and the diligent application of radio theory☐, Kaiser said.

Kaiser, who served as assistant general chairman last year, noted that many attendees to return each year to Dayton to meet other hams that they have talked to on the radio. ☐The quest for that distant contact advances Amateur Radio on many levels so the Hamvention team is honoring DX in all of its forms this year!☐ Kaiser said.

Kaiser also announced that, Jim Tiderman, N8IDS, will serve as his assistant chairman for 2013. ☐He has been active in Hamvention for many years and brings a natural leadership style to the Hamvention Team. I will be asking Jim to lead many important responsibilities to enhance the event. It also very important to note our team is all volunteer and we continue to work in the spirit of collaboration,☐ Kaiser said.

A number of key vendors have already committed to returning to Hamvention® which the Dayton/Montgomery County Convention & Visitors Bureau estimates

produces an economic impact of about $4 million for Montgomery County and nearly $10 million regionally. Hamvention®, the world's largest amateur radio gathering, brings about 25,000 people to the greater Dayton area. The three-day event includes exhibits, a flea market, forums, education sessions and license exams.

For more information about Dayton Hamvention 2013 (scheduled for May 17-19), visit the website at www.hamvention.org or e-mail media@hamvention.org.

- Tap on the cover of an issue and select "Read" or "Download."
- Log in with your ARRL website username and password. If you do not have an ARRL website username and password, please register here <http://www.arrl.org/myarrl>.
- Each time you download an issue in the app, it is added to the "My QST Library" to view offline. Note: Before viewing issues offline, you must first initialize each issue online using your ARRL website login.
- To stream embedded video and audio, you must be connected to the Internet.
- This app may send anonymous usage statistics to ARRL and our service providers to help us improve QST and to better meet the needs of our members. To disable sending usage information, turn ON the "Disable Tracking" feature for the QST app in your iOS device settings. For more information, visit the Digital QST FAQ page <http://www.arrl.org/digital-qst-faq> and the ARRL Online Privacy Policy <http://www.arrl.org/online-privacy-policy>.

Using an Android or Windows Mobile Device?

<http://itunes.apple.com/us/app/qst/id531766442?mt=8> At this time, a native app is only available for Apple iOS devices. Users with Android or Windows devices can access the digital edition of QST from a web browser <http://www.nxtbook.com/fx/archives/view.php?id=4d8f3fb65736c8b1e83e4879a8b0ef57>.
The web version runs in an Internet browser on nearly any device, including desktop or laptop computers, smartphones, tablets and e-book readers.

==> + FCC DENIES ARRL PETITION TO DENY RECONROBOTICS LICENSES, BUT LIMITS DEVICES TO 100 KHZ BANDWIDTH

On November 14, the FCC issued an Order on Reconsideration dismissing a March 2010 Petition for Reconsideration filed by the ARRL that asked the Commission to deny pending Public Safety Pool license applications associated with the ReconRobotics Video and Audio Surveillance System; however, in doing so, the FCC made it clear that the devices may not exceed 100 kHz of bandwidth. The Recon Scout -- manufactured by ReconRobotics -- is a remote-controlled, maneuverable surveillance robot that transmits real-time video surveillance data that operates by FCC waiver in the 70 centimeter band. Read more here <http://www.arrl.org/news/fcc-denies-arrl-em-petition-em-to-deny-reconrobotics-licenses-but-limits-devices-to-100-khz-bandwidt>.

==> IARU: HO CHI MINH CITY HOSTS IARU REGION 3 CONFERENCE

Officials from 16 IARU Member Societies in Region 3 attended the IARU Region 3 15th Triennial Conference. Hosted by the Vietnam Amateur Radio Club, the conference took place November 5-9 in Ho Chi Minh City,

Vietnam. The delegates elected a new Region 3 leadership team, appointed regional coordinators and formed two working groups to focus on policy matters and operational and technical matters. These two groups acted on more than 60 documents and recommendations during the conference. Read more here <http://www.arrl.org/news/ho-chi-minh-city-hosts-iaru-region-3-conference>.

==> + CHECK OUT THE DECEMBER ISSUE OF QST

Between tiny tots with their eyes all aglow and Jack Frost nipping at your nose, it's good to escape from all the holiday hullabaloo and open up the latest issue of QST. Whether you're looking for a project that takes you to your workbench, fantasizing of journeys to far-away DX or even dreaming about all the new radio gear that you hope to find under the tree, the December issue of QST has it all. So relax, get out your QST, put your feet up and enjoy all that the holiday season -- and Amateur Radio -- have to offer.

Jack Morgan, KF6T, knows a thing or two about Amateur Radio contests -- especially how tired and sore your voice can be after a 48-hour SSB contest! In his article "Super Simple Digital Voice Keyer," Morgan explains how you can save your voice by using your PC's sound card, a potentiometer and an audio transformer. If you can only have one HF antenna, how do you choose the best one? QST Technical Editor Joel R. Hallas, W1ZR, attempts to demystify the age-old conundrum in his article "Vertical or Horizontal Antennas -- What's Best for You?"

In January 2009, Laura Smith was sworn in as Special Counsel at the FCC, replacing Riley Hollingsworth, K4ZDH, who had retired a few months earlier after overseeing Amateur Radio enforcement actions for several years. ARRL Regulatory Information Manager Dan Henderson, N1ND, sat down and talked with Smith in "An Interview with FCC Special Counsel Laura Smith" and found out where we stand with Amateur Radio enforcement today.

Many hams spend all year gearing up for ARRL Field Day, the most popular on-the-air operating event in all of Amateur Radio. For those hardcore Field Day aficionados, the December issue of QST is one of the most anticipated issues all year -- this is the issue with the Field Day results! This year, join ARRL Field Day Manager Dan Henderson, N1ND, as he travels through the funny pages to bring readers the annual Field Day results article. You'll also find announcements for upcoming radiosport events, such as the 2012 Straight Key Night, the 2013 RTTY Roundup and the 2013 ARRL International DX Contest (both CW and SSB).

QST Technical Editor Joel R. Hallas, W1ZR, takes a look at the Elecraft KX3 HF and 6 meter QRP transceiver in this month's Product Review. He says this radio "offers a large measure of performance and features in a compact but workable enclosure. While it's a wonderful addition to a campsite or picnic table, the KX3 can also form the basis of a competent home or mobile station with the addition of appropriate accessories."

Of course, there are the usual columns you know and have come to expect in the December QST: Amateur Radio World, Happenings, Hints & Kinks, The Doctor is In, Short Takes, Vintage Radio, How's DX? and more, including lots of new books and products, just in time for the holidays. Look for your December issue in your mailbox. QST is the official journal of the ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join, or to renew your ARRL membership, please see the ARRL web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> + DAYTON HAMVENTION ANNOUNCES DX THEME FOR 2013

Throughout its 62 years, the Dayton Hamvention® has showcased the best that Amateur Radio has to offer. Each year, a specific theme -- such as Amateur Radio clubs, global friendship or the advent of digital modes -- spotlights one of the many facets of the Amateur Radio Service. And when Hamvention opens on May 17, 2013, at Hara Arena, the 2013 theme DX Hamvention will reflect an important part of ham radio: the distant contact. "Hamvention is often an important DX destination for amateurs from all over the globe," Hamvention General Chairman Charles Kaiser, KD8JZR, explained. "Working DX is often a mix of magic, conditions and the diligent application of radio theory."

ARRL's large exhibit area at Hamvention, ARRL EXPO, has always included significant attention for on-air DX activities and the participation of many international visitors. "In addition to our many activities at ARRL EXPO -- such as hands-on kit building, forums and membership services -- we are proud to support DXers from all over the world," said ARRL Marketing Manager Bob Inderbitzen, NQ1R. "We know hams appreciate our on-site QSL card checking services and enjoy being able to drop off their cards for the ARRL Outgoing QSL Bureau. In recent years, the ARRL exhibit area has included representatives from the International Amateur Radio Union and from our partner radio societies in the UK, Germany, Japan and Qatar." Read more here <http://www.arrl.org/news/dayton-hamvention-announces-dx-theme-for-2013>.

==> + BE A STAR! ENTER THE THIRD ANNUAL ARRL VIDEO CONTEST

<http://www.arrl.org/winners> If you've ever wanted a way to show the world how exciting Amateur Radio can be, here's your chance: The ARRL is sponsoring its Third Annual Video Contest! Here's a chance to put that video camera to use: Shoot a ham radio-related video and send it our way. If your video takes first, second or third place, we'll post it on the ARRL website for everyone to see. We're looking for a few good videos (but only one per ARRL member, please) on any tasteful subject relating to Amateur Radio. Videos will be judged on overall quality and composition, and prizes will be awarded for first, second and third place. Read more here <http://www.arrl.org/news/be-a-star-enter-the-third-annual-arrl-video-contest>.

==> W1AW ANNOUNCES 2012-2013 WINTER OPERATING SCHEDULE

With the switch from Daylight Saving Time to Standard Time earlier this month, W1AW Station Manager Joe Carcia, NJ1Q, has updated the W1AW operating schedule to reflect the change the W1AW operating schedule. The standard times have not changed, but the UTC times have. Read more here <http://www.arrl.org/news/w1aw-announces-2012-2013-winter-operating-schedule> .

==> SOLAR UPDATE

Tad Cook, K7RA, reports: There is an exciting and dramatic rise in sunspot activity this week. The daily sunspot number was 188 on Monday, November 12 -- higher than it has been in more than a year. The last time the daily sunspot number was as high was on November 9, 2011, when it was 208. Prior to last November, we have to go back nine years -- November 26, 2003 -- into the previous solar cycle to find a number as high. On that date the sunspot number was 209. A coronal mass ejection (CME) on November 13 caused a geomagnetic storm on November 13-14, driving the planetary A index to 33 on November 14. Aurora was visible across Northern United States. The NOAA/USAF prediction on Wednesday, November 14 shows the solar flux at 145 on November 15-18, 140 on November 19-20, down to 135 and 125 on November 21-22, 105 on November 23-24, 100 on November 25-26, and then dropping below 100 until December 3. The predicted planetary A index is 12 on November 15, 10 on November 16-17, 8 on November 18, 5 on November 19 through December 4, and rising to 10 on December 5-8. Look for more on the ARRL website on Friday, November 16. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>.

==> + ARRL HEADQUARTERS TO CLOSE FOR THANKSGIVING HOLIDAYS

ARRL Headquarters will be closed November 22 and 23 in observance of Thanksgiving. There will be no W1AW bulletins or code practice transmissions <http://www.arrl.org/w1aw-operating-schedule> those days. The ARRL Letter <http://www.arrl.org/arrlletter/> will be published a day early on Wednesday, November 21, but there will be no ARRL Audio News <http://www.arrl.org/arrl-audio-news> on Thursday, November 22. ARRL Headquarters will reopen Monday, November 26 at 8 AM Eastern Standard Time. We wish everyone a safe and bountiful Thanksgiving holiday.

==> THIS WEEK IN RADIOSPORT

This week:

- November 16 -- NCCC Sprint; YO International PSK31 Contest
- November 17 -- CQ SA SSB Contest; Feld Hell Sprint
- November 17-18 -- LZ DX Contest; All Austrian 160 Meter Contest; RSGB 2nd 1.8 MHz Contest (CW)
- November 17-19 -- ARRL Sweepstakes Contest (SSB) <http://www.arrl.org/sweepstakes>; North American Collegiate ARC Championship (SSB)

- November 18 -- EPC PSK63 QSO Party; Homebrew and Old Time Equipment
Party
- November 19 -- Run for the Bacon QRP Contest

Next week:

- November 23 -- NCCC Sprint
- November 24-25 -- CQ WW DX Contest (CW)
- November 28 -- SKCC Sprint
- November 28-29 -- CWops Mini-CWT Test
- November 29 -- QRP ARCI Top Band Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- November 17-18 -- ARRL Indiana State Convention

NZART Headquarters Infoline Issue 262

16 November 2012

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· Top Monitoring Service Award

· FMTAG Notes

· VHF-UHF-SHF-EHF Contest News

· Dark Future for Ham Radio in EU

· ZL9HR Update

· IARU Region 3 15th Conference report Ho Chi Minh

Debby Says…We are nearing the end of the year so it's
now time for all branches to remember some very important activities and
events.

Elections will be held in March next year, therefore all branches are
urged to consider nominating someone they feel can best serve them in
their respective areas and help the growth of amateur radio and NZART
membership in future years.

I have attached a nomination form to this issue of HQ Info-line for your
convenience. Please complete this and return to me before 31 December
2012.

Remits…all branches considering forwarding a remit to the AGM
next year, a reminder that I need to receive this also before 31
December 2012.

So far we have had a good response to the membership promotion, however
if you know of anyone who is still considering joining/rejoining with
this special offer, please urge them to do so.

Talk soon…Debby ZL2DL

Top Monitoring Service Award

John Martin ZL1GWE Monitoring Service Officer, advised the recipient of
this years award goes once again to Phillip Conza ZL2TZE.

Congratulations Phillip on behalf of NZART Council and members and thanks for your continued efforts.

FMTAG NOTES FOR HQ INFOLINE 262

Proposals

Published for the information of, and seeking comments from, members.

Branch 74 Wellington VHF has applied for a Digital Amateur TV Repeater at Belmont, located at TOPO50 BQ32 570.40 396.30. RSM has chosen a transmit frequency band of 502 MHz to 510 MHz. An Engineering evaluation, in accordance with RSM PIB38, shows that there will be no interference to other stations.

Please refer to Infoline Special No 35s for background information regarding this Digital Amateur TV Repeater application – ZL1TGC

Final Recommendations to NZART Council

None this time.

Licence Renewals

FMTAG has sent Invoices, for $51.11 per licence, for repeaters owned by the following Branches:

05 Christchurch 26
Nelson

28 Whangarei 34
South Canterbury

37 Southland 38
Taumarunui

49 Westland 51
Eastern Bay of Plenty

56 Christchurch West 67 Kawerau

78 Far North 82
Southern Wairarapa

84 Bay of Islands 86
Musick Point

87 South Taranaki CARDS

Please contact FMTAG by email if the invoice has not been received: fmtag@nzart.org.nz

Payment to NZART is required before the end of November, to avoid automatic cancellation of the licences by RSM's SMART system.

Many thanks to the Branches that have already paid.

Comments and Applications

Please send your comments and suggestions on the above, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART website:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

VHF-UHF-SHF-EHF CONTEST NEWS

The Next Contest

The next contest is the Field Day Contest, all bands 50 MHz and up, on Saturday the 1st and Sunday the 2nd of December 2012. The operating times are: Saturday 1700 to 2300 NZDST and Sunday 0700 to 1300 NZDST.

The contest after that is the DX Weekend Contest, all bands 50 MHz and up, on Saturday the 2nd and Sunday the 3rd of February 2013. The operating times are: Saturday 1700 to 2300 NZDST and Sunday 0700 to 1300 NZDST.

The Contest Rules are available at:
www.vhf.org.nz/VHF-UHF-SHF-ContestRules

All contest logs should be sent, to arrive within two weeks, to:

zl2wa@clear.net.nz

with Contest Log in the subject line.

Or by post to:

Contest Manager

Wellington VHF Group

P.O. Box 12-259

Thorndon

Wellington

Please include your email address if you wish to receive the results as soon as they are available.

Dark Future for Ham Radio in EU.

Polluting Draft Standard EN50561-1:2012 Approved Despite *RSGB* opposition,

the CENELEC Working Group 11 have voted in favour of draft standard *

EN50561-1:2012* for polluting Power Line Communication apparatus.

This draft standard means the polluting radio interference from PLT devices

could be 10,000 times higher than the previous standard EN55022, ruining

people's enjoyment of radio.

Hat off for RSGB and a few other IARU R1 members who took up the fight

To achieve growth and new jobs in the EU-market shortwave will be

sacrificed.

More: http://www.rsgb.org/news/articlelinks.php?id21

Goran SM7DLK

One of the most important DX'peditions of the year is about to start. ZL9HR will be active from the UNESCO World Heritage Campbell Island which is 650Km south of New Zealand in the Great Southern Ocean. This Sub-Antartic island is sought after not only for DXCC and IOTA (OC-037) awards but I have been informed by August HB9TZA, also for the World Flora and Fauna radio award where the island has the reference ZLFF-019. Please checkout www.wff44.org for details of that competition.

I am glad to report all plans are still on schedule and ZL9HR will be active on all bands from 160m to 6m from November 28th to December 9th from Campbell Island. Here's hoping for mild weather and good propagation for the event.

As always please refer to the DX'Pedition's website zl9hr.com for all details and latest updates.

Thanks, this is Ed VK2JI Australian Publicity Officer for ZL9HR.

Housekeeping

1.. Break-In-Closing Date Reminder: Copy for the Sept/October issue of Break-In-closes on 10 Dec 2012.
2.. Copy for Break-In: Copy is welcome in most electronic formats but word.doc files are preferred. Photos and other graphics should be send as separate discrete files (*.jpg preferred); not as embedded pix in the body of the text. Please ensure that suitable descriptive captions/legends are included with your copy. All received copy will be acknowledged to confirm receipt.
Thank you for your cooperation.

Nomination form for Council Elections

International Amateur Radio Union Region 3

RELEASE

>Date: 10 November 2012

The 15th IARU Region 3 Conference,

Ho Chi Minh City, Viet Nam

The International Amateur Radio Union (IARU) Region 3, 15th Triennial Conference was held on 5 - 9 November 2012, hosted by the Vietnam Amateur Radio Club (VARC) in Ho Chi Minh City (HCMC), Viet Nam.

The Conference opened on Monday 5th November, under the shadow of the passing away of the former Chairman Michael Owen VK3KI on 22nd September 2012.

The meeting observed a minutes silence in Michael’s memory. Throughout the duration of the conference a series of photographs of Michael were placed on the top table to remember him.

The Conference was declared open by the Chairman of VARC Mr Nguyen Minh Duc 3W2REH. Local officials Mr Lee Manh Ha Vice Chairman of the HCM City People's Committee and Mr Nguyen Van Thu Deputy Manager Radio Frequency Management Department and Director of the Centre for Regional Frequency Management 2 of the Ministry of Telecommunications of Viet Nam warmly welcomed everyone to HCMC.

Mr. Tim Ellam VE6SH President of the IARU and Peter Lake ZL2AZ Chairman of Directors of Region 3 also participated in the opening ceremony. They also paid tributes to Michael Owen on behalf of the IARU, Region 3 and radio amateurs all over the world.

The conference saw participation with a record number of 16 societies in person and one by proxy. (ARRL/ ARSI/ BDARA/ CRSA/ CTARL/ HARTS/ JARL/ KARL/ MARTS/ NZART/ ORARI/ PARA/ RAST/ SARTS/ VARC/ WIA and PIARA represented by JARL. This compares with 10 member societies and 3 proxies at the 14th Regional Conference in Christchurch. Also attending were the IARU President Tim Ellam, from Region 1 President Hans Timmerman PB2T and Secretary Dennis Green ZS4BS and from Region 2 President Reinaldo Leandro YV5AM and Secretary Ramon Santoyo XE1KK.

Terry Carrell ZL3QL from New Zealand was nominated as the Conference Chairman by VARC, and accepted by the conference.

Two Working Groups were formed:

· WG1 - Policy matters that included education, training, development of amateur radio and international and regional conferences involving radio administrations

· WG2 - Operational and Technical Matters, including emergency communications, the IARU R3 Award and band plans.

In addition the Finance Committee was convened at times when all delegates were invited and available to participate.

A total of 61 documents were discussed by the Working Groups and recommendations submitted to the conference.

One of the major items for consideration was the possible increase in subscriptions, a subject that had been initiated at the last conference in Christchurch. This has engaged the attention of all societies during the past three years as the current rates of subscription payments just about balanced the expenses of the region without generating much for building up a reserve or covering inflation etc.

The conference debated this issue and recognized the need, and voted for an increase of 20% over the current IARU Region 3 subscription rates.

Two societies had submitted resolutions for increasing the number of directors from the present five to either six or seven to provide greater representation from societies, and to be able to work on the many issues that need attention. This item was discussed in detail and it was agreed by the conference to increase the number to six.

Attendance at APT/APG meetings is vital to the build-up for WRC 15, and budget has provided for the region to be adequately represented.

The conference noted that ORARI were in an advanced stage of preparations to launch an amateur satellite from a launch pad in India.

Steps will also be taken to modernize the IARU Region 3 website.

The Conference accepted a proposal from WIA to sponsor and implement an annual award in memory of the late Michael Owen, VK3KI. It is to be awarded to the highest Region 3 individual score in the annual IARU HF Contest. The WIA will fund and present a suitable trophy each year.

Consequent to the decision of conference to elect six directors the following six nominations were received and declared elected, unopposed:

· Peter Lake ZL2AZ

· Joong Guen Rhee HL1AQQ

· Shizuo Endo JE1MUI

· Geoff Atkinson VK3TL

· Wisnu Widjaja YB0AZ

· Gopal Madhavan VU2GMN

The Directors then elected Gopal Madhavan VU2GMN as their Chairman, which was endorsed by conference.

Katsumi (Ken) Yamamoto JA1CJP was returned unopposed as Secretary. The auditor was also reappointed.

Most Regional Coordinators were reappointed. The Conference appointed Onno W Purbo YC0MLC to the vacant EMC Coordinator's position due to the resignation of Chang HL3QVU. The EMR Coordinator's position remains vacant after the passing away of Keith Malcolm, VK1KM. The Directors are tasked with finding someone to do this job.

The Administrative Council of IARU met just before the Region 3 conference with Chairman Peter Lake ZL2AZ and Secretary Ken Yamamoto JA1CJP participating on behalf of Region 3, with Shizuo Endo JE1MUI also attending as an observer. The Administrative Council members also participated in the conference.

The Directors of Region 3 also met before the Region 3 conference. Most of their work was concerned with preparation for the conference. The re-elected and new Directors met after the conference, on 10 November, to prepare for the next triennium of work.

The conference was in praise of the VARC organizing committee, headed by Mr Nguyen Minh Duc 3W2REH, and the Royal Hotel Saigon, for their arrangements for meetings etc.

The conference thanked Terry Carrell ZL3QL for taking on the role of conference chairman and conducting the meetings with efficiency.

One invitation was received from ORARI to host the 16th Regional Conference of IARU Region 3 at Jogjakarta in Central Java, Indonesia in late 2015. Presentations were made by ORARI. The conference adopted the motion to hold the next conference in Indonesia.

Ken Yamamoto

Secretary, IARU Region 3

Amateur Radio Newsline(tm) Report 1840 - November 16 2012

Amateur Radio Newsline report number 1840 with a release date of November 16, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. China to revise its amateur radio service rules, French radar signals heard on several ham radio bands, Norway affirms new spectrum for its ham radio community, a rescue radio group receives a large grant to get more gear, the Dayton Hamvention announces the theme of Hamvention 2013 and a new ham radio cubesat will blink a holiday message from space on Christmas Eve. Find out the details are on Amateur Radio Newsline(tm) report number 1840 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: CHINA TO REVISE ITS AMATEUR RADIO SERVICE

Big amateur radio changes ahead for ham radio in China. Amateur Radio Newsline's Jim Meachen, ZL2BHF, reports from down-under:

--

According to word from Jim Linton, VK3PC, mandatory membership of the Chinese Radio Sports Association will likely soon be a thing of the past. This as China moves forward under soon to be announced new amateur service regulations.

For the past 30 years, only a sports organization could transmit on the amateur Radio bands. That began on the 29th of March, 1982 with the station BY1PK, at first on CW and with limited spectrum made available for ham radio operations. But this is 2012 and the old system of someone first being a member of a sport-related body before entering amateur radio no longer works and will end. Now clubs and individuals will have their own callsigns throughout the world's most populated country.

Also being considered for emergency communications is a new error-correcting low power data mode for HF radio using Chinese characters, a Software Defined Radio receiver network for noisy locations, an alarm system, VHF and UHF repeaters and overall training.

Along with the revised regulations will be a new entity called the Chinese Radio Amateur Club, that will be solely focused on amateur radio. The new group will deal with the regulations including visitor

licenses, conduct exams and licensing, create band plans, allow nation-wide mobile operation, develop emergency communications infrastructure, amateur satellites, and work with the International Amateur Radio Union.

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, in Nelson, New Zealand

--

When enacted, these revised regulations promise to bring China more in line with the rest of amateur radio service regulations world wide. As such don't be too surprised to hear many more mainland China stations on the hambands once the new rules do take effect. (VK3PC)

**

INTRUDER WATCH: HAM RADIO OPPOSED EUROPEAN PLT STANDARD APPROVED

Europe has a new Power Line Communication or PLT standard and hams on the other side of the Atlantic are not very happy. Amateur Radio Newsline's Bruce Tennant, K6PZW reports:

--

Despite opposition from the Radio Society of Great Britain and several other European national ham radio societies, the European Committee for Electrotechnical Standardization or CENELEC Working Group 11 has voted in favor of a draft standard for what ham radio operators are calling polluting Power Line Communication or PLT apparatus. According to the Radio Society of Great Britain this means the chance of radio interference from P-L-T devices could be 10,000 times higher than the previous standard and holding the potential of ruining people's enjoyment of radio.

A statement on the RSGB website says that one of the reasons why the combined voice of the amateur radio fraternity was not heeded was the absence of complaints reported to and by the national enforcement agencies. As a consequence it is imperative that interference cases are diagnosed and reported to, and pursued with, U-K telecommunications regulator Ofcom if and when they occur.

The statement goes on to note that the RSGB EMC Committee is working with other parties to enable radio amateurs to do this and to build up statistics on the status of complaints. If a significant number of people are affected the organization can then lobby for further revision to the standard. If the devices do not cause publicized problems then the protection provided by this new standard will be deemed adequate.

For the Amateur Radio Newsline, Im Bruce Tennant, K6PZW, in Los Angeles.

--

You can read the full RSGB statement at
tinyurl.com/european-PLT-approved. (Southgate)

**

INTRUDER WATCH: FRENCH RADAR ON THE HF HAM BANDS

The IARU Region 1 Monitoring Service reports that French radar is again active near and in the High Frequency ham bands. Recent reports have heard it near 7, 14, 14,259, and 21 MHz transmitting a 20 kHz wide burst system.

But that's not all. Region 1 monitors also report that taxi operators in the Russia Federation, Belarus, Ukraine and Kazakhstan are now using FM in the 28 MHz, 10 meter amateur radio band more than ever. You can read more about both these intruders on-line
tinyurl.com/10-meter-intruders (IARU-R1)

**

RESTRUCTURING: NORWAY AFFIRMS NEW SPECTRUM FOR AMATEUR RADIO OPERATIONS

Its now official. Norway has affirmed news bands for ham radio in that nation. Jeremy Boot, G4NJH, of the RSGB News reports:

--

The Norwegian Post and Telecommunications Authority has made changes to the Norwegian amateur license regulations.

The major change is that permission has been given to use 472 to 479 kHz with a maximum 1 Watt EIRP, with the former permission to use 493 to 510 kHz removed.

Permission has been given to use 70.1875 to 70.2625MHz, except in the three Norwegian southwest counties of Hordaland, Rogaland and West-Agder, where there still is commercial traffic within this frequency segment.

Other segments allowing 100W transmitter power and maximum 16kHz bandwidth include 70.0625 to 70.0875MHz, 70.3625 to 70.3875MHz and 70.4125 to 70.4625MHz.

For the Amateur Radio Newsline, Im Jeremy Boot, G4NJH, in Nottingham in the U.K.

--

The new rules in Norway are reportedly effective now. (GB2RS)

**

RESCUE RADIO: SOUTH AFRICA HAMNET AIDS IN SEARCH FOR MISSING AIRCRADT

South Africa's HAMNET, the Amateur Radio Emergency Communications Organization has concluded it's involvement in a cross-border search

and rescue operation for a missing aircraft. This after a light aircraft, on an October 28th flight from Malawi to an airport in South Africa failed to make regular radio contact over Mozambique.

Soon after the plane was reported as missing, the South African Air Rescue Control Centre was advised and requested to assist. HAMNET was called out on Monday, October 29th by the Air Rescue Control Centre to form a team to travel to the region and provide a High Frequency communications link between the two countries. Operations took place on the internationally agreed Emergency Centre of Activity frequencies using the 30 and 20 meter bands.

Unfortunately the search for the missing plane and its occupants was unsuccessful and was scaled back on Saturday November 3rd. At that point the HAMNET team stood down and has now returned home. (IARU Region 1)

**

HAM RADIO IN SPACE: FITSAT-1 SCHEDULES CHRISTMAS EVE OPTICAL TRANSMISSION

And there will be a Christmas present of sorts from ham radio in space. On December 24th which is Christmas Eve the students in Japan who built the FITSAT-1 satellite are planning to active the birds LED optical array and flash a message in Morse Code to those of us here on mother Earth.

According to JA6AVG, the students plan to start testing the optical system at the end of November. As such its Morse message beacon may well be visible from Earth with the unaided eye well before the scheduled transmission date.

FITSAT-1 is a CubeSat that was developed by students at the Fukuoka Institute of Technology in Japan. In addition to the optical transmission system the bird carries a CW beacon on 437.250 MHz and a data link on 437.445 MHz. There is also a 5.8 GHz data downlink.

Further information about the FITSAT-1 cubesat is on-line at tinyurl.com/fitsat-christmas-signal. And we will have more ham radio space related news later on in this weeks Amateur Radio Newsline report. (FITSAT-1 Team)

RESCUE RADIO: NIAGRA COUNTY NY RACES GETS $7000 GRANT

Some good news for a dedicated rescue radio group. Buffalo dot com reports that the Niagara County New York Radio Amateur Civil Emergency Service has received a $7,000 donation from Waste Management, parent company of the CWM Chemical Services.

Jim Callahan of Waste Management made the presentation of the check that will provide the group with equipment for expanding and enhancing its services to Niagara County in the event of a disaster. In doing so Callahan called the RACES hams as being the unsung heroes who are prepared to help communicate through any emergency situation, when other means of communication may be down. (Buffalo.com)

**

ENFORCEMENT: PAGER COMPANY FINE REDUCED TO $7000

The Federal Communications Commission has affirmed a $7000 monetary forfeiture order to Leetek America, Inc. a subsidiary of Lee Technology Korea. This for marketing of an unauthorized pager transmitter system. Jim Davis, W2JKD, has the details:

--

On August 25, 2008, the Enforcement Bureau's Spectrum Enforcement Division issued a Notice of Apparent Liability for Forfeiture or NAL to Leetek in the amount of $14,000. This for its apparent willful and repeated violations of Section 302(b) of the Act and Section 2.803(a) of the Rules in connection with its marketing of two models of unauthorized pager transmitter systems.

The Division's investigation into this matter was initiated by a complaint that Leetek was marketing a pager transmitter system that did not comply with the Rules and was causing interference to primary licensed operators.

Leetek responded to the NAL on September 2, 2008. In its reply, the company repeated the argument that it imported only three units of the LTK-1700CT solely for the purpose of design review and performance testing. Leetek's response also clarified information Leetek submitted to the Division in its response with respect to the LTK-1400S pager transmitter system. It asserted that it never marketed a pager transmitter system with the model number LTK-1400S. Rather that its third party website provider mistyped LTK-1400S as the model number for Leetek's authorized LTK-1400A pager transmitter system. Leetek also said that it never marketed or sold a pager transmitter system with a LTK-1400S model number. According to Leetek, the company was marketing an authorized pager transmitter system called he LTK-1400A, but its third-party website provider misprinted the model number as LTK-1400.

In rendering its final decision, the FCC says that based on the company's statements, which were made under penalty of perjury, it appears that the device mistakenly marketed on Leetek's website under

model number LTK-1400S was properly authorized. Therefore the agency finds that a reduction of the proposed forfeiture is warranted as to that model. However having considered Leetek's response to the proposed fine in light of the applicable statutory factors the FCC concludes that Leetek did willfully and repeatedly violate Section 2.803(a) of the Rules in connection with its marketing of the uncertified LTK-1700CT pager transmitter system, and is therefore liable for a forfeiture in the amount of $7,000.

Im Jim Davis, W2JKD.

--

Because this was an affirmed fine, Leetek Payment was given only fifteen calendar days after the release date of this Forfeiture Order to pay the amount in full. That period is now past. If the forfeiture was not paid within the period specified, the FCC said that the case may be referred to the U.S. Department of Justice for enforcement. (FCC)

**

RADIO LAW: EXTENSION OF HEART MONITORING DEVICE GRANTED

The FCC has granted a request by Boston Scientific Corporation to extend the existing waiver of Section 15.205 of its rules to continue tests of the company's Cognis cardiac device.

The FCC says that granting Boston Scientifics' request will permit this device to continue to use the 90 to 110 kHz frequency band while Boston Scientific completes its ongoing MultiSENSE clinical trial, begun in 2010, in which it is using the Cognis device to collect physiologic data related to patients' worsening heart failure.

The present waiver is scheduled to expire on November 17, 2012, and the extension will permit the continued manufacture and marketing of the subject devices until December 31, 2013, when the referenced clinical trial is expected to complete its enrollment. (FCC)

**

HAM HAPPENINGS: EPISODE 4 OF YOUTH IN AMATEUR RADIO PODCAST AVAILABLE

Episode 4 of the Youth in Amateur Radio Podcast is now available for download. This month's topics include getting on the air and how repeaters work. The report can be downloaded on yarphams.com or on itunes, or the producers RSS feed. As always please feel free to contact the production team with comments and suggestions. They can be reached by e-mail to Joe Andrews in care of kd0los (at) yahoo (dot) com. (KD0LOS)

**

NAMES IN THE NEWS: MICHAEL J. OWEN AWARD CREATED BY IARU

Some names in the news. A new Michael J. Owen, VK3KI, Award has been created and announced at the recently concluded IARU Region 3 Conference held in Ho Chi Minh City, Vietnam. The purpose of the award is to recognize an individual or individuals that best exemplify the dedication and hard work of International Amateur Radio Union volunteers.

At the same conference the Wireless Institute of Australia proposed that an annual award or trophy be introduced in Michael Owen's name for the highest Region 3 individual operator score in the IARU High Frequency Contest. It reported that the proposal was well received and the details are to be announced at a later date. (RSGB)

**

NAMES IN THE NEWS: G4SWX NAMED NEW RSGB VHF MANAGER

The RSGB has announced the appointment of John Regnault, G4SWX as the societies new VHF Manager. Regnault is described as an active amateur on the VHF and UHF bands, a long standing designer and home builder of VHF equipment and a contributor to the RSGB publication RadCom. He replaces David Butler, G4ASR, who took on the job temporarily following the death of Terry Stevens, G8DKS, earlier in the year. (RSGB)

**

NAMES IN THE NEWS: GREG WALDEN, W7EQI, RE-ELECTED TO CONGRESS

Congressman Greg Walden, W7EQI, who is the chairman of the House Energy and Commerce Committee's Communications Subcommittee has been re-elected by a wide margin in Oregon's second district. Walden pulled almost 70% of the vote, according to unofficial results from the Oregon Secretary of State. (Published News Reports)

**

NAMES IN THE NEWS: NEWSLINE'S WA6ITF TO APPEAR ON ECHOLINK NET NOV. 17

Amateur Radio Newsline producer Bill Pasternak, WA6ITF, will be the featured guest on the Saturday night, November 17th edition of the Echolink Newsline Net. The net meets every Saturday at 9 p.m. Eastern on the Dodropin conference server which is Echolink Node number 355800. According to Steve Sercrest, W8WFO, this is not the original name for the gathering. Rather, because it's been running our weekly report for such a long time that those signing in began calling it the Amateur Radio Newsline or Newsline network. Again, you are welcome to join in the net conference at Echolink node 355800 on Saturday night, November 17th at 9 p.m. Eastern to hear Newsline's Bill Pasternak, WA6ITF, talk about numerous things in ham radio and do is best to answer your questions. Bill says he hopes to meet many of you there. (W8WFO)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

**

EMERGING TECHNOLOGY: BOEING UNVEILS EMP DRONE

>From our technology page, it appears as if science fiction has become a military fact. This after a successful missile test has ushered in a new era of warfare in which the military can take out electronic targets without destroying a single building or harming human beings. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is here with the story:

--

According to news reports, back on October 16th an experimental missile called CHAMP fired bursts of high power microwave energy at an unoccupied site to damage computers and other electronic systems during a test at the Utah Test and Training Range. The Counter Electronics High Power Microwave Advanced Missile Project flew over the Utah test site and brought down the compound's entire spectrum of electronic systems, apparently without producing any other damage at all. Even cameras recording the test was shut down.

Keith Coleman is the CHAMP program manager for Boeing Phantom Works. He says that in the near future this technology may be used to render an enemy's electronic and data systems useless even before the first troops or aircraft arrive.

The idea of using microwaves or electromagnetic pulses to knock out electronic systems without having to reduce cities or military bases to rubble first arose during Cold War nuclear tests. There scientists found that explosions created electromagnetic pulses that damaged some civilian power grids and other facilities.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

It will be interesting to see where the development of this new electronic warfare device goes in years to come. (Science OnLine, Business Insider, Discovery News, others)

**

HAM RADIO IN SPACE: WORK PROCEEDING ON RECOVERY OF AO-27

Amsat Oscar 27 is down but not out. This according to controllers who are working to return of the satellites FM repeater back to service after it stopped responding on October 5th. Heres the back story.

In early October AO-27 was restored to running on its primary bootloader program. Control operators were able to turn on the Transmitter for a short time on several occasions. Also required were multiple recoveries the stuck AFSK modem.

During recovery efforts AO-27 crashed once again on October 16. The command team again recovered the satellite to the bootloader state. It was also recovered from another occurrence of the AFSK modem problem and they again performed another software upload.

On October 18 the transmitter was left on in an attempt to discharge the batteries with the hope that faults could be cleared. Once the battery was recharged the high-level software aboard AO-27 ran for a few seconds before locking up. The team was able to reset it back to the bootloader once again. Telemetry indicate AO-27 is locking up while fetching telemetry from the hardware. As such, controllers say that it does not look like there will be a quick resolution to this crash.

In the meantime the AO-27 controllers are asking the ham radio public not to attempt to use the AO-27 if you hear it in Amalog mode. This to prevent interfering with the command team's recovery efforts. (AMSAT)

**

RADIO IN SPACE: JAPAN SCHEDULES FIRST LAUNCH OF NEW EPSILON ROCKET

Japan is scheduled to launch its first Epsilon solid-fueled rocket next August or September. The flight will deploy a planetary telescope while on-orbit while demonstrating new low-cost rocket assembly and control techniques, the Japanese space agency announced last week.

The Epsilon program is designed to cut in half the cost of Japanese small satellite launches. Japan's M5 rocket, which launched seven times before retiring in 2006, cost $94 million per flight. Engineers designed the Epsilon rocket with a simplified control system, and the vehicle's own computers will autonomously monitor the status of its systems during countdown.

Only a handful of engineers with laptop computers are required on the launch control team. The Epsilon is also designed to launch after only seven days of assembly on the launch pad, reducing labor and overhead costs. (ANS)

**

CONTEST CORNER: RESULTS OF 2012 ARRL JUNE VHF CONTEST ON LINE

Sean Kutzko, KX9X, who is the Leagues Contest Branch Manager, says that the results for the 2012 ARRL June VHF Contest are now available online. If you took part and want to know where you placed, you can find out by taking your web browser to www.arrl.org/contest-results-articles. (KX9X)

**

SWL NEWS: L.A. INTERNATIONAL AIRPORT'S TIS STATION GOES DARK

If you are an A-M broadcast band DX'er and have not been able to hear the Travelers Information Station on 530 kHz at Los Angeles International Airport theres a good reason. It has reportedly been off the air for a month or so. No word as to why, but it does open up that frequency in the Southwest United States for DX'ing a 50 Kilowatt religious station in Turks and Caicos islands that operates on the same frequency. (CGC)

**

SWL NEWS: UK REGULATOR OFCOM CANCELS 648 KHZ BBC NOV

British telecommunications regulator Ofcom has issued a notice of variation the Wireless Telegraphy Act to Babcock Communications Ltd. This to remove Babcock's authorization to the frequency of 648 kHz previously used to broadcast the BBC World Service.

Subject to international co-ordination, this frequency will now be available for use by community radio licensing in various parts of the UK, in addition to FM and other AM frequencies that are already potentially available for this purpose.

However, some note that the characteristics of 648 kHz is at the lower end of the AM broadcast spectrum and therefore requiring relatively large towers and transmitter sites. This they say may make it less suitable for community radio than other AM frequencies higher up in the Medium Wave band.

A Notice of Variation in the UK is very much like a Special Temporary Authorization or STA issued here in the United States by our FCC.

You can read the Ofcom announcement on line at tinyurl.com/uk-nov-cancel (GB2RS)

**

DX

In DX, word that F8FQX will be active from Cameroon as TJ3SN next 3 to 4 years. He will be operational on High Frequency bands plus 6 meters using various modes. QSL via IZ1BZV direct or electronically using Logbook of the World.

Members of F6KOP team and others will be on the air from Uganda next February 6th to the 18th as 5X8C. They will be active on 160 through 10 meters using CW, SSB, RTTY and PSK. QSL via the bureau or electronically using Logbook of the World.

AA9A will be active from Antigua Island February 10th to the 20th as V24A. His operation will include the 2013 ARRL DX CW Contest. No bands or modes mentioned. QSL via home call

HB9TUZ will be active as 8Q7MS from Gangehi Island Resort on the North Ari Atoll Male in the Republic of the Maldives from December 26th to

January 3rd. His operation will be on 80 through 10 meters using SSB only. QSL electronically only using eQSL.

Lastly the 2012 operation 5X1EME operation from Uganda has been approved for DXCC credit. If you have a card for this operation you can submit it to checkers to be added to your DXCC total.

(Above courtesy of various DX news sources)

**

THAT FINAL ITEM: DAYTON 2013 IS A DX HAMVENTION

The Dayton Hamvention has announced its theme for 2013. Amateur Radio Newsline's Cheryl, Lasek, K9BIK, has the details:

--

When the 2013 Dayton Hamvention opens its doors next May 17th the theme will be that of it being the DX Hamvention. This according to General Chairman Charles Kaiser who says that this name will reflect the distant contact which is an important part of ham radio.

Kaiser says that the Dayton Hamvention is often an important DX destination for amateurs from around the globe to visit. Also, working DX is often a mix of band conditions, the diligent application of radio theory and of coarse a little bit of magic.

Kaiser noted that many attendees return to Dayton each year to meet other hams that they have talked to on the radio. He says that the quest for that distant contact advances amateur radio on many levels so the Hamvention team is honoring DX in all of its forms this year.

In the same press release, Kaiser announced that Jim Tiderman, N8IDS, will serve as his assistant General Chairman for 2013. Kaiser says that Tiderman has been active in Hamvention for many years and brings a natural leadership style to the Hamvention Team.

For the Amateur Radio Newsline, Im Cheryl Lasek, K9BIK, not far from Dayton in Zion Illinois.

--

Hamvention 2013 will take place next May 17th to the 19th at its traditional home at the Hara Arena in suburban Trotwood, Ohio For more information please visit www.hamvention.org on the World-Wide-Web or e-mail media@hamvention.org. And as always, we will se you there. (Dayton Hamvention)

WIANEWS WEEK COMMENCING NOVEMBER 18 2012.

Spring VHF-UHF Field Day

2013 WIA AGM and ANNUAL CONFERENCE

Christmas Eve - Ham Radio satellite to flash morse code

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING NOV 18 2012.

Spring VHF-UHF Field Day

Here is a reminder for NEXT weekend, November 24 and 25.

If you don't wish to camp out overnight, you can enter one of the 8 hour
sections rather than the full 24 hours. Or you can participate as a
home station.

This next Field Day will again include the "F Call Challenge", with special
certificates for Foundation licensees who participate in any of the
single operator sections of the Field Day.

The details are available on the contest page of wia.org.au

(John VK3KM)

WIA BOARD TALK

President Phil Wait VK2ASD vk2asd@wia.org.au
Vice President Chris Platt VK5CP vk5cp@wia.org.au
Secretary David Williams VK3RU vk3ru@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

2013 WIA AGM and ANNUAL CONFERENCE

The 2013 WIA Annual conference will be held at the Tradewinds Hotel in historic Fremantle, Perth's port city. Fremantle is one of Perth's major tourist centres, offering history, culture and lifestyle.

The conference is on the weekend 24 25 26 May 2013. This is the end of autumn in Perth, however we should enjoy good weather as we tend to get most of our rain later in Winter and in Spring.

Various components of the conference will be hosted by Amateur radio clubs in Western Australia, and together we look forward to welcoming you to Perth and Fremantle.

There is an interesting line up of activities for you to enjoy, and just as importantly you'll have time to relax in the bar.

For many of you, a trip to Western Australia is not to be taken lightly, and I encourage you to make it worth your while by making the conference part of a longer holiday.

With a bit of forward planning you can get some very good airfares to Perth, giving you more cash on the wallet for your enjoyment.

If you're considering coming to the Conference, or if you've never given it thought before, think about it now, to give yourself time to make holiday arrangements and to watch the airfares - the airlines are frequently offering very good fares. This week QANTAS was offering Melbourne to Perth for $189 one way. With some vigilance, you may be able to improve on that fare.

Booking details will be on the WIA website in early December. Check out the website at VK6.net for conference information. That's vk6.net

As Onno VK6FLAB says " The 2013 WIA AGM and conference is less than 200 days away and we're excited to announce that expressions of interest for speakers is now open.

We're planning to host a large range of topics in various formats, from Quick Talks to Hands-on presentations, from discussions to Social Events and now is the time for you to stick up your hand and show us what you've got.

If you've built a new gadget, written some software, engaged in research, or achieved something, we'd like to hear from you. Tell us about your successes and your failures. Use the opportunity to speak with other Amateurs who share your passion and excitement about a large range of topics.

If you've been attempting to figure out how to achieve something, but finding it hard to get a room of experts together, the conference offers you the opportunity to host an open discussion on a topic of your choosing. You'll

have the ability to get people in the room and benefit from the combined knowledge accumulated. Who knows, you might find someone who has a similar interest.

We will be allocating time-slots on a first-come basis, so get clicking now!

You can find the Expressions of Interest form on the VK6 conference site, conference.vk6.net, that's conference.vk6.net "

So that's it. Conference in May 2013 at Fremantle, More things to do than we can cram into a weekend programme, airfares going dirt cheap, and a great venue. I look forward to hearing that you are coming to Fremantle next May.

I'm Bob VK6POP

HAMS ACROSS AUSTRALIA.

VK1

Last weekend the 10/11th of November Canberra Region Amateur Radio Club ran their final Foundation Amateur Radio course for the year.

On the Saturday Mathew and Mark passed their upgrade from Foundation to Standard Licence and Steve passed his first attempt at the Standard Licence.

They then had seven candidates for the course and assessments on the Sunday.

Congratulations to John, the 2 Andrew's, Peter, Jack, Eyal, and Max who were all successful in completing the course and assessments.

VK2
web service:- http://www.arnsw.org.au/html/news_vk2wi.htm

The final Trash and Treasure for this year at the VK2WI site will be next Sunday the 25th at 63 Quarry Road Dural, 9.30 am.

This is Roger Harrison VK2ZRH

The battle over NSW planning restrictions on amateur radio antenna masts now has to enter a new phase - the political campaign.

Last week, I asked you to do some homework - to get hold of the essential contact details for your local member of the NSW Legislative Assembly.

I want you to write a polite letter to your local member, to briefly explain our issue with planning restrictions and council red tape when you want to put up an antenna mast, and to ask them to find out why this matter is NOT being considered in the current Planning System Review.

I explained last week that preparing a letter to your local member requires a different approach to writing a submission to a government department. So, to help you, I have had a set of simple guidelines posted to the WIA website.

When you write to your local member about an issue that concerns you, they will most likely write to the relevant minister - in this case, the NSW Minister for Planning and Infrastructure, the Honourable Brad Hazzard MP,

who is the Member for Wakehurst.

You can expect that your letter to your local member will be sent to the Minister.

If your local member is a member of the Government, the Minister's Office will refer the correspondence to the Department of Planning & Infrastructure to draft a response to your local member for the Minister's signature.

For you guys on the northern beaches in Sydney, the Minister is your local member. That's an advantage.

But, if your local member is either an independent or a member of the opposition, the Minister's Office will likely refer the correspondence to the Department of Planning & Infrastructure to write a reply to your local member from the Department - or, at best - a reply from one of the Minister's advisors.

Either way, all the correspondence that flows on this issue will send a signal to the Minister and the Department of Planning that this issue is of serious concern to many electors.

They have to get the message that the radio amateurs of NSW want exemptions for antenna masts to be included in the proposed new planning system.

If it turns out that we don't get the answer we're looking for, be prepared to participate in stepping up the campaign to another level.

Amateurs of NSW - the battle continues. This is about your future and the interests of future radio amateurs. Get cracking!

This is Roger Harrison VK2ZRH. I'll see you further down the log.

VK3
web service:- http://www.amateurradio.com.au/news/

The inaugural meeting of the Homebrew Constructors Group was well attended last Saturday, November 10, at Amateur Radio Victoria in Ashburton.

In the chair was Rob Whitmore VK3MQ, who believed that a good core group exists and with time there was a possibility it could expand.

Rob VK3MQ asked those attending to introduce themselves and talk a bit about their particular interests.

It ranged from kit building, home-brewing HF transceivers, power amplifiers, wireless restoration, software defined radio, microprocessors, and antennas.

One of the aims of the new group is to provide support and guidance. Certainly the knowledge and experience is already among those who attended.

The meeting raised topics for future discussion including printed circuit boards, soldering and surface mount techniques.

A special activity day might be arranged involving the pooling of test equipment to give new projects a thorough 'work out', all under the

supervision of the test equipment owner.

Rob VK3MQ said the next meeting on a Saturday afternoon would be in early December and held as a 'show and tell' day.

(Jim Linton VK3PC)

The Southern Peninsula Amateur Radio Club's inaugural RadioFest at Rosebud on the Mornington Peninsula, will be held next Sunday, 25th November.

The event will be held at the Eastbourne Primary School auditorium at Allambi Avenue, Rosebud, where off street parking is available.

Ticket sales and outdoor "Show and Tell" activities will commence at 8am and the Auditorium will open to the public at 9.30am with an entry fee of $5.

Catering for the event is being handled by the school's Parent and Friends Association and a large menu will be available at very reasonable costs.

This event next Sunday presents an ideal opportunity to make a family day of it, so bring your family and enjoy the RadioFest and the beaches, parks, wineries, shops and restaurants of the Mornington Peninsula.

If you have pre-loved equipment to sell, tables are still available at $10 through www.rosebudradiofest.com.

(John Ross VK3BJR : President SPARC)

VK4 - QNEWS
Send your stories for news. SCRIPT to qnews@wia.org.au
send audio to http://www.wia.org.au/members/broadcast/upload/

This story, and the email threads in the text editions only of both QNEWS and VK1WIA National News Thanks to Sam VK4TTT/FQ

"Eclipser One

A joint team - Stiinta and Tehnica Magazine, with assistance from VK4BS (Howard) and VK4FQ (Sam) launched at 5:30 (QLD TIME) on November 14th, a helium balloon right in the middle of a solar eclipse track.

The balloon had APRS tracking with YO4SJI-11 callsign.

Reports where received by VK4GO (Art at Tolga) VK4FQ (Sam's Cairns IGate) VK4ZZ (Gavin Townsville IGate) and others.

During the tracking, we recorded heights in excess of 36.886Km above the earth before it burst and this broke this teams previous record of 33.5Km.

Brisbane Centre - (ATC) used this information real time via aprs.fi to track the balloon and it's payload through controlled airspace. The launch place approx. 90km from Laura is located on the road between Cairns and Weipa.

The payload consisted of photo and HD video cameras and a scientific logger for UV, IR, Air pressure measurements. The balloon was successfully recovered.

People in the launch and recovery were - Florin Mingireanu and his partner, Marc Ulieru, Catalin Beldea from Romania and Howard (VK4BS) Sam VK4FQ.

Reported by Adrian (Yo3hjv) as far as I know, Eclipser One is on third place by altitude in Australia, after HORUS 16 and HORUS 22 High Altitude Amateur Radio Balloon, so you may be proud

Sam."

DISCUSSION POINT

I'm Geoff Emery, VK4ZPP, and I've been thinking.

You wonder at times whether enjoyment of a recreational pursuit, a hobby, can be like a marriage. Involvement starts out with a tingle of excitement, a sense of commitment develops and explosive times of energy and delight abound.

Then the demands of work/family and other things seem to compound until the great fun times seem to disappear with the proverbial, "I'm too tired" or "I've got a headache" almost to a routine. What once put a spring in one's step now seems to assume the role of being just mundane and ordinary.

Even when opportunity arises, it seems almost too much effort to acknowledge it let alone open a lazy eye for a brief "once over". But is that really how life was meant to be?

This is one of the areas where our network of clubs and our administrative structure can and does provide support. When the world is passing you by it is probably the right time to engage with your local radio club again. As much as people enjoy this hobby in the isolation of their own shacks, they are still social beings whose good health and stability depends on interaction with other people, face to face.

So when it is meeting time for your local club what will your response be? "Sorry, I've got a headache" just doesn't work for me or you. See you at the club.

I'm Geoff Emery and that's what I think....how about you?

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

environment across DHS components.

November 08, 2012 09:00 AM Eastern Time MELBOURNE, Fla. & ROCHESTER, N.Y. (BUSINESS WIRE)--Harris Corporation (NYSE:HRS), an international communications and information technology company, has received $7 million in orders to deliver public safety and tactical communications systems to the U.S. Department of Homeland Security (DHS) and its component agencies, the Federal Emergency Management Agency (FEMA) and the U.S. Coast Guard. The orders were awarded through the five-year, $3 billion DHS Tactical Communications (TacCom) indefinite delivery/indefinite quantity (IDIQ) contract vehicle.

"The Coast Guard is using this important procurement vehicle to deploy Falcon III® radios, while DHS is rapidly implementing a Harris P25 system"

Harris will provide the U.S. Coast Guard with Falcon III® AN/PRC-117G multiband manpack tactical radios that will be installed across the Coast Guard fleet to provide interoperable tactical communications with local, state and federal agencies, as well as the Department of Defence.

The AN/PRC-117G radio operates multiple waveforms for narrowband line-of-sight voice and data communications, beyond-line-of-sight satellite communications, communication with public safety agencies, and wideband data communications

Big amateur radio changes ahead for China

Mandatory membership of the Chinese Radio Sports Association will be a thing of the past, as that country moves forward under soon to be announced new amateur service regulations.

For the past 30 years, only a sports organisation could transmit over amateur radio.

It began with the station BY1PK on the 29th of March, 1982, at first on CW and with limited bands.

Now clubs and individuals have their own callsigns throughout the world's most populated country.

The system of them first being a member of a sport-related body, before entering amateur radio, no longer works and will end.

Along with the regulations will be a new entity called the, Chinese Radio Amateur Club, that will be solely focused on amateur radio.

The regulations promise to bring China more in line with its counterparts throughout the world.

The new group will deal with the regulations including visitor licences, conduct exams and licensing, create band plans, allow nation-wide mobile operation, develop emergency communications infrastructure, amateur satellites, and work through the IARU.

Being trialled for emergency communications is a new error-correcting low power data mode for HF radio using Chinese characters, a Software Defined Radio receiver network for noisy locations, an alarm system, VHF and UHF repeaters and training.

New Philippines amateur service rules

The National Telecommunication Commission has revised its regulations to stimulate amateur radio in the Philippines, and introduced a new Foundation Licence which gives access to the 2-metre band and up to 50-watts.

That is addition to the Technician Class on VHF and HF with 200-watts PEP, the General up to one-kilowatt PEP, and the top of the range Extra Class with all bands and up to 2,000 watts PEP.

Clubs with 25 radio amateurs are eligible for a licence. Extra Class Licences of five years standing may be deputised as Amateur Inspectors to visit

stations.

There was freedom to operate mobile, a publically available licensees list, a question bank, vanity callsigns and access to internet linking.

The regulations formally recognise the national IARU society, the Philippines Amateur Radio Association, which celebrates its 80th anniversary on November the 30th at the La Mesa Dam New Guest House at Quezon City.

==========

NEWS FROM ARNEWSLINE USA

GERMAN SPACE AGENCY REJECTS AMSAT DL MARS MISSION

Germany's space exploration plans will not support a proposed ham radio mission to the red planet. We have more in this report:

--

After five years of discussions and negotiations with the German space agency, AMSAT-DL reports that nation's space exploration group has withdrawn its support for the amateur satellite organization's plan to send a ham radio satellite to Mars. This is the so-called P 5 or Phase 5 satellite mission.

According to the AMSAT News Service, the agency advised the group that P5's mission was not financially feasible. Also that compared with the current Mars missions the scientific attraction was simply not there. You can read that as being of insufficient interest to the formal scientific research community.

The decision by the German Space Agency also affects plans for a geostationary Earth-orbiting ham radio satellite. This being the so called Phase 3 E which was to be part of the overall P 5 program. None of this is good news for amateur radio's future exploration of the final frontier.

For the Amateur Radio Newsline, I'm Burt Hicks, in Los Angeles.

--

AMSAT-DL officials say that they are not giving up hope for these missions. They note that their organization recently had some interesting meetings in China adding that if it cannot do rocket science in Germany, that it will have to look for other countries.

DARC SEEKS NOMINATIONS FOR ANNUAL HORKHEIMER PRIZE

Nominations are being invited by the German national amateur radio society, the DARC, for the prestigious Horkheimer Prize. The prize consists of an etched glass trophy and a monetary prize for non-personal use. The money is to be spent for the promotion of amateur radio however the recipient chooses. The prize can be awarded to one or more persons or institutions.

Any member of an amateur radio society in the International Amateur Radio Union is eligible, and self-proposals are permitted. Nominations must be submitted to DARC by March 28, 2013, and the prize itself will be awarded at the opening of next year's Ham Radio convention in Friedrichshafen. More information in the German language is on-line at www.darc.de

IRTS ANNOUNCES OPPOSITION TO PROPOSED EUROPEAN PLT STANDARD

Ireland's Irish Radio Transmitters Society is the latest national ham radio organization to line up in opposition to a newly proposed pan-European draft digital Power Line or PLT transmission standard. Jeremy Boot, G4NJH, has more:

-

Following the news last week that the German National Society, DARC, now opposes a new pan-European draft Power Line Transmission standard, we have heard that the Irish Radio Transmitters Society, like the RSGB, also opposes the standard.

In their magazine they say that "the draft Standard accepts that the PLT devices do not, in effect, meet the essential requirements of the EMC Directive as it prescribes measures to mitigate interference by permanently or dynamically excluding frequencies in the amateur, aeronautical mobile and broadcast bands."

The IRTS Committee took the unanimous view that it would not be appropriate to support a draft Standard that sought only to protect selective sensitive frequencies in the HF spectrum without regard to the levels of interference that could be caused by the equipment concerned on the remainder of the HF spectrum.

For the Amateur radio Newsline, I'm Jeremy Boot, G4NJH, in Nottingham in the United Kingdom.

--

As previously noted here on Amateur Radio
Newsline, this new standard concerns the devices
that people install in their homes to run data
over their house wiring. It has nothing to do
with PLC or BPL data that is carried over the
over company power line networks.

==========

OPERATIONAL NEWS - DATELINE 2012

WW CQ WW DX Contest CW November 24-25
VK Spring VHF / UHF Field Day November 24-25
WW ARRL 160 MTR CONTEST November 30
WW RTTY Melee December 1
WW ARRL 10 m Contest December 8- 9

So as you see not a lot happening till years end contest wise, maybe
our WIA Directors and ex-officious looking after Contests, Awards
DX etc etc would like to supply the WIA members and listeners to this
broadcast with material to prove we haven't ALL gone to sleep!!

NOT going to sleep is IARU region One who have just released this months
IARU Monitoring Report on the web and to sister societies,

In Intruder watch we find that a French radar is again active on 7000, 14000,
14250, 21000 kHz using a 20 kHz wide burst system.

They also report that taxi operators in the Russia Federation, Belorussia,
Ukraine and Kazakhstan are using FM in the amateur radio 28 MHz band more
than ever.

Read the International Amateur Radio Union Monitoring System (IARUMS)
Region 1 October 2012 newsletter at the web address wia.org.au
and click "This Weeks Broadcast".

I think I have time again to bring you that "DX Code Of Practice" and with
little band activity a good chance to "listen and learn" from John VK2JJW

"I will listen, and listen, and then listen again before calling.

I will only call if I can copy the DX station properly.

I will not trust the DX cluster and will be sure of the DX station's
call sign before calling.

I will not interfere with the DX station nor anyone calling and
will never tune up on the DX frequency or in the QSX slot.

I will wait for the DX station to end a contact before I call.

I will always send my full call sign.

I will call and then listen for a reasonable interval. I will not call
continuously.

I will not transmit when the DX operator calls another call sign, not mine.

I will not transmit when the DX operator queries a call sign not like mine.

I will not transmit when the DX station requests geographic areas other than mine.

When the DX operator calls me, I will not repeat my call sign unless I think he has copied it incorrectly.

I will be thankful if and when I do make a contact.

I will respect my fellow radio amateurs and conduct myself so as to earn their respect."

In Ingham where after the eclipse where we are "starting to see the light", I'm Felix VK4FUQ.

INTRUDER WATCH - ENFORCEMENT ZONE

IARU Monitoring System Newsletter

The IARU Region 1 Monitoring Service reports that French radar is again active on 7000, 14000, 14250, 21000 kHz using a 20 kHz wide burst system.

They also report that taxi operators in the Russia Federation, Belorussia, Ukraine and Kazakhstan are using FM in the amateur radio 28 MHz band more than ever.

Read the International Amateur Radio Union Monitoring System (IARUMS) Region 1 October 2012 newsletter at

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

Christmas Eve - Ham Radio satellite to flash morse code

Dec. 24 the Japanese students who built FITSAT-1 are planning to active the satellite's LED optical array and flash a message in Morse Code to Earth. The Morse message may be visible with the unaided eye.

According to Takushi Tanaka JA6AVG, the students plan to start testing the optical system at the end of November.

The FITSAT-1 CubeSat was developed by students at the Fukuoka Institute of Technology (FIT) in Japan. It has a CW beacon on 437.250 MHz and a data link on 437.445 MHz, there is also a 5.8 GHz data downlink.

Further FITSAT-1 information at
http://www.fit.ac.jp/~tanaka/fitsat.shtml

WW SPECIAL INTEREST GROUPS --- RADIO SCOUTING
http://www.scouts.com.au

In Maryborough Queensland a very dedicated band of volunteers are working in preparing the local Showgrounds and Equestrian Park to become a working canvass city. People are travelling and sacrificing their weekends at the venue of the Australian National Scouts Jamboree, AJ2013, commencing 2nd

January, next.

As part of the preparations, the pieces of organising a special event amateur radio station are being juggled into place. For the collectors of special event call signs be on the lookout for V-I-4-A-J-S operating on HF, VHF and UHF as well as internet linked modes for what is expected to be a busy 10 days.

For the members of MERG, Inc. this is again a great experience at sharing the great hobby Amateur Radio with other dedicated volunteers, in the world of scouting. Ours is but a small part of the program but with the possibility of having 10,500 scouts accessing the station to earn their Jamboree Award, this is a major event for a regional radio club as well.

For the WIA National News Service, this Geoff, VK4ZPP on behalf of MERG, Inc.

Thanks Geoff, now as I leave you this week, you the listener can take a leaf out of VK4ZPP's book and submitting some news items for next week.

Yes it's easy done to submit news items for inclusion in the VK1WIA broadcasts, just email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News. Each item will only be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh 'and always if the news room is to read your item write in the 3rd person.

>From Melbourne that's all this week I'm Robert VK3DN.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

What use is an f-call? (20120408)

So, you've got yourself a transceiver and it's all working well. You've read the manual more than a couple of times and you know your way around your kit. It's great to know how to operate your own radio and I've spoken to many hams who know their way around their own radio backwards.

I remember one day speaking with an amateur and we were talking about how I could show a spectrum scope showing activity across a band. He lamented that his radio didn't have that functionality. I had a quick look through his system and activated the spectrum scope on his radio. A pleasant surprise for both.

The opposite happened not long afterwards when another amateur was using my rig to listen to a remote station. He fiddled with some settings and magically the station appeared from out of the muck and we could hear it clearly.

I asked him how he did that and after some hand-waving it transpired that there were some settings I knew nothing about - the radio which I'd known for many hours, read the manual backwards and so-on.

It's been on my to-do list for a little while now, but I've just spent an enjoyable couple of hours sitting at my radio, re-reading parts of the manual, learning more about its operating parameters, how to set filters, turn on and off pre-amplifiers, change microphone equalisation and many other settings.

How well do you know your radio - really?

I'm Onno VK6FLAB

LZ DX HF Contest 2012

Posted: 16 Nov 2012 12:13 AM PST
http://forums.qrz.com/showthread.php?368575-LZ-DX-HF-Contest-2012&goto=newpost

Dear fellow contesters,

LZ DX HF Contest will be held this weekend.

This is a good opportunity to check your equipment and antennas before CQ
WW DX CW.

The rules are here:

http://lzdx.bfra.org/rulesen.html

Let's hope for a good propagation.

Good luck and CU in the contest.

Propagation Forecast Bulletin #46 de K7RA:

Posted: 16 Nov 2012 05:31 AM PST
http://www.eham.net/articles/29349

Suddenly this week we see an exciting and dramatic rise in sunspot activity. The daily sunspot number was 188 on Monday, November 12, higher than it has been in over a year. The last time the daily sunspot number was as high was on November 9, 2011, when it was 208. Prior to last November, we have to go back nine years into the previous solar cycle, November 26, 2003, to find a number this large. Back then the daily sunspot number was 209.

County Tyrone Radio Ham Saves US Plane After Contact Lost:

Posted: 16 Nov 2012 01:51 AM PST
http://www.eham.net/articles/29344

A radio enthusiast from Castlederg in County Tyrone has been praised for saving the lives hundreds of airline passengers, from his shed. Benny Young was turning the dial on his radio when he picked up a Mayday call from a United Airlines flight from Dublin to Boston. Mr Young said he heard the mayday call just before moved to another frequency. He then relayed information between the pilot and ground control at the airport. "I heard two people talking about Hurricane Sandy and that's what made me stay on the Pacific frequency and I heard the mayday call," Mr Young said. "I ended up talking to the pilot for about 17 minutes and I got the man operating the emergency net to come up to my frequency.

Dayton Hamvention Announces DX Theme for 2013:

Posted: 15 Nov 2012 07:55 AM PST
http://www.eham.net/articles/29335

Throughout its 62 years, the Dayton Hamvention® has showcased the best that Amateur Radio has to offer. Each year, a specific theme -- such as Amateur Radio clubs, global friendship or the advent of digital modes -- spotlights one of the many facets of the Amateur Radio Service. And when Hamvention opens on May 17, 2013, at Hara Arena, the 2013 theme DX Hamvention will reflect an important part of ham radio: the distant contact. "Hamvention is often an important DX destination for amateurs from all over the globe," Hamvention General Chairman Charles Kaiser, KD8JZR, explained. "Working DX is often a mix of magic, conditions and the diligent application of radio theory."

SARL NEWS - SUNDAY 18 November 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

CALL TO URGENT ACTION ON 5 MHz

DX HAMVENTION THE THEME FOR 2013 DAYTON HAMVENTION

CW MESSAGE FROM SPACE FITSAT-1 SCHEDULES CHRISTMAS EVE OPTICAL TRANSMISSION

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

CALL TO URGENT ACTION ON 5 MHz

While Radio Amateurs in the UK are experimenting on the 5 MHz band South Africa are still awaiting the answer to the SARL's request to ICASA to allocate one or more 5 MHz channels. This week RSGB news reported that their popular Sunday evening 5 MHz Sunset Net is changing frequency. The net, as its name implies, meets around UK sunset time on Sunday evenings to compare propagation with that during the 5 MHz GB2RS News earlier the same day. It has for some time met on the UK's 5 371,5 kHz channel. Following a number of reception reports from amateurs in the Republic of Ireland, the net participants have decided to move the Sunset Net's frequency to 5 398,5 kHz, with a backup of 5 278,5 kHz, beginning today, 18 November, as both these latter two channels are available to EI amateurs.

W&#65533;, here, need your action this weekend and on Monday and Tuesday. Monitor the channels between 5 250 and 5 450 kHz and report any transmission heard. We need the date, time and ID of the station or any information that may assist in identifying the organisation licensed.

The SARL needs this information in preparation for the meeting with ICASA on Thursday this week. Mail your findings to artoday@sarl.org.za. Here is a chance to do something for your amateur radio.

DX HAMVENTION THE THEME FOR 2013 DAYTON HAMVENTION

Newsline reports that the theme for the 2013 Dayton Hamvention 2013 will be DX Hamvention to reflect an important part of amateur radio, the distant contact. Charles Kaiser, KD8JZR, General Chairman for the event says that Hamvention is often an important DX destination for amateurs from all over the globe. "Working DX is often a mix of magic, conditions, and the diligent application of radio theory", Kaiser said.

A number of key vendors have already committed to returning to Hamvention® which the Dayton/Montgomery County Convention & Visitors Bureau estimates produces an economic impact of about $4 million for Montgomery County and nearly $10 million regionally. Hamvention®, the world's largest amateur radio gathering, brings about 25 000 people to the greater Dayton area. The three-day event includes exhibits, a flea market, forums, education sessions and license exams. The Dayton Hamvention 2013 is scheduled for 17 - 19 May, visit the website at www.hamvention.org.

CW MESSAGE FROM SPACE FITSAT-1 SCHEDULES CHRISTMAS EVE OPTICAL TRANSMISSION

There will be a Christmas present of sorts from amateur radio in space. On 24 December, the students in Japan, who built the FITSAT-1 satellite, are planning to activate the bird's LED optical array and flash a message in Morse Code to Earth.

According to JA6AVG, the students plan to start testing the optical system at the end of November. As such its Morse message beacon may well be visible from Earth with the unaided eye well before the scheduled transmission date.

FITSAT-1 is a CubeSat that was developed by students at the Fukuoka Institute of Technology in Japan. In addition to the optical transmission system the bird carries a CW beacon on 437,250 MHz and a data link on 437,445 MHz. There is also a 5,8 GHz data downlink.

CONTEST NEWS

Results of the Spring QRP Contest help on the 20th October 2012 are as follows

1st Pieter Jacobs, ZS6XT - 1 620 points 2nd Gerrit Rautenbach, ZS2XD - 1 512 points 3rd Christopher van Rensburg, ZS3R - 752 points

The results after adding up all of the 4 contests are as follows: 1st Gerrit Rautenbach, ZS2XD - 4 728 points 2nd Pieter Jacobs, ZS6XT - 4 626 points 3rd Pierre van Deventer, ZS6A - 2 560 points

The results of the VHF/UHF contest held on the 15/16th September are as follows:

ROVER 1st ZS60Y - 6 615 2nd ZS6MHH - 4 499 points

LIMITED ZS4VP 6 992 points

HOME MIXED MODES 1st - ZS1NAZ - Analogue 54 282 / Digital 34 570 2nd - ZS6A - Analogue 23 556 / Digital 42 924 3rd - ZS6PX - Analogue 3 123 / Digital 72 684

HOME ANALOGUE ONLY ZS6KTS 7 977

HOME DIGITAL ONLY ZS2ACP 68 917

FIELD STATION ANALOGUE ZS6MRK 54 135

The full results will be published in HF Happenings.

The following are the results of the Antique Wireless Association QSO Party held on 13 and 14 October 2012:

In the AM section top scores are: Denis, ZR6DNS

SSB: 1st Abe, ZS1ZS 2nd Theunis, ZS2EC 3rd Denis, ZR6DNS

Although there were more than 30 stations active on the AM section, only 2 logs and 2 check logs were submitted.

In the SSB Section, there were more than 40 active stations, but only 4 logs and 2 check logs were submitted.

Thanks to all who participated in the QSO Party.

Certificates for the top scores will be in the mail shortly.

CLUB NEWS

The West Rand Amateur Radio Club will host its next flea market at 12:00 on Saturday 01 December 2012 at their clubhouse in Kroton street, Weltevredenpark, Roodepoort. Everybody is welcome. For more information contact Phillip, ZS6PVT, at 083 267 3835 or Geoff, ZS6GRL, at 082 546 5546.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that solar activity is on the rise. There are a number of active areas visible on the solar disk which have the potential for flare activity. Active areas 1 610, 1 611, and 1 614 have complex magnetic configurations and have the possibility for C-class and isolated M-class flaring.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 102.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings, with 20 m not far behind. There will also

be frequent 10 m openings due to the higher solar activity.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 18 November - SARL National Field Day still on the go till 10:00 UTC today. 18 November - Log sheets for the RaDAR Contest to be in to Lichtenberg Amateur Radio Club (LARK), PO Box 410, Lichtenburg, 2740 or by email to zs6lrk@nwinternet.za.org. 01 December - West Rand Amateur Radio Club flea market starting at 12:00.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 UTC on 4 895 kHz ((A new time and frequency!). Reception reports are invited. We are particularly interested in reports of the 4 895 kHz transmission on Mondays at 18:30 UTC as the frequency is close to the proposed new amateur allocation near 5 MHz. Reception reports from all areas in South Africa would be useful in our bid to ICASA for frequencies pilot studies. Send reports at the latest by Tuesday 20 November to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

EPC PSK63 QSO Party

Posted: 16 Nov 2012 10:30 AM PST
http://forums.qrz.com/showthread.php?368627-EPC-PSK63-QSO-Party&goto=newpost

Date and Time

Starting time is at 00:00 UTC, and ending time is at 24:00 UTC on Sunday 18 November, 2012.

Objective

The European PSK Club has the honour to invite the radio amateurs all over the world to participate in the EPC PSK63 QSO Party. The objective of the competition is to establish as many contacts as possible between radio amateurs around the world by using the BPSK63 mode. Everybody can work everybody for QSO and multiplier credit. MixW statistics files by R3BB for PSK63 QSO Party: http://www.digitalrus.ru/Files/StatsEUEPC.zip (last update 30.10.2012).

EXCHANGE

EPC members should send signal report plus EPC membership number (example ☐ 599 EPC00001). Please make sure that you don't separate «EPC» from the «Number», and you don't use any characters between. Please make sure that your EPC number consists of 5 digits. Other stations should send signal report plus QSO number, starting 001 (example ☐ 599 001).

Fair Highlights Emergency Preparedness:

Posted: 16 Nov 2012 04:23 PM PST
http://www.eham.net/articles/29351

In the wake of Hurricane Sandy, a disaster-readiness fair that highlighted solar oven cooking, water storage, 72-hour emergency kits and HAM radio communication demonstrations seemed quite timely. However, planning for the Emergency Preparedness Fair began many months ago. The event, hosted by the Temecula Stake of The Church of Jesus Christ of Latter-day Saints, took place on Saturday, Nov. 10, at the LDS church on North General Kearny Road. Dozens of tables with information and demonstrations on topics pertinent to emergency preparedness were set up in and around the church facility. Additionally, two presentations on food storage and earthquake preparedness were given by specialists in those areas. Gordon Neuls, of Aguanga, an avid HAM radio enthusiast and trainer, manned a booth promoting HAM radio certification. In the case of a natural disaster where normal lines of communication are interrupted, HAM radios can be used to relay information, as well as to send for help and assistance.

//
EU Standardises Hamtagonistic Powerline Network Tech:

Posted: 16 Nov 2012 04:22 PM PST
http://www.eham.net/articles/29350

The second vote on EN50561-1, the EU standard for running Ethernet over mains circuits, has passed, putting the standard on the books, much to the annoyance of the UK amateur radio operator community. EN50561-1 requires that all Powerline Telecommunication (PLT) kit, which carries networking signals over the mains electrical wires, must avoid the amateur radio frequencies; switch off when not in use; and keep transmission power to a minimum. All powerline networking kit sold in Europe will have to conform to it within the next three years, though it clearly doesn't go far enough for some. UK hams, in the body of the Radio Society of Great Britain, have long opposed the standard, arguing that existing requirements that no device generate undue radio interference should be applied to PLT devices, which would make the vast majority of those in use today illegal. Appeals to Ofcom and Trading Standards failed to get any traction, with Trading Standards deferring to Ofcom while the radio regulator pointed out that it has no power to govern devices that were not designed to emit radio signals. PLT kit is supposed to only send signals over mains wires, but as

such wires are unshielded it inevitably leaks out. Ofcom did extend its remit for the Olympics, giving itself permission to shut down any radio transmission regardless of source, but that right ended with the closing ceremony.

CQ contest question

Posted: 18 Nov 2012 08:08 AM PST
http://forums.qrz.com/showthread.php?368833-CQ-contest-question&goto=newpost

Hi, I'm fairly new to HF after upgrading to General a few months back. I hear a lot of stations on 40M and 20M meters contesting. My question, what information are they collecting from the other answering stations? I think Grid location is part of it, but what other info should I have available for them?

I recorded a little last night
http://www.youtube.com/watch?v=jDpKo...eature=mh_lolz for reference.
Towards the end you can hear him asking for check & section.

Kelvin

3B, MAURITIUS. There is a newly licensed ham on the beautiful island of Mauritius. His name/callign is Achmed, 3B8BAE, and his 'Elmer' (and father) is a well-known operator Rachid, 3B8FQ. Currently, you may find

Achmed active almost daily on 28491 kHz SSB, at 1400z, as HF propagation allows. He also plans to be active on CW in the future. Achmed requests, "If you hear me on any mode, please spot 3B8BAE on the DX PacketCluster system, and of course, give me a call. I enjoy meeting new friends!" QSL via his QSL Manager Ron, K5XK, who also handles cards for his Dad, 3B8FQ. Please QSL direct to K5XK with 2 USDs, preferred, although IRCs are also OK. See details on <QRZ.com/db/k5xk> for more info. Do not QSL via the Bureau because there is NO BUREAU in Mauritius. Also, he does not do LoTW or eQSL at this time.

3V, TUNISIA. SWL Ashraf "Ash", 3V4-002 (KF5EYY), will be active as 3V8BB from the "Institute Superieur de L'Animation Pour la Jeunesse et la Culture" in Bir El Bay, Tunis, during the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW or to LX1NO. Read about Ashraf on the following Web page at: http://www.qsl.net/3v4-002

5G, MOROCCO (Special Event). Special event station 5G12ITD is now active until December 16th. Activity is to celebrate "International Tolerance Day" by UN members on November 16th. Operations will be on all bands and modes. QSL via RW6HS.

5W, SAMOA. Ralph, H44RK, has announced that he will be active from Samoa for a while as of early December. More details will be forthcoming.

5W, SAMOA. A team of 15 German operators will be active as 5W0M from Le Lagoto between April 4-18th (2013). Activity will be on 80-6 meters using CW, SSB and RTTY plus 2 meter EME. They plan to have four stations active simultaneously on the air with amp and various antennas. Suggested frequencies are:
CW - 3526, 7026, 10116, 14026, 18086, 21026, 24906 and 28026 kHz
SSB - 3805, 7095, 14210, 18120, 21255, 24945 and 28440 kHz
RTTY - 3580, 7041, 10137, 14077, 18104, 21098, 24924 and 28098 kHz
6m - 50107/CW and 50115/SSB

Operators mentioned are Yl Heidi/DK1MA, Sid/DM2AYO, Rolf/DL7VEE (Team Leader), Franz/DL9GFB, Klaus/DK1AX, Joe/DF1AL, Heye/DJ9RR, Dietmar/ DL2HWA, Uwe/DJ9HX, Martin/DL3KMS, Rudolf/DK3CG, Georg/DL4SVA, Norbert/ DL2RNS, Ernst/DK7AN and Joachim/DL9MS. QSL via DL4SVA, direct or by the Bureau. QSL EME QSOs via DL9MS. A OQRS will be available for QSL requests for Bureau QSLs or direct cards. A Web page is available are: http://5w0m.hkmann.de

5X, UGANDA (2013/Frequency Change). Members of the F6KOP team expected to be active as 5X8C between February 6-18th, 2013, from a location some 20 Km from Entebbe airport, have announced they will comply to the last IARU bandplan on 40m for the region, the frequencies of the PSK and RTTY modes have been moved to 7040 and 7042 kHz. For more details see OPDX.1081 or see: http://www.5x2013.com

6W, SENEGAL. Jeff, N1SNB, will be active prior to the contest next weekend as 6W7/N1SNB. QSL (non-contest only) via N0TG.

8Q, MALDIVES. Max, HB9TUZ, will be active as 8Q7MS from Gangehi Island (AS-013) between December 26th and January 3rd (2013). Activity will be on 80-10 meters using SSB only. QSL via eQSL only.

9J, ZAMBIA. Niko, S53A, will be active as 9J3A from the Kafue National Park (WFF-9JFF-003, WWL KH35) between November 21-26th. This is his fifth operation from Zambia. Activity will be mostly during the CQWW DX CW Contest (November 24-25th) as a Single-Op, possibly as a Single-Band (10m) or All-Band (depending on conditions)/Low-Power entry. He will operate from the rain forest, under the tent, with a generator. There is no electricity, nor a Cell-Phone signal. This could be a very dangerous operation with a lot of poisonous insects, snakes, crocodiles, wild pigs or even lions could visit a tent in the middle of the night. He will be running 100w into SpiderBeam and some fixed loops. QSL via S57S (not S53A, not S57A), directly or by the Bureau (a very long wait, see details on QRZ.com). LoTW will be updated a few months after his return home.

AFRICAN TOUR (Western). Peter, HA3AUI, is once again heading to Western Africa in early 2013. Look for him to be active as 6W2SC from Senegal and J5UAP from Guinea-Bissau sometime between January 17th and March 10th (tentative dates). Peter has used these callsigns before. His stays in Cabrousse, Senegal (6W), will be very near to the border of Varela, Guinea-Bissau (J5), and he plans to make regular trips to J5-land for the beautiful beaches there (plans to also operate from there). Using his Elecraft K3 with 500w into a 5-Band Spiderbeam and verticals, Peter's activity will be on 40-10 meters, mainly on CW and the Digital modes, but he may use the other modes possibly on request. He will also try to activate some IOTAs and WFF references. QSL direct via HA3AUI or use his OQRS (available after his return). Visit his Web site at: http://cqafrica.net

AH2, GUAM. Members of the Guam Contest Club will be active as AH2R from Tumon (OC-026, USI GU003S, WLOTA L-0064) during the CQWW DX CW Contest (November 24-25th) as a Multi-Single entry. Operators mentioned are: Toshinobu/JI3ERV, Mikiawa/JR7OMD, Hiroyuki/JG7PSJ and Nozomu/JE8KKX. QSL via JH7QXJ, direct, by the Bureau (not the KH2 Bureau) or LoTW.

BY, CHINA. Look for the YinZhou Middle School Amateur Radio Club Station, located in NingBo City, Zhejiang Province, to be active as BY5CD during the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band entry. Their station consists of 2x Yaesu FT-2000 with stacked antennas for 40m and above. They also have 80m 4 SQ, 160m full size Slope with Beverage, and will use legal limit power. QSL via BD4HF, direct or by the Bureau (May take a long time!). The operator will be Jack, BA4ALC.

DAYTON HAMVENTION NEWS. The Dayton Hamvention® has announced it theme for 2013. When the Hamvention opens on May 17th, 2013, at Hara Arena, the 2013 theme will be DX Hamvention. Read all about it in this week's November 15th ARRL Letter at: http://www.arrl.org/arrlletter?issue 12-11-15

EF8, CANARY ISLANDS. Mauri, EA8CMX/OHBYS, will be active as EF8S during the CQWW DX CW Contest (November 24-25th) as a Single-Op/Single-Band

(160m)/Low-Power entry. He states that he will trying a 3-element wire-Yagis and Beverages. QSL via OH2BYS.

EU, BELARUS. Valentin, EU1AA, will be active during the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/QRP entry. He has operated the last 60 years in the CQWW DX Contests and is 76 years old. QSL via his home callsign or W3HNK.

FK, NEW CALEDONIA. Mirek, VK6DXI (aka SP5IXI, 9M8DX, 9V1XE etc.), is now active as FK/VK6DXI from New Caledonia (OC-032) until mid-December. He was heard early Sunday morning on 28485 kHz around 0720z. QSL via his home callsign.

HQ, HONDURAS. Hiro, JA6WFM, will be active as HQ2N from San Pedro Sula during the CQWW DX CW Contest (November 24-25th) as a Single-Op/Single-Band (10m) entry. QSL via EA5GL or LoTW. Hiro will be here until January 2014.

IOTA NEWS.....
AS-077. Look for special event station 8J6HAM to be active from the Island of Kyushu (WLOTA 0963), Japan, between December 10th and March 3rd (2013). Activity is in celebration of the 12th West Japan Ham Fair. Operations will be on all bands and modes. QSL via the JARL Bureau.

EU-025. Members of the Arcibessi DX & Contest Group will be active as II9P from Sicily Island during the CQWW DX CW Contest (November 24-25th) as a Multi-Single entry. QSL via IT9CHU or LoTW. Operators mentioned are Francesco/IK8TEO, Antonello/IT9EQO, Carmelo/IT9AUG, Vincenzo/IT9CHU, Alfio/IT9EJW, Fabio/IT9GSF, Marcello/IT9CJC, and Robert/S53R (ST2AR). The team reports that this M/S operation is from a new Sicilian contest station. They state, "Good low band antennas, Beverage's on RX, MULT STATIONS QRV on low bands at DX's sunrise/sunset (Sunrise ZL, VK, JA, BY, JT, VU - Sunset VY, PY, VE2, W7, KL, Carribean). Call and we will answer your CQ...! 1850, 3550, 7050 • Pass QRGs." Visit the II9P Web page at: http://ii9p.com

NA-134. Graham, G4MFX, will be visiting Aasiaat Island, Greenland, this week between November 20-26th. Since he is there because of his job, activity will be limited to his spare time. He expects most of his activity will be on November 24th (around 2100z). His callsign will be OX/G4MFX. Operations will be SSB only using his FT817ND with 5 watts into Zepp antennas for 17m and 20m (no other bands). QSL via his home callsign, by the Bureau or direct (see details on QRZ.com).

J3, GRENADA. Tom, VE3RSA, will be active as J34K during the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/QRP entry. QSL via LoTW.

J6, ST. LUCIA . The "Buddies in the Caribbean" suitcase mini-DXpedition group which specializes in 100 watt or less low power radios and Buddipole portable antenna systems is going back to St. Lucia (NA-108, WLOTA L-1336) again between December 2-11th. They state, "The north shore villa location was magnificent on our first visit in Feb 2010 and subsequent visits in December of the following years with a new group of operators. Our goal is to demonstrate 'ultralite' DXpeditioning into magnificent 'vista' locations, operating a field portable battery-only radio with backpackable, lightweight antennas and most of all 'having fun' with a new group of operators who have never experienced the 'other side of a pileup!' The eight operators this Dec 2012 are: Everett/W6ABM, Robert/N7QT, Hugh/W4VAB, Bryan/WB8ISG, Scott/KA9P, Jerry/W5TDY, Budd/W3FF (J68FF), and Guy/N7UN (J68UN). There will be 3 villa stations in operation on 160-10m using CW, SSB, and RTTY or PSK. At the same time, several teams will be battery-only, field portable either from St. Lucia beaches or scenic mountain tops and will sign call/p. They group will participate in the ARRL 10m Contest (callsign: J68UN) on Dec 8-9th. QSL via LoTW, eQSL or mail to the operator's home callsign (SASE required)."

JX, JAN MAYEN. Svein, LA9JKA, continues to be active as JX9JKA from Jan Mayen (EU-022) until approx. April 11th, 2013. He operates on SSB and the Digital modes on 160-4 meters (also 60m). QSL via his home callsign direct only (see QRZ.com).

KG6, GUAM (OC-026). Joel, KG6DX, will be active as KG6DX in the CQWW DX CW Contest (November 24-25th) as a Single-Op/Single-Band (10m)/High-Power entry. QSL via KG6DX, CBA or QRZ.com address. Also LoTW.

ADDED NOTE (TNX to W8KVK): New Experimental Products Coming -
On December 11th (tentative), SWPC (Space Weather Prediction Center) will introduce two new forecast products titled the 3-Day Forecast and the Forecast Discussion. These new products will: be available twice a day at 0030 and 1230 UTC; provide space weather information in two separate formats, abbreviated and detailed; and use NOAA Space Weather Scale information. Examples of these new products are available to familiarize our users at http://www.swpc.noaa.gov/info/3-Day.pdf (the

concise, 1-page summary) and http://www.swpc.noaa.gov/info/Discussion.pdf (the in-depth space weather analysis for the technical user). These two products will supplement the existing product suite and no current products will be discontinued.

KH0, MARIANA ISLANDS (Update/Change). Operators Jussi-Pekka/OH6RX and Esa/OH7WV will be active from Saipan Island (OC-086) during the CQWW DX CW Contest (November 24-25th) as a Multi-2 entry. Callsign will be AH0DX and QSL via WX8C. Time permitting, some operating outside of contest one day before and one day after may take place. Operators will be on Saipan between November 22-27th, and will probably use the callsigns KH0/homecall outside of the contest.

LX, LUXEMBOURG. A team of operators will be active as LX7I during the CQWW DX CW Contest (November 24-25th) as a Multi-Single entry. QSL via LX2A. Operators mentioned are YL Sandy/DL1QQ, Helmut/DK6WL, Gerd/DF9TS, Mike/DF3VM, Frank/PA4N, Philippe/LX2A and possibly others. Also, visit the following Web page at: http://www.lx2a.com

NH7, HAWAII. Al, NH7A/F5VHJ, will be active as NH7A from Keaau during the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/High-Power entry. QSL via F5VHJ, by the REF Bureau or LoTW.

NP2, U.S. VIRGIN ISLANDS. Brad, K7EUG, will be active as K7EUG/NP2 from St. Croix (NA-106) between November 19-27th. Activity will be on 40-10 meters, definitely be on SSB and possibly digital. QSL via his home callsign, direct or by the Bureau.

NP3, PUERTO RICO. Jaime, WP3A, will be active as NP3X from the Coamo Contest Club station during the CQWW DX CW Contest (November 24-25th) as a Single-Op/Single-Band (20m)/Low-Power/Assisted entry. QSL via NP3O. Visit the following Web page at: http://kp2b.net

OY, FAROE ISLANDS. Carsten, OY1CT, will be active during the CQWW DX CW Contest (November 24-25th) as a Single-Op/High-Power entry. This will be a part time operation; no 160m. QSL via OY1CT.

P3, CYPRUS. Jack, R2AA (ex-RW3QC), will be active as P3N during the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/High-Power entry. QSL via RW3RN.

PACIFIC TOUR. Bob, 5B4AGN, is planning a lightweight Pacific trip for February 2013. Look for him to be active as KH2/G3ZEM from Guam (OC-026) between February 9-13th (2013) and as V63ZM from Micronesia between February 13-23rd. Activity will be on 80-10 meters but may include 160m if a useful antenna arrangements can be made. He will use his K3 radio and KPA-500. QSL via M0URX.

PG100, THE NETHERLANDS. Fred, PA0FAW (ISWL Member), will be operating as PG100NOM between December 1-28th. Activity will be mostly on CW and SSB with some Digital. Operations will be in WFF-PA-005 (For the World Fauna and Flora Award). Fred will use a 3 element beam for 10, 15 and 20. QSL is 100 percent and SWL reports are very welcome. See QRZ.com

for details.

PT0S, ST. PETER AND ST. PAUL ROCKS (Update). Just a reminder that the
PT0S team has extended their operation to cover the CQWW DX CW Contest
(November 24-25th) as a Multi-Single entry. QSL via HA7RY. The team
has three stations on the air CW, SSB and RTTY. The latest updates are
available at their Web page. Also the PT0S's log is now on their Web
page and ClubLog at: http://pt0s.com
https://secure.clublog.org/logsearch/PT0S
As of 1045z, November 18th, PT0S has made a total of 25251 QSOs with
9283 Unique callsigns (14760/CW, 9789/SSB and 704/RTTY). Breakdown by
continent is: 514/AF, 0/AN, 1510/AS, 11292/EU, 9497/NA, 278/OC and 2160/SA.

3V8BB DIRECT QSLS. Ashraf "Ash", KF5EYY (SWL 3V4-002), and one of the
operators of 3V8BB and 3V8SS, reports that he just received a box of
QSL cards (with 140 cards) from the Director of the Institute in Tunisia
where the 3V8BB station is located. Ash states, "The secretary didn't
know what to do with them, she simply stored them in a box! Some of
them are old QSLs. I'm processing these QSLs and I'll answer them all
direct. I added on my Web site a QSL Status Page for you to follow-up
at: http://www.qsl.net/3v4-002
If there is any problem, please don't hesitate to contact me. Sorry for
the delay!"

QSL RECEIVED VIA LoTW: 8P6DR, 9A7A, 9Y4D, A71AM, AH0/N0AT, AL1G, CX2AQ, DL8PF, DL9UBF, E74IW, EO2012KW, HC6EP, KL2R, KL8DX, KP2MM, LA5VSA, MW2I, NH8S, P4/PG4DX, RU0FM, RX1CQ, SM5AQD, SV3DCX, VE3MJR, VK5PAS, YL2KF, YO9HP, ZC4LI, ZD8O, ZD9UW, ZL1BYZ, ZM4T and ZS2DK

QSLS RECEIVED VIA MAIL: 3A/G0VJG, 4L1MA, 5B/W2TAA, 5B4AII, 5U5U, 6O3A, 8P6DR, 8Q7OE, A5A, C4M, C50C, CY9M, E21EJC, EX8MLE, IP1T, J28AA, J39BS, KH8/DL3DXX, P3N, T6JP, T77C, TT8PK, VP5DX and ZS7/DL1LLL

QSLS RECEIVED VIA THE BUREAU: 3G1TUW, 4U1WRC, 4Z13AR, AH0J, C31LJ, C5YK, D2AM, DS4DRE, EM15UCRF, H40FN, HK1R, HL5BLF, J37T, J45PO, J73CCM, JA7DOT, JA7ODY, JG7MFN, JH0JDV/0, JH4UYB, JI1LET, JR1MAF, JT1RF, JY4NE, KH0/KH2F, KP4KE, LZ907SKB, NY8A/KH2, PJ7/K5SL, R0/KE5JA, RG50F, RJ3AA, S56P, S550ACP, SP100MSC, V31MD, V5/DJ2HD and VP2MWG

RI1, FRANZ JOSEF LAND. Eugene, UA4RX, will be active as RI1FJ from Franz Josef Land (EU-019) during the CQWW DX CW Contest (November 24-25th) as a Single-Op/Single-Band (15m)/Low-Power entry. QSL via UA2FM direct, an OQRS is available on ClubLog.

T40, CUBA. Cuban operators Carlos/CO2CW, Winston/CO2WF, Juan-Carlos/CO2JD and Manuel/CO2MS will be active as T40C during the CQWW DX CW Contest (November 24-25th) as a Multi-Op/Single-Transmitter entry on 80/40/20/15/10 meters. QSL direct to address on QRZ.com.

T6, AFGHANISTAN (Update). As reported alst week, Mike, KI4MRH, is now active as T6MH from Afghanistan, and expects to be there until October 2013. Activity will be on 80-10 meters (no 30m) using SSB and the Digital modes (PSK-31/PSK-63/JT-65). He will use 100 watts (SSB) and 30 watts (Digital) into a 40 meter Inverted Vee and a 20 meter vertical. This past week Mike has be real active on 20/17/15 meters using the Digital modes. Also, OPDX was informed that he now has a QSL Manager, so QSL via W2GR direct w/GSs or IRC and SASE.

T8, PALAU. Naotsugu, JA1MML, will be active as T8NS from Palau (OC-009) between November 21-26th. Activity will include the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band entry. QSL route TBA.

TC2, TURKEY. Members of the Bulgarian Elecraft Contest Team will be active as TC2M during the CQWW DX CW Contest (November 24-25th) as a Multi-2 entry. QSL via LZ1NK. Operators mentioned are Stanislav/LZ1GC, Stoyan/LZ1SDR, Krasimir/LZ2UW, Mike/LZ2NW, Vesko/LZ2JE, Darin/LZ2NG, Chrsito/LZ3FN and Veselin/LZ5VK. There will be activity outside of the contest using the callsign TC2W. Visit the group's Web page at: http://tc3a.alle.bg

TF, ICELAND (Update). Operators Phil/G3SWH, Tom/N3ZZ, Andrew/UA3AB, Mike/WA6O,
Oskar/TF3DC, Yngvi/TF3Y and Thorvaldur/TF4M will activate the TF4M Rhombic Farm club station in Otradalur, using the callsign TF4X during the CQWW DX CW Contest (November 24-25) as a Multi-2 entry. QSL via G3SWH, direct only or the OQRS. For more on the TF4M station, see: http://www.tf4m.com
Also for a log search, see: http://www.g3swh.org.uk/tf4x.html

TG, GUATEMALA. Martin, DL5RMH, is now active as TG9/KF5LSG until January 13th, 2013. Activity will be holiday style on CW and RTTY, using an Icom IC-706 MKII into a Cushcraft R7. Martin will also be in the CQWW DX CW Contest using the callsign TG9IDX as a Single-Op/All-Band/Low-Power entry. QSL via DL5RMH, by the Bureau, direct or LoTW.

V4, ST. KITTS (NA-104). Andy, N2NT, will be active as V47NT from the QTH of V47KP between November 19-26th. Activity will include the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/High-Power entry. QSL via W2RQ. Andy adds, "The operation is dependent on getting the station back together :) There is a lot of work to be done there."

V8, BRUNEI (Update). The members of the Gemilang Amamteur Radio Club (GEMILANG Radio) and the Mediterraneo DX Club continue to be active as V84SMD from Brunei (OC-088, WLOTA 1628) until November 23rd. An interesting log search is available at: http://www.maxlaconca.com/logv84smd
QSL via IK2VUC, direct, by the bureau or the OQRS. Logs will be uploaded to LoTW 4-5 months after the activity. Further information can be found on their website at: http://www.mdxc.org/v84smd
As of 1724z, November 18th, V84SMD has made a total of 27568 QSOs with 10210 Unique callsigns (38%/CW, 43%/SSB and 19%/Digi). Breakdown by continent is: 1%/AF, 50%/AS, 38%/EU, 8%/NA, 2%/OC and 1%/SA.

VE2, CANADA (Zone 2). Victor, VA2WDQ, will be active as VE2EKA from Sept-Iles in Zone 2 during the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/Low-Power/Assisted entry. Victor will be in Zone 2 between November 22-26th. QSL via VA2WDQ.

VK6, AUSTRALIA. Bernd, VK2IA, will be active as VK6AA during the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/Low-Power entry. QSL via his new QSL Manager Uli, DK2BJ. ADDED NOTE: QSL all of the following - VK2IA, VK6AA, VK8VJ, VK9AA and VK9AA/9 via DK2BJ. Bernd reports that his old manager Peter, DL8YR, passed away earlier this year and Uli has kindly offered his help and support. Uli's postal address is (for those who wish to send QSLs direct): Uli Hacker, Karl-Marx-Allee 155, 52066 Aachen, Germany. Bernd states, "I will upload all my VK logs to LotW before the end of the year."

VK8, AUSTRALIA. Tom, OZ1AA, will be active as VK8GM (from Gregory's QTH) during the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/High-Power entry. QSL via VK8GM, direct or by the Bureau.

VP2M, MONTSERRAT. Will, AA4NC, will be acvtive as VP2ME from Montserrat (NA-103, WLOTA 1475) between February 13-20th (2013). Activity will be on the 30/17/12 meter bands using CW, SSB and RTTY. He will also be in the ARRL DX CW Contest (February 16-17th). QSL via LoTW.

VP8/S. SOUTH GEORGIA (Update). Mike, GM0HCQ/MM, onboard the "Royal Research Ship James Clark Ross, is scheduled to possibly be active again as VP8SGK from King Edward Point Base station, South Georgia (AN-007). According to his latest update [edited]: "The current plan has the ship working cargo at Bird Island on Sunday, 18th November. If the cargo work is not completed and the weather remains good then the ship may well remain

here for a further day, which means that at present the proposed arrival dates for King Edward Pont, South Georgia, are either Monday 19th or Tuesday 20th. The ship is likely to arrive by 1200z. If the ship does arrive at 1200z, then I am likely to have work to carry out for most of the morning and part of the afternoon. I do have to visit the base to look over the radio equipment and once I have done this I would hope to be able to operate as VP8SGK. . I anticipate this to be after 1700 or 1800z. Proposed frequencies: As it is likely to be an afternoon of operating I suspect that ideally I would be best working on 15m. However, there may be an issue with the antenna and the transceiver not loading on this band. If so I will then have to drop down to 17m and perhaps 20m. I propose to use the following frequencies: 21187kHz, 18157kHz or 14187kHz. All operations will be on SSB, which is not by choice but due to not wanting to carry a whole pile of kit ashore with me. The transceiver is a commercial unit, a Skanti TRP800 (I think) and does not have any fancy filters. Hopefully, I will be able to plug in a set of headphones from the ship." QSLing is only direct for all contacts. All contacts will be on e-QSL or LoTW. NO BUREAU QSLS. Full details on QSLing are available at: http://www.gm0hcq.com/qsl.htm Details about Mike and the "James Clark Ross" are avaialble at: http://www.gm0hcq.com

VU2, INDIA. Prasad, VU2PTT, will be active during the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/High-Power entry. QSL via the LoTW, by the Bureau or direct using the info on QRZ.com.

XV, VIETNAM. Retu, OH4MDY (OX3RZ/XU7MDY/XV2MDY), will once again be active as XV2RZ from Southeast Vietnam between November 23rd and December 10th. Activity will be on 20-6 meters using the "normal modes" (CW and SSB). QSL only direct via OH4MDY with a SASE and 2 USDs. His log will be available online at: http://www.clublog.org

XW, LAOS. By the time you read this, Naim, OD5LN, who was just active as XU7HRN from Sihanoukville, Cambodia, is expected to be active from Laos until November 24th. As of press time callsign is unknown. QSL via OD5LN.

YI, IRAQ. The "Iraq Amateur Radio Society" (IARS) club station YI1IRQ is once again back on the air as of November 14th. The last legitimate airing of YI1IRQ was in August 2008. Visit the IARS Web page at: http://www.iraqi-ars.org

Z6, KOSOVO. Marijan, S56A, will be active as Z6/S56A from south of Pristina, close to the Serbian monastery of Gracanica, during the CQWW DX CW Contest (November 24-25th) as a multiplier for the contest. He will operate as a Single-Op/All-Band/Low-Power entry. Marijan will be in Kosovo between November 22-26th. Activity outside of the contest will be on all bands using CW, SSB and RTTY. His equipment: TS-480 and a homemade coaxial multiband vertical antenna. QSL via S56A.

ZM4, NEW ZEALAND. Members of the East Coast Contesters ZM4T/ZM2M Team will be active using the callsign, ZM4T, in the CQWW DX CW Contest (November 24-25th) as a Multi-Multi entry. Operators mentioned are:

Lee/ZL2AL, Gary/ZL2IFB, Holger/ZL3IO, Peter/ZL2LF, Tom/ZL2MY and John/
ZL1BYZ. QSL via ZL2AL, only direct or LoTW with in 30 days or OQRS via
the ZM4T Web page at: http://www.zm4t.com

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 18th November 2012

Great Sadness

It is with great sadness to hear of the passing of Maura McClarey loving wife of EI6S George McClarey of Rosemount Co Cavan.

Maura sadly passed away in Cavan hospital on the 9/11/2012. May she rest in peace

George EI6S would be well known in the low band DX community worldwide and is a great pioneer and ambassador for amateur radio in Ireland.

We would like to express our deepest sympathy to George and his family friends and relation in this challenging time.

Mayo Rally

The Mayo Radio Experimenters Network rally takes place today at the Welcome Inn in Castlebar. Doors open at 11 a.m. and the usual traders will be in attendance.

All details are available on www.ei7mre.org the Mayo Radio Experimenters Network web site.

Tipperary Amateur Radio Group AGM

On Wednesday the 7th of November 2012 last, members of the Tipperary Amatuer Radio Group met at Raheen House Hotel at 8.30pm for their 18th Annual General Meeting. This was a well attended meeting with group members travelling from Co Kilkenny, Co Waterford, Co Limerick and Co Cork joining their Co Tipperary based colleagues. Paul EI3ENB chaired this very productive meeting with John EI7IG reading the minutes from last years AGM. The group treasurer Thomas EI2IT reported a healthy financial situation for this amateur radio group which was formed in October 1994. A review of the year and the group activities were then discussed at length. Particular praise was given to Eddie EI3FFB for reading the weekly IRTS news every Sunday evening at 8.30pm on 145.450mhz FM. Eddie provides a valuable service for the group and his efforts were very much appreciated. The new committee was elected for the coming year and the meeting concluded at 11.30pm when Paul EI3ENB

thanked all for their input and efforts in attending this most important event of the calender year for TARG. The new committee was elected as follows:-

Chairman- Paul Norris EI3ENB Vice Chairman - Eddie Kavangh EI3FFB Secretary - John Ronan EI7IG Treasurer -Thomas Hallinan EI2IT ThomPRO - Hugh O'Donnell EI2HI

---

5 MHz 'Sunset' Net Changes Frequency

The popular Sunday evening 'Sunset' Net on 5 MHz is changing frequency. The net, which as its name implies, meets around UK sunset time on Sunday evenings to compare propagation with that during the 5 MHz GB2RS News earlier the same day has for some time met on the UK's 5371.5 kHz channel.

Following a number of reception reports from Amateurs in the Republic of Ireland, the net participants have decided to move the Sunset Net's frequency to 5398.5 kHz (with a backup of 5278.5 kHz), beginning Sunday 18th November as both these latter two channels are available to EI Amateurs, whereas 5371.5 kHz is not.

We hope that more EI Amateurs with 5 MHz experimental licences will join us here in the future and indeed welcome all wishing to participate.

Galway Radio Experimenters

Galway Radio Experimenters club held their AGM in the Anno Santo hotel, Salthill on Sunday 11th November. The following were elected: Chairman; Larry EI9CN Secretary; Damian EI2HG Treasurer; Tom EI3ER

Committee members: Aengus EI4ABB Tycho EI9EXB

Tom EI3ER gave a very interesting lecture on the Clifden Marconi site. The next club meeting for GREC is Monday 3rd December.

DX News

Lord Howe Island will be activated by two Finnish operators from 17 - 27 November. They will use the callsigns VK9/OH1VR and VK9/OH3JR on 160 - 6m with CW, SSB and RTTY. Lord Howe Island counts as a separate DXCC entity and has the IOTA reference OC-004. QSLs go via the operators' home calls.

OZ6TL will operate as E51TLA from Raratonga in the South Cook Islands until 8 December. QSL manager is OZ6TL and logs will be uploaded to Logbook of the World.

For those who have not yet worked Gerry 7P8CC in Lesotho and still need this DXCC entity for a new one look out for 7P8D between 23 November

and 3 December. This is the callsign of a multi-national DXpedition and they will have three stations running 24/7. More details are available on http://www.zs2dl.co.za/7P8D.html

Oliver W6NV will be on Ascension Island from 19 - 30 November. He will use the callsign ZD8W and also be active in the CQ WW DX CW Contest on the weekend of 24/25 November. QSL to his home call.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Astronaut Suni Williams Enthralls Flagler Students in a Radio Chat From ISS

Posted: 17 Nov 2012 04:28 PM PST
http://www.eham.net/articles/29353

So, Suni Williams, what do you and your family sacrifice to be able to travel in space? Over. "Well," Williams, one of the most decorated astronauts in the world, replies, "the biggest thing we sacrifice is seeing each other. You know, we don't really get to choose when we go to space, so you might miss birthdays, weddings, anniversaries, and even if somebody gets sick at home you don't really have a choice about when you're coming home. So if something happens to somebody back on earth, I can't necessarily go see them. So I think that's probably the biggest sacrifice. We do have internet phone and video conferencing, so we do get to see them, but we know we won't be up here for long so we are all enjoying the time that I'm up here, and I'm relaying some of my stories to them, so that's making it better. Over." It could have been an exchange on Charlie Rose, who likes to have conversations with history-makers -- Williams, an Indian-American (that is, India) holds the record for longest space walk by any woman, most space walks and longest time in space, among other records.

To all SEANET 2012 Participants,

IMPORTANT NEWS TO ALL PARTICIPANTS (04 October 2012):

We would like to inform those interested to participate in 40th SEANET Kuala Lumpur, to register and confirm their participation before 15 November 2012, to guarantee your accommodation at the conference hotel.

Please take note that the hotel is fully booked for 27th November 2012 onward.

The organizing committee is unable to guarantee your accommodation at the conference hotel for registrations made after 15 November 2012.

To all who have registered, thank you for your participation and we look forward to meet you soon.

Your attention and immediate action to this is much appreciated.

Thank you.

GB2RS NEWS

Sunday 18th November 2012

The news headlines:

* Longest-serving GB2RS Newsreader becomes silent key

* Latest news on PLT

* New frequency for 5MHz Sunset Net

The Radio Society of Great Britain is saddened to report that its longest serving GB2RS Newsreader, Jimmy Porter, GI3GGY, died on Wednesday 7 November. He was 92 years of age and had spent the two previous weeks in hospital. Jimmy was an active member of the RSGB's news broadcasting team until 2009/2010. He thus served in this capacity for some 55 years. In March 1954 he was asked by the RSGB Secretary, John Clarricoats, G6CL, to make a test AM voice transmission on 40 metres in order to assess the hoped-for UK coverage during daylight hours. Subsequently, the RSGB obtained permission from the GPO to broadcast GB2RS news on the 80m band. The first GB2RS news broadcast was actually made by Frank Hicks Arnold, G6MB, of Walton-on-Thames, on 25 September 1955. H owever, shortly afterwards the GPO gave permission for 40 metres to be used as well, and Jimmy commenced news reading each Sunday morning on 7047.5kHz. He employed an RCA ET4336 broadcast transmitter and a massive HF log periodic antenna for the purpose. Our thoughts are with his family at this difficult time.

For over 15 years the RSGB has been active in standards work for powerline communications devices. The Society's position opposing the latest proposals was presented to the UK BSI committee, supported by other members, but the UK voted in favour which, along with other EU national committees, caused the standard to be approved. What does this mean for UK radio amateurs? New devices must be certified to meet EN50561-2012, which gives significant protection to the amateur HF bands through fixed notching to the levels of the previous standard. It also requires a test to confirm dynamic power control, which reduces levels dependant on the insertion loss between the PLTs. Broadcast DX frequencies are outside the notch-protected bands and could suffer interference 10,000 times higher than previously. Intermodulation effects could also give rise to interference in the protected bands. We are starting a campaign to investigate and report all problems thought to be caused by these devices. We need your help, as only by proving that these devices cause real problems can we successfully lobby for

modification to standard to reduce the permitted emissions. The small number of problems reported from the large population of these devices already installed in Europe swayed the vote on the standard. You can read more abut this in the January 2013 RadCom and on the RSGB website.

The popular Sunday evening 5MHz Sunset Net is changing frequency. The net, as its name implies, meets around UK sunset time on Sunday evenings to compare propagation with that during the 5MHz GB2RS News earlier the same day. It has for some time met on the UK's 5371.5kHz channel. Following a number of reception reports from amateurs in the Republic of Ireland, the net participants have decided to move the Sunset Net's frequency to 5398.5kHz, with a backup of 5278.5kHz, beginning today, 18 November, as both these latter two channels are available to EI amateurs. It is hoped that more EI amateurs with 5MHz experimental licensees will join the net in the future. They welcome all who wish to participate.

A Russian taxi business from the Moscow area is using FM on 21.4042MHz daily. You can often hear a female voice organising the business. IARU Region 1 continues to monitor the situation and encourages all amateurs to continue to use the frequency as normal.

Since October, mysterious Chinese signals on 7, 14, 21 and 21.010MHz have been heard. At first the A3E signals were sounding like a grunt or moo. These very strong multitone signals with a carrier and both sidebands have been heard

Copyright © RSGB 2012. Not for public release before Monday 19 November 2012 except as a GB2RS broadcast. every morning. The purpose is unknown, but IARU Region 1 encourages anyone who hears these signals to report them to the Intruder Watch service.

And now for the details of rallies and events for the coming week

The Mayo Radio Experimenters Network Radio Rally will take place today, 18 November, at the Welcome Inn, Castlebar, Co Mayo. Doors open at 11am and admission is 5 per adult. Children are free. The usual traders will be in attendance. More information about the rally can be found on the club website, www.ei7mre.org.

The North Wakefield Radio Club Rally will take place on Saturday 24 November at Drighlington [pronounced Drig-ling-tan] Community Hall, Moorland Road, Drighlington BD11 1JZ. Talk in is on S22, doors open at 10.30am and admission is £2, with accompanied under 14s free. More details from Tony, G0JVI on 0774 000 3159.

On 25 November it's the 34th CATS Radio & Electronics Bazaar, held at 1st Coulsdon Scout HQ, at the rear of the Council Car Park, Lion Green Road, Coulsdon, Surrey. Doors open from 10am to 1pm and admission is £1. There will be a Bring & Buy. Details from Glenn, G4FVL, at chairman@catsradio.org.

Also on 25 November, the Plymouth Radio Club Rally will be held at Harewood House, The Ridgeway, Plympton, Plymouth PL7 2AS. This is a new venue for this event. Doors open at 10am and admission is £2. There will be trade stands, a Bring & Buy as well as a talk-in station.

And now the DX news compiled from 425 DX News and other sources

HB9OAU will be on the air as 8Q7AU from the Maldives, IOTA reference AS-013, between 26 November and 11 December. Activity will be holiday style on 10 through to 80 metres, SSB only. QSL via his home callsign, direct or by the bureau.

Dave, WJ2O will be active as 8P9DF from Barbados, which is IOTA reference NA-021, from 20 to 28 November, including an entry in the CQ WW DX CW Contest. He will operate almost entirely CW, with a focus on 30, 17 and 12 metres outside the contest. QSl via his home callsign.

UU5WW, UU0JR and UT5JCW will be active as 3W2J from Vietnam on 22 to 28 November. The main activity will be during the CQ WW DX CW Contest; outside the contest they will operate CW, SSB and RTTY on 10, 15, 20, 40 and 80m. All of the QSOs will be confirmed automatically via the bureau and LoTW. Direct cards via K2PF; an OQRS will be provided by Club Log. Further information can be found at www.3w2j.com.

Look for 9H3OG and 9H3TX to be active from Gozo, Malta, which is IOTA reference EU-023, on 21 to 26 November. Their activity will include a Multi-Two entry in the CQ WW DX CW Contest as 9H3TX. QSL via DL4HG and DL5XAT respectively.

Prefix hunters should look out for the special Mongolian prefix of JU850 until 21 November. The regular JT prefixes can be replaced to celebrate the 850th birthday of Genghis Khan.

Now the contest news

The 1.3GHz UK Activity Contest takes place on 20 November from 2000 to 2230UTC. Using all modes the exchange is signal report, serial number and locator.

The big event of the month will be the busiest, the CQWW DX CW. It takes place for the full 48 hours of the weekend of the 24th and 25th and invariably keeps the CW portions of the HF bands really busy, especially any frequency where a DXpedition to a rarely activated country operates. Notwithstanding solar outbursts, conditions on the upper HF bands

Copyright £ RSGB 2012. Not for public release before Monday 19 November 2012 except as a GB2RS broadcast. could be very good this year, so QSO totals for the leading stations should be high. The exchange is signal report, and CQ Zone, which for the UK is 14.

The final event is the UK Microwave Group's Low Band Contest, which takes place on Sunday 25th. Because of the limited hours of daylight at the end of November, please note that this session is two hours shorter

than the other three in the series. Running from 1000 to 1400UTC and using all modes, the exchange is signal report, serial number and locator.

And now the solar factual data for the period from Friday the 9th to the 15th of November compiled by Neil Clarke, G0CAS on Friday the 16th of November.

Several large and complex sunspot groups were visible during the period but only one produced any sizable solar flares. Solar activity was low on the 9th and the 10th and again on the 15th. On the remaining days activity increased to moderate levels and high on the 13th. The largest solar flare was a M6 that took place early on the 13th. Several coronal mass ejections took place but none were directed towards Earth. Solar flux levels increased from 115 units on the 9th to 146 by the 13th, levels then declined slightly to 141 by the 15th. The average was 135 units. The 90 day solar flux average on the 15th was 119 units, that's two units up on last week. X-ray flux levels increased from B3.1 units on the 9th to B5.9 on the 12th. The average was B4.6 units. Geomagnetic activity was very quiet until the 13th when an anticipated coronal hole disturbance arrived. The most disturbed day was the 14th, with an Ap index of 31 units. The average was Ap 9 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from a slow 270 kilometres per second to 470 by the 14th. Particle densities were low but increased to 77 particles per cubic centimetre during the 12th. Bz varied between minus 1 and plus 5 nanoTeslas on the quietest day and between minus 19 and plus 20 nanoTeslas during the disturbance. Auroral contacts were made on 50MHz but were confined to high latitudes late on the 13th and again during the 14th. Daytime highs decreased by several MHz during the disturbance.

And finally the solar forecast for the coming week. At first the active side of the Sun will be looking our way but as the week progresses it will rotate out of view. Solar activity is expected to be low but there is a chance that activity could increase to moderate levels, especially during the first half of the week. Solar flux levels are expected to decline and be around the 120 mark by next weekend. Geomagnetic activity is expected to be quiet every day, however, there is a slight chance that a solar flare related coronal mass ejection could head our way; if one does than activity would increase. MUFs during daylight hours at equal latitudes should be around or slightly exceed 30MHz during most days. Darkness hour lows should be around 9MHz. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of around 29MHz. The optimum working frequency with a 90 per cent success rate should be about 24MHz. The best time to try this path will be between 1400 and 1700 hours UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week.

Wythall Radio Club is holding club net on 145.225MHz today and next Sunday. On Monday the Advanced course continues, and on Tuesday there's a talk by James, M0YOM, on filtering in the shack. Friday sees the shack social, and the CQ Worldwide CW Contest takes up all of next weekend. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications Club is running a club net on Monday from 7pm on 144.165MHz USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR and Friday sees an HF club net on 3.748MHz. Contact the FELCC Information Line on 07554 362 020 for more information.

Lincoln Short-Wave Club is holding a committee meeting on Monday. On Tuesday it's the 1.3GHz UK Activity Contest from the shack. Friday sees a formal meeting followed by the construction contest. For more information contact Pam Rose, G4STO, on 01427 788 356.

Lincoln Short-Wave Club is running a club net on 145.375MHz from 8pm on Thursday. The Saturday surgery in the shack starts at 9am, followed by the 50kHz UK Activity Contest at 8pm. Next Sunday sees a talk by Nick Miers about wartime Bletchley Park, and he will be bringing an original Enigma machine. For more information contact Pam Rose, G4STO, on 01427 788 356.

South Birmingham Radio Society has a committee meeting on Monday. On Thursday there are training classes with Dave Murphy, G8OWL, and Friday sees shack and aerial work. Contact Don, on 01214 581 603.

Central Radio Amateur Circle is running its Intermediate course via Skype on Tuesday, which also continues on Saturday. On Thursday there's a night on the air on 145.375MHz from 8pm. Details from Martin Hallard, G1TYV, by email to radio-circle@live.co.uk.

South Notts Amateur Radio Club is on the air and having a natter night on Wednesday. Saturday sees the Advanced weekend continue. Contact Robin, G4NDM, on 01159 372 942.

Now we return to the traditional listing in date order. On Monday Aldridge & Barr Beacon Amateur Radio Club is planning for 2013. Contact Albert, G0KFS, on 01922 614 169.

On Monday Gloucester Amateur Radio & Electronics Society is having a construction evening and operating on HF. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Tuesday Derby & District Amateur Radio Society is discussing technical topics. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday Loughborough & District Amateur Radio Club is watching the Gerry Wells video. More information from Chris, G1ETZ, on 01509 504 319.

Copyright © RSGB 2012. Not for public release before Monday 19 November 2012 except as a GB2RS broadcast. On Wednesday Midland Amateur Radio Society has training classes, an open meeting and the shack on the air. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday South Kesteven Amateur Radio Society is running its club net on 145.525MHz from 8pm. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday Telford & District Amateur Radio Society is having a talk on ARDF by G4KWQ. Contact Mike, G3JKX, on 01952 299 677.

On Friday Coventry Amateur Radio Society is having a radio workshop evening. Contact John, G8SEQ, on 07958 777 363.

NEWS FOR THE NORTH OF ENGLAND On Monday Sheffield Amateur Radio Club is having a talk on the Raspberry Pi computer by David Littlewood, G6DCT. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday Workington and District Radio and IT Group is having a talk on power supplies by Glyn M0XUH. For more information get in touch with Barry Easdon, G0RZI, on 01946 812 092.

On Tuesday Chester & District Radio Society is holding a surplus sale. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday Halifax & District Amateur Radio Society is having a talk by Raymond, G1MSD on his life with radio. Details from Martin, M0GQB, on 01422 341 317.

On Tuesday Morecambe Bay Amateur Radio Society is having a HF and 70cm night. Contact Sheila, on 07867 516 836.

On Wednesday Denby Dale Radio Club is having a demonstration of SDR receivers by Cross Country Wireless. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday Hornsea Amateur Radio Club is holding its AGM. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Wednesday Mid-Cheshire Amateur Radio Society is having a committee meeting. Contact Peter Paul Fox, G8HAV, on 01606 553 401.

On Thursday South Manchester Radio and Computer Club is having a talk on leap seconds by Ron, G3SVW. Details from Ron, G3SVW, on 01619 693

999.

On Thursday Wakefield & District Radio Society is having a natter night and is on the air from the club shack. Details from Ken, G8FSO on 07900 563 117.

On Saturday Wakefield & District Radio Society continues its Intermediate course from 13:30 with Chris, M0KJP. Details from Bill, 2E0IPC on 07905 178 845.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

Copyright © RSGB 2012. Not for public release before Monday 19 November 2012 except as a GB2RS broadcast.

NEWS FOR SCOTLAND Tonight and next Sunday West of Scotland Amateur Radio Society is having a club night with talks, quiz & a raffle. On Friday there's project work & learning. Details from Sam, GM4BGS, on 07771 554 035.

On Tuesday 20 November Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Friday 23 November Cockenzie & Port Seton Amateur Radio Club is having a talk on SOTA Activation by Dr Colwyn Jones. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. Bromley & District Amateur Radio Society continues its Intermediate course today. On Tuesday there's a construction contest with Richard, G8ITB. Details from Andy, G4WGZ, on 01689 878 089.

Farnborough & District Radio Society has a CW net on Monday at 1pm on 3.570MHz, then a Top Band net on 1.995MHz at 8pm. On Wednesday the club is holding its AGM, and Friday sees the 2m net on 144.675MHz from 8pm. Details from Neville, G3SPD, on 01252 404 816.

Now we return to the traditional listing in date order.

On Monday Braintree & District Amateur Radio Society is having a talk on metal detecting by Howard, G6LXK. For more information contact John, M5AJB, on 01787 460 947.

On Monday Burnham Beeches Radio Club is having a talk on a practical approach to fractal antennas by Charles, G0SKA. Contact Dave, G4XDU, on 01628 625 720.

On Monday East Kent Radio Society is having a visit by Chris Ridley and John Turner of Icom. Details from Karl Davies, M1DFM, on 01227 710 120.

On Monday Surrey Radio Contact Club is holding a natter and fix-it night. Contact John, G3MCX, on 02086 883 322.

On Tuesday Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday Chelmsford Amateur Radio Society is holding a 70cm net on GB3ER from 8.30pm. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday Verulam Amateur Radio Club is having a club meeting followed by talk. Contact Ralph, G1BSZ, on 01923 265 572.

On Wednesday Banbury Amateur Radio Society is having a demonstration of slow scan television. Contact John, G8OZH, on 07774 525 818.

On Wednesday Chesham & District Amateur Radio Society is having a technical talk on safe and effective vehicle installations by John, G8SYD. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday Norfolk Amateur Radio Club is having a talk by Steve Appleyard, G3PND, on the Reverse Beacon Network and how to use it. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday Worthing & District Amateur Radio Club is having a photo quiz with G4LRP. Contact John, G8FMJ, on 01273 593 232.

Copyright © RSGB 2012. Not for public release before Monday 19 November 2012 except as a GB2RS broadcast. On Thursday Bredhurst Receiving and Transmitting Society is having a homebrew demonstration. Details from Charles, G4VSZ, on 07982 244 788.

On Thursday Edgware & District Radio Society is looking at amateur radio to suit your environment. More information from Mike, G4RNW, on 02089 500 658.

On Thursday Fort Purbrook Amateur Radio Club is having lunch at Lloyds Bar, Port Solent, at 1.15pm. Contact Neil Hoare, M0NEH, on 02392 378 559.

On Thursday Huntingdonshire Amateur Radio Society is having a talk on baluns by Steve, G1KWF. Details from David Leech, G7DIU, on 01480 431 333.

On Thursday Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Contact Tim Ward, 2E0TJW, on 07810 481182.

On Thursday Reading & District Amateur Radio Club is having a talk on amateur radio at the North Pole by Michael Meerman, M0MPM. Details from Pete, G8FRC, on 01189 695 697.

On Thursday Shefford & District Amateur Radio Society is having a quiz, organised by David, G8UOD. Details from John Burnett, M6JBU, on 07860 804 793.

On Thursday Vange Amateur Radio Society is having a natter night. Contact Steve, G0KVZ, on 01268 552 606.

On Friday Cambridge & District Amateur Radio Club is having a talk on the history of broadcasting by Ron, G3KBR. Contact Ron, G3KBR, on 01223

501 712.

On Friday Itchen Valley Amateur Radio Club is holding a members' forum. Details from Liz, M0ACL, on 02380 254 599.

On Friday Mid-Sussex Amateur Radio Society Radio is having an operating evening in the shack. Contact Rob, 2E0RJA, on 01444 232 129.

On Friday Radio Society of Harrow is having a talk on the vector network analyser by Brian, G3YKB. More information from Linda, G7RJL, on 02083 868 586.

On Saturday Kent Weald Radio Club is holding its regular monthly meeting. Details from Patrick, G0UXG, via email to palybl@btinternet.com.

NEWS FOR THE SOUTH WEST Exeter Amateur Radio Society has its HF net on 3.675MHz on Monday from 19:45. The Tuesday 2m net is on 145.575MHz at 19:45 and on Thursday it's the 4m net on 70.425MHz from 19:00. Contact Nick, 2E0NRJ, on 01363 775 756.

On Monday Appledore & District Amateur Radio Club is holding a Bring and Buy sale. Contact Brian Jewell, M0BRB, on 01237 473 251 for more information.

On Monday Weston Super Mare Radio Society is discussing wireless restoration topics. Details from Paul, G3SDH, on 01761 221 206.

On Wednesday Thornbury & South Gloucestershire Amateur Radio Club is having a video night. Contact Tony, G0WMB, on 01454 417 048.

On Wednesday Trowbridge & District Amateur Radio Club is having a natter night. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

Copyright © RSGB 2012. Not for public release before Monday 19 November 2012 except as a GB2RS broadcast. On Thursday Cornish Radio Amateur Club November is having a construction night. Note that this is a change of date due to local elections. Details from Steve, G7VOH, on 01209 844 939.

On Thursday South Bristol Amateur Radio Club is holding its AGM. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750.

On Friday Poole Radio Society is having an activity night & Intermediate course session. Details from Bill Coombes, G4ERV, by email to secretary@g4prs.org.uk

On Friday Torbay Amateur Radio Society is having a natter night with the TARS 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

On Sunday Plymouth Radio Club is running the Plymouth Radio Rally. Details from Rob James, 2E0ONO, via email to Robert-james@virginmedia.com.

NEWS FOR WALES On Monday 19 November Dragon Amateur Radio Club is holding its AGM. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Tuesday 20 November Carmarthen Amateur Radio Society is having an open night. Details from Lloyd, 2W0LLT, on 01239 711 297.

On Tuesday 20 November Wrexham Amateur Radio Society is having a CW night with Pat. Contact Frank Bailey, M1EYH, via email to fcbailey20@btinternet.com.

It was supposed to be but a few Realops tried to get the story pulled
only to be told it wasn't possible. Whether it got read out on air I
don't know but it obviously got pulled from the printed edition.

My understanding is that the script has to be submitted to Ofcom on the
previous Wednesday, for approval. [I don't know whether anything has
ever been disapproved.] Thereafter, on the Sunday news bulletins, the
approved script is supposed to be read verbatim from end to end (which
is why, fairly recently, a certain long-term reader was obliged to give
up reading).

#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
12 - 18 November 2012

Solar activity ranged from low to high. On 12 November, moderate
levels were observed due to a M2 X-ray flare from Region 1613 (S22,
L=210, class/area Dso/170 on 12 November) and associated Type II
radio sweep (645 km/s) at 12/2328 UTC. Solar activity increased to
high levels on 13 November due to a M6 X-ray flare, also from Region
1613, and associated Type II radio sweep (1193 km/s) at 13/0204 UTC.
This region also produced two M2 X-ray flares and an associated 10
cm burst of 220 sfu at 13/2052 UTC, but showed signs it was
decreasing in areal coverage. Region 1613 continued its M-class
flare activity into 14 November, producing a M1 X-ray flare, but
continued to slowly decrease in area. A return to low levels was
observed from 15 to 18 November. A C8 flare from Region 1618 (N08,
L=136, class/area Eai/90 on 18 November) occurred at 16/1539 UTC
with an associated Type II radio sweep (511 km/s) and a non-earth
directed coronal mass ejections (CME). A long duration C1 flare from
Region 1613 also occurred on 16 November with an associated 24
degree filament eruption centered near S39E22. Another filament
eruption was observed from the East limb, as seen in SDO/AIA 304
imagery, but analysis of SOHO/LASCO C2 suggested these eruptions
would not be geoeffective. While there were many new CMEs observed
over the 7 day period, none were determined to be earth-directed and
have had little to no observable impacts.

No greater than 10 MeV proton events were observed at geosynchronous
orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal background levels on 12 and 13 November, but reached moderate
levels on 14, 15, and 16 November. The week ended with high levels
for 17 and 18 November with the maximum value reaching 3160 pfu.

Geomagnetic field activity ranged from quiet to major storm levels.
The week started off at quiet to unsettled levels, but by late 12
```

November to early 13 November, the effects from the two CMEs from 09 and 10 November were being felt. ACE data indicated a shock arrival at 12/2216 UTC and a sudden impulse was observed on earth at 12/2316 UTC (16 nT, as measured by the Boulder USGS magnetometer). The maximum southward component of Bz reached -19.5 nT at 12/2338 UTC, the total IMF reached 22.8 nT at 13/0053 UTC. The solar wind speed, as measured by the ACE spacecraft, reached a peak speed of 504 km/s at 13/0111 UTC. The geomagnetic field responded with unsettled to active levels throughout the day on 13 November, but increased to major storm levels early on 14 November. The increase in activity was caused by prolonged period of negative Bz attributed to a combination of lingering CME effects and a solar sector boundary crossing that occurred at approximately 14/0245 UTC, followed by a negative polarity coronal hole high speed stream (CH HSS). Activity returned to quiet to unsettled levels for the remainder of the week (15 - 18 November).

Forecast of Solar and Geomagnetic Activity
19 November - 15 December 2012

Solar activity is expected to be low with a chance for M-class flares through 27 November when Region 1618 is due to rotate off the west limb. Very low to low conditions are expected from 28 November through 05 December. From 06 December to the end of the period, low conditions are expected with a chance for M-class activity with the return of Region 1613.

No greater than 10 MeV proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to remain at moderate to high levels through 24 November. Normal levels are expected to return from 25 November through 03 December. Moderate to high levels are expected from 04-06 December due to coronal hole high speed stream (CH HSS) activity. Normal levels are again expected to return from 07 December through 13 December. From 14 December to the end of the period, expect moderate to high levels to return with CH HSS activity once again.

Geomagnetic field activity is expected to be mostly quiet through 02 December. Unsettled levels are likely on 03 and 04 December due to a possible solar sector boundary crossing (SSBC) followed by a CH HSS. Mostly quiet levels return from 05 December through the end of the period, except for a chance for unsettled activity on 11 December due to a possible SSBC/CH HSS.

HamRadioNow: California Dreamin' - The TWIT Tour, Leo Laporte Interview,
and more

Posted: 18 Nov 2012 07:45 AM PST
http://forums.qrz.com/showthread.php?368830-HamRadioNow-California-Dreamin-The-TWIT-Tour-Leo-Laporte-Interview-and-more&goto=newpost

HAMRADIONOW.tv

Episode 32: California Dreamin' ☐

Stuff, California, TWiT, and Leo W6TWT

So much 'Stuff' this episode comes in two parts.

Part One: Jeff AC4ZO returns to HamRadioNow, but can't keep Gary KN4AQ on
track as he

rambles on about his trip to Atlanta where he saw the Coke Museum, Georgia
Aquarium,

CNN, and took a Segway tour. That's the "stuff". In California, we see
several iconic Silicone Valley

signs, which lead us to Xerox PARC and Stanford University for some history
of the

personal computer, and finally a tour of W6YX, the little radio club at
Stanford.

Part Two: We head north from Silicone Valley, up to the quaint town of
Petaluma, home of the

TWiT Studios and Ham Nation. Gary gets an extensive tour of (and below) the
studios and all

the technology that keeps it humming from Studio Manager John Slanina (aka
JammerB).

And finally, Gary's interview with Chief TWiT Leo Laporte W6TWT. Leo
reveals the real

reason he got a ham license, and what he plans to do with it.

I'll not go in to all the details Ian (to protect the gullible and the co-operative) the story was submitted and accepted, I personally begged to get the story pulled when some facts came to light (nothing to do with saving the RSGB's blushes I might add) only to be told it couldn't be done. Perhaps if what you say is correct it'll appear in next weeks news.

Fort Wayne Hosts Largest Hamfest in Indiana:

Posted: 19 Nov 2012 01:32 AM PST
http://www.eham.net/articles/29358

FORT WAYNE, Ind. (WANE) - The Memorial Coliseum in Fort Wayne hosted the largest Hamfest and Computer Expo in Indiana on November 17 and 18. The event featured amateur radio equipment, vendors, emergency equipment, and more. Jim Boyer, the Hamfest chairman, said this year was the 40th anniversary for the event. "There are 300,000 amateur radio operators in the United States and about 10,000 or so in Indiana alone, so there is a lot of interest here," Boyer said.

William Kleronomos, KD0HG (SK):

Posted: 19 Nov 2012 01:30 AM PST
http://www.eham.net/articles/29357

The funeral service for William Kleronomos is this Sunday, Nov. 18 in Longmont, Colo. The long-time chief engineer for Clear Channel's KBCO(FM), Boulder, Colo. died Tuesday at the age of 61. The cause was not reported. He had been the CE of KCBO since 1995. "While Bill was an integral part of the Denver engineering team there are many of us in this company that have also been touched by his willingness to help at any time. He was also very popular in the ham radio community, KD0HG," according to Mike Irby, director of engineering and IT for Clear Channel's Denver cluster. "I've worked with Bill for several years even before coming to Denver," Mike told Radio World. "He was instrumental in the early days of Clear Channel's HD rollout. KBCO was on the forefront of that and his findings helped many others in the company as they began installing their equipment. Bill loved radio and lived to help others anytime he could. There was never a time that I knew him to not be happy about life and what he was doing."

MDSR V2.5 has now been released (multi plaform IF-SDR interface) RIG upgrade

Posted: 18 Nov 2012 08:10 PM PST
http://forums.qrz.com/showthread.php?368916-MDSR-V2-5-has-now-been-released-(multi-plaform-IF-SDR-interface)-RIG-upgrade&goto=newpost

The new SDR upgrade software can be downloaded from the Yahoo user Group:

http://groups.yahoo.com/group/mdsradio/

Please join the group to access all the information and instructiuons on
how to upgrade all different types of radios.

The new update builds on the multi platform system (FT-817,857,897,
IC-7000, IC703,706 and more) and provides IF SDR capabilities to these
transceivers. All that is required is the LIF2012 PCB and it connects the
radio via the IF down-converter to the sound card.

The new V2.5 has a new filter slope setting for the RX and TX filter which
allows to precisely tailor the LIF filter response for extreme audio
clarity. Adjustment instructions can be found in the pdf manual which is
accessible through the "Disk" icon on the MDSR-spectrum analyzer window -
click on "Manual MDSR-J Engine".

The MDSR software is free to use as long as it is for non commercial HAM
radio purposes.

Thanks a lot and have a great time with the new release;

The MDSR Team

though there seems to be some confusion as to the validity of the story,
any way here is the story from the

Ulster Telvision News Service. And if true, well done him. A confirmation from you chaps in the USA would be nice.

Regards

Damian

IRLP/EchoLink Weather Net - Via James (Jim) Langille, VE1JBL

I just want to let you know about a fairly new net on Saturday nights called the Weather Radio Listeners Newsletter Net. It is hosted by Gordon Maybee, VA3WXA out of Toronto. It begins at 8pm Atlantic, 7pm Eastern on IRLP Reflector 9034 and if you have a computer, Echolink node 223557. It has information about Weather Radio and also CANWARN. It will also include weather warnings across Canada and power outages. We are trying to make this a Cross Canada Net to include all provinces and Territories.We are looking for station from Qu**bec to participate as we do not have any stations checking in from there yet.

We are looking for stations who are interested in weather to take part. If you have a weather station, you can report your findings at your QTH or if you have any local severe weather going on, you can report on that.

For more information about the net, go to The Maritime Amateur website http://www.maritimeamateur.ca/ and click on CANWARN. Once there, click on CANWARN news where you will find articles on this net. Here is the direct link: http://www.freewebs.com/ve1jbl/canwarnnews.htm

Any questions, please let me know. Thanks for reading, Hope to hear you on the net,
James (Jim) Langille VE1JBL

Antenna Masts in NSW -- Write to Your MP:

Posted: 20 Nov 2012 05:44 AM PST
http://www.eham.net/articles/29365

The battle over NSW planning restrictions on amateur radio antenna masts now has to enter a new phase - the political campaign. We want you to write a polite letter to your local member, to briefly explain our issue with planning restrictions and council red tape when you want to put up an antenna mast, and to ask them to find out why this matter is NOT being considered in the current Planning System Review. If you don't already know, or are unsure of the details of who to write to, here's how to find out. Guidelines on writing your letter, along with other information on the community benefits of amateur radio, can be downloaded from the links below.

Radio Vibes:

Posted: 20 Nov 2012 03:06 AM PST
http://www.eham.net/articles/29362

THE sudden afternoon downpour makes it gloomy in Bangi, Selangor. So much so that the atmosphere in an action-adventure hobby store tucked away in a block of unassuming shoplots takes on a mysterious air. Packed with gadgets and collectibles, this is where Rafidah Muhammed, 40, spends a big portion of her time. Here she runs hobby store RNJ Venture in Bangi, Selangor with her husband, former national weightlifter Ahmad Janius Abdullah. The venue is also headquarters for the Association of Two-Way Radio Communications Fans of Selangor (Persatuan Peminat Komunikasi Radio Dua-Hala Selangor, or better known as Pradas), a society which provides amateur radio fans a platform where they can learn about and train in constructing,

experimenting and communicating using two-way radio equipment legally. Rafidah is one of the few female committee members in the association. Apart from being the treasurer, she is also an Amateur Radio operator -- also called ham radio operator -- having earned a Class B licence from the Malaysian Communications And Multimedia Commission (MCMC) in 2008 that enables her to operate radio equipment from a home, a vehicle and anywhere in the country.

The ARRL Contest Update

Published by the American Radio Relay League
****

November 21, 2012

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- All Hands At the Key - CQ WW CW
- Digital Everywhere - TARA RTTY, 10 Meter RTTY, SARL Digital
- New Categories for ARRL VHF+ Contests
- Propagation Resources Galore
- Tower Know-How by W2GD and K4ZA
- ARRL June VHF and Aug UHF Online Writeups
- Antenna System Wisdom from W3LPL
- Electronic Component Reference Collection
- Gain Damaged

NEW HF OPERATORS - THINGS TO DO

The biggest CW DX contest of the year - CQ WW CW - is here! You can work a lot of DX with just a modest station on CW and the bands will be full. Know your CQ zone <http://cqww.com/resources.htm> and have at it! The following weekend is a day-night doubleheader of the 10 Meter RTTY Contest in sunlight and the ARRL 160 Meter Contest - another CW festival - in the dark hours. I hope you have a full coffee pot!

BULLETINS

A weekend fire at the V26B station destroyed the shack and caused the host, Roy V21N to suffer some smoke inhalation from which he recovered overnight - best wishes, Roy! Thus, V26B will not be active this weekend but operator Bud AA3B plans on lashing a station together and operating with an alternate V26 call sign. Elsewhere, impassable roads have resulted in the cancellation of the planned V47NT activity in CQ WW CW by Andy N2NT. Hurricane Sandy also did major damage to the QTH of CO8LY <http://www.deltadx.net/CO8LY/CO8LY.htm>, destroying his ham shack and home.

BUSTED QSOS

A golden issue last time - perhaps that will translate to a low error rate for you editor in his contest adventures!

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Nov 24-25

- CQ World Wide CW Contest
- SKCC Straight Key Sprint
- Top Band Sprint

Dec 1-2

- ARRL 160 Meter Contest--CW (Nov 30)
- TARA RTTY M�l�e
- Top Operators Activity Contest--CW
- AWA Bruce Kelly QSO Party--CW
- 10 Meter RTTY Contest
- SARL Digital Contest
- ARS Spartan Sprint--CW (Dec 4)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

We've just gotten used to the idea of Low Power categories for Unlimited and Multioperator entries in ARRL HF contests - how about for VHF+ contests? Yes, two new categories have been added there, too, beginning with the ARRL January VHF Contest <http://www.arrl.org/january-vhf>. First is the 3-Band category in which participants are limited to 100 W or less on 6 and 2 meters, and 50 W or less on 70 cm. This category is just right for those sporting an "all-band, all-mode" rig! To encourage new hams to give VHF+ contests a try without having to buy new equipment, the FM Only category allows operation with 100 W or less on the 6 meter, 2 meter, 1-1/4 meter, and 70 cm bands. Experienced VHF+ contesters will want to include FM capability to work these new stations. Remember to upgrade your logging software and operating aids to add these new categories well in advance of the January contest date.

Along with the FM-Only category, the ARRL Rookie Roundup <http://www.arrl.org/rookie-roundup> offers yet another path to contest enjoyment on HF. The December 16th edition is the contest's CW event and is a great six hours of fun, encouraging the new hams to give their new-found Morse methods a try. If your club has been active in the other fall contests, here's an opportunity to keep the ball rolling by encouraging members to operate. Don't forget that individual operators can form teams! It will keep them in shape for the January North American QSO Parties <http://ncjweb.com/naqprules.php>, too.

A new release of the Super Check Partial database files is now available <http://www.supercheckpartial.com/> with 44,295 calls in the MASTER.DTA file and 11,939 calls in the MASTERTTY.DTA file. You still have to copy what they send on the air, though! Make sure your CTY file of prefixes <http://www.country-files.com/cty/> is also up to date well in advance of contests, big and small. (Thanks, Bob WA1Z)

The FCC has just released a new NPRM
<http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-12-140A1.pdf>
that solicits comment regarding the creation of the new amateur band at
135.7-137.8 kHz and proposes to upgrade the amateur allocation from
1900-2000 kHz to primary status. There is quite a bit of other material
addressing allocation through microwave. Watch for more detail on the
ARRL website <http://www.arrl.org/> over the next week or so. In the
meantime, changes to Part 97.301 and 97.303 are on pages 108 and 109 of
the referenced NPRM document.

Don NR7X wrote a good article in Electronic Design
<http://electronicdesign.com/blog/secondary-emissions-4/analog-and-mixed-signal/amateurradio-emergency-services-disasters-74616?NL=ED-03&Issue=ED-03_20121107_ED-03_282&YM_RID=kd2kw@yahoo.com&YM_MID=1350625&sfvc4enews=42>
about Amateur Radio in disasters. While the general thrust of the
article is to educate non-ham readers, he raises a particularly
important point for hams, "One can't just get a license, wait for a
disaster, and show up," reminding us all of the need for training and
practice. Contests are good operating training but you still need to
know about emergency procedures and practices in your area. He also
notes that as an incentive for training and practicing "You will learn
useful stuff." (Thanks, Mike KA5CVH)

The following books on early wireless technology are recommended by
Dave W6NL:

- Hugh G. J. Aitken, "Syntony and Spark: The Origins of Radio," J.
Wiley & Sons, 1976 and "The Continuous Wave: Technology and American
Radio, 1900-1932," Princeton Univ. Press, 1985.
- George C. Southworth, "Forty Years of Radio Research," Gordon &
Breach, 1962. It's about the AT&T experiments with short wave radio in
the late 1920's that used a ham station and a ship to plot skip zones.
- Gerald F. J. Tyne, "Saga of the Vacuum Tube," Howard W. Sams & Co.,
1977.

If the worldwide spotting networks are flooding your band map to a
distracting degree, here is a tutorial <http://www.sdxa.org/?p=308> by
Wayne WA1PMA on using VE7CC's CC User <http://www.ve7cc.net/> spotting
network management software. More than just filters, the software is a
tool set for making the spotting network give you the information you
need. (Thanks, John K3TN)

Ian G3NRW <g3nrw-radio@ntlworld.com> has updated his 160m Band
Utilization Chart
<http://homepage.ntlworld.com/wadei/160m_band_utilization.htm>. It now
shows the JT9 dial frequency at 1.8395 MHz. Send Ian any updates or
additional details you might have. He also publishes a 30m Band
Utilization Chart
<http://homepage.ntlworld.com/wadei/30m_band_utilization.htm>, a UK 60m
Band Utilization Chart
<http://homepage.ntlworld.com/wadei/UK_60m_band_utilization.htm>, and
sponsors the Top Band Digital Group
<http://groups.yahoo.com/group/TBD160> (TBD160).

With new licensees lining up for tickets, Fred K3ZO reports that the Thai telecomm authority (NBTC) has not changed the regulations which require an 8 wpm Morse test in order to upgrade to HF status. Building on May's successful exam session, 32 new hams were recently licensed and most of them should appear on the HF bands soon. Assuming they are just getting started, be gentle with them if they show up during CQ WW CW!

What international events happened when the cook dropped the Thanksgiving dinner? Why, the downfall of TA, the destruction of BY, the ruination of SV, and the ascendance of HA! A tip of the Contest Update cap to our friends around the world on the occasion of the American Thanksgiving holiday.

Web Site of the Week - WorldRadio Online <http://www.worldradiomagazine.com/old_wro/articles/bio/luetzelschwab/luetzelschwab.html> propagation columnist, Carl K9LA has some great propagation resources <http://myplace.frontier.com/~k9la/index.html> on his web site including downloadable PDF copies of both NM7M propagation books and a slide presentation showing an update on Cycle 24. Carl is also busy working on the ARRL Handbook's <http://www.arrl.org/shop/ARRL-Handbook-2013-Hardcover-Edition/> chapter on Propagation and is the author of the annual IARU HF Championship <http://www.arrl.org/iaru-hf-championship> results. More propagation resources have been published by Steve G0KYA, including a downloadable PDF eBook "Understanding LF and HF Propagation <http://g0kya.blogspot.com/2010/11/understanding-lf-and-hf-propagation.html.>". You can also get regular propagation bulletins <http://arrl.org/w1aw-bulletins-archive-propagation> as part of your ARRL membership.

WORD TO THE WISE

A question this time - there is a specific slang term for the parts left over after a piece of equipment has been reassembled but runs fine without them. Does anyone know that term (no fair just making one up and naughty ones are not appreciated) and have any documentation of it?

==> SIGHTS AND SOUNDS

The latest online webinar is a presentation by tower and antenna mavens John W2GD and Don K4ZA, "...outlining things we've learned from almost 100 years of combined experience, focusing on safety, cost-savings, and problem-solving." The date is Wednesday, December 12, at 9 PM EST (Thursday, Dec 13th at 0200 UTC) and registration <https://www2.gotomeeting.com/register/761813138> is free, courtesy of the World Wide Radiosport Operator's Foundation <http://wwrof.org/> (WWROF). (Thanks, Ken K4ZW)

And you wondered why they were called paddles <http://www.youtube.com/watch?feature=player_embedded&v=mPW4NWQYVic>? (Thanks, Kirk K4RO)

I think all the little pistols out there can identify with this song <http://www.youtube.com/watch?v=uNWZjzrzgwA&feature=plcp> by NT8K. (Thanks, Tim K3LR)

Finally, those of you who frittered away hours and hours in the pre-Dungeons and Dragons era by programming the Game of Life <en.wikipedia.org/wiki/Conway's_Game_of_Life> and experimenting with different starting patterns (this is somewhat autobiographical) will enjoy and marvel at the new floating-point implementation of the called Smoothlife <http://boingboing.net/2012/10/11/game-of-life-with-floating-poi.html>.

==> RESULTS AND RECORDS

Lots of activity at the ARRL Contest Branch Bar and Grill - manager Sean KX9X reports that online, expanded writeups for the June VHF and August UHF Contest have been posted <http://www.arrl.org/contest-results-articles>. In addition certificates for the 2011 160 Meter, 2011 10 Meter, and 2012 RTTY Roundup contests are either shipped or about to be shipped. Keep an eye on award status for ARRL contests online <http://www.arrl.org/plaques-and-certificates>! Meanwhile, over at the Log Submission Corral, the numbers just keep rising: even with hurricane Sandy's depredations, 1259 CW Sweepstakes logs were received before the deadline and 960 Phone Sweepstakes logs have been received thus far.

CQ World Wide Contest Manager, Randy K5ZD reports, "The raw scores for CQWW SSB 2012 have been updated <http://www.cqww.com/claimed.htm?mode=ph> to correct a multiplier scoring problem with some Zone 2 stations. Thanks to KF2O and W2JU for making inquiries that resulted in helping us find the score calculation error. We currently have 7999 logs received."

OPERATING TIP

The joy of socks? Siggi TF3CW suggests wearing knee-high compression socks <http://en.wikipedia.org/wiki/Compression_stockings> to reduce leg swelling from sitting for long periods of time in a contest. (and maybe in a plane, too) These thin socks improve leg circulation. Don't forget Alan K6SRZ's suggestion of taking a low-dose aspirin to reduce the probability of blood clots, as well. I confess to wearing some extra-special pairs of hand-knit socks for contests - thanks, Mom!

==> TECHNICAL TOPICS AND INFORMATION

Frank W3LPL checked in with some solid engineering advice for antenna systems. "In the real world, receiving (or transmitting) problems are often caused by faults rather than by inadequate design. The most common problems are connectors and deteriorated coaxial cable caused by poor installation practices and moisture entry. Faults are best found through regular inspections, rather than (as many of us do) waiting for the fault to become so severe that it's obvious. A resistance measurement of your transmission line performed inside your shack takes

only a few seconds and will reveal many of the most common faults. A VSWR sweep with an MFJ-259 or your favorite instrument is also very useful. VNA (vector network analyzer) and TDR (time-domain reflectometer) measurements are also very helpful if you have that capability (you should!). Keep records of your measurements so that changes will be apparent. Any change is cause for an investigation."

Many of us use surplus ½-inch CATV hardline for long cables to antenna farms. Stan K5GO describes his method of attaching a PL-259 to the line - "I use about six inches of .625" OD (5/8") x .058"-wall tubing slit about 2.5 inches and four times on either end to fit over the back of the PL-259 and outer jacket of hardline and used some hose clamps. (It) takes about ten minutes start to finish and cost is minimal. A little Penetrox, some Scotch 88, a soldered center conductor and I've not had a problem in eight years." (Thanks, Stan K5GO)

If you need an audio mixer in the shack or elsewhere, Don W3FPR recommends the inexpensive Behringer or Xenyx 802 model. "It is a small pro-type mixer, but you can mix up to 2 stereo channels, plus 2 mono channels plus one "tape.CD" input - each with individual level controls. The output is headphone level. It (also has) faders and a three-band equalizer for each channel." Terry WA0ITP also found a website with several good mixer designs <http://sound.westhost.com/articles/audio-mixing.htm> if you like rolling your own.

Use caution when using a compressed-air antenna launcher made of PVC. Grant KZ1W warns that, "...minor damage can escalate into ruptures and high-energy flying slivers and fragments...Handling damage can be concealed, cold is bad since the plastic gets brittle, and heat is bad because the pressure rating is significantly reduced. Making [the gun] from Schedule 80 PVC pipe is probably safer, since the pressure ratings are much higher (and) the fittings much stronger. Good solvent gluing is extremely important as a 4" PVC cap on a pressure tank at 80psi has about 1000 lbs of force on it."

In researching some old magazine articles, I stumbled on a home do-it-yourself project you just don't see much these days. The October 1924 QST article by 7AGI (before the days of prefixes) is titled "A 100-Foot Wooden Tower" and not much besides a saw and common hand tools was required. It was designed to hold wire antennas, not beams, and no word is given on whether it was climbable or not. The method of erection? A 40-foot gin pole!

Here are some more modern do-it-yourself projects:

- Sparkfun LogicBlocks
<http://www.edn.com/electronics-products/other/4401043/SparkFun-s-LogicBlocks-kit-teaches-digital-logic-?cid=EDNToday>
kit for the young experimenter in the family

And from the Instructables website:

- An Internet connected control knob
<http://www.instructables.com/id/ControlBox-An-internet-connected-knob-to-control/>

- Removable tablet and phone car mounts
<http://www.instructables.com/id/Tablet-iPad-removable-car-mount-for-1-in-5-minu/>

- A USB flash "diskette"
<http://www.instructables.com/id/USB-Flash-Diskette/>

Recognizing that switch-mode power supplies can cause a lot of RFI,
this EDN magazine article
<http://www.edn.com/design/power-management/4400304/Low-Noise-switching-power-supply-is-id
eal-for-AM-and-FM-bands-in-automotive-radio-systems?page=1>
describes a power supply intended for use in mobile radio receivers.

Trying to protect delicate receiver front ends from the marauding
signals of a legal-limit RF amplifier a fraction of a wavelength away
can be a challenge. This front-end saver design
<http://www.ok1rr.com/index.php/technical-topics/39-yet-another-front-end-saver>
shows how OK1RR solves the problem. (Thanks, Jose EA7BJ)

Where do you go to look up information about components and other bits
of electronics, especially when you're not near your workbench library?
The Radio-Electronics
<http://www.radio-electronics.com/info/data/index.php> website answers
a lot of those needs with this online collection of reference tables
and compilations.

Technical Web Site of the Week - Stu K6TU has released an online
propagation mapping and prediction tool <http://k6tu.net/> you just
won't be able to stop using! It uses the VOACAP prediction engine on a
speedy server to generate hour-by-hour frequency coverage maps based on
your specified geomagnetic conditions, the date, and your station
characteristics. The web-based user interface is well-done and the
results are fascinating!

==> CONVERSATION

Gain Damaged

Fans of Pink Floyd may remember the song "Brain Damage
<http://en.wikipedia.org/wiki/Brain_Damage_(song)>" about band leader
Syd Barrett's descent into insanity. Sometimes Sunday afternoon of a
48-hour contest can feel a little like that - albeit thankfully
temporary and quite reversible. At any rate, if you hit The Wall
<http://en.wikipedia.org/wiki/The_Wall> and the interference starts to
Meddle <http://en.wikipedia.org/wiki/Meddle> with you...here are some
new words you may find useful, courtesy Dr Beldar.

The QRM is multi-path.
The QRM is multi-path.
It takes chordal hops and scatters back and laughs
Got to work the echoes off the back.

The QRM is in the calls.
The QRM is in the calls.
The band map shows a list of needed mults galore
And every hour the spotting net brings more.

And if the sunspots peak many years too soon
And if there is no tower on the hill
And if the band explodes with signals like a zoo
I'll work you off the dark side of the moon.

The QRM is in my head
The QRM is in my head
You raise the gain, the filters change
Attenuate them till they're tame.

The mike is stuck
I've thrown away the key
There's someone in my log but it's not me.

And if the thunderstorms clamor in your ear
You call and no one seems to hear.
And if the mode you're on hears signals you can't tune
I'll work you off the dark side of the moon.

73, Ward N0AX

==> CONTESTS

21 November through 5 December 2012

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

CQ World Wide CW Contest--CW, from Nov 24 0000Z to Nov 26 2400Z. Bands (MHz): 1.8-28. Exchange: RST and CQ zone. Logs due: Dec 21. Website: cq-amateur-radio.com <http://cq-amateur-radio.com>

SKCC Straight Key Sprint--CW, from Nov 28 0000Z to Nov 28 0200Z. Monthly on the fourth Wednesday UTC. Bands (MHz): 1.8-28, 50. Exchange: RST, S/P/C, name, SKCC nr or power. Logs due: 5 days. Website: www.skccgroup.com <http://www.skccgroup.com>

Top Band Sprint--Phone,CW, from Nov 29 0000Z to Nov 29 0600Z. Bands (MHz): 1.8. Exchange: RST, S/P/C, ARCI number or Power. Logs due: 14 days. Website: www.qrparci.org/contests <http://www.qrparci.org/contests>

ARRL 160 Meter Contest--CW, from Nov 30 2200Z to Dec 2 1600Z. Bands (MHz): 1.8. Exchange: RST and ARRL/RAC section if US/VE. Logs due: Jan 1. Website: www.arrl.org/contests <http://www.arrl.org/contests>

TARA RTTY M�l�e--Digital, from Dec 1 0000Z to Dec 3 2400Z. Bands (MHz):
1.8-28. Exchange: RST and State/Province or serial. Logs due: Jan 1.

==> SUPERSTORM SANDY HOTWASH

ARRL HQ coverage of massive storm Sandy and responses can be found here
<http://www.arrl.org/news/as-hurricane-sandy-wreaks-havoc-on-east-coast-hams-heed-call-to-
help>.
Amateur Radio operators who wanted to assist those Sections affected by
Hurricane Sandy were advised not to self-deploy to those areas. "There
are many ARRL Sections involved in the impact area, and each has
different requirements on how they locate, credential and deploy
volunteers," explained ARRL Emergency Preparedness Manager Mike Corey,
KI1U. "If a need for manpower is identified that cannot be met locally
or in the Section, Section leadership may contact other Sections for
assistance. If the need is still not met, Section leadership may then
contact ARRL HQ for assistance." ARRL HQ also sent Ham Aid radios and
equipment in response to requests, and Corey was active on major
disaster response nets from Connecticut. The following are summary
after-action reports received by your editor, by state or section. Many
sections that were active during the storm are not represented here, as
their leadership are still gathering reports from their operators for
```

compilation and forwarding to ARRL. Further reports are welcomed by your editor at k1ce@arrl.org and will be considered for future issues accordingly. The reporters represented below are to be commended for their efforts to include what went right and what went wrong, lessons learned and lessons applied from past events. And, of course, the field operators that worked so hard while in harm's way for the safety and security of citizens and property deserve the most credit and the thanks of a grateful Amateur Radio community and public at large. - K1CE

Eastern and Western Massachusetts

Eastern Massachusetts ARES was put on standby on Friday evening, October 26, 2012 to obtain availability of Amateur Radio operators for deployment at EOCs and shelters, reported Rob Macedo, KD1CY, Eastern Massachusetts Section Emergency Coordinator (SEC). Western Massachusetts ARES was placed on standby on Saturday evening.

Eastern Massachusetts ARES activated its Amateur Radio command centers at the Town of Acushnet Emergency Management Agency and at the Clay Center Observatory co-located at the Dexter-Southfield School in Brookline, Massachusetts to assure the section would stay connected if widespread 2 meter repeater outages occurred. The City of Boston EOC requested Amateur Radio support, as did the Red Cross for several regional shelters within Eastern Massachusetts. Cape Cod ARES supported several regional shelters on the cape, and had radio amateurs at several area hospitals. Operators ran net control for their district net out of the Red Cross Chapter office in Hyannis under the call sign K1PBO.

The Massachusetts Emergency Management Agency (MEMA) Region Two Office in Bridgewater was also active as WC1MAB through the efforts of Region Two RACES Radio Officer Mike "Sparky" Leger, N1YLQ, and John Miller, N1UMJ. Finally, operators at the National Weather Service office (Taunton) Amateur Radio SKYWARN station, WX1BOX, were active. Macedo and Eastern Massachusetts ARES Assistant SEC Carl Aveni, N1FY, staffed and operated WX1BOX.

In Western Massachusetts, SEC John Ruggerio, N2YHK, reported that several Red Cross shelters were opened in his section. One shelter in Northampton was staffed with an Amateur Radio operator, but for the other shelters, hams were not requested. The Worcester Emergency Communications Team (WECT) ran a resource net and supported Amateur Radio SKYWARN operations with reports of damage across Worcester County.

During Hurricane Sandy, the WX1BOX team handled several hundred reports of wind damage (including roof structural damage reports in some areas as well as many trees and wires down), wind measurements, rainfall measurements, storm surge and urban flooding reports from heavy rainfall.

Reports came through over a dozen local area VHF/UHF repeaters with liaisons as well as through the use of the New England Echolink/IRLP Reflector system IRLP 9123/Echolink conference *NEW_ENG* node: 9123, which was combined and linked into the VoIP Hurricane Net IRLP 9219/Echolink conference *WX_TALK* Node: 7203 system. This created one large hurricane net covering from the Delmarva region into New Jersey, New York and New England. The Amateur Radio station at the National Hurricane Center in Miami, WX4NHC, was also linked into this network. The damage reports and meteorological information was shared with other agencies such as the Red Cross, local and state emergency management and the media to provide situational awareness and disaster intelligence during Sandy's impact on the region. This has become a very critical role for Amateur Radio in the region and is viewed as equally important to providing communications when all else fails.

At the height of the storm, numerous wind gusts exceeding hurricane force (74 MPH) were recorded across southeastern New England with wind gusts as high as 70 MPH recorded across interior locations of southern New England. Two critical reports from Westerly, Rhode Island, of sustained winds of 64 MPH with a wind gust to 86 MPH as well as a wind gust reported by Cape Cod ARES District Emergency Coordinator (DEC) Frank O'Laughlin, WQ1O, of 76 MPH in the Marstons Mills section of Barnstable, Massachusetts were received by WX1BOX and relayed to WX4NHC and appeared in the 5 PM Monday, October 29, National Hurricane Center Advisory.

Power outages numbered 386,000 in Massachusetts, 122,000 in Rhode Island and 630,000 in Connecticut. This meant over 1.1 million people were without power in southern New England at the height of Sandy's impact. Despite that many people without power, southern New England was luckier than New York City/Long Island and New Jersey where power outages lasted longer and affected over 3 million people. "I never thought I would say with close to 400,000 people without power in the Commonwealth of Massachusetts that we would say we were lucky but that is definitely the case in comparison to the other areas," Macedo said.

Surge flooding was heaviest in southern New England. Beach erosion with sand as deep as 4 feet covered beach roads with homes damaged and even knocked off their foundations by the storm surge in Charlestown, Rhode Island. The south coastal areas were restricted to residents only and required a pass to get into those locations. However, Amateur Radio operators embedded with local town Emergency Management and Public Safety teams facilitated reports on the damage from storm surge and pictures after the situation passed for the NWS Taunton SKYWARN program.

Lessons Learned

What Worked: There was significant reporting of conditions across the region from Amateur Radio operators including those embedded with Emergency Management and other agencies as well as APRS/CWOP weather stations. On-air operations were professional and efficient. There was seamless transfer of information from the local to regional to national

level as seen in reports from southern New England making it into NHC advisories by contact with the National Hurricane Center via the VoIP Hurricane Net and the Hurricane Watch Net. There was strong contact with the Massachusetts Emergency Management Agency (MEMA) Region 2 Office and Emergency Management agencies that were on the air at various local cities and towns. There was good PR generated with various local TV and newspaper outlets mentioning Amateur Radio efforts in their publications and on-air programs. A tremendous amount of pictures and videos that were generated by many Amateur Radio operators and SKYWARN spotters will allow for a historical guide for what Hurricane Sandy's impacts were in the region.

What Needs Improvement: Several agencies waited until the last minute to request Amateur Radio operators unlike during Hurricane Irene when these agencies made requests upfront. This may have been due to the lack of Hurricane Warnings issued up the coastline. This could potentially be addressed via tabletop exercises with various agencies. The number of Amateur Radio operators needed to create depth to do multiple shifts for a situation that is over a 24-hour period remains an issue. This will be addressed through more aggressive training programs, district ARES meetings and drills. And finally, getting SKYWARN Spotters embedded with Emergency Management to see storm surge areas if safe to do so for near real-time reporting is a goal. This is an issue that will also be coordinated with the National Weather Service in Taunton. - Rob Macedo, KD1CY, Eastern Massachusetts SEC

Eastern Massachusetts Section Manager Phil Temples, K9HI, said that "Macedo and his ARES staff did a stellar job in the planning stages. They held numerous teleconferences in the days leading up to our near-brush with disaster. Our section's seamless integration of ARES and SKYWARN gave the players an excellent window into what lay ahead. And, of course, NWS benefited greatly from our real-time weather criteria reporting via VHF/UHF repeaters tied into the IRLP/EchoLink/VoIP network."

North Carolina

Newport SKYWARN was activated on Saturday, October 27, after a conference call briefing conducted by Richard Bandy, Meteorologist in Charge of the Newport NWS office, with check-ins from numerous areas. ARES operators participating in the net monitored their local repeaters, reporting flooding and damage reports. Reports came in from Down East Carteret County of storm surges more than 2 feet above high tide. Highway 70 was flooded. Bulkheads were breached and wind gusts went up to 50 mph. Rob Shonk, N4JKL, reported that his yard in Buxton was flooded with 4-5 feet of water. Shonk also witnessed a house sliding into the sea and two nearby houses leaning on each other in Rodanthe. -- Janice Hopkins, KJ4JPE, ARRL PIO, Newport, North Carolina SKYWARN Net Control

Connecticut

Connecticut SM Betsey Doane, K1EIC, and SEC Wayne Gronlund, N1CLV, reported that 80 stations checked into the SM/SEC planning net held on Sunday night, October 28, before the arrival of major storm effects there. Doane and Gronlund briefed the group, and recruited volunteers to fill gaps in operations where needed. Doane also took calls from served agencies to fill their requests. All requests were met and problems were solved quickly by the ARES leadership pair and the entire section ARES team.

SEC Gronlund worked from the Division of Emergency Management and Homeland Security (DEMHS) Region 4 Headquarters. The SEC's leadership nets met every two hours on the KB1AEV linked repeater system. Some members of these nets were operating from their respective DEMHS Region Headquarters stations. All participated, giving reports of current conditions in their respective regions.

SKYWARN was busy, with Assistant DEC for SKYWARN Jim McBride, KD1LD, keeping the nets updated on conditions. SKYWARN ECs coordinated activity in their respective counties, performing very well as trained. Well known SKYWARN operator Roger Jeanfaivre, K1PAI, coordinated 10 weather nets for Hartford County.

Craig Lang, W1MHZ, ran a net while camped out at his neighbor's home, as he had to be evacuated. Assistant SEC Art Fregeau, AF1HS, posted alerts on the CTARES <http://www.ctares.org/> Web site, while others kept the ARES Discussion email reflector operational. In general, repeaters went down, but backup repeaters and power quickly restored communications.

Operators were deployed by the Greenwich American Red Cross office. In Stamford, operators were recently CERT trained and were under the umbrella of the City of Stamford as they provided backup communications for the city. Led by EC Jon Perelstein, WB2RYV, operators were deployed to the shelters as needed, and provided valuable support to the Stamford Office of Emergency Management, manning phones; they had over 700 evacuees. The town of Darien had one operator deployed for the Red Cross. In Norwalk, the shelter was staffed around the clock by ARES, with one operator also being an evacuee. In Wilton, one operator was on site at the EOC. Greater Bridgeport Amateur Radio Club operators were at their EOC -- their area had over 800 evacuees in three evacuation centers.

Many other shelters throughout the Section were supported by Amateur Radio operators, some of whom are also CERT trained. EC Perelstein reported that eight volunteers and two Red Cross disaster leaders, most of whom are members of the Stamford Amateur Radio Association, supported the three Stamford shelters, manned the City's Citizen Service Line, and provided backup communications for Red Cross between the shelters, the EOC, and the Darien Red Cross chapter house. Those manning the shelters did everything from intake to cooking to support for the elderly and infirm. Those who manned the Citizen Service Line were the City's direct communication to residents as they called for advice on evacuation. Doane said that ARES operators also became

involved as "expediters" in dealing with various problems such as untangling a (non-radio) communications issue that was interfering with food deliveries to the Stamford shelters.

In the aftermath of the storm, the Mayor was careful to single out participants to various visiting politicians, including U.S. Senator Richard Blumenthal. Both the Mayor and the Director of Public Safety made specific mention of Amateur Radio in thanking the various volunteer groups who helped the City of Stamford.

In Region 2, DEC Douglas Sharafanowich, WA1SFH operated for two days from DEMHS Region 2 Headquarters and ran nets every hour on Monday. This region was recently reorganized, and Doane commended the DEC and his team on getting so many trained people out in the field for this storm.

In Eastern Connecticut, the following towns in Region 4 opened shelters that were supported by ARES and/or Red Cross Amateur Radio operators: East Lyme, New London, Groton, Stonington, Norwich, and Colchester and the Area 4 Waterford Office of the Red Cross (K1ARC).

The East Lyme Regional Shelter was opened on Sunday, October 28, by the American Red Cross. Amateur Radio assistance was requested to link it to the Waterford American Red Cross Headquarters. The link was established by a shelter radio, go-box, and antenna that had been assembled by ARES from a Homeland Security Grant. A Region 4 Resource net was operational with 31 stations checking in for duty.

In Region 5, DEC Dave Hyatt, K1DAV, manned the Torrington EOC. The War Memorial Shelter was supported by hams. Herb Kommritz, N1KWV, managed the Red Cross operation in Bethel. The Region 5 Resource Net run by Hyatt had 17 towns represented. In Bethel, Tom Cheslock, K1TJC, acted as a Red Cross shelter manager for seven days and six nights. He and his wife Carol looked after clients, manned radios, and handled many difficult situations. Laura Vasile, KB1SOM, Bethel's Health Director handled all of the health decisions. Ken Weith, KD1DD, ran shelter communications, assigning town radios to key people. CERT training served the volunteers well in this long term shelter assignment, reported Weith.

The Stratford EOC was supported by Gary Moyher, WE1M, and SM Doane. The pair set up EOC VHF/UHF radios and antennas at Bunnell High School (the Stratford shelter). The EOC and shelter were then continuously manned by additional operators.

On the digital front, Assistant SM Larry Buck, K1HEJ, reported that the Flexnet packet nodes maintained connectivity. There was good use of Winlink gateways, Buck said, and also 29 nodes were connecting to the W1HAD packet network as platforms for disaster response messages. NTS nets ran as scheduled but stood by to handle only emergency record traffic to accommodate repeaters on backup power. Many operators stood by; lots took part actively. Those at shelters supported communication

functions when asked and helped out with other related tasks. Doane thanked her ARES operators: "We're a team!" -- Betsey Doane, K1EIC, Connecticut Section Manager

Southern New Jersey

Ocean County ARES was activated and conducted status nets on the WA2RES repeater twice each day during the emergency and response phases. The Ocean County EOC requested Amateur Radio communications for each Red Cross and municipal shelter, which was met by Ocean County EC Robert Murdock, WX2NJ. Six shelters were opened, but county ARES did not have enough equipment to serve all shelters, so a request was made to Southern New Jersey SEC John Zruba, K2ZA, and ARRL HQ responded by sending six transceivers, power supplies, coax and antennas to the ARES group under the Ham Aid program.

Murdock went to the EOC, took possession of the equipment and returned to his home, where he worked through the night to inventory the gear, program the transceivers, assemble antennas and test all power supplies and coax for proper operation. There was no commercial power at his home, but his ham shack was being powered by a 9KW propane-powered emergency generator.

By Thursday, November 1, the emergency phase changed to the recovery phase, which will take a long time to complete in the nine counties of the ARRL Southern New Jersey section. Commercial communications systems were being restored in most parts of the section, but Amateur Radio operations continued in Ocean and Atlantic counties under the direction of their ECs. Murdock said the ARRL Ham Aid VHF radios worked very well. Both shoreline counties will continue to determine their long term Amateur Radio needs daily based on Red Cross sheltering plans, and the state of commercial communications restoration.

Zruba was also the Incident Commander for this event. He polled other counties in the section for mutual aid operator support for Atlantic county to relieve weary operators there. The ARRL Eastern Pennsylvania, Northern New Jersey, and Western Massachusetts sections all offered operators and ARESMAT teams.

The last session of the Section Resource net on the SNJ ARES repeater was held on Thursday morning. Thanks were given to all ARES/RACES operators who showed that planning, regular monthly tests, and dedication pay off when it comes to helping their fellow citizens in a major communication emergency. When all else fails, Amateur Radio works! -- Gary Wilson, K2GW, Assistant SM, Southern New Jersey Section

Virginia

Virginia Section Manager Carl Clements, W4CAC, reported that ARES groups in Fairfax County, Chesapeake, Portsmouth, Norfolk, and Virginia Beach staffed EOCs and the Isle of Wight was also activated. "Most of our damage here in the Tidewater area (Norfolk, Portsmouth, Chesapeake, and the Beach) was a few downed trees and power lines with minor

flooding. When our folks were activated, they responded!"

Delaware

The ARRL Delaware Section ARES/RACES was tasked with providing back up communications for the State EOC in Smyrna and each of the three individual Delaware county EOCs at New Castle in New Castle county, Dover in Kent county, and Georgetown in Sussex county. (Delaware has only three counties). The team also provided back up communication for the City of Wilmington in New Castle county and several small towns in Sussex County.

Communications provided during the storm consisted of essential elements of information in the form of local road and weather reporting, high water, downed trees and power outages. There was exchange of local welfare information about open shelters. Updates were communicated to the National Hurricane Center during the storm's progress. There were about 100 radio amateurs involved throughout Delaware. Section Manager Frank Filipowski, KB3QQZ, managed his team from the State EOC.

The primary HF frequency used was 3905 kHz for the Delaware Traffic Net with check-ins from each of the EOCs. HF communications were also established using Winlink, Army MARS, and CAP frequencies. VHF and UHF communications were maintained during the storm without power outages in most cases. Most of the traffic and messages were passed using local VHF and UHF activated nets for each county.

SM Filipowski said "Although the eye of Hurricane Sandy passed over the state of Delaware, we escaped much of the damage that was reported to areas north of us." Sussex County ARES provided emergency back-up communications during Hurricane Sandy from October 28 through October 30. ARES members furnished over 360 hours of communications support at served agency locations as well as from their homes and mobile units.

Preps

Based on the increasing potential of a damaging storm, Sussex County ARES encouraged members to check their Go-Kits and overall readiness. As the storm continued to develop a bulletin was issued on October 26 giving details of potential shelter and hospital activations. On October 26 and 27, the EC attended statewide conference calls at the county EOC. Information obtained from these calls was helpful in creating the ARES plan for Sandy response. A special pre-hurricane net was called on the evening of October 27 to answer questions and discuss assignments and operating requirements. The detailed ARES plan was issued on Sunday morning, October 28, which included frequencies, personnel assignments, reporting requirements, and a request for additional personnel. Activations began at 1200 on October 28. Sussex County ARES operators deployed to several served agency locations and shelters.

The operating environment was generally high, gusty winds with heavy to moderate rain. Winds peaked late afternoon and evening of October 29. Nearly all traffic was "tactical." Information requests from the EOC were made in this format, as were most responses. The Indian River High School shelter ARES team used the ICS-213 message format for shelter head count reports. They obtained Shelter Manager signatures on each. Practice/test WINLINK messages were exchanged between the hospitals and the EOC.

Accomplishments/Lessons Learned

Sussex County ARES provided communications at two shelters housing over 500 residents. For many Sussex County ARES members, this was their first opportunity to operate during an emergency and each of them stepped up. Net discipline was greatly improved. With our training emphasis and the importance of the actual situation at hand, chatter and general comments were at a minimum. The radios that were recently installed at Nanticoke Hospital worked very well. Data communications using WINLINK and WINMOR/PACTOR as well as voice were available throughout the storm. The pre-net offered an opportunity to announce and discuss final plans.

Permanent antennas at shelters and hospitals are essential. This has been stated after several SETS and drills and following Hurricane Irene. The marginal communications attained with portable J-Poles and jury rigged solutions stands in stark contrast to the success with the permanent antennas at Nanticoke Memorial hospital. On a positive note, ARES has learned that Sussex County has procured equipment for permanent installation at five shelter facilities. At Beebe Medical Center, antennas have been purchased with the next step being installation. Completion of these installations will mark a significant milestone. It is hoped that the shelters and Beebe hospital will have permanent antennas in time for the next emergency.

WINLINK was available at Beebe and Nanticoke and at the EOC, but none of the shelter operators had this capability. ARES is continuing to train and emphasize the importance of this digital mode. The goal is to have WINLINK at each deployed location/served agency. The ICS-213 is a useful tool in traffic handling. During Sandy, only one site used the form in submitting shelter headcount reports. The operator obtained Red Cross Shelter Manager signatures on each message. We will continue to underline the value of the 213 in our training and at the same time emphasize the need to send messages slowly and only after direction from the NCS to begin transmission.

We must redouble our efforts to encourage members to deploy to served agencies. During Sandy, we satisfied our mission, but had the storm lingered, our deployed manning level would have been insufficient to the task. ARES leadership has identified several members who will be contacted individually and asked to deploy during the next activation.

NCS and served agency operators used ICS-309 for communications logging. Newer members were unsure about the form, but tried their best

to fill it out. ARES will conduct training on the use of ICS-309, ICS-213 and ICS-214 forms.

The initial NCS operator was on duty for twelve hours. After that, with the addition of two more operators, shifts were six hours. This still proved to be too long, so in the future we will use three-hour shifts so that operators do not become so fatigued. Reporting criteria need to be emphasized. We did a much better job in reporting than we did during Hurricane Irene. The EC requested a list of reportable information from the EOC and this was generally provided by radio amateurs accordingly. A few unnecessary reports ("it's raining in Lewes") mean that we must continue to emphasize that only information requested by a served agency is to be reported.

Individual operators reported radio, home generator, and TNC problems as they attempted to use their equipment during the storm, pointing to the importance of regularly checking out our equipment.

Summary

During the storm we received an inquiry from the Delaware State Police asking about our ability to provide support if it became necessary. The storm concluded without our activation, but we were pleased to be considered as a potential resource. Beebe and Nanticoke hospitals were very complimentary, frequently expressing their appreciation for our support. Shelter managers were very cooperative in helping the ARES teams find operating areas that were separate from the actual shelter areas. This marked an improvement over the situation during Hurricane Irene. An ARES press release was provided to local media outlets. Based on a September meeting with Sussex County, ARES provided a listing of all deployed operators so that they could be covered under the county's insurance plan.

Sussex County ARES provided 365 person hours of communications support to our community. An additional 21 hours were dedicated to the pre-storm planning net, 13 hours to planning and coordination including two meetings at the EOC, and 10 hours of after-action analysis and reporting. In total, 409 hours of service. -- Frank Filipkowski, AD3M, Delaware Section Manager

Northern New York

Two days after the ARRL Northern New York section's SET, superstorm Sandy hit the east coast. In most of the Adirondacks, the storm seemed almost a non-issue. We had some trees down and power outages for a short time, but nothing too serious or prolonged. However, this was not the case elsewhere, obviously.

As a member of the Air Force Military Auxiliary Radio System (MARS), I spent the better part of three days checked in to the USAF MARS emergency communications nets -- monitoring, relaying messages, or acting as net control. MARS and ARES/RACES are complementary volunteer emergency radio services, with ARES/RACES primarily supporting civilian

agencies and MARS supporting the military and other federal government agencies such as FEMA. MARS members are Amateur Radio operators who have special training in military communications procedures and operate on assigned military frequencies outside the ham bands.

During one of my net control shifts we handled a message to the FAA about loss of tower lighting at a nuclear power facility, a potentially hazardous situation especially with disaster relief aircraft in the area. The problem was observed by a mobile station in New Jersey and relayed by an HF station in Virginia to a military station in New York who in turn contacted the FAA, which in turn issued a bulletin on the situation to warn pilots. - Pete Newell, KC2WI, Lewis County ARES Emergency Coordinator/RACES Radio Officer; Lewis County Emergency Communicators <http://www.lcecg.org/>; AFA2CQ, Military Auxiliary Radio System

==> GEORGIA ARES TEAM SUPPORTS NATIONAL GUARD COMMEX

Zero-dark-thirty hours comes early for anyone, but especially for civilians getting up to be part of a military communications exercise! But members of the Cobb County (Georgia) ARES team, along with their counterparts from Chatham County were up (literally!) for the Saturday, November 3, 2012 National Guard COMMEX with time to spare -- or so it seemed right up until net operations began.

Cobb ARES Emergency Coordinator (EC) Ed Humphries, N5RCK, along with his wife Dawn, KI5EV, were joined by Anthony (Tony) Gaito, KC0CSG and James (Jim) Wingate, WA2EIU, to meet up and convoy together to Georgia's Clay National Guard Center, recently opened on the site of the former Naval Air Station (NAS Atlanta). Gaito towed the group's emergency communications trailer, which recently completed build out, to the site. Working in two teams, the group set up the trailer and its antennas for HF/VHF/UHF and weather along with the emcomm generator and a DIY 40 meter folded dipole erected as an NVIS antenna in an inverted V configuration. Everything was in place and tested prior to the 0800 "STARTEX."

After EC Humphries visited the Georgia National Guard Joint Operations Center inside the Guard's newly completed headquarters building, the COMMEX began in earnest. The objectives for Amateur Radio included making contact with the Chatham County ARES group deployed to Fort Stewart via HF voice and data, D-STAR, and, if time allowed, Echolink. ICS-213 style messages were successfully passed via HF voice and PSK-31 and delivered to the intended recipients. Although the Fort Stewart team could hear the Cobb ARES group via D-STAR emergency communications Reflector 30C, a programming glitch prevented them from replying; the Chatham hams solved the problem shortly before the exercise ended.

LTC Jeffrey Olive of the Headquarters Detachment, Joint Force Headquarters at Clay National Guard Center led the way for a series of VIP briefings given by Cobb ARES concerning the capabilities of Amateur Radio as exemplified by the group's emcomm trailer and functioning. The

Guardsmen all seemed to be impressed with the possibilities for interoperability, especially in the first 12 to 24 hours of any possible National Guard callout such as for Hurricane Sandy that had just hit the northeast and Atlantic states. This citizen soldier group has plenty of sophisticated communications gear, but they also understand that the Guard's mission often puts them in a position of needing to communicate and coordinate with civil authority and NGO support groups. Amateur Radio already plays a key role in disaster scenarios with those groups; a little synchronicity may come into play, meaning it is a good thing to interact and practice interoperability!

As the "ENDEX" was being sounded there were cries heard above the background noise of the generator, "Wait! I want to try ..." As usual the time flew by and all the communications exchange ended with that one last thing yet undone: The Cobb County ARES group enjoyed lunch with the National Guard team courtesy of LTC Olive and then packed it all up, tired but happy to have had a successful deployment.

The Amateur Radio part of the exercise could not have taken place without the other end to talk to: Chatham County ARES deployed to Fort Stewart, Georgia, near Savannah. Newly appointed Metro Atlanta Assistant DEC Guy McDonald, K4GTM, was there along with Greg Bandish, W5GKB; Dwight Bliecher, K4YPM; and Dan Scott, KF4MND. Also, a special thanks goes to SFC Tiffany Warren for her coordination efforts and arranging access to the Clay National Guard Center. Thanks to LTC Olive and all the Guard crew for letting Cobb County ARES be part of their communications exercise. -- Ed Humphries, N5RCK, Cobb County (Georgia) EC

[Editor's note: ARRL Southeastern Division Vice Director and Metro Atlanta District EC Jim Millsap, WB4NWS, commented "The importance of our providing communications services to our National Guard during a disaster is evidenced by their now second request for support for their COMMEX. Our folks performed well providing solid radio communications 200 miles apart. At one point, a soldier went down due to heat, military comms became overloaded and Amateur Radio VHF was utilized to communicate messages to command from the field.
Data and voice were used to provide support also."]

==> TENNESSEE AMATEUR RADIO CLUB PARTICIPATES IN EXERCISE "WINTER STORM 2012"

Members of the DeKalb/Cannon County (Tennessee) Amateur Radio Club participated in an emergency exercise on Saturday, October 6, 2012. The Simulated Emergency Test was titled "Winter Storm 2012," and was conducted with DeKalb and Cannon County EMAs. The exercise scenario was a winter storm that entered Tennessee from the west near Memphis and moved into middle Tennessee west of Nashville by noon on Saturday. The storm shut down all major Interstates and highways across the state, with major widespread power outages.

Portable HF and VHF/UHF stations and antenna systems were constructed, evaluated for performance, and deployed at several locations including DeKalb West School, Woodland School, and atop Short Mountain. Stations at Cannon County High School, DeKalb Community Hospital, and Stones' River Hospital were also activated and evaluated for effectiveness.

The Amateur Radio station at the DeKalb County EOC located at the Smithville Fire Hall was the command center for the exercise. Messages were sent to the State EOC at the Tennessee Emergency Management Agency (TEMA) in Nashville via wireless computer-radio links. These messages contained SITREPs for DeKalb and Cannon counties, and were sent from either the DeKalb EOC or the mobile station setup atop Short Mountain by HF radio to an automated station in another part of the U.S., outside the local simulated disaster area. Messages then went via one of five hardened servers located worldwide (for redundancy), and then into the regular Internet, to be delivered via e-mail anywhere that e-mail is available. Thus, if the Internet were down locally or even regionally, by using the Winlink 2000 system, we would still have some e-mail capabilities. This was in addition to and separate from the usual local and area VHF/UHF operations.

A total of 14 radio amateurs from throughout middle Tennessee checked into the emergency radio network. Local amateur repeaters were used as well as VHF/UHF and HF point-to-point networks. Check-ins included ARRL ARES officials DeKalb County EC Kathy Kujawski, NF9G, and Cannon County EC Freddy Curtis, KC4GUG. Additional stations checking into the radio network were John O'Conner, KD4WX, ARES District 6 Emergency Coordinator; Dallas Rife, KK4ISW, Shelbyville; and Gary George, WB4CWS, of McMinnville.

The club thanked DeKalb County Emergency Management Director Charlie Parker, and Cannon County EMA Director Faye Morse, as well as DeKalb Community Hospital and Stones' River Hospital for their support of local participation in this annual state-wide exercise. The club is affiliated with the ARRL. -- Wm. Freddy Curtis, KC4GUG, DeKalb/Cannon County Amateur Radio Club, Smithville, Tennessee

==> NEW ENGLAND FOREST RALLY 2012: CHALLENGING AND REWARDING

Using your radio to serve the public is not only a great way to give back, but it's also quite rewarding on a personal level. A secondary benefit to volunteering your time to perform public service through ham radio is that it's an excellent environment in which to hone your skills in case you're needed in an emergency. The protocols employed at a public service event are much like those used by hams called out to assist in disasters and emergencies.

This past spring, I worked the Boston Marathon. Weeks ago I was at the summit of Mt. Washington in New Hampshire braving sustained winds of 50 mph while logging cyclists crossing the finish line of the grueling Newton's Revenge race. At the end of the second week of July, 2012, thousands of people descended upon Newry, Maine for the classic New England Forest Rally (NEFR). If you were anywhere near this remote

western part of Maine, you saw street legal racing cars covered with decals roaming Route 2 side by side with cars and trucks sporting Amateur Radio antennas and operators providing safety communications. The NEFR is an event that provides excellent training for disaster response operations: there are dense forests, hills, dust, heat and no fixed repeaters nor commercial power.

The team I was assigned to worked the prestigious Concord Pond stage on the first day of the rally and both Lost Weekend stages on the second day of the event. The Lost Weekend stage is a loop road raced counterclockwise (CCW) in the morning and clockwise (CW) after lunch. For operators, an H-T was quite limited unless it was paired with a mobile 50-watt radio that can cross band repeat. That's how I worked the rally this year: I used my Yaesu VX-7R on 439.000 MHz set on low power, and had my Yaesu FT-8900R in my truck to capture my H-T signal and boom it out at 50 watts on the primary simplex 2-meter frequency we were using. I was usually no more than 300 feet from my truck, so the low power setting on my H-T was perfect. This helped preserve battery power in the H-T and allowed me to work all day with one battery.

It's helpful to have a portable mast-mounted antenna that you can connect to your car, truck or a tree. You suspend from the top of the mast a 2-meter J-pole antenna that allows you, in most cases, to hear every other ham on that stage. Using a rooftop antenna on a car or truck will work, but I was not able to hear all the other radios on my stages all the time. Next year I'll have a mast antenna that I can erect in minutes and connect to the mobile 50-watt radio in my truck.

If you like bugs, dust, mud, the woods, fast cars, food from plastic bags and challenging work, then the New England Forest Rally is the place for you. In all seriousness, I highly recommend working this event, or any other rally event, if you want to see how you might perform under pressure in a real disaster. -- Tim Carter, W3ATB, Meredith, New Hampshire

==> ARRL PUBLIC SERVICE/EMERGENCY COMMUNICATIONS TRAINING PROGRAM CHANGES

Revised Field Instructor (FI) and Mentor Qualifications/Requirements have been implemented for the ARRL Public Service/Emergency Communications Training Program. Our continuing effort to improve and adjust our training program to adapt to the role we play in public service and emergency communications response with other local and national agencies necessarily results in changes from time to time. Based on feedback from individuals and leaders in our community and changes in FEMA training we are making some changes to strengthen our training program. Effective November 1, 2012 we are updating the qualifications/requirements for those who wish to serve as Field Instructors or Online Mentors for ARRL's Emergency Communications training program. Changes to qualifications include the addition of SKYWARN training and some changes in the list of FEMA training required of instructors and mentors. Updated requirements include listing field

classes with the ARRL Continuing Education Program office, and filing student rosters and student evaluations with the CEP office. We are also adding a 3-year term of service to this appointment. You can review the updated qualifications/requirements on the ARRL website at: www.arrl.org/requirements-for-field-instructors <http://www.arrl.org/requirements-for-field-instructors> and www.arrl.org/mentoring-online-courses <http://www.arrl.org/mentoring-online-courses>.

The list of prerequisites for completion of the Public Service and Emergency Communications Management for Radio Amateurs (EC-016) Course has also been updated to reflect changes in the FEMA training program, as well as other appropriate training for field leadership. Review the updated list of prerequisites in the course description at: www.arrl.org/online-course-catalog <http://www.arrl.org/online-course-catalog>. -- Mike Corey, KI1U, ARRL Emergency Preparedness Manager and Debra Johnson, K1DMJ, ARRL Education Services Manager

==> LETTERS: ON RECRUITMENT CHALLENGES

In response to the thoughtful letter in the last issue from John Lawrence, W1QS, about getting new operators into your organization, we can honestly say in more than 20 years serving the Medtronic Twin Cities Marathon we have never had a problem getting staffed up to around 130 volunteers for a seven hour event, and running a year round technical/Linux development team that is world class. Here's what we do:

1. Run a big tent -- we take anybody with a license or even without a license for certain jobs like checking in patients in our medical tent or looking up the status of missing runners.

2. Have an obsessive focus on the needs for health care support and safety in your event/served agency -- we are introduced and assigned as "part of the Medical Team."

3. Take related duties as assigned and do them perfectly -- some of these, like driving medical carts can be interesting.

4. Embrace the newest technology - this year we were asked about supporting iPhones and sending text messages to family members of injured runners.

5. Follow ICS/NIMS best practices, including decentralizing operations. This provides us with more leadership opportunities.

6. Drive to a mission statement -- ours is to deploy world class Amateur Radio infrastructure and highly trained volunteers to help make our community safer.

7. Show off a little. I will never forget the gratitude on the faces of the fledgling medical department at a new running event three years ago

who called us in to help. On a hot steamy race morning we brought in an Incident Action Plan co-written with the City/County, two multi-million dollar communications trucks, 20 hams and eight EMTs from our local Native American community. Two of the MDs from that event now volunteer for us.

8. Work seamlessly with Public Safety professionals and under their direction. Led by our energetic Medical Director, we have been recruiting new health care volunteers and are helping to glue our various agencies together to improve the overall level of emergency response. -- Erik Westgard, NY9D, Volunteer Medical Communications Coordinator, Twin Cities in Motion, www.14567.org <http://www.14567.org/>

I feel the pain of John Lawrence, W1QS. As the leader for a successful VE team we have developed a comprehensive means to meet our recruitment goals. A good PIO or PR person is a must. You need a strong person or team to get your message out as well as manage your message. We actively go after CERT volunteers, Public Safety officials, Boy Scouts, Civil Air Patrol, Library patrons, pilots, boaters, Senior Center residents, and so on, to get interested persons licensed and ultimately on our team. Use some imagination.

Look at your served agencies as a potential recruiting pool, especially. Going after them also promotes communication, cooperation and coordination.

Bring people together by generating training and activities, as well as social events. Networking and getting people to work together as a team are major factors to a healthy organization. People will be involved if they feel engaged and that they can contribute. -- Bill Neill, NE1LL, Westerville, Ohio, ne1ll@ymail.com

==> FLORIDA ARES GROUP SUPPORTS GREAT FLORIDIAN TRIATHLON

The Lake County (Florida) ARES took an active support role in the Great Floridian Triathlon that was held on October 20, 2012 in Claremont, Florida. The major contest is the "Iron Man" where athletes complete a 2.5 mile swim, a 112 mile bicycle ride and a 26 mile marathon run. There were participants from several different countries and many from all over the United States. There were 300 people who took part in the Iron Man event and another 100 who competed in an intermediate contest.

Lake County ARES (LCARES) provided radio communications along the 112 mile bicycle route consisting of three laps of nearly equal mileage. ARES was there to make sure the ride was safe and those riders who broke down or had a medical problem could get help quickly. Several ARES volunteers had put in a 12 hour day by the time the communications trailer was pulled out at dusk.

LCARES turned out 13 volunteers to provide the necessary radio communications using their own radio equipment and vehicles as well as the ARES mobile communications trailer. The trailer was set up at the

Lake Minneola Park site in Claremont next to the event headquarters. A VHF/UHF vertical antenna was placed on top of the 40 foot crank up tower, which served very well as contact was established with all the mobile and hand-held 2 meter radios throughout Lake County. The N4FLA repeater on 147.000 MHz was the primary frequency, with simplex 2 meter frequencies also used for short range contact to the trailer from event headquarters and staging area. The Lake County EMS provided ARES with one of their portable radios for use in the trailer to report cases that needed medical attention. We had to use this radio on three occasions when Amateur Radio mobiles reported medical emergencies.

We also had Nextel communications with event personnel and with the mobile bicycle repair vans who also provided the SAG wagons. There were three rest stops along the route with Amateur Radio operators at each of them to report rider progress, request supplies, or look out for certain riders. We had 10 requests for the mobile repair vans when mechanical breakdowns were reported by Amateur Radio operators who were patrolling the course.

Lessons Learned

Everything was going smoothly until for some yet undetermined reason in the afternoon our primary repeater locked up and made it unusable. Being flexible ham radio operators, we quickly switched to our secondary repeater on 146.255 MHz without missing a beat. Taking part in events such as this gives the ARES personnel practical experience in setting up emergency radio equipment, how to function as a team in an emergency and to properly communicate by radio under these circumstances. This is important as we are sometimes called upon to support public safety first responders in times of natural disasters such as hurricanes and tornados, which are not strangers to this part of Florida.-- Ted Luebbers, K1AYZ, Lake County ARES PIO, Tavares, Florida www.k4fc.org <http://www.k4fc.org/> or www.n4fla.org <http://www.n4fla.org/>

==> TRAINING OPS

I found this while browsing a Utah state government site, which seemed of interest to ARES. AUXCOMM Training <http://publicsafety.utah.gov/emergencymanagement/Training/AUXCOMM.html>Description: This workshop is designed for the amateur radio/auxiliary communicator or group who provides emergency communications backup support for planned or unplanned events at a State/Territory, Tribal, regional, or local level. This offering is designed for amateur radio operators/organizations who work with public safety and cross-disciplinary emergency response professionals and coordination/support personnel with an amateur radio background. The course focuses on educating attendees about auxiliary communications interoperability, emergency operation center etiquette, on-the-air etiquette, FCC rules and regulations, auxiliary communications training and planning, certification and accreditation and emergency communications deployment. It is intended to supplement and standardize

an operator's basic knowledge of emergency amateur radio communications in a public safety context. Prerequisites: General Class or higher amateur radio license. Also, IS-100, IS-200, IS-700, and IS-800. The IS courses can be completed online at: http://training.fema.gov <http://training.fema.gov/> the FEMA Independent Study Website. -- K1CE

==> K1CE FOR A FINAL

Here's what I took away from reading and compiling the reports received after the disaster responses were wrapped up from storm Sandy: ARES and Amateur Radio emergency/disaster response communications have evolved exceptionally well in this post 9/11 and Katrina era. ARES has kept pace, step for step with the emergency management community at large as we have embraced digital modes, new technology, and especially more and better training, professionalism and maturity as a critical component of the overall radio communications emergency support function. We should be proud of our efforts that have produced a better, more valuable service for our neighbors and communities, our served agencies, and indeed our own Amateur Radio community.

Joint Point Lighthouse Op - Nov 23 & 24 MD/VA Border

Posted: 21 Nov 2012 07:55 AM PST
http://forums.qrz.com/showthread.php?369190-Joint-Point-Lighthouse-Op-Nov-23-amp-24-MD-VA-Border&goto=newpost

I have received my permit to operate from Jones Point Lighthouse from the National Park Service.

Call: K1LFG/P

>Date: Nov 23rd (afternoon) & 24th (all morning, and part of afternoon, conditions permitting)

Modes: SSB only (see restrictions)

Bands: 10m, 12m, 15m, 20m, 40m (late)

Location: Jones Point Park, Jones Point Lighthouse (ARLHS USA-409)

Virginia & Maryland border, very close to the District of Columbia southern border point. I will be operating from outside the lighthouse, with my portable station literally splitting the VA/MD border.

If there is enough interest (100+ QSO), I have permission to have special color QSL cards made with photos of the site, NPS / ARLHS logos, and other historical information.

Notes:

The permit is very restrictive; I can't have anything staked down, nothing attached to the trees or lighthouse, no commercial power or generators, can't block the walking paths, "voice only" (SSB), check in with park police, 1 person permitted, no shelters, the list goes on; it's 5 pages!

There will be no W1AW bulletins or code practice transmissions <http://www.arrl.org/w1aw-operating-schedule> those days. The ARRL Letter <http://www.arrl.org/arrlletter/> will be published a day early on Wednesday, November 21, but there will be no ARRL Audio News <http://www.arrl.org/arrl-audio-news> on Thursday, November 22. ARRL Headquarters will reopen Monday, November 26 at 8 AM Eastern Standard Time. We wish everyone a safe and bountiful Thanksgiving holiday.

==> ARRL MEMBERS IN HUDSON DIVISION ELECT NEW DIRECTOR; NORTHWESTERN DIVISION RE-ELECTS DIRECTOR

On November 16, ballots were counted in the races for Director in the Hudson Division and for Director and Vice Director in the Northwestern Division. This year, there were only three contested races

for Director or Vice Director in the five Divisions holding elections. In the Hudson Division, Mike Lisenco, N2YBB, defeated incumbent Joyce Birmingham, KA2ANF, for the top slot in that Division. In the Northwestern Division, Jim Fenstermaker, K9JF, defeated William Balzarini, KL7BB, for Director, while James Pace, K7CEX, was elected Vice Director in a three-way race. Terms for Directors and Vice Directors begin at noon on January 1, 2013 and run for three years. Read more here <http://www.arrl.org/news/arrl-members-in-hudson-division-elect-new-director-northwestern-division-gets-new-vice-director>.

==> FCC SEEKS TO ASSIGN ENTIRE AMATEUR PORTION OF 160 METER BAND TO PRIMARY STATUS TO AMATEUR RADIO SERVICE, PROPOSES NEW LF AMATEUR BAND AT 135.7-137.8 KHZ

On Tuesday, November 20, the FCC released a Notice of Proposed Rulemaking (ET Docket No. 12-338) that proposes to amend Parts 1, 2, 74, 78, 87, 90 and 97 of the Commission's rules. Part 97 governs the Amateur Radio Service. These changes will implement allocation decisions from the 2007 World Radiocommunication Conference (WRC-07) that concern those portions of the radio frequency spectrum between 108 MHz and 20.2 GHz and make certain updates to the rules in this frequency range. Most of the NPRM does not concern the Amateur Radio Service, but the FCC is requesting comments on the three parts that do: changing the allocation to the amateur portion of the 160 meter band, allocating a new Amateur Service band at 135.7-137.8 kHz and cleaning up the rules for the 10.0-10.5 GHz band. Read more here <http://www.arrl.org/news/fcc-seeks-to-assign-entire-amateur-portion-of-160-meter-band-to-primary-status-to-amateur-radio-serv>.

==> AMATEUR RADIO IN SPACE: THREE HAMS RETURN TO EARTH FROM ISS

Shortly before 9 PM EST on Sunday, November 18 (0200 UTC Monday, November 19), a Soyuz spacecraft carrying Expedition 33 Commander Sunita Williams, KD5PLB, and Flight Engineers Yuri Malenchenko, RK3DUP, and Aki Hoshide, KE5DNI, landed in the steppes of Kazakhstan, returning them safely to Earth from the International Space Station (ISS) after 127 days in space.

While aboard the ISS, Williams, Malenchenko and Hashide completed 39 contacts with schools via the Amateur Radio on the International Space Station (ARISS) project. According to NASA ISS Ham Radio Project Engineer Kenneth Ransom, N5VHO, this ties with Expedition 15 for the fourth highest number of contacts. In 2011, Expedition 26 -- led by Scott Kelly -- set the record for having the most ARISS contacts at 73. Read more here <http://www.arrl.org/news/three-hams-return-to-earth-from-iss>.

==> ON THE AIR: TOP OFF THE YEAR ON TOP BAND IN THE ARRL 160 METER CONTEST

While Solar Cycle 24 is making the high bands the focal point for HF operators, 160 meters -- Top Band -- is still chock full of DX. There's no better time to get on 160 meters than the ARRL 160 Meter Contest <http://www.arrl.org/160-meter>, November 30-December 2.

The ARRL 160 Meter Contest is an all-CW event, with ARRL/RAC Sections and DXCC entities used as multipliers. If you live in a rare Section -- such as North Dakota, Nebraska or any of the rare Sections from the November Sweepstakes contests -- everyone will be seeking you. Hams in Ontario (VE3) will have a new role in this year's contest: The split of Ontario into four new sections -- Ontario East (ONE), Ontario North (ONN), Ontario South (ONS) and the Greater Toronto Area (GTA) -- will give everybody a few new multipliers to hunt for on Top Band.

In this contest, Alaska (KL7) and Hawaii (KH6) can be worked by both DX and US/Canadian stations, as can the Caribbean US possessions (KP1-KP5) and all of the Pacific Ocean territories (KH0-KH9). No antennas for 160? Don't be discouraged! According to ARRL Contest Branch Manager Sean Kutzko, KX9X, if you don't have an antenna for 160, put up a temporary length of wire or try to load up whatever you have through an antenna tuner; even a 40 meter dipole through a tuner will make some QSOs.

Since ARRL and RAC Sections are worth 2 points each and count as multipliers, the ARRL 160 Meter Contest is a good way to begin working -- or finishing up! -- your Worked All States Award (WAS <http://www.arrl.org/was>). But don't forget about those DX stations -- each DXCC entity is a multiplier and is worth 5 points.

The 2012 ARRL 160 Meter Contest <http://www.arrl.org/160-meter> runs from 2200 UTC Friday, November 30 through 1559 UTC Sunday, December 2. Complete rules and entry forms may be found here <http://www.arrl.org/contests>. Logs must be e-mailed <160meter@arrl.org> or postmarked no later than 1600 UTC Tuesday, January 1, 2013. Paper logs should be sent to ARRL 160 Meter Contest, 225 Main St, Newington, CT 06111.

==> SILENT KEY: FORMER "HOW'S DX?" CONDUCTOR ROD NEWKIRK, W9BRD (SK)

Rod Newkirk, W9BRD/VA3ZBB, of Ottawa, Ontario, Canada -- who penned the QST column "How's DX?" from 1947-1978 -- passed away on Monday, November 19 after a long illness. Newkirk was credited with coining the term "Elmer," as well as for his humorous take on DX in his column, especially with limericks in his DX Hoggery and Poetry Depreciation Society and the accompanying cartoons of Jeeves by Phil "Gil" Gildersleeve, W1CJD (SK).

The term "Elmer" -- meaning someone who provides personal guidance and assistance to would-be hams -- first appeared in QST in Newkirk's March 1971 "How's DX?" column, where he wrote that "[t]oo frequently one hears a sad story in this little nutshell: 'Oh, I almost got a ticket, too, but Elmer, W9XYZ, moved away and I kind of lost interest.' Sure, the guy could have burned through on his own, maybe, but he, like

others, wound up an almost-ham. No more Elmer. We need those Elmers. All the Elmers, including the ham who took the most time and trouble to give you a push toward your license, are the birds who keep this great game young and fresh." Newkirk was probably not trying to coin a term at the time, but the name stuck, becoming a general term for the mentors Newkirk called "the unsung fathers of ham radio." Read more here <http://www.arrl.org/news/former-how-s-dx-conductor-rod-newkirk-w9brd-sk>.

==> SECTION MANAGER NEWS: MONTE SIMPSON, K2MLS, APPOINTED ARRL WESTERN WASHINGTON SECTION MANAGER

Monte Simpson, K2MLS, of Bremerton, has been appointed ARRL Western Washington Section Manager, effective December 31, 2012. Membership and Volunteer Programs Manager Dave Patton, NN1N, made the appointment after current Western Washington Section Manager Jim Pace, K7CEX, was elected as ARRL Northwestern Division Vice Director on November 16. Pace has served as Western Washington Section Manager since October 2007. Read more here <http://www.arrl.org/news/monte-simpson-k2mls-appointed-arrl-western-washington-section-manager>.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: The strong solar activity continued this week. In last week's bulletin, the average daily sunspot number on November 8-14 was 104.9, but in the six days since then -- November 15-20 -- the average was 135.5, making for a nice increase. With the solar flux, the average over the previous period was 129.5, and in the six days since then, it increased to 138.6. The latest prediction from NOAA/USAF on Tuesday, November 20, has the solar flux at 140 on November 21, 135 on November 22-23, 130 on November 24-25, 125 on November 26-27, 120 on November 28, and back down to 110 on November 29-December 1. The planetary A index is predicted to be 5 on November 21-22, 10 on November 23-24, 7 on November 25-26, and down to 5 on November 27-December 4. On November 19, Jon Jones, N0JK, in Wichita, Kansas reported fun on 6 and 10 meters: "I heard the W4CHA/b in grid square EL88 on 50.079 MHz via E skip around 1740 UTC. No live ops around. About 10 minutes earlier, I worked the PT0S DXpedition while on fixed mobile on 10 meters SSB. I was running 100 W and a mag mount whip antenna on the car. PT0S peaked up to 10 over S-9. I was on a high ridge with a clear shot to PT0S across the Wakarusa River Valley, which helped." Look for more on the ARRL website on Monday, November 26. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>.

==> BE A STAR! ENTER THE THIRD ANNUAL ARRL VIDEO CONTEST

If you've ever wanted a way to show the world how exciting Amateur Radio can be, here's your chance: The ARRL is sponsoring its Third Annual Video Contest! Here's a chance to put that video camera to use:

Shoot a ham radio-related video and send it our way. If your video
takes first, second or third place, we'll post it on the ARRL website
for everyone to see. We're looking for a few good videos (but only one
per ARRL member, please) on any tasteful subject relating to Amateur
Radio. Videos will be judged on overall quality and composition, and
prizes will be awarded for first, second and third place. Read more
here
<http://www.arrl.org/news/be-a-star-enter-the-third-annual-arrl-video-contest
>.

==> THIS WEEK IN RADIOSPORT

This week:

- November 23 -- NCCC Sprint
- November 24-25 -- CQ WW DX Contest (CW)
- November 28 -- SKCC Sprint
- November 28-29 -- CWops Mini-CWT Test
- November 29 -- QRP ARCI Top Band Sprint

Next week:

- November 30 -- NCCC Sprint
- November 30-December 2 -- ARRL 160 Meter Contest
<http://www.arrl.org/160-meter>
- December 1 -- TARA RTTY Melee; Wake-Up! QRP Sprint; TOPS Activity
Contest
- December 1-2 -- ARRL EME Contest <http://www.arrl.org/eme-contest>
- December 2 -- 10 Meter RTTY Contest; SARL Digital Contest
- December 4 -- ARS Spartan Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- December 1-2 -- ARRL West Central Florida Section Convention
<http://www.arrl.org/hamfests/west-central-florida-section-convention-tampa-b
ay-hamfest-2>,
Palmetto, Florida
- January 18-19 -- ARRL North Texas Section Convention
<http://www.arrl.org/hamfests/north-texas-section-convention-cowtown-hamfest-
1>,
Fort Worth, Texas
- January 19 -- ARRL Southern Florida Section Convention
<http://www.arrl.org/hamfests/southern-florida-section-convention-3>,
Fort Myers, Florida
- January 25-26 -- ARRL Mississippi State Convention

<http://www.arrl.org/hamfests/mississippi-state-convention-capital-city-hamfe
st>,
Jackson, Mississippi
- January 26-27 -- ARRL Puerto Rico State Convention
<http://www.arrl.org/hamfests/puerto-rico-state-convention>, Hatillo,
Puerto Rico
- February 2 -- ARRL South Carolina State Convention
<http://www.arrl.org/hamfests/south-carolina-state-convention-2>, North
Charleston, South Carolina
- February 8-10 -- ARRL Southeastern Division Convention
<http://www.arrl.org/hamfests/southeastern-division-convention-orlando-hamcat
ion-1>,
Orlando, Florida
- February 15-16 -- ARRL Arizona State Convention
<http://www.arrl.org/hamfests/arizona-state-convention-yuma-hamfest-1>,
Yuma, Arizona
- March 8-9 -- ARRL Oklahoma Section Convention
<http://www.arrl.org/hamfests/oklahoma-section-convention-green-country-hamfe
st-1>,
Claremore, Oklahoma
- March 30 -- ARRL North Carolina State Convention
<http://www.arrl.org/hamfests/north-carolina-state-convention-raleigh-hamfest
-2>,
Raleigh, North Carolina
- April 20 -- ARRL Louisiana State Convention
<http://www.arrl.org/hamfests/louisiana-state-convention-northeast-louisiana-
regional-ham-radiofest>,
Monroe, Louisiana
- April 26-28 -- ARRL Idaho State Convention
<http://www.arrl.org/hamfests/idaho-state-convention-3>, Boise, Idaho

To find a convention or hamfest near you, click here
<http://www.arrl.org/hamfests>.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

2338. rec.radio.info Posting Guidelines

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Posting-Frequency: posted twice monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

Suggestion for all of you CW contesters ... a way to get a few more
contacts . . . .

Posted: 21 Nov 2012 07:28 PM PST
http://forums.qrz.com/showthread.php?369266-Suggestion-for-all-of-you-CW-contesters-a-way-to-get-a-few-more-contacts&goto=newpost

SLOW DOWN A LITTLE !!!

I was seriously thinking of trying my hand at the ARRL CW sweepestakes a
few weeks ago but after listening for a bit I said to heck with it. I can
copy a pretty reliable 15 wpm but I was pretty intimidated by the speeds
that most guys were sending at :(Maybe with a CW decoder and computer
sending you can actually copy it but I usually could not even get the call
signs most of the time.

I bet I am not alone in feeling this way and with the recent popularity of
CW coming back, I think there are a lot of guys who are new to CW who might
have participated if they could actually copy it :(

I bet it would not reduce the number of QSO's a single bit if you slowed
down to about 15 wpm, would probably get you more. I know that I would have
spent a few hours on the air if I had felt comfortable with the speeds.

Just a thought,

//
Santa Net December 1

Posted: 21 Nov 2012 09:21 AM PST
http://forums.qrz.com/showthread.php?369203-Santa-Net-December-1&goto=newpost

The Orange County Amateur Radio Club (NY) will be holding its 3rd annual
Santa Net on Saturday, December 1, from 2030 UTC to 2230 UTC on 3920 and
7200 (+/-10 kHz), locally on simplex on 147.550. Santa Net is held at
Adams Fairacre Farms on Route 300 in Newburgh, NY. OCARC Members in
appropriate holiday attire wander the store with HT's looking for kids who
want to talk to Santa, who makes a special stop in Newburgh to be with the
members of OCARC. Santa also talks to kids all over on the HF bands. All
kids talking to Santa will receive a QSL card. For those on HF, it will be
sent to the call sign of the person controlling the radio. If in the store
(where Santa will only be talking to kids on the radio), they will be given

a QSL card on the spot, along with some goodies supplied by Adams. The QSL cards will be mailed immediately after the event so they arrive in time for Christmas.

If there are 5 kids at a given location, Santa will send out a QSL card for each kid.

Contact w2trr at OCARC-NY dot ORG for information.

Ham Radio Signal Strong:

Posted: 22 Nov 2012 01:39 AM PST
http://www.eham.net/articles/29377

Grab your license and get communicating! Have you ever wanted to speak with an astronaut? Well you can! That is, if you have your amateur radio license. "You can talk to the astronauts on the International Space Station, when they're not tightening the nuts and bolts of course" says Max Brighton, the President of the Sunraysia Radio Group. And it's not just intergalactic travellers that you can talk to. Depending on the strength of your equipment, you can talk to people all over the world. The friendships start over the airwaves but then can progress face to face, with radio clubs all over Australia and the world meeting to talk signal strength.

FCC Seeks to Assign Entire Portion of 160M to Primary, Proposes LF Band:

Posted: 21 Nov 2012 08:07 AM PST
http://www.eham.net/articles/29373

On Tuesday, November 20, the FCC released a Notice of Proposed Rulemaking (ET Docket No. 12-338) that proposes to amend Parts 1, 2, 74, 78, 87, 90 and 97 of the Commission's rules. Part 97 governs the Amateur Radio Service. These changes will implement allocation

decisions from the 2007 World Radiocommunication Conference (WRC-07) that concern those portions of the radio frequency spectrum between 108 MHz and 20.2 GHz and make certain updates to the rules in this frequency range.

If you've ever wanted a way to show
the world how exciting Amateur Radio can be, here's your chance: The ARRL is sponsoring its Third Annual Video Contest! Here's a chance to put that video camera to use: Shoot a ham radio-related video and send it our way. If your video takes first, second or third place, we'll

post it on the ARRL website for everyone to see.

//
ARRL Members in Hudson Division Elect New Director:

Posted: 21 Nov 2012 08:01 AM PST
http://www.eham.net/articles/29368

On November 16, ballots were counted in the races for Director in the Hudson Division and for Director and Vice Director in the Northwestern Division. This year, there were only three contested races for Director or Vice Director in the five Divisions holding elections. In the Hudson Division, Mike Lisenco, N2YBB, defeated incumbent Joyce Birmingham, KA2ANF, for the top slot in that Division. In the Northwestern Division, Jim Fenstermaker, K9JF, defeated William Balzarini, KL7BB, for Director, while James Pace, K7CEX, was elected Vice Director in a three-way race. Terms for Directors and Vice Directors begin at noon on January 1, 2013 and run for three years.

Monte Simpson, K2MLS, Appointed ARRL Western Washington Section Manager:

Posted: 21 Nov 2012 08:01 AM PST
http://www.eham.net/articles/29367

Monte Simpson, K2MLS, of Bremerton, has been appointed ARRL Western Washington Section Manager, effective December 31, 2012. Membership and Volunteer Programs Manager Dave Patton, NN1N, made the appointment after current Western Washington Section Manager Jim Pace, K7CEX, was elected as ARRL Northwestern Division Vice Director on November 16. Pace has served as Western Washington Section Manager since October 2007.

//
Emergency Operating Center Activated; Ham Radio Volunteers Help:

Posted: 21 Nov 2012 01:20 AM PST
http://www.eham.net/articles/29366

By Monday morning Clatsop County's Emergency Management Division had partially activated its Emergency Operating Center on the fourth floor of the county building in Astoria. High winds were registering up and down the coast and it soon became apparent that nearby river flooding might be a real possibility. Emergency Management Coordinator Tiffany Brown received phone calls from her cellphone and county phone lines, gathering updates about Providence Seaside Hospital, which ran on a generator after its power went out and it canceled elective surgeries. Other calls reported incidents of road closures and power outages. The partial activation of the EOC notifies state government that additional first-responders may be needed if the situation worsens, or as Brown put it, the storm would have to "put to the test local resources." Oregon counties have a mutual-aid agreement, meaning that outlying counties can be contacted in the event of a full activation of the EOC to support the local resources that are exhausted.

The partial activation entails letting these outside emergency resources know ahead of time. Brown described it as putting them "actively on stand-by."

http://news.google.com/news/url?sa=t&fd=R&usg=AFQjCNEDJhdm1tPNKvIMfou-f4V2_-xClg&url=http://electronicdesign.com/blog/secondary-emissions-4/analog-and-mixed-signal/amateurradio-emergency-services-disasters-74616

Amateur-Radio Emergency Services and Disasters
Electronic Design (blog)
The second morning after Hurricane Sandy hit the East Coast seems like a good time for Electronic Design readers to think about ham radio and emergency response issues. I got involved in these issues myself when my neighbor, Dave, told me about his ...

Amateur Radio Newsline(tm) Report 1841 - November 23 2012

Amateur Radio Newsline report number 1841 with a release date of November 23, 2012 to follow in 5-4-3-2-1.

The following is a QST. Hams in China develop a new digital protocol based on their own written language while mystery signals are being heard on the High Frequency bands coming from that nation. Find out the details are on these stories and more on Amateur Radio Newsline(tm) report number 1841 coming your way right now.

EMERGING TECHNOLOGY: NEW CHINESE DATA MODE CP-16 ANNOUNCED

China makes news again this week with word that hams in that nation have developed their own new data mode. One based on characters in the Chinese alphabet. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

--

Up until now, most amateur radio data modes have been based around the English alphabet. The problem is that does not work well for languages that are built around graphic characters rather than letters. Because of this the Chinese Radio Amateurs Club has been working since 2011 on a project to develop a new data mode called CP-16, which stands for Chinese character Pattern of 16 x 16 dot-matrixes.

To achieve the goal of allowing easy communication at very low signal to noise ratio, CP-16 is designed to directly transmit the graphic image of Chinese a character one line at a time at about 10 milliseconds per line but adjustable according to propagation and other conditions. This makes the total transmission speed of 2 to 5 characters per second, which is suitable for real-time reading.

To make the system work, CP-16 uses 16 on-off keyed audio carriers spaced at 17 Hz intervals, with the total bandwidth under 400 Hz. A CP-16 message can be received by any Software Defined Receiver or the combination of an ordinary SSB receiver and a computer equipped with any type of S-D-R audio analyzing software that produces the traditional waterfall display. The text will be directly shown on the waterfall graph. Designers say that the human brain can then easily filter out all sorts of noise and correctly pick out the character.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

A paper on the work was presented by the Chinese Radio Amateurs Club to the International Amateur Radio Union Region 3 conference held recently in Vietnam. It can be seen at tinyurl.com/CP16-data. (IARU Region 3)

INTRUDER WATCH: MYSTERY CHINESE SIGNALS BEING HEARD ON HF BANDS

Wolfgang Hadel, DK2OM, who is the IARU Region 1 Monitoring System coordinator reports that there are some strange signals coming from China and making their homes on various parts of the Amateur Service spectrum. DK2OM says that since October 25th hams have been hearing from mysterious signals on 7, 14, 21 and 21.010 MHz. He notes that they are also audible in the shortwave spectrum at 15, 18, 19 and 20 MHz as well.

DK2OM says that initially the A3E signals sounded like grunt or cow mooing. Now reports are that thy have become very strong multi-tone signals with a carrier and both sidebands and heard every morning. He speculates that this night become kind of special kind of encrypted broadcast or a new generation of Over the Horizon radar but at the moment its actual purpose is unknown.

For further details visit www.iarums-r1.org/ and look under "Latest Intruder News". There you can also find a link to a recording of this new intruder to the High Frequency bands. (IARU-R1)

**

INTRUDER WATCH: RUSSIAN TAXIS ON 15 METERS

And here's a rather strange one. A taxi dispatch system seems to have set up shop on 15 Meters in Russia. This as DK2OM confirms a report of a taxi company in the Russian Federation is transmitting FM around the clock on 21.404.2 MHz. He says you can often hear a female voice organizing the business. (IARU-R1)

**

HAM RADIO IN SPACE: NASA PHONESAT COMING SOON TO HAM RADIO

Scientists at NASA's Ames Research Center have built the most affordable ham band satellite to date. Amateur Radio Newsline's Heather Embee, KB3TZD, has the details:

--

The $3,500 orbital device is a cubesat the size of a coffee cup that uses an off-the-shelf Nexus One smartphone as a central processor and an inexpensive off the shelf radio for communications with the ground.

Called PhoneSat 1, the tiny bird is scheduled to launch by the end of this year. Once on-orbit it will transmit back photos of Earth on an amateur radio band for 10 days, or until the battery dies.

Subsequent iterations will be capable of much more. For example, PhoneSat 2.0 will have a two-way S-band radio transponder which most satellites use to communicate with the ground and solar panels for extended life.

More on PhoneSat 1 is on-line at tinyurl.com/phonesat-one. An overview of the entire NASA PhoneSat mission can be found at tinyurl.com/phone-sat-project. At airtime, exact operating frequencies for these tiny birds has not been announced.

For the Amateur Radio Newsline, I'm Heather Embee, KB3TZD, near Berwick, Pennsylvania.

--

We will have more space related ham radio news later on in this weeks newscast. (CGC, W7RNA, AI9Q)

**

ENFORCEMENT: US AND MEXICO JOIN FORCES TO COUNTER CROSS BORDER TRAFFICKING OF STOLEN MOBILE DEVICES

Its going to get a lot harder to activate a stolen smart prone or other broadband device in both the United States or Mexico. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

FCC Chairman Julius Genachowski has announced the signing of a new bilateral agreement with Mexican Communications Under-Secretary Hector Olavarria Tapia. This to combat the theft and cross-border trafficking of mobile devices between the United States and Mexico.

The agreement builds further on the FCC's `PROTECTS Initiative', and the recent participation of U.S. and Mexican mobile providers in an international stolen device database. This database will prevent mobile devices stolen in U.S. cities from being re-activated in Mexico, and stolen Mexican devices being re-activated in the U.S. market. U.S. carriers were able to join the database from October 31st.

But it does not end there. The agreement also commits the FCC and Mexico's Secretariat of Communications and Transport to extend their inter-agency cooperation to crack down on the international trafficking of stolen mobile devices through a series of new action steps using technology and transparency. Among other measures, Chairman Genachowski and Under-Secretary Olavarr&#65533;a agreed that the respective agencies will closely track, analyze, and report progress in preventing mobile device theft.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Both the United States and Mexican telecommunications agencies will also develop and share best practices with respect to theft prevention and consumer education. (FCC)

RESCUE RADIO: DEMOCRATIC LAWMAKERS WANT HEARING ON HURRICANE SANDY COMMS FAILURES

A group of top Democrats on the House Energy and Commerce Committee is calling for a hearing to be held on the effect Hurricane Sandy had on the reliability of Internet, mobile, telephone and other communications networks. This after the massive storm whipped across the East Coast.

In a letter sent to committee chairman Representative Fred Upton and Communications and Technology sub-panel chairman Representative Greg Walden, W7EQI, the Democrats emphasized that network outages put lives at risk and noted that the storm knocked out 25 percent of cell towers in the affected areas. They argue that a hearing would let lawmakers examine vulnerabilities found in wireless and mobile networks during the storm and help with preparation for the next one. The lawmakers said they also want to examine the performance of wireless networks during and after the storm. (The Hill)

**

RADIO LAW: ZONECASTING TO BE TRIED ON THE FM BAND IF FCC SAYS OK

Something new may soon be coming to the FM broadcast band in the United States. This if a proposed system called ZoneCasting proves out its proposed technology.

ZoneCasting is the result of research and development by a company known as Geo-Broadcast Solutions. It proposes to use a series of booster transmitters to give FM radio stations the ability to divide their coverage areas into geographic zones and "geo-target" their advertising and programming. Geo-Broadcast Solutions says its ZoneCasting system uses GPS and mobile broadband technologies to slice up the FM signal but avoid interference via a single-frequency network made up of FM boosters.

To allow the system to work, the company has asked the FCC to modify its current rule that prohibits booster stations from originating programming. A booster operates on the same frequency as an FM station's main channel and is used to improve signal within the station's coverage contour.

The company and Harris are partnering on the first commercial test, which is expected to launch early next year at WRMF-FM in Palm Beach, Florida. Broadcast engineers say that limiting interference between a main channel signal and booster can be a challenge. Geo-Broadcast Solutions said the purpose of the test at WRMF is to prove ZoneCasting will not cause that type of a problem. (RW)

**

ENFORCEMENT: FOUR UNLICENSED FLORIDA STATION OPERATORS HAVE FINES AFFIRMED

Four operators of unlicensed broadcast stations in Florida have had proposed fines ranging from $10,000 to $20,000 each affirmed by the FCC. This is because none of them responded to Notices of Apparent Liability that were issued to them last summer.

The four unlicensed operators are identified by the regulatory agency as Damian Anthony Ojouku Allen, Michael William Downer, McArthur Bussey and Burt Byng. As a result of their failure to communicate back to the FCC the agency has upheld a total of $65,000 in fines and issued Forfeiture Orders.

Downer and Allen were fined $20,000 each for operating unauthorized stations on 101.1MHz in Pompano Beach and 102.1 MHz in Lauderhill. Bussey was told he has to pay$15,000 for operating on 89.1 MHz in Fort Lauderdale while Byng received a $10,000 penalty for operating an unauthorized facility on 107.1 in Miami.

As is usual in these cases, each was given 30 days to pay the fine or to file an appeal. If they fail to do either the cases may be turned over to the Justice Department for collection. (FCC, RW)

**

ENFORCEMENT: ALLEGED COPPER THIEVES CHARGED IN OHIO

Federal officials in Cleveland, Ohio, have charged 28 year old Thomas M. Carbone and 23 year old Katie M. Stanton with the malicious destruction of federally-licensed communications lines. U.S. Attorney Steve Dettelbach said that the defendants are accused of allegedly breaking into and seriously damaging radio towers.

The indictment charges that on or about August 17 to 18, 2012, Carbone and Stanton unlawfully entered the property of Radio One in North Royalton, Ohio, and willfully and maliciously destroyed and removed copper material from four radio station towers on the property. According to the indictment, this unlawful removal of copper depleted the signal strength of the radio station, thereby impeding its ability

to broadcast emergency messages. As such emergency repairs cost nearly $11,000 while permanent repairs will cost an estimated $125,000.

The indictment also charges that Carbone and Stanton conspired together to commit these unlawful acts. (CGC, Published News Reports)

**

HAM HAPPENINGS: HAPPY 20th BIRTHDAY TO REC.RADIO.INFO

A very happy birthday to the popular Usenet newsgroup rec.radio.info which is about to turn 20. This with the first articles having appeared back in January of 1993.

Usenet is an electronic discussion and bulletin system that predates much of the Internet. It later began using the Internet to carry its discussion categories, known as newsgroups. Amateur radio was one of the very first topics to have these newsgroups.

The rec.radio.info newsgroup carries a wide range of bulletins, announcements, and other informational articles about all kinds of radio. These include amateur, shortwave, and domestic broadcasting all of which are submitted by its readers and selected by its moderation team. Articles from rec.radio.info suitable for amateur radio transmission are also relayed to the amateur packet radio bulletin board service network.

The rec.radio.info newsgroup can be accessed using a newsreader and subscription to a News Service Provider. A web-based interface to Usenet newsgroups, including rec.radio.info, is available from Google Groups at groups.google.com. (K3FU, K9YA)

**

SOCIAL SCENE: HAMFEST INDIA 2012 TO HOLD US LICENSE EXAMS

Hamfest India 2012 is in the process of organizing a USA amateur radio license exams session on for this December 16th in city of Radakrishnan. Planners say that they are trying to find a location near to the hamfest venue with the exact location to be updated as soon as its known.

All the three classes of United States licenses will be tested. As anywhere else, applicants must present a photo identification of whom they and pay the exam fee of $15 or 850 Rupee in Indian currency. Walk-ins allowed and results will be made known to each applicant on the same day.

Oversight for this exam session will be by the ARRL VEC. More information is on-line at tinyurl.com/us-exams-in-india. (AB9US)

NAMES IN THE NEWS: THREE ASTRO-HAMS RETURN TO EARTH

Some names in the news. First up are ISS Expedition 33 Commander Suni Williams, KD5PLB, and Flight Engineers Yuri Malenchenko, RK3DUP, and Aki Hoshide, KE5DNI. All three returned to Earth on Monday, November 19th after 127 days in space.

The descent and landing took over 3.5 hours and occurred at 5:56 am U-T-C. This with a successful touchdown to the north-east of the town of Arkalyk in the Ukraine.

Expedition 34 arrived at in October is now in charge of ISS operations. It consists of Russian cosmonauts Oleg Novitsky and Evgeny Tarelkin, as well as NASA astronaut Kevin Ford, KF5GPP. They will spend five months on the orbiting laboratory. (NASA, Southgate, published news reports)

**

NAMES IN THE NEWS: ARRL DIVISION ELECTION RESULTS ANNOUNCED

Mike Lisenco, N2YBB, who has been elected the new Director of the ARRL's Hudson Division. Lisenco of Brooklyn New York handily defeated incumbent Joyce Birmingham, KA2ANF, for the top slot in that Division.

Meantime in the Northwestern Division, incumbent Jim Fenstermaker, K9JF, defeated challenger William Balzarini, KL7BB, to retain his Directors seat. James Pace, K7CEX, was elected as Vice Director in a three-way race.

Ballots were counted on November 16th. Those standing for election in other divisions were unchallenged. Terms for all Directors and Vice Directors elected or re-elected begin at noon on January 1, 2013 and run for three years. (ARRL)

**

NAMES IN THE NEWS: WALDEN TO CHAIR NATIONAL REPUBLICAN CONGRESSIONAL COMMITTEE

Newly re-elected Oregon Representative Greg Walden, W7EQI, says he will remain chairman of the House Subcommittee that oversees communications and technology policy. This as the former radio station group owner is being promoted within the Republican party leadership in Congress.

In addition to his other duties, W7EQI will chair the National Republican Congressional Committee. Elected to the post by House GOP members, the National Republican Congressional Committee chairman works with House leadership to set the agenda of that body. The committee also coordinates national efforts to elect Republicans to the House. (Published news reports)

**

NAMES IN THE NEWS: 2012 ARRL UHF CONTEST RESULTS POSTED

Sean Kutzko, KX9X, who is the League's Contest Branch Manager says that the results for the 2012 ARRL August UHF Contest are now on-line. You can view them at www.arrl.org/contest-results-articles. (ARRL)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: INCREASING EFFICIENCY OF WIRELESS NETWORKS

Professors at the University of California, Riverside Bourns College of Engineering have apparently developed a way of doubling the efficiency of wireless networks. According to researchers Yingbo Hua and Ping Liang it appears the doubling of efficiency could be achieved by using full-duplex with "time-domain transmit beam forming." They say that the latter digitally creates a time-domain cancellation signal, couples it to the radio frequency front-end to allow the radio to hear much weaker incoming signals while transmitting strong outgoing signals at the same frequency and same time.

Wireless Design says scientists Hua and Liang see applications in cognitive radio. They say that this is a type of wireless communication in which a transceiver can detect which communication channels are in use and which are not, and move into vacant channels while avoiding occupied ones. You can read the Wireless Design Online article at tinyurl.com/highly-efficient-radio. (Southgate, Wireless Design)

**

TECHNOLOGY CHANGING: SPACE WEATHER TO INTRODUCE TWO NEW PRODUCTS

This note from National Oceanic and Atmospheric Administration. Tentatively on December 11th the Space Weather Prediction Center will introduce two new forecast products titled the 3-Day Forecast and the Forecast Discussion. These new products will be available twice a day at 00:30 and 12:30 UTC to provide space weather information in abbreviated and detailed formats.

Both will use NOAA Space Weather Scale information. Examples of these new products are available at tinyurl.com/caqy4ox and for the concise, 1-page summary and tinyurl.com/bm9flp6 for the in-depth space weather analysis. These two products will supplement the existing product suite and no current forecasts will be discontinued. (OPDX, W8KVK)

**

RADIO IN SPACE: DARPA RECRUITING AMATEUR ASTRONOMERS FOR SPACE JUNK SURVEILLANCE

The U.S. military is launching a far-out neighborhood watch. But instead of warding off burglars, it's recruiting amateur astronomers to assist in tracking orbital debris and there-by help in avoiding possible satellite collisions in Earth orbit.

The sky-monitoring project, called SpaceView, is a Defense Advanced Research Projects Agency or DARPA program that enrolls the talents of amateur astronomers to help protect American space assets from orbital trash. These dangerous objects include spent rocket stages, defunct satellites and fragments from other spacecraft that are the result of erosion, explosion and collision. DARPA says that a collision between one of these small pieces of debris and a satellite could release more than 20,000 times the energy of a head-on automobile collision at 65 miles an hour.

The concept of the SpaceView program is to provide more diverse data to the Space Surveillance Network. This is a U.S. Air Force program charged with cataloguing and observing space junk and debris to identify potential near-term collisions. NASA estimates more than 500,000 pieces of hazardous space debris orbit the Earth, threatening satellites that among other things support peacekeeping and combat missions.

For more information on DARPA's SpaceView project take your web browser to www.spaceviewnetwork.com. (Space.com)

ON THE AIR: SPECIAL EVENT STATION GB0IDD TO CELEBRATE UN INTERNATIONAL DAY OF PERSONS WITH DISABILITIES

The United Kingdom's Wakefield District Radio Society will be operating the special event station GB0IDD over the weekend of December 1st to the 3rd. This in celebration of the United Nations International Day of Persons with Disabilities.

This United Nations sponsored Day of Action takes place each year. Its overall aim is to raise awareness and understanding of disability issues and to promote the independence, inclusion and choice of disabled people and their rights, abilities and well-being worldwide.

This year's theme is Removing Barriers to Create an Inclusive and Accessible Society for All. Operation will be mainly on 20 through 10 meters and you should confirm this contact electronically via e-QSL only.

By the way: Some 30 percent of the Wakefield District Radio Society members are disabled in some way, (GB0IDD)

**

ON THE AIR: 5G12ITD CELEBRATES INTERNATIONAL TOLERANCE DAY

And special events station 5G12ITD is on the air Morocco in celebration International Tolerance Day. The United Nations sponsors International

Day for Tolerance annually observed to educate people about the need for tolerance in society and to help them understand the negative effects of intolerance. 5G12ITD will be active all bands and all modes through December 16th. QSL via RW6HS. (Southgate)

**

DX

In DX, word that Members of the F6KOP team expected to be active from Ugands as 5X8C between February 6th to the 18th, 2013, from a location some 20 Km from Entebbe airport. They have announced they will comply to the last IARU bandplan on 40 meters for the region with the frequencies of the PSK and RTTY moved to 7040 and 7042 kHz. For more details see www.5x2013.com

H44RK has announced that he will be active from Samoa for a while in early December. More details will be forthcoming shortly.

DL5RMH will be active from Guatemala until middle of January signing stroke TG9 stroke KF5LSG though he is hoping to obtain the call TG9IDX. If you make contact, please QSL via his home callsign.

VK6DXI will be active stroke FK from New Caledonia until mid December. He has been heard early on Sunday mornings on 28.485 MHz around 07:20 UTC. QSL only via his home callsign.

LA9JKA continues to be operational as JX9JKA from Jan Mayen Island and will be there until approximately April 11th, 2013. He operates SSB and the digital modes on 160 through 4 meters including 60 and 6 meters. QSL direct only to his home callsign as listed in QRZ.com.

Lastly, special event station 8J6HAM will be operational from the Island of Kyushu Japan, between December 10th and March 3rd. Activity is in celebration of the 12th West Japan Ham Fair with operations on all bands and using many modes. QSL via the JARL Bureau.

**

NEWSLINE FOLLOW-UP: L.A. AIRPORT'S TRAVELERS INFORMATION STATION IS HISTORY

And finally this week, thanks to the efforts of a sharp-eyed CGC Communicator reader, we now know why the 530 kHz Travelers Information Station at Los Angeles International Airport reported on last week is silent. Amateur Radio Newsline's Bill Pasternak tells us who found out and why its goods and bad news for broadcast band DX'ers:

--

According to the CGC Communicator, it was a reader identified as Mark Nodine who provided the answer to the question of why the station went dark. According to Nodine, who holds the call KJ6MS says Los Angeles World Airports canceled their recently renewed license for WNHV296

effective October 1, 2012.

Los Angeles World Airports is the City of Los Angeles department that owns and operates three airports. These are Los Angeles International, Ontario International and Van Nuys. The latter of the three being mainly used for private and corporate aviation.

The CGC Communicator goes on to give some interesting technical date about the now defunct Los Angeles International Airport Travelers Information Station. For instance, the station consisted of two separate transmitters. A 10 watt unit was used to provide service to street traffic in a tunnel under the runways while a 100 watt transmitter broadcast to the general public. An FCC waiver was necessary in order to run 100 watts with the above-ground transmitter. That power level was granted back in 2004 after being deemed necessary to communicate with the general public in case of a terrorist attack.

The bottom line: As we said in our last report, the disappearance of this Travelers Information Service station does open up that frequency in the Southwest United States for DX'ing a 50 Kilowatt religious station in Turks and Caicos islands that operates on the same frequency. But it also means another low power AM broadcast band station that was a challenge for DXing listeners has gone away.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, scanning the medium waves from the newsroom in Los Angeles.

--

As an aside, the Los Angeles World Airports still holds but is not using the license for station WQEA967 on 770 kHz. It is supposed to be a 10 watt station at Southern California's Ontario International Airport. (CGC Communicator)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News, TWiT-TV and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, NG3K & ADXO, W3UR & The Daily DX, KP4BJD, N4AA & QRZ DX, KF5EYY, KH6BZF, WB6RSE, K8GI, K8YSE, W8GEX & 60m News, AT International, CX3AL, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK7JWY, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF) and VU2PAI for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX CW Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW DX CW Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 16th-November, through Friday, 23rd-November there were 236 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PY0S, PZ, R1FJ, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9L, VP2E, VP2M, VP2V, VP5, VP8, VP8/g, VP8/h, VP9, VR, VU, XE, XU, XW, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

AU2, INDIA (Special Event). Look for special event station AU2JCB to be active between November 24th and December 10th. Activity will be on 40-6 meters SSB, SSTV, PSK and FM. Suggested frequencies are (depending on the propagation): 7035, 7150, 14220, 14250, 14350, 21235, 21350, 28490, 28545, 28590 and 51500 kHz. If higher bands are open, operations will be on those bands. The operator will be Surabhi, VU2DSI. QSL direct (with 2 IRCs) to VU2DSI. Operations are to celebrate the 154th anniversary of the birth (November 30th) of Sir Jagadeesh Chandra Bose, India's great scientist and inventor, who they consider the "Father of Wireless Communication". For more details, see the following Web page at: http://www.qsl.net/vu2msy/JCBOSE.htm

BA7, CHINA. Paul, BA7JS, will be active during the CQWW DX CW Contest (November 24-25th) as a Single-Op/Single-Band (160m)/High-Power entry. QSL via his home callsign.

C6, BAHAMAS. Brian, ND3F/N3IQ, will once again be active as C6AQQ from Nassau (FL16 - Junkanoo Beach), Providence Island (NA-001) between now and November 27th. Activity will be mostly on the lower bands, but he will also be in the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/Low-Power entry. QSL via ND3F, direct preferred, eQSL, LoTW, or by the Bureau (long wait).

CR3, MADEIRA ISLANDS. Jose, CT1BOH, will be using the special callsign CR3E during the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band entry. All QSOs will be uploaded into LoTW. QSL Manager, Joe, W3HNK. See his Web page and station at: http://www.qsl.net/ct1boh

CX/CW, URUGUAY. Leo, CX3AL, provided OPDX with a list of Uruguayan stations to be active during the CQWW DX CW Contest (November 24-25th):
CW5W - Operator Jorge; Single-Op/All-Band/High-Power entry
CX2DK - Operator Marcelo; Single-Op/Single-Band (20m)/Low-Power entry
CX3AL - Operator Leonardo; Single-Op/Single-Band (15m)/High-Power entry
CX5TR - Operator Alan; Single-Op/Single-Band (15m)/Low-Power entry
CX7CO - Operator Carlos; Single-Op/Single-Band (10m)/High-Power entry
CX7ACH - Operator Pablo; Single-Op/Single-Band (10m)/Low-Power entry
See QRZ.com for QSL routes for all operators.

D3, ANGOLA. Mike, UA1QV, is now active as D3AA from Vila de Catoca, about 30 km from Saurimo, the capital of the Province Lunda Sul, Angola, until he leaves on February 15th (2013) for another vacation. Look for him to be in the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band entry. QSL via UA1QV.

DXPEDITION VIDEOS OF THE WEEK. With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings:
2012 - T30PY/T30SIX Western Kiribati:
http://www.youtube.com/watch?v=-Sa9dn89s

2012 - David/K3LP & Paul/N6PSE visit to Mt. Athos:
http://www.intrepid-dx.com/index-images/dxpedition_video.jpg
2012 - LA/SP7IDX and LA/SP7VC to Mageroya Island (EU-044):
http://www.youtube.com/watch?v=bRIxgfv-A
2010 - GB2BLE Lundy Island DXpedition:
http://www.youtube.com/watch?v=vsXY7Ayfo

If you have a DXpedition 'video' available on the Web and would like to have it listed in the OPDX, PLEASE send the URL to use, and we will publish it.

E7, BOSNIA-HERZEGOVINA. A team of operators will be active as E7DX during the CQWW DX CW Contest (November 24-25th) as a Multi-Single entry. QSL via E77E, direct, by the Bureau or LoTW.

ER4, MOLDOVA. Serge, UT5UDX, will be active as ER4A during both the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/High-Power entry. QSL via LoTW.

F6, FRANCE. Members of the Ville de Provins ARC will be active as F6KOP from a station located in the highs of Provins, 77 km SE of Paris, during the CQWW DX CW Contest (November 24-25th) as a Multi/Multi entry. Operators mentioned are Ghis/F6CEL, Francis/F5QF, Didier/F5JVP, Alain/F6ENO, Bruno/F5AGB, Mat/F5PED, Jean-Jacques/F5NKX, Stephane/F5UOW, Tony/F8ATS, Antoine/F5RAB, Serge/F6DZS, Terry/F4TTR, Claude/F5GVA, Laurent/F6BBO, Jean-Paul/F8BJI, Frank/ F4AJQ and Maurice/F5NQL. QSL via F6KOP, direct or by the Bureau.

FY, FRENCH GUIANA. Didier, FY5FY, will be active as FY5FY during the CQWW DX CW Contest (November 24-25th) as a Single-Op/Single-Band (possibly 20/15/10m)/Low-Power or QRP entry. QSL via FY1FL, by the Bureau or direct.

FY, FRENCH GUIANA. Larry, F6FVY, will be active as FY5FY during the CQWW DX CW Contest (November 24-25th) as a Single-Op/Single-Band (possibly 15/10m)/High-Power or QRP entry. QSL via LoTW or by the Bureau.

GU, GUERNSEY. Bob, GU4YOX, will be active during the CQWW DX CW Contest (November 24-25th) as a Single-Op/Single-Band (15m)/High-Power entry. QSL via GU4YOX, direct or by the Bureau (very slow) or LoTW.

H40 & H44, SOLOMON ISLAND AND TEMOTU PROVINCE. Ralph, H44RK, has announced that he is [edited] "planning a DXpedition in and around the Solomon Islands next year via our sailing boat Hafskip. The trip will start around April (2013) from Vella la Vella (OC-149) and continue through many Islands through to Temotu Province. From there we will be operating on many of the other islands as we head slowly back to VK4-land." In the Temotu Province, Ralph will sign H40RK. Some of the islands that he mentions (all count for DXCC as Solomon Islands) are: Solomon Islands (OC-047), Rennell Island (OC-127), New Georgia Islands (OC-149), Florida Islands (OC-158), Shortland Islands (OC-162), Russell Islands (OC-168), Ontong Java Atoll (OC-192) and Stewart Islands [aka Sikaiana Atoll]

(OC-285). Ralph is interested and looking in sponsors for this trip.
He can be contacted at: ralph.honiara@gmail.com

HP, PANAMA. Simon, S54ZZ, will be active as HP1/S54ZZ from Panama until
November 27th. Activity will be on 80-10 meters. QSL via his home callsign.

IOTA NEWS.............
NA-072. Olli, OH0XX, is currently active as HP1XX from Contadora
Island. The length of his stay is not known. He is expected
to be in the CQWW DX CW Contest (November 24-25th) as a
Single-Op/Single-Band entry. QSL via his home callsign.

MARK YOUR CALENDARS (Doomsday). According to one of the three Mayan
Calendars, the end of the world will occur on December 21, 2012. To
celebrate this once in a lifetime event, look for special event station
"N0D" to be on the air for the following three days:
December 20th - To celebrate the end of the world.
December 21st - The day of destruction. Operators will be on the
air as long as possible.
December 22nd - This day is a little iffy right now.
This operation will take place from a secret undisclosed location. QSL
with SASE via KK5W, the address is in QRZ.com. According to the info on
QRZ.com, "If Doomsday actually does happen, we regret that a QSL will
not be possible so don't mail your QSL request until it is safe." More
information is available about certificates, official N0D Doomsday apparel
(T-shirts, Caps and buttons) and becoming a registered "Official Doomsday
Station" [also take the Doomsday survey] on the Official N0D Web site at:
http://www.nowzerodays.com
You can also E-mail the N0D team at <N0D.Doomsday@gmail.com> with questions
or suggestions about Doomsday. "DO IT QUICK -- TIME IS RUNNING OUT"

MJ0, JERSEY. Mat, F5SHQ, will be active as MJ0ASP during the CQWW DX CW
Contest (November 24-25th) as a Single-Op/All-Band entry. QSL via LoTW.

MZ, SCOTLAND. Ian, G3WVG, will be active as MZ5B from Eshaness, Shetland
Island (EU-012, IOSA SH01, SCOTIA SI11, ARLHS SCO-075, BARLS A3838, WLH

GM-026, WLOTA LH-0867, WAB HU27) during CQWW DX CW Contest (November 24-25th) as a Single-Op/Single-Band (10m) entry. QSL via LoTW or to G3TXF, direct or by the Bureau.

NP4, PUERTO RICO. Felipe, NP4Z, will be active during the CQWW DX CW Contest (November 24-25th) as a Single-Op/High-Power entry. QSL via N4AO.

OA, PERU. Martijn, PA3GFE, will be active as OA4/PA3GFE between December 20th and February 1st. Activity will be holiday style on 40-10 meters, mainly CW and the Digital modes. He hopes to get active on 80m too, if he can get the antenna to resonant. QSL via his home callsign, direct or by the Bureau. Log will be uploaded to LoTW.

OH0, ALAND ISLAND. Operators Franta/DJ0ZY, Maik/DJ2QV, Simon/DJ4MZ, Manfred/DK2OY, Holger/DL5KUT, Bernhard/DL6RAI, Jukka/OH6LI and Jari/OH6QU will be active as OH0V from Geta Bergen during the CQWW DX CW Contest (November 24-25th) as a Multi-2 entry. QSL via OH6LI, by the Bureau or direct.

PT0S, ST. PETER AND ST. PAUL ROCKS (Update). The PT0S team will not be in the CQWW DX CW Contest (November 24-25th) because they went QRT on November 23rd at 1030z. QSL via HA7RY. The latest updates are available at their Web page. Also the PT0S's log is now on their Web page and ClubLog at: http://pt0s.com
https://secure.clublog.org/logsearch/PT0S
As of 0845z, November 22nd, PT0S has made a total of 40922 QSOs with 13116 Unique callsigns (23649/CW, 15676/SSB and 1597/RTTY). Breakdown by continent is: 710/AF, 1/AN, 2591/AS, 19278/EU, 15060/NA, 363/OC and 2919/SA. ADDED NOTE: The OQRS is now available on their Web page!

7O6T QSL STATUS. OPDX was informed on November 20th that QSL Manager Nick, UA3DX, reported he received the QSL cards from the printer about 4 weeks ago (QRZ.com states October 18th). He is now mailing about 500 direct cards weekly.

NEW QSL MANAGER. As of November 21, 2012, Buzz, NI5DX, is the QSL Manager for 4L1AN. Buzz and Joni will work on designing a card and getting it printed. This may take up to 6 weeks. NI5DX will NOT be able to answer any card requests prior to November 21, 2012.

NEW QSL MANAGER. Effective immediately, Buzz, NI5DX, is the QSL Manager for ZL2HAM, Rick in Nelson, New Zealand. Rick has forwarded Buzz his past logs, so Buzz will be able to answer any request for a card from ZL2HAM. Cards will be ordered and should be available to send out in about a month. Buzz will also handle Rick's contest calls ZL1G and ZM1G.

QSL INFO UPDATE FROM VU2PAI. Pai, VU2PAI, sent the following to OPDX:
"Greetings from Mangalore ,South India,
With a heavy heart I wish to inform the sad news about the loss my beloved father recently. He encouraged me very much in all walks of life and specially he helped me and motivated a lot for Ham Radio.
The reason for my mail is to request you to publish some information that I will give in this mail in your next news bulletin.
I have a small back log of the QSLs that I have received recently from about June-August as I was travelling to the U.S. in May-June to attend Dayton Hamfest, and I have not been active on the air for about 2 months since the death of my father. I am now QRV, and I will be sending all the pending cards soon. I once again request all DX hams not to send any green stamps with their QSL card. IRCs are fine no problem at all. I also read that it is difficult to get IRCs in many post offices in Europe and now the U.S.A also. But please do not forget to send a self addressed envelope or an address label with your QSL request.(More info on QRZ.COM under my call VU2PAI)
I will be very happy to send cards via direct even without IRC or green stamp, no problem, I request hams to please use 3 or 4 beautiful stamps on the envelope when they send me their card. If possible they can send me 3 or 4 mint (unused stamps) from their country or any saved envelopes that they have from exchanging QSLs from other DX contacts to me. I love collecting stamps and stamps on envelopes. I still have some photo QSL cards from my previous activations like St.Marys Island (IOTA AS-096), Sacrifice Rock Island (Iota AS-161), AT0PAI,AT2PAI,VU2PAI/50 etc.
I DO NOT have any QSL Manager, and I handle all my QSL requests. Some databases showed a QSL Manager in Italy for me which is wrong information.
All QSL cards only for VU7LD/VU2PAI (Laccadive Islands) is VIA W3HNK ONLY.
I have also been appointed as the QSL manager for ALL VU stations since

the last one year, and I will be happy to forward all incoming QSL cards to the members of the ARSI (Amateur Radio Society Of India which is affiliated to the IARU).
Best wishes to all and Seasons greetings in Advance for a very Merry Christmas and happy,healthy and a prosperous 2013."
VU2PAI address is: Ananth G.Pai, Bharath Beedi Works Pvt Ltd,
Post Box 730, Bharath Bagh,Kadri Road, Mangalore 575 003, India.

QSL RECEIVED VIA LoTW: 5H2DK, 5U6E, EA6UN, EA8AY, EI3KD, HB9ELE, HK1NA, J68HZ, LZ1MS, MW0ZZK, PJ7DX, PT0S, RI1ANF, S50XX, SV1CQN, T30PY, VE1DHD, VK7DZ, XE2HQI, YI9EO, ZL4PW and ZL7A

QSLS RECEIVED VIA MAIL: 3D2C, 7O6T, C50C, C5A, D3AA, D64K, FG5FR, and TO2D

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

ST, SUDAN. "The Daily DX" reports that Mario, CT1FTR, has moved to the Sudan and has recently obtained his ST2FT license. He is using a FT-857 that is set up for SSB and PSK31 on the HF bands. QSL via CT2GBU direct and eQSL. PLEASE NOTE: QSLs cannot go through the REP QSL Bureau as neither CT1FTR nor his QSL Manager are members of REP.

T2, TUVALU. Operators Rob/GM3YTS, Tom/GM4FDM, Gav/GM0GAV and Clive/GM3POI will be active as T2GM from Tuvalu between March 12-23rd (2013). Activity will be focused on Europe. QSL via GM4FDM. Hopefully, more details will be forthcoming.

T6, AFGHANISTAN. Eric, K9GY, now active as T6MO from the Helmand Province (Grid MM21), is expected to once again be in the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/Low-Power entry. Activity will be on 40/20/15/10 meters only using 100 watts into a OCF dipole at 30 feet. His sunrise is 0218z and sunset is 1240z. QSL via K8GY.

TM1, FRANCE (Special Event). Look for special event station TM1TARA to be on air between December 8-10th. Activity is to commemorate the scientific campaigns of French polar boat "TARA". Operations will be conducted by Fran&#65533;ois/F8DVD and Sebastien/F8IJV in Paris during the Tara exhibit. Look for them on 20-10 meters SSB. A special color QSL card will be printed and will be sent via the Bureau or direct (SAE with 1 IRC or 2 USD) via the QSL Manager F8DVD.
The Tara Expeditions has been organizing missions aboard the research schooner Tara for the past 9 years. The goal was to learn more about the impact of climate change on ecosystems. Tara has accomplished 8 successful expeditions - to Greenland, Antarctica, Patagonia, southern Georgia, the Arctic and all over the world with the latest expedition Tara Oceans. After stopovers in Europe this winter, the schooner will leave for a new mission in 2013 for the great North. Tara will attempt to go through the Arctic Ocean by the northwest and northeast passages, if the ice pack permits this. This will also be the occasion to add new research programs specific to the region concerning plastic particles and traces of pollution. For more info, see QRZ.com or contact F8DVD: a.pole@laposte.net

TX1, NEW CALEDONIA. Sam, FK8DD, will be using the special callsign TX1CW from Noumea, New Caledonia (OC-032), for the CQWW DX CW Contest (November 24-25th). QSL via LZ1JZ.

UA2, KALININGRAD. Dmitri, UA2FB, will be active as UA2KW (ex-UA2KK) from the Keeper Telecom LTD Club Station during the CQWW DX CW Contest (November 24-25th) as a Single-Op/Single-Band (20m) entry. QSL via direct to: Ulrich Mueller, 13 Kreutzacker Str, D-35041 Marburg, Germany. No German stamps please! All cards are replied from Russia. No IBRS please! Bureau QSLs go to the UA2 QSL Bureau.

V2, ANTIGUA (NA-100). The V26B QSL Manager Mike, KA2AEV, reports: "We (Team Antigua) are currently awaiting additional information as to the status of the shack. The building was damaged and the owner, Roy Carte, injured, but he's in the hospital and as far as I know recovering nicely. We will have additional information in the days ahead. ANOTHER UPDATE: V26B shack was totally destroyed: http://n3oc.dyndns.org/v26b
Pictures here: http://n3oc.dyndns.org/v26b/fire.htm
ADDED NOTE FROM Mike: Also, currently due to Hurricane Sandy which hit my area HARD, I have not yet begun to answer any QSL requests that I have received and do not anticipate until maybe another 2 weeks because of my job status, (I work for the local Power Company) so PLEASE BE PATIENT. Please do not email me or Telephone me asking me if your QSLs have been received or why they haven't been answered yet....
PATIENCE PLEASE."

V3, BELIZE. Bob, K4UUK, will be active as V31RD from Belize between May 4-18th (2013). Activity will be on 80-6 meters SSB. QSL via his home callsign, direct (preferred) or by the Bureau.

V4, ST. KITTS (Cancelled). Andy, N2NT, was expected to be active as V47NT from the QTH of V47KP between November 19-26th. However, he reports, "I had to cancel the trip to V47NT for the CQWW contest. The road to the station is out and no way to get to the hill. "

V8, BRUNEI (Update). By the time you read this, the activity by the V84SMD DXpedition should be over. Remember, the V84SMD log search is available at: http://www.maxlaconca.com/logv84smd
QSL via IK2VUC, direct, by the bureau or the OQRS. Logs will be uploaded to LoTW 4-5 months after the activity. Further information can be found on their website at: http://www.mdxc.org/v84smd
As of 2347z, November 22nd, V84SMD has made a total of 39310 QSOs with 14102 Unique callsigns (42%/CW, 37%/SSB and 21%/Digi). Breakdown by continent is: 1%/AF, 44%/AS, 43%/EU, 10%/NA, 2%/OC and 1%/SA.

VK0H, HEARD ISLAND (Update). A recent update, was posted on the Heard Island (The 2014 Cordell Expedition) Web page at:
http://www.cordell.org/HD
Under "News" it states [edited]:
"PROJECT STATUS - We announce the appointment of Viola Krebs as liaison to IPEV, the operators of the vessel Marion Dufresne. Viola replaces Peter Casier who resigned for personal reasons. We are currently in final negotiations for the itinerary and cost for the expedition. Attempts to

arrange a combined mission with TAAF to enable the team to be on Heard Island for 33 days did not succeed due to the large size of the team and inadequate space on the vessel.
We report that that team member Damion Gildea has made preliminary arrangements for an Australian film team to make a documentary of the expedition.
We expect that in the next news update (15 Dec), we will have specific information about the itinerary and projected costs.
We have posted updates on the expedition website <www.heardisland.org>.
For more information, please contact Dr. Robert Schmieder, KK6EK, Organizer and Expedition leader, Schmieder@cordell.org."

VP2M, MONTSERRAT. Alan, N3AD, will once again be active as VP2MMM between now and November 27th. Activity will include the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band possibly a High or Lower Power entry. QSL via W3HNK.

XR0, EASTER ISLAND. A UK DXpedition team will be active as XR0YG from Easter Island (SA-001) between February 13-21st. Operators mentioned are Michael/G7VJR, Nigel/G3TXF, Bob/MD0CCE and Martin G3ZAY. QSL via M0OXO.
There will be a log search on ClubLog at:
https://secure.clublog.org/charts/?c=0YG
No other details are available at this time. Stay tuned.

XT, BURKINA FASO. A team of Japanese operators will be active from Burkina Faso between February 22nd and March 2nd (2013). Activity will be on 80-10 meters using CW, SSB and the Digital modes. Look for the following operators (w/their XT callsign): Yukinori/JA3VWT (XT2VWT), Jusei/JA3IVU (XT2IVU), Junichi/JH3AEF (XT2AEF) and Kunio/JA1CJA (XT2CJA). QSL via their home callsign.

XT, BURKINA FASO. On Tuesday, members of the "Italian Dxpedition Team" announced that their next DXpedition will be to Burkina Faso between February and March 2013 (dates are approx.). This will be a 15 day operation on all bands and all modes. The pilot station is IK7JWY, and the pilot station for 6m band is IK0FTA. Software Management (real-time log online) will be by IH9GPI. The official Web site is:
http://www.i2ysb.com/idt
Official forum is: http://www.hamradioweb.org
Look for more details to be forthcoming.

XU, CAMBODIA. Mal, VK6LC, will be on another DX vacation to Cambodia between November 23-25th. He will sign XU7AEO. Activity will be on CW and some SSB. Also, look for him to operate in the CQWW DX CW Contest. QSL ONLY DIRECT to VK6LC.

XV1, VIETNAM. Eddie, XV1X, will be active during the CQWW DX CW Contest (November 24-25th) as a Single-Op/Single-Band (10m) entry. He mentions that he may operate on other bands if 10m closes up. QSL RW6HS.

XV4, VIETNAM. Yan, XV4Y (ex-XV4TUJ), located in Mekong delta (south of Vietnam), informs OPDX this past week [edited]: "Like last winter, I

will try to be active on 80 meters around NA sunrise time (1300-1400z).
I already have several good reports and even a couple of QSOs during last
month, but the level of noise is still really high since the rainy season
has not yet ended. I hope to have better conditions in December and
January, but the stations who want to work me may need a lot of patience.
My setup is rather simple with 100W in a low-above-ground 80m OCF Dipole
for TX antenna and an homebrew coaxial-made small loop for RX antenna.
I will also try to be on the air for Europe around 2200z (my sunrise),
but I have not a lot of spare time for this so don't expect me to be
there every morning. However, band conditions are usually better at
sunrise than at sunset so the QSO rate could be better. For more details
about my planned operations (when I am able to plan something) will be
available on my Twitter account @XV4Y. See you on the air." QSL via
OK1DOT, LoTW and eQSL. Yan's Twitter and Web page can be found at:
http://twitter.com/#!/XV4Y/followers
http://xv4y.radioclub.asia
Also, to learn more about Yan, read his QRZ.com page.

XW2, LAOS. Rudi, DK7PE, is now active as XW2CW from Vientiane until
November 27th. Activity will be limited. Look for him to possibly be
on 160 and 80 meters. QSL via his home callsign, direct or by the Bureau.
Visit his Web page at: http://www.rooody.de/index.html

YB0, INDONESIA. Pri, YB0ECT, will be active during the CQWW DX CW Contest
(November 24-25th) as a Single-Op/Single-Band (10m)/Low-Power entry. QSL
via W2FB.

ZL9, CAMPBELL ISLAND. Just a reminder that members of the Hellenic Amateur
Radio of Association of Australia (HARAOA) will be active as ZL9HR from
Campbell Island (OC-037, WFF ZLFF-019) between November 28th and December
9th. Activity will be on 160-6 meters using all modes. QSL via EB7DX direct,
LoTW or use the OQRS for Bureau and direct requests. For more information
and updates, visit their Web site at: http://www.campbell2012.com

----
The following stations are expected to be active in the
CQ World Wide DX CW Contest (November 24-25th, 2012)

Thanks to Bill, NG3K, for providing OPDX readers with the following
consolidated listing of the participants in the 2012 CQWW DX CW Contest.
For a more detailed listing (and up-to-date changes/corrections) in HTML
format, please visit Bill's Web page at:

WIANEWS WEEK COMMENCING NOVEMBER 25 2012.

GAREC 2012 was hosted by MARTS

Dale Hughes VK1DSH to chair ITU Committee

WIA BOARD TALK EWAN VK4ERM

VK4TUB Wormhole FBBS back online

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING NOV 25 2012.

Australian is new head of ITU committee

The International Telecommunications Union Working Party 5A1, dealing with
amateur radio, has met to discuss the 5 MHz proposal for the next World Radio
Conference in 2015 and a change concerning the use of PSK31.

Under the Chairmanship of Brennan Price N4QX it met in Geneva, Switzerland
this month.

The discussions about 5 MHz are at an early stage. A Canadian contribution
on the Spectral Occupancy between 5250-5450 kHz was discussed and carried
over to the next meeting.

A recommendation, ITU-R M. [VARICODE], that seeks to establish a telegraphic alphabet and transmission protocols for PSK31, was accepted by the Working Party.

Among its other work done is the continued updating of the Amateur and Amateur-Satellite Service Handbook published by the ITU.

During the final plenary meeting, the Chairman Brennan Price N4QX announced his retirement. He was thanked for his contributions over the past few years. Dale Hughes VK1DSH was proposed and will Chair the next meeting in May.

(Jim Linton VK3PC)

KOLD TURNS 90

The founder of the world's most remote radio station, Radio KOLD Antarctica, turned 90 this week.

Steve Grimsley VK2ZP set up Radio KOLD at Wilkes Base in 1961, and the station is still broadcasting.

Family, friends and former colleagues gathered in the NSW town of Binalong to celebrate Steve's birthday.

Radio KOLD was notorious for beginning its broadcast day very early in the morning.

"Well the object of that of course was to get everybody out of bed and get them off to breakfast, but it wasn't very well received" Mr Grimsley laughed.

Professor Mark Hunt, the Casey Research Station Leader called in to wish Mr Grimsley a happy birthday and tell about the state of Radio KOLD today.

"Radio KOLD is on an FM frequency these days, 102.5, and it still keeps the station in music all through the day," Professor Hunt said.

"We share it around so that different people get to choose the music each day and that can either be an education, or it can be something of a pain," Professor Hunt added.

GAREC 2012 was hosted by MARTS

The 8th Global Amateur Radio Emergency Communications Conference was held in Port Dickson, Malaysia.

Attending the conference on November 12 to 14 were delegates from nine countries under this year's theme of 'One world, One commitment'.

Among the presentations was one on the Mobile Emergency Weather System which assists authorities using simple equipment and training.

There were status reports from various countries and these highlighted the differences and similarities in approach to emergency planning.

While solutions may not be easy to find, sharing the problems and allowing individual countries to recognise that they were not alone, provides valuable support to the Global community.

GAREC-2012 included two practical activities. These enhanced inter-personal relationships enabling delegates to work together more efficiently in future.

Future conferences may seek to involve partners in emergency response, such as the International Federation of the Red Cross and the ITU, in accord with the existing Memoranda of Understanding.

The delegates thanked the Malaysian Amateur Radio Transmitters Society in hosting this successful conference.

The next GAREC is in Zurich, Switzerland on June 25 to 27, 2013. All groups and organisations involved in Amateur Radio Emergency Communications are invited to attend to share their knowledge and learn from others.

WIA BOARD TALK

President Phil Wait VK2ASD vk2asd@wia.org.au
Vice President Chris Platt VK5CP vk5cp@wia.org.au
Secretary David Williams VK3RU vk3ru@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

VK6POP Bob Bristow has put out a call to all the broadcasters via the wiabroadcasters@yahoogroup.com asking for ideas how this VK1WIA National News can best be delivered live from Perth May 24-25 from the WIA Conference and AGM.

So if you haven't yet put in your 2 bobs worth have a re-read and get back to both vk6pop@wia.org.au AND vk4bb@wia.org.au

Greetings Everyone, from the President and Board of the WIA.

Recently residents in southeast Queensland and northern New South Wales have been reminded just how rapidly damaging storms can generate and how little time there is to prepare our property for an onslaught. There is plenty of information available on the preparation of homes, yards, outside furniture and personal survival items but radio amateurs face additional concerns and decisions related to their hobby and assets.

How many of us have compiled and refined a checklist of things to do in preparation for storms and the curly wind season and another for when the arrival of them is imminent?

Each amateur station has its own unique characteristics which determine the sequence of preventive maintenance inspections and actions to maximise the chances of station survival. For example, are tower guys still sound? The external galvanising may appear good but has internal corrosion started and lowered the breaking strain of the cable? Can all cabling to the tower, both RF and control, be rapidly disconnected and widely separated from your equipment, ideally outside onto the ground? Can the station be isolated from mains power? Can the station ground be easily and quickly disconnected and physically separated from the station equipment? Does your telescopic tower need to be fully extended when not in use?

As we leave our home, for whatever reason, have we done the simple things to increase the probability of the survival of our station equipment in the

even a tempest strikes in our absence? Perhaps we adopt the 'She'll be right Mate!' attitude but this is not a consoling recollection as you dismantle the fried equipment and consign it to history and ponder what went wrong.
The 'If only I had' thoughts are not worth much in the aftermath of station damage.

So please pick up pen and paper and work out your plan of preventive inspection and maintenance plus the actions and their sequence to be taken in preparing your station to ride out a storm or curly wind especially those that arrive at short notice or unexpectedly.

This has been Ewan VK4ERM for the WIA Board

HAMS ACROSS AUSTRALIA.

VK4TUB Wormhole FBBS back online

After a break of 7 years the VK4TUB Wormhole FBBS is back up and running, as part of the resurgence of Packet Radio now sweeping the world.

Tubby/VK4TUB has been missing his packet fix since closing the FBBS in 2005, and recently became aware of several issues in the world-wide hobby of Amateur Radio that is spurring renewed interest in the mode of operation.

The Tubster reports that the failure of commercial and community based digital services based on mobile phone networks during extreme weather events and the protocol wars in the digital radio scene has seemed to kept Packet Radio alive in Europe and the USA and he is surprised but pleased to see many new Packet BBS popping up in countries like Spain, Japan and Canada.

The keen interest in APRS has also led some hams to give the mode of operation it is based on a bit of a go and have become hooked.

So, how do you access the VK4TUB Wormhole FBBS ?

The system is currently running one radio port on 145.175MHz at a data speed of 1200baud with 10 connection channels available.

The system is currently running one telnet port with 7 channels configured as either user or forward type.

To connect on radio, fire up your favourite terminal program, plug in that old TNC and in command mode issue c vk4tub-3 to get the login message and bbs prompt.

To find out more or arrange registered access on the telnet port, drop Tubby a line on this special wormhole email address

wormhole15@hotmail.com

REAST November Show and Tell night

A very inspiring evening of show and tell.

Tom VK7TL showed a stereo microscope

Ric VK7RO showed his interesting vernier drive and Atlas Transceiver he has restored,

Bob VK7ZL his digital QRP transmitter and active antenna,

Warren VK7FEET showed a homebrewed CW paddle and 40m CW QRP transmitter from the 1960's used at the Antarctic Division and it still works!,

Andrew VK7FAAJ showed a 1920s Howe crystal receiver he is about to start restoring,

Justin VK7TW showed his VK3XU design valve 160/80m transmitter and CMOS4000 car alarm.

The highlight of the evening was Tony VK7TU, with his homebrewed calculator, audio spectrum analyser, computer trainer and lighting controllers.

(73, Justin, VK7TW)

What use is an f-call? (20120415)

Arthur C Clarke pointed out that "Any sufficiently advanced technology is indistinguishable from magic" and so it is with Amateur Radio.

We're celebrating over a century of radio and most of that is about learning, about transforming knowledge, applying that and coming up with new solutions for problems.

What use is an F-call started 44 episodes ago. During that time I've talked about what Amateur Radio is about, what you can do with a Foundation Call, how to involve yourself in the hobby, how to ask questions, where to go for help and many other topics. As I've said all along, I'm a new Amateur. I've been in this hobby less than two years and every day I learn something new.

>From the feedback I'm getting, what I'm doing is striking a chord for many Amateurs and I'm happy that it does. Ultimately, the aim of this is to encourage Amateurs to experiment, to talk, to interact and to not be afraid

to make mistakes. Some of those topics are specific to new hams, but some might relate to you even if you've had a license for much longer.

I'd like to see "What use is an F-call" evolve into something that you can participate in. Your contribution might be a simple email that tells of an experience you had at some time, or it might be an outline of an idea that you'd like to see discussed.

For me, Amateur Radio is magical. It's a technically challenging hobby that encourages me to investigate and learn.

What does Amateur Radio mean for you?

If you'd like to get in touch, my email address is vk6flab@harg.org.au

I'm Onno VK6FLAB

HOME OF THE GOOD GUYS

A TRUE ACT OF TRUE HUMANITY

It isn't often that you hear a story like this, but when you do it makes one proud to be a member of the human race.

Amateur Radio Newsline's Bruce Tennant, K6PZW reports:

--

Gene "Bean" Baxter is a personality of CBS Radio's KROQ-FM in Los Angeles. He has entertained L.A. audiences since 1990 alongside on-the-air partner Kevin Ryder, as part of the "Kevin and Bean" morning show team.

In addition to making a multitude of over the air friends, Bean, as he is known, has also created longstanding relationships with those inside the KROQ offices. In that vein he recently announced that he will become a kidney donor to help a long-time staffer. The recipient of Bean's generosity will be Scott Mason, N1CBS, who is the Director of Engineering for CBS radio on the West Coast, and who has been with the company in a variety of capacities since 1979.

On November 13th, the two will go to Cedars Sinai Medical Centre which is one of only four hospitals in the country that have the ability to match Mason's blood type to that of Bean and give him the much needed organ. Bean then plans to take a few weeks off from work, and expects his remaining kidney to function at about 80%.

Out of this whole process, Bean hopes that people will see how easy it is to become an organ

donor. He also believes that if he recovers
quickly and is back to work in a short time, it
may deliver an even stronger message, changing
the minds of some and raising awareness of organ donation.

This will be the second transplant for Mason, who
has had kidney problems for most of his adult
life. He underwent a previous transplant from a
cadaver in 1999 that lasted about 10 years. He
currently undergoes daily dialysis and calls
Bean's decision to donate a kidney to him as a
game changer. Bean Baxter calls it a no-brainer.

Wishing them both Mason and Bean a quick recovery
from this upcoming and life changing surgery,
I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Scott Mason has been on a waiting list for a
kidney, which sometimes is a six to 10 year wait,
when Bean offered his kidney. For Bean Baxter,
it was an educational process and a decision
based on math, not emotions. He said that Mason
has zero kidneys and that he has two. You can
hear the full discussion with Bean Baxter and
Scott Mason on Kevin and Bean audio archive at
tinyurl.com/radio-kidney-donation

(KROQ Audio Archive, ARNewsLine)

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL,
Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

WORK PROCEEDING ON RECOVERY OF AO-27

AMSAT Oscar 27 is down but not out.

This according to controllers who are working to return of the satellites FM
repeater back to service.

Here's the back story.

In early October AO-27 was restored to running on its primary boot loader
program. Control operators were able to turn on the Transmitter for a
short time on several occasions. Also required were multiple recoveries to
a stuck AFSK modem.

During recovery efforts AO-27 crashed a couple of times.

Then the transmitter was left on in an attempt to discharge the batteries
with the hope that faults could be cleared. Once the battery was recharged
the high-level software aboard AO-27 ran for a few seconds before locking up.

The team was able to reset it back to the boot loader yet again.

Telemetry indicates AO-27 is locking up while fetching telemetry from the hardware. As such, controllers say that it does not look like there will be a quick resolution to this crash.

In the meantime the AO-27 controllers are asking the ham radio public not to attempt to use AO-27 if you hear it in Analogue mode. This to prevent interfering with the command team's recovery efforts.

==========

NEWS FROM ARNEWSLINE USA

BOEING UNVEILS EMP DRONE

>From our technology page, it appears as if science fiction has become a military fact. This after a successful missile test has ushered in a new era of warfare in which the military can take out electronic targets without destroying a single building or harming human beings.

Amateur Radio Newsline's Bill Pasternak, WA6ITF, is here with the story:

--

According to news reports, back on October 16th an experimental missile called CHAMP fired bursts of high power microwave energy at an unoccupied site to damage computers and other electronic systems during a test at the Utah Test and Training Range. The Counter Electronics High Power Microwave Advanced Missile Project flew over the Utah test site and brought down the compound's entire spectrum of electronic systems, apparently without producing any other damage at all. Even cameras recording the test was shut down.

Keith Coleman is the CHAMP program manager for Boeing Phantom Works. He says that in the near future this technology may be used to render an enemy's electronic and data systems useless even before the first troops or aircraft arrive.

The idea of using microwaves or electromagnetic pulses to knock out electronic systems without having to reduce cities or military bases to rubble first arose during Cold War nuclear tests. There scientists found that explosions created electromagnetic pulses that damaged some civilian power grids and other facilities.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

==========

WEIRD AND WONDERFUL

TEN COMMANDMENTS OF ELECTRONICS

1. Beware of the lighting that lurks in an undischarged capacitor lest it cause three to be bounced upon thy backside in a most ungentle manly manner.

2. Cause thou the switch that supplies large quantities juice to be opened and thus tagged, so thy days may be long in the world.

3. Prove to thy self that all circuits that radiateth, and upon which thou worketh, are grounded lest they lift thee to high frequency potential and cause thee to radiate.

4. Take care thou useth the proper method when thou taketh the measure of high voltage circuits so that thou doth not incinerate both thee and the meter, for verily, though hast no account number and can be easily replaced, the meter doth have one and as a consequence bringeth much woe upon the supply department.

5. Tarry not amongst those who engage in intentional shocks, for the yare surely non-believers and not long for this world.

6. Take care thou tampereth not with interlocks and safety devices, for this will incur the wrath of thy seniors and bring the fury of the safety officer down upon thy head and shoulder.

7. Work not upon energised equipment, for if thou doeth, thy buddies will surely be buying beer without thee, and the space at the bar will be filled by another.

8. Verily I say unto thee, NEVER service high voltage equipment alone, for electric cooking is a slothful process, and thou might sizzle for hours on end before thy maker sees fit to end thy misery and drag thee into his fold.

9. Trifle not with radioactive equipment les thou commence to glow in the dark like unto a lightning bug.

10. Commit thee to memory the words of the prophets, which are written in instruction books, which giveth thou the straight dope, and which consoleth thee, and thou canst not make mistakes.

OPERATIONAL NEWS - DATELINE 2012

As this news penetrates the ether 2 contests, completely different, are in full force!...

Hello I'm Felix VK4FUQ.

CQ'S DX Contest, CW and the WIA Spring VHF / UHF Field Day November 24-25

then 3 BIGGIES BEFORE 2013 ROLLS AROUND,

ARRL 160 MTR CONTEST November 30
RTTY Melee December 1
ARRL 10 m Contest December 8- 9

WITH SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE WE LEARN OF ANOTHER OPERATION FROM "THE SAND PIT".

Yes it's an Afghanistan operation.

Mike, KI4MRH, is active as T 6 MH from Afghanistan, and expects to be there until October 2013.

Activity will be on 80-10 meters (no 30m) using SSB and the Digital modes of (PSK-31 / PSK-63 / JT-65).

He will use 100 watts (SSB) and 30 watts (Digital) into a 40 meter Inverted Vee and a 20 meter vertical.

This past week Mike has been really active on 20/17/15 meters using the Digital modes.

Also, OPDX. was informed that he now has a QSL Manager, so QSL via W 2 GR.

Special Event Station - GB 0 IDD

UN International Day of Persons with Disabilities

Wakefield District Radio Society will be operating the Special Event Station GB 0 IDD (International Disability Day) over the weekend of 1st, 2nd,and 3rd December from the Wakefield 23rd Troop Scout HQ in Celebration of the day.

This United Nations sponsored "Day of Action" takes place each year to raise awareness and understanding of disability issues and to promote the independence, inclusion and choice of disabled people and their rights, abilities and well-being worldwide.

This year's theme is

"Removing barriers to create an inclusive and accessible society for all".

Wakekefield District Radio Society has around 30% of its' members who are disabled in one way or another.

Operation will be mainly (but not exclusively SSB) on the Bands 14 - 28MHz

AWARDS

Victorian National Parks Weekend a success

Over three days an estimated 400 QSOs were amassed by operators who went portable in the numerous National Parks in Victoria to give contacts toward the Keith Roget Memorial National Parks Award.

The vibe seemed good with so many stations activating the parks last Friday, Saturday and Sunday.

Award Manager, Tony Hambling VK3VTH said thank you to all who put National Parks to air and those who contacted them.

Some of those in National Parks had a dual task of putting mountain tops in the log books, under the Summits Of The Air or SOTA program.

For example Peter Fraser VK3ZPF activated six National Parks and one SOTA summit, mostly with QRP into a squid pole antenna, including working Madagascar on 5 watts.

The Alpine National Park and a SOTA was activated by Warren Brown VK3BYD on 40-Metres CW, giving those chancing the mode a rare opportunity.

Peter Freeman VK3PF, at eight National Parks and five peaks, praised the considerate operations and QSYing on the 40-Metres frequency.

Jim Linton VK3PC said that "Unfortunately the weather went against Duncan Maughan VK3XBC. Despite several attempts, a storm with hail and snow got in his way."

Oh well there's the next event, which Tony VK3VTH has revealed will be November 15 to 17 in 2013, and he looks forward to issuing new award certificates.

INTRUDER WATCH - ENFORCEMENT ZONE

Top Monitoring Service Award

John Martin ZL1GWE the NZART Monitoring Service Officer, advises the recipient of this year's award goes once again to Phillip Conza ZL2TZE. On congratulating Phillip on behalf of NZART Council and members, John Martin thanked ZL2TZE for his continued efforts.

Mysterious Chinese signals on our bands

Wolf, DK2OM, Coordinator IARU Monitoring System (IARUMS) Region 1 reports on strange Chinese signals in the amateur radio bands.

Since Oct. 25 we are suffering from mysterious Chinese signals on 7, 14, 21 and 21010 kHz. At first the A3E signals were sounding like grunt or moo. Now we are receiving very strong multitone signals with a carrier and both sidebands every morning.

The signals are also audible on 15000 (disturbing the time signal from RWM Moscow), 18000, 19000 and 20000 kHz. The purpose is unknown, perhaps a special kind of encrypted broadcast or a new generation of OTH radar?

Please inform your national PTTs for official complaints! Wolf has informed the German PTT.

Wolf also reports that a taxi company in the Russian Federation is transmitting FM on 21404.2 kHz daily and all day. He says you can often hear a female voice organizing the business. DK2OM asks we use this frequency for amateur traffic daily.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

Sunita Williams sends warm wishes to kids on Children's Day

D.N.A. India reports that ISS Commander Sunita Williams KD 5 PLB used Ham Radio to send a special 'Children's Day' message from space to children in India

They say:

"Sunita Williams conveyed warm wishes to kids on the occasion of Children's Day celebrations," Gujarat Science City's senior scientist Narottam Sahoo said about the interactive session which was approved by USA's National Aeronautics and Space Administration.

A team of experts set up a Ham Radio link that connected to the ISS through a centre in Italy, he said, adding that it is the first ever communication to be received by school children of any state in India, after Williams left for her second space expedition this July.

For 20 children, it was a memorable day to interact with Williams through Ham Radio at the government-runt Science City.

>From Maryborough Electronics and Radio Group, I'm Geoff Emery, VK4ZPP

Continuing its long tradition of support of amateur radio, Icom Australia has donated an HF transceiver for use by the Special Event Station VI4ASJ. Icom has most recently been the donors of D-Star Repeater equipment around many of the major population centres of Australia and its support of the hobby is evident in its paid advertising in Wireless Institute of Australia journal, Amateur Radio.

As time grows shorter, activity at the Jamboree site on the Fraser Coast of Queensland is stepping up a notch or three in preparation for the 14 to 15 thousand scouts and leaders gathering from Australia and overseas. Maryborough Showgrounds and Equestrian Park will be home to the participants

and activities planned include excursions as far away as Bundaberg and the sandy peace of Fraser Island.

Almost as a trial for the real event, storms tore property apart throughout southern Queensland over the weekend just gone. One of the victims was the multiband vertical belonging to Albert, VK4POW which had been erected for JOTA and now requires replacement parts from its USA manufacturer. This antenna will not be joining Albert at AJ2013.

The shopping list is being refined as the equipment for VI4ASJ is adjusted and the members of the local radio club, MERG get ready for the biggest event in the club's history.

Earthquake in Guatemala

The rescue and relief work in San Marcos, Guatemala, a mountainous region bordering Mexico that was hit by a 7.4 scale earthquake claiming the lives of at least 52 people earlier this month, was aided by emergency communications provided by radio amateurs.

International Amateur Radio Union Region 2 Emergency Communication Coordinator, Cesar Pio Santos HR2P said he was very proud of the work done during and after the earthquake on November 8, despite the difficult times.

Cesar HR2P thanked the members of the Club de Radioficionados de Guatemala for their outstanding efforts. He was responding to a report from Marco Aurelio TG 8 AMP, who was in charge of the emergency network.

About 10,000 houses have been affected by the earthquake with authorities setting up 11 rescue centres for the homeless.

It was the worst to hit Guatemala since 1976, when a 7.5 magnitude earthquake caused the deaths of about 23,000 people in one of the worst natural disasters of the time, again helped by the work of amateur radio.

[IARU-R2-News 245] EmCor R2 in Honduras
2012-11-23

The President of Honduras, Mr. Porfirio Lobo Sosa, inaugurated the Regional Center II of the Permanent Commission of Contingencies, (COPECO) on Thursday, November 22, 2012.

This is one of the five new regional and logistic centers of COPECO and is equipped with a seismological and a meteorological station.

In another center, COPECO has a meteorological radar capable of regional coverage that includes other countries of the zone, like Guatemala, Nicaragua and El Salvador.

The Commissioned Minister of COPECO, Lisandro Rosales, stated to Dr. Cesar P�o Santos, HR2P, IARU Region 2 Emergency Coordinator, his recognition of the important role of radio amateurs, especially when conventional communications collapse in cases of disasters.

Also present at the event was the President Pro Tempore of the Coordination Center for the Prevention of Natural Disasters in Central America (CEPREDENAC) and General Director of the National Civilian Protection System of Panama (SINAPROC), Mr. Arturo Alvarado de Icaza, who also mentioned the good relationship existing in his country with the radio amateurs. Dr. Cesar P�o Santos congratulated him on the openness of the Panamanian government towards the radio amateurs by allowing the adhesion of that country to the IARP convention (International Amateur Radio Permit), which can be of great help in disaster situations.

In the picture,

So, just a question about contests in general...

Posted: 23 Nov 2012 10:26 AM PST
http://forums.qrz.com/showthread.php?369412-So-just-a-question-about-contests-in-general&goto=newpost

From what I've read about contesting the general feeling in the ham community is, like a certain president, you either love it or hate it. Last weekend was the big sweepstakes contest and I figured I'd join in an get my feet wet. I did hear some guys yelling "freq in use" several times but not actually participating, I suppose because they're in the anti-contesting camp. But anyway I made 27 contacts in about an hour which about tripled my logbook. (Can you tell I'm a rookie?) So it was just good experience for me. My question is, since I wasn't intending to actually/officially enter the contest and send in any logs, do my contacts still count for the guys I worked? I wouldn't them to have wasted their time....

And another question, one guy told me I was off frequency but I thought I had him zeroed in pretty well. Is there some trick to making sure you're spot on, other than by ear and 4 or 5 decimal places on the display? Not looking to get flamed here; that's why I didn't post in the General section. Thanks.

There is a new release of LOG4OM in time for this weekends contest!

Posted: 23 Nov 2012 10:01 AM PST
http://forums.qrz.com/showthread.php?369409-There-is-a-new-release-of-LOG4OM-in-time-for-this-weekends-contest!&goto=newpost

The latest release of the Free logging software LOG4OM is now available.

This release has the following features and fixes...

New features

☐ New redesigned Award management with "all in one" screen.

☐ Cluster management works on it's own thread, deploying information when

refreshing to increase responsiveness.

☐ QSL management and QSO management search button now is connected to RETURN

when focus is set on call sign filter.

☐ Added a filter save feature

☐ Added a selectable list of values for the main search parameters

Issues resolved

☐ Fixed an issue with EQSL/LOTW match in the proximity of the midnight

☐ Fixed an issue that prevented correct upload of Clublog under some

circumstances

☐ Resolved issue of distance and bearing now displaying in fields

☐ Resolved issue when clicking on the name of the country giving a blank
screen

in statistics and awards

☐ Call sign search in Post Office now improved

☐ DXCC Code sort order in the ARRL Awards screen now works

☐ Improved the ADIF import

☐ If QRZ or HAMQTH are down there is now a time out timer

☐ Validated and verified are now the same

☐ Country worked statistics is now updating in external detached screen

☐ DXCC Award RTTY now works correctly

☐ Fixed `Submitted' issue in the Awards tab

Download the program and the latest user guide
fromhttp://www.pisto.it/wordpress/log4om-en/

Good luck in CQWW this weekend!

Des Moines jammer caught

Posted: 23 Nov 2012 05:29 AM PST
http://forums.qrz.com/showthread.php?369389-Des-Moines-jammer-caught&goto=newpost

According to an article in the Des Moines Register, a local man has been
caught jamming with police communications and transmitting false reports.

Quote:

A Webster Township man programmed a radio to the Des Moines Police
Department☐s communications frequency and used it to impersonate an officer
while calling in nonexistent car crashes and fires, police said.

Kevin Grimes, 22, now faces 28 counts of obstructing emergency
communications and eight counts of impersonating public officials.

Searching the database reveals an Amateur Radio operator of that name in
the area.

SARL NEWS - SUNDAY 25 November 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEYS

It is with regret that it must be announced that the keys of two radio amateurs became silent recently. They are:

That of Mike Muir, ZS6MUI, in the early hours of last Saturday the 17th November.

The other one is that of Buddy McCullen,ZS1MP. He was the holder of the a Jack Twine Merit Award (1986) and a Willy Wilson Gold Badge (1994).

We extend our deepest sympathies to the relatives and friends of the deceased and in particular to Annie, the wife of Mike, ZS6MUI.

(PAUSE)

IN THE NEWS TODAY:

ALL RADIO AMATEURS WILL HAVE TO REAPPLY FOR THEIR LICENSES

SARL ROADMAP TO REGULATORY REFORM

5 MHz PILOT FREQUENCIES FOR PROPAGATION STUDIES

THE 2013 SARL AGM

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

ALL RADIO AMATEURS WILL HAVE TO REAPPLY FOR THEIR LICENSES

At the ICASA/SARL Liaison committee meeting held this week, ICASA informed the SARL that following a qualified audit by the Auditor

General, ICASA has been instructed to implement regulation 15 of the Radio Frequency Spectrum Regulations which stipulate that an amateur radio license can only be renewed for up to five years after which an new application has to be submitted. All Radio Amateurs will be required to re-apply for a license for the period of 1 April 2013 till 31 March 2018. Payment of the annual license fee can be made annually or for the full 5 year period in which case a discounted rate applies.

Details are expected to be gazetted in the next few weeks. Do nothing right now. SARLNEWS will keep you informed and the requirements, procedure and the necessary forms will be made available on www.sarl.org.za after the publication of the Government Gazette.

Stay tuned to SARL News or visit the web site frequently. New information will be published as soon as it comes to hand.

SARL ROADMAP TO REGULATORY REFORM

The SARL Roadmap to regulatory reform will be discussed at a meeting with ICASA on 3 December when a working committee will be formed to explore the various regulatory issues pertaining to amateur radio. The Roadmap is available on www.sarl.org.za, select Amateur Radio Today and follow the links.

5 MHz PILOT FREQUENCIES FOR PROPAGATION STUDIES

The process was taken a step further at this week's liaison meeting. Hans van de Groenendaal, ZS6AKV, is working with the ICASA person in charge of spectrum to identify at least two channels for propagation and sharing studies. ICASA gave an undertaking to speed up the process and has given end January 2013 as the date when they expect the process to be finalised.

Radio amateurs and shortwave listeners can assist by monitoring the segment 5 250 - 5 450 kHz. Stations currently licenced in this section of the band are 5 kHz apart. Details of the proposed research project can be found at www.sarl.org.za, select Amateur Radio today.

NASA PHONESAT COMING SOON TO AMATEUR RADIO

Scientists at NASA's Ames Research Centre have built the most affordable amateur band satellite to date. Amateur Radio Newline carried the following details: The $3 500 orbital device is a cubesat the size of a coffee cup that uses an off-the-shelf Nexus One smartphone as a central processor and an inexpensive off the shelf radio for communications with the ground.

Called PhoneSat 1, the tiny bird is scheduled to launch by the end of this year or early 2013. Once on-orbit it will transmit back photos of Earth on an amateur radio band for 10 days, or until the battery dies.

Subsequent iterations will be capable of much more. For example, PhoneSat 2.0 will have a two-way S-band radio transponder which most satellites use to communicate with the ground and solar panels for

extended life.

THE 2013 SARL AGM

It is that time of the year when the SARL starts preparing for the AGM.

The 2013 AGM wil be hosted by the West Rand Amateur Radio Club and will be held on 27 April 2013 at the National Amateur Radio Centre.

Clubs and members are reminded that the closing date for submitting motions to be discussed at the AGM, is 31 January.

Die SARL Council requests all affiliated clubs to submit a nomination for at least one councillor. This does not affect the normal nominations by individual members. It is, however, a fact that the SARL Council has a lot of work and needs willing and able councillors for this. A councillor must be nominated and seconded by an SARL member or affiliated club and be accompanied by a short amateur radio based CV and his signed statement that he is willing to serve as a councillor. Councillors should be experienced amateurs who can spend some hours per week on SARL business and can take part in council teleconference meetings.

There is no reason to delay until the last minute. Submit your motions and nominations now.

PLEASE CHECK YOUR MEMBERSHIP DETAILS

The ease and economy of communication by electronic means and the rising price of snail-mail communication, causes the SARL to use emails and SMSs to an ever increasing extent.

To enable the SARL to communicate with you, please ensure that your contact details are correct on the SARL database. This includes your email address, your phone and cell phone numbers, as well as your postal address. It can be checked by looking up your own call sign in the online call book and clicking on 'update'. This works for all records on the database, so it is not necessary to log on as a member.

The database is updated weekly. Take note that ICASA does not notify the SARL of any changes to your contact details or address. It is your responsibility to update your information with both the SARL and ICASA.

The Council of the SARL would like to encourage members who have no email address to acquire one. It is easy, convenient and inexpensive. There may come a time when snail mail communication of some items will no longer be worthwhile and they will only be communicated by electronic means.

Your membership details can also be checked by going to www.sarl.org.za/public/Membercheck.asp.

MEMBERSHIP CARDS

All members who have a valid email address on the SARL database will by now have received, by email, a membership card and a receipt for their subscription payment. The receipt will also show their login password for the 'members only' section of the SARL website. For members with no email address, the information will be sent by snail mail. Due to the amount of work involved in printing the labels, filling the eNvelopes etc. there will be a delay of some days.

Members are requested to check their email addresses on the SARL database. Members with no email addresses are encouraged to obtain an address - it is cheap, easy and convenient. Even an email address operated from an Internet caf&#65533;, will be quite adequate.

Members who receive printed copies of Radio ZS, will find an SARL bumper sticker enclosed. Other members will receive their bumper stickers by snail mail. Please use the stickers, they are intended to increase the visibility of the SARL. Be proud of your membership.

NEW MEMBERS

The SARL welcomes the 110 radio amateurs who passed the October 2012 RAE, to it ranks. All these members have now been captured on the database and will have membership until the end of June 2013.

The web passwords for the new members have been sent to them. All members, but especially new members, are reminded that in order to use the forum, they have to register for it seperately.

CONTEST NEWS

RaDAR Competition Results

True RaDAR.

No one took on the challenge as a "True RaDAR" operator except that Eddie, ZS6BNE, went for a two kilometer walk prior to the contest but did not carry his kit.

Field / Mobile station.

Tienie, ZS6MHH - 276 points Eddie, ZS6BNE - 192 points Peter, ZS6IQ (Maritime mobile) - 144 points

Fixed station.

None

Despite the relatively few participants, the general feeling is that the RaDAR contest should still be hosted biannually. There will be a rules change for future RaDAR contests which will prove to be quite exciting for anyone wishing to take on the challenge.

The SARL Digital contest.

This contest will be taking place on the 2nd December 2012 and not the 25th November 2012. Apologies for the confusion.

Registration with LOTW.

If you have not yet registered with LOTW (Logbook of the World) and would like to do so, please send a copy of your licence and ID to Geoff Levey, ZS6GRL, to hfmanager@sarl.org.za. If you have not received your licence yet, a letter from ICASA stating that your licence has been paid will suffice. The process normally takes about 2 days.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is decreasing compared to last week's levels. Sunspot AR1618 has experienced some decay but its magnetic canopy harbours enough enery for X-class solar flares. A sunspot is a vast island of magnetism floating on the surface of the sun. Magnetic fields bubble up from the sun's interior to form the sunspot's dark cores, much like an island forming from the lava of an undersea volcano.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 71.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. There will also be frequenct 10 m openings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 01 December - West Rand Amateur Radio Club flea market starting at 12:00. 02 December - SARL Digital Competition. 31 January 2013 - Last day for submission of nominations for councilors for the next term and motions for the 2013 AGM.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 UTC on 4 895 kHz ((A new time and frequency!). Reception reports are invited. We are particularly interested in reports of the 4 895 kHz transmission on Mondays at 18:30 UTC as the frequency is close to the proposed new amateur allocation near 5 MHz. Reception reports from all areas in South Africa would be useful in our bid to ICASA for frequencies pilot studies. Send reports to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

Amateur Radio a Key Component of Disaster Preparedness:

Posted: 24 Nov 2012 02:43 AM PST
http://www.eham.net/articles/29380

It seems that natural and man-made disasters are increasingly frequent phenomena capable of striking at any time, irrespective of local, regional or international borders. The role and the extent of involvement that governments should have mitigating the effects of disasters are subjects for legitimate debate; but one constant in disaster response is the involvement of trained volunteers supplementing and enhancing the work of emergency officials. Disaster Preparedness is one of six volunteer focus areas that the Corporation for National and Community Service endorses for its Retired & Senior Volunteer Program grantees throughout the United States. RSVP-Racine County offers more than a half dozen Disaster Preparedness Volunteer stations: including two complementary amateur (ham) organizations: the Racine County Amateur Radio Emergency Services and the Megacycle Club. Both organizations operate four amateur radio stations, housed at the Volunteer Center, during emergency simulations and actual situations when cellphones and the Internet are often rendered unusable. Amateur radio is a century-old technology that is often overlooked in the 21st century world of communication options. When disaster strikes, high-tech communication often yields to ham radio, providing wireless service locally and regionally through repeater systems located in Racine County. Other equipment operates voice and Internet communications nationally and internationally on specific frequencies.

SA Radio Amateurs will have to re-apply for their licenses

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/aGBauwTBh0g/sa_radio_amateurs_will_have_to_re_apply_for_their_licenses.htm?utm_source=feedburner&utm_medium=email

South African regulator ICASA has been instructed to implement regulation
15 of the Radio Frequency Spectrum Regulations which stipulate that an
amateur radio license can only be renewed for up to five years after which
an new application has to be submitted

//
Propagation Report from Hannes Coetzee, ZS6BZP

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/xjSa_RbJUyo/november_25.htm?utm_source=feedburner&utm_medium=email

Hannes Coetzee, ZS6BZP, reports that the solar activity is decreasing
compared to last week's levels. Sunspot AR1618 has experienced some decay
but its magnetic canopy harbours enough enery for X-class solar flares

//
N0D special event station celebrating the End of the World

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/AT2Lw6CqUSs/n0d.htm?utm_source=feedburner&utm_medium=email

To celebrate this literally once in a lifetime event, Special Event Station
N0D (Now Zero Days) will be activated for three days during and after (?)
the end of the world

//
Solomon Islands DXpedition

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/DQKULs-30MM/solomon_islands_dxpedition.htm?utm_source=feedburner&utm_medium=email

Ralph, H44RK, has announced that he is planning a DXpedition in and around
the Solomon Islands next year via his sailing boat Hafskip

//
Special event station TM1TARA

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/7WI-rIkPqww/tm1tara.htm?utm_source=feedburner&utm_medium=email

Look for special event station TM1TARA to be on air between December 8-10th. Activity is to commemorate the scientific campaigns of French polar boat 'TARA'

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 25th November 2012

IRTS Technical Panel

The IRTS is planning to launch a new service for our membership. In our ongoing endeavours to engage more fully with our membership we have identified an area we feel could be of significant benefit to them.

The IRTS Technical Panel is a group of volunteers who have expertise in, or experience of, different aspects of amateur radio. The e-mail address irtstech /at/ irts.ie is a single point of contact for communicating with the Panel. Our aim is to help radio amateurs with technical or operational problems.

Send your question to irtstech /at/ irts.ie. . Provide as much information as possible, including details of attempts already made to deal with the issue in question.

Your query via irtstech /at/ irts.ie will be distributed to all the members of the Technical Panel and the resolution to the query e-mailed to your private e-mail address. See the October edition of Echo Ireland for further information.

South Eastern Amateur Radio Group

The South Eastern Amateur Radio Group's Christmas get together takes place on Friday the 7th of December in Kilkenny city. The general plan is we intend to meet in Langton's Bar 67 John Street, Kilkenny around 7:30 to 8 o'clock. Langton's is a lively spot with a few different bars in there and a restaurant if anyone wants to get some food. A raffle will be held on the night with top prize of a handheld radio. Check out our website www.searg.com or our Facebook page for more details or directions etc. For anyone who intends coming down and maybe cannot locate us on the night you can contact the club P.R.O Sean EI2HZB on 083-1379764 who will know the whereabouts of the group.

The next monthly meeting of the South Eastern Amateur Radio Group will take place in Roanmore Social and Sports Centre, Cleaboy Road, Waterford at 8.30 p.m. on tomorrow night Monday the 26th November. The meeting will be preceded by a committee meeting at 8.00 pm. New members are always welcome. For up-to-date news about the club you can check

our website www.searg.com and you can follow us on Facebook and Twitter.

Cork Get Together

Hams in Cork will gather for their Christmas get together at their usual venue, Vienna Woods Hotel, Glanmire on Wednesday December 5th at 2000. Tickets cost 25.00 and should be booked with Dave EI4BZ on 087-6290574 or ei4bz /at/ eircom.net Please book early as last time some latecomers could not be accommodated.

Opportunity for Young Ham Radio Operators

Amateur Radio Supplies in Haverhill, Massachusetts, USA have contacted us with news of a fantastic new program to support youth activity on the HF bands. They seek to help a few lucky young hams get on the HF bands and make some contacts! Do you know any deserving young hams? They will be giving away 3 complete HF stations per year in order to support activity on the ham bands. Full details can be found at the following link http://www.amateurradiosupplies.com/youth-s/222.htm or by contacting Ger McNamara EI4GXB, IRTS Youth Coordinator.

DX News

A rare DXCC entity will be on the bands from 28 November until 9 December. This will be a multi-national group operating from Campbell Island using the callsign ZL9HR. They will be QRV on all bands and the QSL Manager is EB7DX. IRTS members will recall that an earlier DXpedition (signing ZL9CI) to Campbell Island back in January 1999 had our own DXer Declan EI6FR as one of its members.

A large Polish group will activate the west African country of Mauritania from now until 10 December. The callsign to look out for is 5T0SP and the QSL manager is SP6FXY. They will be on 160 - 6m CW, SSB and RTTY.

Retu OH4MDY is returning to Vietnam where he will reactivate his XV2RZ callsign until 10 December. He will operate on 20 - 6m CW and SSB. He requests direct QSLs to his home address in Finland.

Prefix hunters will be interested to hear of a special callsign in use in Morocco until 16 December. To celebrate 'International Tolerance Day' a special event station 5G12ITD is active. QSLs go via RW6HS.

Mike KI4MRH is now active as T6MH from Afghanistan. He expects to be there until October 2013. Activity will be on 80 - 10m and his QSL manager is W2GR.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to

both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

A Standard for Powerline Telecommunications Devices -- the RSGB Involvement

Posted: 24 Nov 2012 04:25 PM PST
http://www.eham.net/articles/29381
```

☐¡The result of the second vote on a draft standard EN50561-1:2012 for Power Line Communication apparatus used in low-voltage installations has been announced. The standard was passed to be implemented by all European countries after the EU national standards organizations voted 19 for, 5 against with 9 abstentions; according to the weighted voting system used, this is recorded as 90% in favour of the standard, exceeding the 71% needed for adoption. This article explains some of the background to this decision.

Look up Refrigeration oils viscosity varies largely 100 to 700
and if you really want good oil lookup Diffusion pump oils
diffusion oil is high temp. and high vacuum oil.

GB2RS NEWS

Sunday 25th November 2012

The news headlines:

* RSGB EGM result announced

* New CP-16 data mode for Chinese text

* South coast beacons get best DX

At the RSGB EGM held on 17 November, the Special Resolution put to the membership was supported by 96.8% of those who voted. The Interim Board will now take the necessary steps to bring the new governance structure into effect. To this end, advertisements for candidates for the next RSGB President and Board Directors will appear in the January RadCom.

If you look at the data modes in use today you may notice that the vast majority can only be used to communicate using the English language alphabet. That presents a real problem for countries such as China where the language requires graphical characters. This shortcoming is critical when using amateur radio to support emergency and disaster relief operations. To overcome this, the Chinese Radio Amateur Club has devised an ingenious new mode that uses a 16 by 16 dot matrix to send each character. Known as CP-16, the system uses sixteen 17Hz spaced tones that allow the transmitted characters to be displayed by any receiver that uses a waterfall display. So, if you spot Chinese characters on your waterfall whilst tuning around, you're seeing CP-16 in action.

The microwave beacon complex at Bell Hill Dorset, IO80UU59, has entered its 11th year of 24/7 operation across the bands 2.3 to 47GHz. On Wednesday 14 November, auto reports started to arrive from www.beaconspot.eu advising of DX reception, probably due to high level overland/sea ducting. During the evening, reports from stations in DL, OK and OE arrived, with the resulting best distance reception achieved by each beacon amounting to 1221km. Looking at the records for best DX kept on Beaconspot during its last five years of operation, these reports represent the best DX for any beacon in the EU area in the bands 2.3-10GHz. The South Coast Repeater & Beacon Group would like to thank all who have contributed to the ongoing operations of these beacons. They hope that having GPS frequency locked outputs in conjunction with modern multimode identifiers continues to provide DX indication for microwavers throughout Europe. Full details of GB3SCS, GB3SCF, GB3SCC and GB3SCX can be found at www.SCRBG.org.

The ARRL report that the FCC proposes to amend parts of the Commission's rules. These changes will implement allocation decisions from the 2007 World Radiocommunication Conference that concern those portions of the radio frequency spectrum between 108MHz and 20.2GHz, and make certain updates to the rules in this frequency range. The FCC is requesting comments on changing the allocation to the amateur portion of the 160m band, allocating a new amateur service band at 135.7 to 137.8kHz, and cleaning up the rules for the 10.0 to 10.5GHz band. You can read the full ARRL story at www.arrl.org/news.

The amateur radio station at the US Embassy in Port-au-Prince, Haiti, is now up and running. It plans to run a weekly US Embassy Welfare Net on 7.178MHz, ± QRM, starting on 28 November at 1930UTC. The net control callsign will be HH2USA.

The RSGB regrets that the story reported last week concerning an amateur assisting an American aircraft diversion appears to be unfounded. The item was broadcast by GB2RS in good faith on the basis of reports from BBC news and other media organisations.

Copyright ± RSGB 2012. Not for public release before Monday 25 November 2012 except as a GB2RS broadcast. And now for the details of rallies and events for the coming week

Today, 25 November, it's the 34th CATS Radio & Electronics Bazaar, held at 1st Coulsdon Scout HQ, at the rear of the Council Car Park, Lion Green Road, Coulsdon, Surrey. Doors open from 10am to 1pm and admission is ±1. There will be a Bring & Buy. Details from Glenn, G4FVL, at chairman@catsradio.org.

Also today, 25 November, the Plymouth Radio Club Rally will be held at Harewood House, The Ridgeway, Plympton, Plymouth PL7 2AS. This is a new venue for this event. Doors open at 10am and admission is ±2. There will be trade stands, a Bring & Buy as well as a talk-in station.

Next weekend, on 2 December, the Bishop Auckland Radio Amateurs Club Rally will take place at Spennymoor Leisure Centre, Co Durham DL16 6DB. Doors open at 10.30am and entry is ±2, with accompanied U14 free. There will be trade stands, a Bring & Buy and a talk-in station. More details can be obtained from Mark, G0GFG on 01388 747 497.

Now for the news of special events

G4PF and M0GWW will be celebrating Lancashire Day on 27 November using the callsign GB0LD. They have the callsign from Sunday 25 November to Sunday 2 December inclusive.

Wakefield District Radio Society will be operating GB0IDD for the UN International Day of Persons with Disabilities over the weekend of 1 to 3 December from the Wakefield 23rd Troop Scout HQ. The aim of the Day is to raise awareness and understanding of disability issues. Operation will be mainly on SSB on the 14 to 28MHz bands. QSL via eqsl.cc only.

5G12ITD is on the air until 16 December in Morocco to commemorate UN International Day for Tolerance. They will be active all bands and all modes. QSL via RW6HS.

And now the DX news compiled from 425 DX News and other sources

VK6DXI will be active stroke FK from New Caledonia until mid December. He has been heard early on Sunday mornings on 28.485MHz around 0720UTC. QSL only via his home callsign.

The Hellenic Amateur Radio Association of Australia now have a landing permit for the ZL9HR DXpedition to Campbell Island, IOTA reference OC-037. The DXpedition will take place between 28 November and 9 December. For more information please go to the DXpedition website at www.ZL9HR.com.

OZ6TL will operate as E51TLA from Rarotonga in the South Cook Islands, IOTA reference OC-013, until 8 December. The QSL manager is OZ6TL and logs will be uploaded to Logbook of the World.

Oliver, W6NV will be on Ascension Island, IOTA reference AF-003, until 30 November. He will use the callsign ZD8W. QSL to his home callsign.

The 5T0SP DXpedition to Mauritania will take place from 24 November to 10 December. Details of their planned frequencies are available on their website, just search the callsign 5T0SP. QSL via SP6FXY, direct or bureau, and OQRS on Club Log. All QSOs will be uploaded to Logbook of the World after reasonable time.

The 7P8D expedition to Lesotho that concludes on 3 December has also announced the frequencies they are using for their four stations. Details are on their website, again search on the callsign 7P8D. QSL direct to ZS2DL. An OQRS will be available after the expedition. Logs will be uploaded to Logbook of the World within 6 months after the expedition has been completed.

Copyright © RSGB 2012. Not for public release before Monday 25 November 2012 except as a GB2RS broadcast. Now the contest news

The big event of the month is in progress still today, 25 November. The CQWW DX CW contest finishes as midnight tonight. The exchange is signal report, and CQ Zone, which for the UK is 14.

The UK Microwave Group's Low Band Contest finishes at 1400UTC today, 25 November. Using all modes, the exchange is signal report, serial number and locator.

The 50MHz UK Activity Contest takes place on 27 November from 2000 to 2230UTC. Using all modes the exchange is signal report, serial number and locator.

Also on 27 November, the SHF UK Activity Contest takes place on the 2.3 to 10GHz bands. From 2000 to 2230UTC you can use all modes and the exchange is signal report, serial number and locator.

At the other end of the frequency range the 80m Club Sprint takes place on 29 November from 2000 to 2100UTC. Using CW only, the exchange is serial number and name.

The third event in this season's Super League series takes place on 2 December. The 144MHz AFS contest runs from 0900 to 1700UTC. Using all modes on the band the exchange is signal report, serial number and locator.

Starting at 2200 on Friday 30 November, the ARRL 160m Contest runs for 42 hours. Work the USA, US Territories and Canada only in this CW event. The rules say the segment 1830 to 1835 should be used for intercontinental QSOs only. The basic exchange is signal report, but US and Canadian stations also send their ARRL or RAC section.

And now the solar factual data for the period from Friday the 16th to the 22nd of November compiled by Neil Clarke, G0CAS on Friday the 23rd of November.

At the start of the period 9 sunspot groups were visible but on the 17th a new sunspot group emerged onto the solar disc and grew in size rapidly. By the 20th and the 21st. solar activity had increased to moderate levels, when two M class solar flares took place on both days. During the other days solar activity was low, with only C class solar flares taking place. There were 34 in total. However, on the 22nd no solar flares occurred and as a result solar activity was at very low levels. Solar flux levels increased slightly to peak at 141 units on the 18th and the 20th but then declined to 128 units by the 22nd. The average was 137 units. The 90 day solar flux average on the 22nd was 122 units, that's three units up on last week. X-ray flux levels increased to B6.1 units by the 20th but then declined to B3.5 by the end of the period. The average was B4.5 units. Geomagnetic activity was quiet everyday except for the 20th which increased to unsettled levels with an Ap index of 13 units. The average was Ap 6 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 370 and 480 kilometres per second for the period. Particle densities were low every day. Bz never varied more than minus 7 and plus 5 nanoTeslas for the period.

And finally the solar forecast for the coming week. This week the quiet side of the Sun is expected to be looking our way once an active sunspot group rotates out of view around midweek. Solar activity should be at low levels, however, there is a slight chance that activity could increase to moderate levels till midweek. Solar flux levels should decline and by next weekend should be slightly above the 100 mark. Geomagnetic activity is expected to be at quiet levels, but there is a slight chance that activity could increase if a coronal mass ejection heads our way. MUFs during daylight hours at equal latitudes should be around 28MHz for the south and 25MHz for the north. Darkness hour lows should be about 9MHz. Paths this week to the Middle East should have a maximum usable frequency with a 50 per cent success rate of around 27MHz. The optimum working frequency with a 90 per cent success rate will be about 22MHz. The best time to try this path will be between

0900 and 1400 hours UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies can be found on the RSGB

website, including email addresses and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Lincoln Short-Wave Club takes part in the 50MHz UK Activity Contest on Tuesday. On Wednesday there is a talk in Aisthorpe Village Hall by Nick Miers about wartime Bletchley Park; entry is £1 and he will be bringing along an original Enigma machine. The simplex club net is on Thursday from 8pm on 145.375MHz and Saturday sees the surgery in the shack at 9am. Contact Pam Rose, G4STO, on 01427 788 356.

Wythall Radio Club is holding a club net on 145.225MHz today. On Monday the Advanced course continues plus there's a curry night at Monsoon. Dave, G3YXM will be explaining what he did on his 2012 holidays on Tuesday. Friday sees the shack social, and the Advanced course continues from 9am on Saturday. Next Sunday sees the 144MHz AFS Contest from the shack from 9am until 5pm, then there's the club net on 145.225MHz at 8pm. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications Club is running a club net on Monday from 7pm on 144.165MHz USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR and Friday sees a club net on 2m. Contact the FELCC Information Line on 07554 362 020 for more information.

South Birmingham Radio Society is making arrangements for the Christmas social on Monday. Tuesday sees a coffee morning at the shack between 11am and 1pm, and on Thursday there are training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603.

Now we return to the traditional listing in date order. On Monday Gloucester Amateur Radio & Electronics Society is having an informal meeting. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday Stratford Upon Avon District Radio Society is having a talk by Ciaran, M0XTD of AMSAT-UK on how to engage the next generation by talking to an astronaut in space. Contact G0CHO, on 01608 664 488.

On Tuesday Central Radio Amateur Circle is having a Plug and Play session at Barr Beacon, Walsall, from 10am onwards. Details from Martin

Hallard, G1TYV, by email to radio-circle@live.co.uk.

On Tuesday Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday Worcester Radio Amateurs Association is taking registrations for its Foundation course and having a construction evening. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Wednesday Midland Amateur Radio Society is holding training classes and making plans for the Christmas party. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

Copyright © RSGB 2012. Not for public release before Monday 25 November 2012 except as a GB2RS broadcast. On Wednesday South Notts Amateur Radio Club is holding a members-only forum. Details from Robin, G4NDM, on 01159 372 942.

On Wednesday Telford & District Amateur Radio Society is looking at winter projects. Contact Mike, G3JKX, on 01952 299 677.

On Friday Coventry Amateur Radio Society is holding a skittles night. Contact John, G8SEQ, on 07958 777 363.

NEWS FOR THE NORTH OF ENGLAND We start with advance notice that Widnes and Runcorn Amateur Radio Club will be starting an Advanced course in Frodsham on Friday 11 January 2013. The sessions will last about two hours and are expected to run for 18-20 weeks. For more information contact Dave Bibby, G1PIX, on 01928 591 401.

Now for clubs that have several events this week. South Manchester Radio and Computer Club is holding its monthly technical forum on Monday. On Thursday there's a talk on celestial navigation by Terry, G6CRF. Details from Ron, G3SVW, on 01619 693 999.

On Wednesday 28 November Hornsea Amateur Radio Club is holding a committee meeting on Wednesday, and taking part in the 80m Sprint CW contest on Thursday. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

Now we return to the traditional listing in date order. On Monday Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Bolton Wireless Club is having a talk on amateur radio in Thailand by Chris, G4JAG. For details, send an email to boltonwireless@gmail.com.

On Monday Sheffield Amateur Radio Club is holding its winter junk sale. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Tuesday Chester & District Radio Society is having an operating evening at the Waverton Institute. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday Morecambe Bay Amateur Radio Society is holding a committee meeting. Contact Sheila, on 07867 516 836.

On Wednesday Denby Dale Radio Club is on the air from 7.30 on 145.575MHz. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday Mid-Cheshire Amateur Radio Society is holding a calibration evening. Contact Peter Paul Fox, G8HAV, on 01606 553 401.

On Thursday Wakefield & District Radio Society is having a natter night and is on the air from the club shack. Details from Ken, G8FSO on 07900 563 117.

NEWS FOR NORTHERN IRELAND On Sunday 2 December Mid Ulster Amateur Radio Club is visiting the WW1 Coastal Defence Station and radio museum at Grey Point Fort, near Bangor. Details from Brian Burns, MI0TGO, by email to muarc.secretary@yahoo.co.uk

NEWS FOR SCOTLAND Today, West of Scotland Amateur Radio Society is having a club night with talks, a quiz and raffle. On Friday there's project work & learning. Details from Sam, GM4BGS, on 07771 554 035.

Copyright © RSGB 2012. Not for public release before Monday 25 November 2012 except as a GB2RS broadcast. On Tuesday Livingston & District Amateur Radio Society is having Morse code practice. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday Lothians Radio Society is having a talk on getting started on 6 metres by Brian, GM4DIJ. Contact Alan J Masson, GM3PSP, on 0131 623 4580.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. Farnborough & District Radio Society has a CW net on Monday at 1pm on 3.570MHz, then a Top Band net on 1.995MHz at 8pm. Friday sees the club 2m net on 144.675MHz from 8pm. Details from Neville, G3SPD, on 01252 404 816.

Brede Steam Amateur Radio Society is at the shack on Tuesday and next Saturday. For more information contact Steve, on 01424 720 815.

Worthing & District Amateur Radio Club is putting GX3WOR on the air on Wednesday. On Thursday they are participating in the 80m CW Sprint contest. Next Sunday sees the monthly breakfast meeting at The Goring caf© from 9am. Contact John, G8FMJ, on 01273 593 232.

Now we return to the traditional listing in date order. On Monday Braintree & District Amateur Radio Society is running a 70cm club net. For more information contact John, M5AJB, on 01787 460 947.

On Tuesday Chelmsford Amateur Radio Society has a Top Band net on 1.975MHz from 8.30pm. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday Dorking & District Radio Society is having a talk on the Elecraft K2 transceiver by Roger Eeles, G0SWC/VP8DBR. Contact Garth, G3NPC, on 01737 359 472.

On Tuesday Harwell Amateur Radio Society is having a shack activity night. Details from Malcolm, G8NRP, on 01235 524 844.

On Wednesday Chesham & District Amateur Radio Society is on the air & running a club net on GB3AL or GB3VA. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday Darenth Valley Radio Society is on the air and having a natter night. Contact Bob, M0RAW, on 01322 663 804.

On Wednesday Hastings Electronics and Radio Club is at the Taplin Centre discussing items of interest. Details from Gordon, on 01424 431 909.

On Wednesday Newbury & District Amateur Radio Society is having a talk on practical radio astronomy for amateurs by Paul, G4CSD. Contact Rob, G4LMW, on 01635 862 737.

On Wednesday Norfolk Amateur Radio Club is holding an informal meeting with Bright Sparks. The shack is open and the workshop is available. Details from Chris Danby, G0DWV, on 01603 898 678.

On Thursday Bittern DX Group is meeting at Pinewood Park Leisure Club at 8pm. Details from Linda, G0AJJ, on 01692 218 562.

On Thursday Bredhurst Receiving and Transmitting Society is holding a club night, with CW practice from 8.30 until 9pm. Contact Charles, G4VSZ, on 07982 244 788.

On Thursday Fort Purbrook Amateur Radio Club is having a natter night at the Fort. Details from Neil Hoare, M0NEH, on 02392 378 559.

Copyright © RSGB 2012. Not for public release before Monday 25 November 2012 except as a GB2RS broadcast. On Thursday Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Tim Ward, 2E0TJW, on 07810 481 182.

On Thursday Shefford & District Amateur Radio Society is having a talk by John Wayman, G4DRS, on Christmas Island T32C . Details from John Burnett, M6JBU, on 07860 804 793.

On Friday Loughton & Epping Forest Amateur Radio Society is having a review of 2012 by the committee. Contact Marc Litchman, G0TOC, on 02085 021 645.

On Friday Mid-Sussex Amateur Radio Society is holding a table top sale. Contact Rob, 2E0RJA, on 01444 232 129.

On Friday Wimbledon & District Amateur Radio Society is having a surplus equipment sale. Contact Andrew Maish, G4ADM, on 02083 353 434.

On Saturday Bromley & District Amateur Radio Society continues its Intermediate course. Details from Andy, G4WGZ, on 01689 878 089.

On Sunday Southdown Amateur Radio Society is holding its Christmas social at Chaseley. Details from John, G3DQY, on 01424 424 319.

NEWS FOR THE SOUTH WEST Exeter Amateur Radio Society is holding a PC clinic on Monday from 19:00 at the moose Centre. The Tuesday 2m net is on 145.575MHz at 19:45 and on Thursday it's the 4m net on 70.425MHz from 19:00. Contact Nick, 2E0NRJ, on 01363 775 756.

On Sunday Plymouth Radio Club is running the Plymouth Radio Rally. Details from Rob James, 2E0ONO, via email to Robert-james@virginmedia.com.

On Monday Bristol RSGB Group is having a talk on forensic applications of electron microscopes by Nick Gleed, GW8YJM. Details from Robin, G3TKF, on 01225 420 442.

On Monday Weston Super Mare Radio Society is holding a construction night. Details from Paul, G3SDH, on 01761 221 206.

On Wednesday Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417 048.

On Thursday South Bristol Amateur Radio Club is on the air and holding an open house night. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday Swindon & District Amateur Radio Club is having a fun quiz. Contact Den, M0ACM, on 07810 317 750.

On Friday Poole Radio Society continues its Intermediate course and is having an activity night. Details from Bill Coombes, G4ERV, by email to secretary@g4prs.org.uk.

On Friday Torbay Amateur Radio Society is having a presentation by the Stover Canal Trust. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

ROFL!! Just goes to show how many sensible radio amateurs inhabit the
RSCB these days. And what's with the "amateur" claptrap? Amateur my
ARSE! GET A GRIP RSGB!!! This is a long time QRO MI3 with a childs
licence who has _NO_ incentive to ever upgrade.

But one wonders what the true basis for the story was.

If we just happen accidentally to (over)hear an emergency message, and
it isn't being responded to, the correct procedure is (I believe) to
dial 999, and ask for the coastguard, who know the correct procedures to
set the wheels in motion. Presumably this is something like what
happened here, but got rather embellished.

Highlights of Solar and Geomagnetic Activity
19 - 25 November 2012

Solar activity ranged from very low to moderate levels. The summary
period started out at low levels but changed on day two as Region
1618 (N08, L=135, class/area Ekc/450 millionths on 23 November) and
Region 1612 (N09, L=228, class/area Hsx/100 millionths on 12
November) both produced M-class x-ray events. Region 1612 produced
an M1 solar flare at 20/1241 UTC with multiple discrete radio
frequency bursts. Around the same time, h-alpha imagery indicated
multiple filament channel eruptions. LASCO C2/C3 imagery supported a
partially Earth directed CME. Region 1618 followed this event with
an M1/Sn solar flare at 20/1928 UTC. Associated with this flare were
several discrete radio frequency bursts. LASCO C2/C3 imagery
indicated a CME, however further analysis indicated that this would
not be Earth directed. On 21 November, Region 1618 continued to
produce M-class solar flares, with an M1/1n solar flare at 21/0656
UTC and an M3 x-ray event at 21/1530 UTC. Both of these events had
Type II and Type IV radio sweeps associated with them. Imagery once
again supported another Earth directed CME. Later on 21 November, a
large filament erupted off the north-east limb. Location and imagery
suggested this CME would not be Earth directed. Activity declined to
very low levels on 22 November. Region 1618 remained a magnetically
complex region during this time, however simplification in the
leader spots was observed. Low levels prevailed throughout the
summary period with Region 1618 producing the occasional C-class
events. On 23 November, a large filament eruption was observed in
the southwest quadrant of the solar disk. The associated CME was
determined to have an Earth directed component. Towards the end of
the summary period, Region 1620 (S13, L=92, class/area Hax/090
millionths on 23 November) started to evolve and produce C-class
activity. At the end of the period, Region 1620 was magnetically
classified as a beta-gamma.

No proton events were observed at geosynchronous orbit.
```

The greater than 2 MeV electron flux at geosynchronous orbit was high levels on 19, 22 and 23 November. The remaining days were at normal to moderate levels.

Geomagnetic field activity was at quiet to active levels. The summary period began at quiet levels with solar wind speed, as measured by the ACE spacecraft, hovering around 400 km/s. On 20 November, an increase in solar wind speed to around 460 km/s was observed, with sustained periods of the negative Bz component of the (Interplanetary Magnetic Field) IMF. This observed change in the solar wind parameters help drive unsettled to active levels late on 20 November and early into 21 November. Predominantly quiet levels prevailed until late on 23 November when solar wind observations indicated the arrival of a CME. At the ACE spacecraft, solar wind speeds increased from 320km/s - 420 km/s with Bt of the IMF increasing to around 17 nT. As the CME arrived at Earth, an increase to active levels was observed. As CME effects continued on to 24 November, active to quiet levels were observed with isolated minor to major storm periods observed at high latitudes. As CME effects waned, quiet level prevailed from late on 24 November throughout the rest of the summary period. Initial analysis and data suggested this was the CME from 20 November, however as the CME progressed, data suggested the incoming CMEs might have merged into this one event.

Forecast of Solar and Geomagnetic Activity
26 November - 22 December 2012

Solar activity is expected to be at low levels with a chance for M-class flares from 26 November - 01 December as Regions 1620 and 1618 evolve and rotate off the visible disk. A decrease to low levels is forecast from 02 - 04 December. An increase to low levels with a slight chance for M-class flares is expected for the remainder of the period as Regions 1612, 1618, and 1620 return.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels from 26 November - 05 December, 08- 11 December, and 19-22 December. High levels are expected at all other times due to coronal hole high speed stream activity.

Geomagnetic field activity is expected to be at quiet to active levels. The forecast period is expected to begin at predominantly quiet levels. On 27 - 29 November, an increase to quiet to active levels is expected as the CME from 23 November is expected to become geoeffective. From 30 November through 05 December, quiet to unsettled levels are expected in response to multiple coronal hole high speed streams. A return to quiet levels is expected from 06-10 December. Another increase to quiet to unsettled levels is expected on 11-15 December due to recurrent coronal hole high speed streams. A return to quiet levels is expected for the remainder of the period.

Marl national field day 2012, 1 & 2 december

Posted: 25 Nov 2012 08:41 AM PST
http://forums.qrz.com/showthread.php?369666-Marl-national-field-day-2012-1-amp-2-december&goto=newpost

Malaysian Amateur Radio League (MARL), will be organizing 2012 National Field Day , for 24 hours beginning from Saturday, 1st December 2012, 10am until Sunday, 2nd December 2012.

This event will also be held concurrently at a number of location throughout the country. The event Head Quarters will take place at Taman Tasik Jaya, Petaling Jaya, Selangor and will be hosted by MARES Malaysia.

MARL welcomes all other Amateur Radio groups, clubs and societies, to set up their station at their respective states.

As a reminder, in the spirit of Field Day, ALL participating groups/clubs/society are required to use ONLY BATTERIES OR GENERATOR SET to power up their stations and equipment.

Event Manager for the 2012 National Field Day is Rashid Sidek 9M2YRS (Pak Yob). He can be contacted at 9m2yrs@gmail.com .

Attention all CW DXers, Contesters & Budding DXpeditionists

Posted: 25 Nov 2012 06:22 AM PST
http://forums.qrz.com/showthread.php?369650-Attention-all-CW-DXers-Contesters-amp-Budding-DXpeditionists&goto=newpost

This is absolutely the best FREE CW pileup training program ever released.

Web Site Here

Strap yourself in as you are transported to your own one man CW DXpedition to North Korea (or North Dakota), your fellow CW enthusiasts are counting on you. :)

Seriously though, Alex, VE3NEA has done an outstanding job with this free program called PileupRunner. Practice with it for 15 - 30 minutes a day for a few weeks and your CW pileup & contesting skills will improve dramatically. Augment PileupRunner with the wonderful German written program RufzXP and MorseRunner for the trifecta of all CW

contesting "simulators".....All programs are 100% free.

PileupRunner is as close to the real experience as one can get without going to an exotic land. 'Da Cow here rates it a full 5 bellowing moo's!!! The program is intuitive as to how the pileup is generated & I would recommend reading it's short 3 - 4 page manual before getting started. You will wonder why stations you have already worked keep on calling you if you don't.

I have no monitory interest in anything Alex does & have never meet him.

See ya in the pileups,

Tom KCØW

I'm not sure anyone has a real grasp of the numbers, thanks the nonsense of the 'licence for life' and 'free' renewals.

If we had kept a decent fee for each licence (callsign), people would have been so keen to hold onto multiple licences (some hold several Full callsigns, and I don't mean OBO of clubs, let alone those with a M0, 2E, and M3/M6) plus the database would only be 'out of date' by the renewal period +/- . If the renewal period had been a more sensible 1 or 2 years, then we would have a much better 'picture.

But, some people didn't value their hobby enough to pay a fee and here we are.

Now OFCOM are looking to drop licensing, exactly as I expected when the consultation was made. Now the belt is tightening, the non-fee generating activity is being dumped. It will be taken over by the very people the "tight fisted" most hate. Poetic justice.

Just as I predicted and opposed.

Planning to Consider Ham Radio Amendment to Zoning:

Posted: 26 Nov 2012 01:22 AM PST
http://www.eham.net/articles/29383

Ridgecrest's Planning Commission will hold a public hearing to recommend the City Council amend a city zoning ordinance at its meeting Tuesday evening. The amendment request, should it be approved by the city council at a later date, could permit "amateur ham radio antennas and windmill towers in excess of 35 feet to be erected subject to a Conditional Use permit," according to a city staff report. The agenda relates directly to a previous request by Ridgecrest resident Steven Rainey to erect a 55-foot ham radio tower on his property back in September. Rainey could not receive a conditional use permit for his proposed tower following a public hearing. The planning commission does not have the authority to grant such permits, under the current muncipal code. During the public hearing, Rainey said the Tower would not be up 24 hours a day, but would be lowered via a crank when not in use. City Planner Matthew Alexander said ham radio operators represented a strong asset to the city in case of emergencies. Should normal and mobile communication networks be knocked out during an earthquake or major flood, ham operators like Rainey would be able to relay communications through radio frequencies to other communities. All ham radio operators are required to be licensed by the Federal Communication Commission.

//
Sunspots Not an Indicator of Solar Cycle:

Posted: 26 Nov 2012 01:18 AM PST
http://www.eham.net/articles/29382

A new study of ice core samples has found the link between sunspot activity and the Sun's solar cycle isn't as strong as previously thought. Researchers have found the Sun's eleven-year solar cycle continued normally during the Maunder Minimum between 1645 and 1715, when sunspot activity was unusually low. This was also a time when northern Europe experienced unusually cold conditions. The discovery, reported in Geophysical Research Letters, comes as the Sun approaches solarmax, the climax of its cycle, when its north and south magnetic poles flip. The researchers were looking for solar cycle variations by studying beryllium-10 isotope concentrations in ice core samples. Showers of heavy isotopes including beryllium-10, are produced when cosmic rays, a high-energy mix of protons, electrons, and

atomic nuclei from outside the solar system, collide with molecules in the Earth's atmosphere. Increased solar wind activity as the Sun moves towards solar max, reduces the amount of cosmic rays reaching Earth. By studying beryllium-10 levels in ice cores, scientists can determine the level of solar activity at a given time. Drawing on two independent ice core records, Owens and colleagues modelled solar activity back to 1610, before the Maunder Minimum. "Between 1650 to 1710 there were no sunspots recorded, even though there were lots of professional astronomers around at the time," says study lead author Dr Mathew Owens of the University of Reading in the United Kingdom. "Yet despite the lack of sunspots, the Sun's magnetic field was still churning over its natural eleven-year solar cycle." "It shows sunspots are a symptom not a cause for the solar cycle."

Press Release - Steven Spielberg's "Lincoln"
2012-11-25

PRESS RELEASE

Morse Telegraph Club, Inc.
29150 Windsor Rd.
Culpeper, VA. 22701

"Morse Telegraph Club members play a key role in Spielberg's Lincoln"

* *

Members of the Morse Telegraph Club, an association of retired railroad and commercial telegraphers, historians, radio amateurs and others with an interest in the history and traditions of telegraphy and the telegraph industry played an important role in the production of "Lincoln."

According to James Wades (WB8SIW), International President of the Morse Telegraph Club, several members provided period telegraph instruments for use in the construction of the War Department Set. Most notably, Tom Perera (W1TP), Derek Cohn (WB0TUA), Kevin Saville (N7JKD), and Roger Reinke provided sufficient telegraph instruments to equip the sixteen operating positions portrayed at the War Department.

Jim Wilson (K4BAV) and his son, Matt Wilson had minor roles as Extras. Jim also worked with production staff and the actors to explain telegraph technology and the role of the telegrapher.

Jim Wades (WB8SIW) who was employed as a Technical Advisor for the production, worked with set designers over a period of months to develop the War Department telegraph scenes. Mr. Wades coordinated the process of procuring the necessary instruments and served as a historical consultant as the telegraph scenes were developed.

Nine of the sixteen telegraph positions depicted in the War Department were fully operational. These instruments could be operated in any combination through the use of a specialized computer program and terminal units custom built by Mr. Wades for the process. When necessary, a hand key could be inserted in the individual telegraph loops so messages could be improvised.

Mr. Wades worked with the producers to develop historically appropriate message traffic that fit the sequence of the script.

However, as the movie was edited, the final product evolved into a more generic facsimile of Morse traffic. However, those with a background in land line telegraphy will hear the occasional snippet of message traffic in the audio track of the movie.

"We are very pleased that Mr. Spielberg and his staff took the time to treat the telegraph with dignity and respect," said Mr. Wades. "It is a pleasure to be associated with a high quality motion picture that can genuinely be classified as not just entertainment, but as a work of art," he added.

The Morse Telegraph Club was founded in 1943 to perpetuate the knowledge, history and traditions of telegraphy. Chapters are located throughout the United States and Canada. Members are actively involved in a variety of projects including presenting talks on the history of telegraphy to historical societies, schools, and Amateur Radio organizations. Chapters throughout the US and Canada have worked with public museums to build historically correct telegraph exhibits. Members also regularly demonstrate telegraphy at historical events throughout North America.

Complete coverage of the making of the telegraph scenes in "Lincoln" will be published in an upcoming issue of "Dots and Dashes," the official journal of the Morse Telegraph Club.

For more information or interviews, please contact:

Ham Radio Now Episode 32, Part 3 The hidden TWit Tour

Posted: 26 Nov 2012 09:07 AM PST
http://forums.qrz.com/showthread.php?369819-Ham-Radio-Now-Episode-32-Part-3-The-hidden-TWit-Tour&goto=newpost

It's at http://youtu.be/igmTmnX5PWw

Don't know what Ham Radio Now is.

Gary Peirce is a Ham Radio operator who has a podcast called Ham Radio Now. Formally know as Amateur Radio Video News or ARVN, Gary and his cohosts take us behind the scenes at ham radio events, interview those making news in the hobby and tell us about things we may not have known about ham radio. In episode 32 Gary takes us on a video vacation of a recent trip to Atlanta (part 1). Then (in part 2) he goes to California and gets a tour of the TWiT studios and talks with Leo Laporte. If you are a fan of Ham Nation or any of the other programs which air on TWiT you will enjoy that one. Here, in part 3, Gary shows us some extra footage of his TWiT tour.

If you are a Ham (and you probably are if you are reading this) or interested in Ham Radio (about to get into the hobby?) you should check out his other videos. Just look for HamRadioNow on Youtube or just click here - http://www.youtube.com/user/HamRadio...ow=grid&view=0

Need to schedule a Delaware QSO for WAS!!!

Posted: 26 Nov 2012 10:38 PM PST
http://forums.qrz.com/showthread.php?369887-Need-to-schedule-a-Delaware-QSO-for-WAS!!!&goto=newpost

Delaware hams: PSE sked with me for WAS - SSB or CW, 10-15-20-30-40!!

My ONLY "holdout state" for WAS as WB7AWK is Delaware! I've always been

mostly a "ragchew" sort of guy - 37 years a ham, Extra (20-WPM sort) since

1997, Novice (WN7AWK) in 1975.....

But I have NEVER confirmed a Delaware QSO!! (Worked a number over the

years, but ZILCH in the QSL department in all this time!).

I just did an accounting of my cards, and Delaware is my HOLDOUT STATE!!!

I really want to earn my WAS with my WB7AWK call - I have a vanity application

in place (15 days waiting time left to go) for a new call. So I have time to make

and confirm a QSO with Delaware QSO before then... especially easy since

10-15-20 have been WiLDLY open of late and should continue to be so.

And yes, I realize that even after my Vanity call is granted, all those old QSL

cards would still apply.... (some dating back to 1975!)... but given I have only

ONE STATE left to confirm under WB7AWK, that would mean a LOT to me!!!

So: Any Delaware hams on here that can work a SKED with me??? I travel

a lot for business.... but Sunday December 2nd is totally OPEN..... I can be

here all day while the sun is up (and the high bands open!).... SSB or CW....

CW would be preferred but USB is totally OK too... maybe we could do BOTH,

start on SSB and QSY to CW??? Or JUST SSB!!!!

So ... Delawarians..... please come forward and let's schedule this thing, Zulu time!

73's

Dave WB7AWK

(Very soon to be W7xxx - don't want to jinx it, so can't reveal it just yet!)

http://forums.qrz.com/showthread.php?369666-Marl-national-field-day-2012-1-amp-2-december&goto=newpost

Malaysian Amateur Radio League (MARL), will be organizing 2012 National Field Day , for 24 hours beginning from Saturday, 1st December 2012, 10am until Sunday, 2nd December 2012.

This event will also be held concurrently at a number of location throughout the country. The event Head Quarters will take place at Taman Tasik Jaya, Petaling Jaya, Selangor and will be hosted by MARES Malaysia.

MARL welcomes all other Amateur Radio groups, clubs and societies, to set up their station at their respective states.

As a reminder, in the spirit of Field Day, ALL participating groups/clubs/society are required to use ONLY BATTERIES OR GENERATOR SET to power up their stations and equipment.

Event Manager for the 2012 National Field Day is Rashid Sidek 9M2YRS (Pak Yob). He can be contacted at 9m2yrs@gmail.com .

Focus on 'Holy Grail' -- Ham Operators Set Sail for Campbell Islands:

Posted: 26 Nov 2012 04:04 PM PST
http://www.eham.net/articles/29415

Ten amateur radio operators have set sail for one of the holy grails of the transmitting world, the Campbell Islands. The group consisting of amateur radio operators - also known as ham operators - from New Zealand, Australia, the United States, Canada, Hungary and Borneo left Bluff harbour on board the 25m yacht Evohe today, destined for the remote sub-Antarctic island. Expedition leader Tommy Horozakis, of Melbourne, said the purpose of the trip was to erect at least five radio stations and for 10 days and transmit signals around the world. ''Thousands of ham radio operators from every continent on earth will attempt to make contact. We expect to make 60,000 contacts,'' Mr Horozakis said from Bluff before the group weighed anchor. For many ham operators, the ultimate thrill is to receive contact from a list of 340 countries or entities on list established within the ham community.

VoIP Hurricane Prep Net & CANWARN Weather Radio Listeners Net
2012-11-27

Reminder: VoIP Hurricane Prep Net & CANWARN 'Weather Radio Listeners Net' Combined on Saturday 201-12-01 at 7 PM EST/0000 UTC

Hello to all..

A reminder that the last VoIP Hurricane Prep Net for 2012 and the CANWARN 'Weather Radio Listeners' Net will be combined for Saturday December 1st, 2012 at 7 PM EST/0000 UTC immediately following SKYWARN Recognition Day (SRD) 2012. The CANWARN 'Weather Radio Listeners' Net takes place weekly on Saturday Evenings at 7 PM EST and the net was backed up one hour to allow folks from their net to participate in the VoIP Hurricane Prep Net. Since that was done, we kept the VoIP Hurricane Prep Net at 8 PM EST to encourage participation in both nets on Saturday Evenings. With SRD being an all day event and the fact that the CANWARN 'Weather Radio Listeners' Net was at 7 PM and we didn't want people to have to wait until 8 PM to check into our net after what is typically a long day of operating, we have combined the nets to take place at 7 PM EST immediately following SRD 2012.

We hope folks will check into this combined net and this combined net will be the last VoIP Hurricane Prep Net for 2012 as we revert to the first Saturday of the month at 8 PM EST/7 PM CST for the non-hurricane season months. Thanks to all for their continued support of the VoIP Hurricane Net!

73,Rob-KD1CY.
Director of Operations for the VoIP Hurricane Net

The Thirty-Seventh Annual

The 2012 Tampa Bay Hamfest

December 1st & 2nd, 2012

Manatee Civic Center - Palmetto, Florida

http://www.fgcarc.org/

The Tampa Bay Hamfest is the largest amateur radio trade show on Florida's west coast. The Manatee Civic Center has numerous amenities including premium meeting facility space, a large exhibit hall, and paved parking.The Manatee Civic Center is in Palmetto, which in located in the south Tampa Bay Area - about halfway between downtown St. Petersburg and downtown Sarasota.

The Talk-In for the hamfest is on the 145.4300 repeater (minus offset)100 Hz tone. This repeater is part of the NI4CE System.

The 2012 Tampa Bay Hamfest continues to build on the success of the previous years.The hamfest continues to expand, with increases in attendance & sales, and we expect the 2012 show to be better than ever!

Show opens on Saturday from 8 till 5 and Sunday 9 till 2.

Please do not send any email inquiries after 9:00 P.M. on Wednesday, November 28th, 2012.

After that time please call 813-765-8916 with any questions.

We have consolidated out tables sections this year. There are no outdoor tables.

The table rental is $25 each for the weekend, you are also required to purchase admission tickets. Tables are eight feet long. Reservations will be accepted starting August 1st. Tables are first come, first serve. Past attendees have priority on floor location selection.You may

set up Friday 3:00 to 6:00 P.M., Saturday starting at 7:00 A.M., Sunday at 8:00 A.M.. Consider bringing a cover (s) for your items on the tables.Final payment is due on or before December 1. There is no discount for electric. There is no additional discount for club tables. There is no additional discount on admission tickets.

Arizona's Superstition Hamfest Postponed

Posted: 28 Nov 2012 08:21 AM PST
http://forums.qrz.com/showthread.php?370031-Arizona-s-Superstition-Hamfest-Postponed&goto=newpost

SUPERSTITION HAMFEST DELAYED. TO BE RESCHEDULED FOR EARLY 2013.

Superstition Hamfest, set to run on Saturday, December 1 got pushed back due to some paperwork timing issues. The issue arose on the Monday before the scheduled event, we were unable to resolve it and keep the scheduled date in play by Tuesday. It is therefore DELAYED (not "canceled") till a later date in early 2013.

Main Prize drawing tickets already sold will be good toward the same drawing at Noon of the new date in early 2013 for the Hamfest.

We need to shoot for some time about 60 days out and fit around existing Hamfests already on the schedule.

January has a hamfest in the west valley by Thunderbird, and March has one by Scottsdale in the near-east valley, so we need to fit our delayed 2012 hamfest in around these events.

Superstition ARC will plan its regular December 2013 Hamfest to be held as it has in the past, on the first Saturday of December, in addition to the delayed 2012 event.

We apologize for the inconvenience to our vendors and attendees.

HamRadioNow: ARRL/TAPR Digital Communications Conference Video

Posted: 28 Nov 2012 05:07 AM PST
http://forums.qrz.com/showthread.php?370016-HamRadioNow-ARRL-TAPR-Digital-Communications-Conference-Video&goto=newpost

HAMRADIONOW.tv

Episode 33, 34, 35:

ARRL/TAPR Digital Communications Conference

Video Begins On-Line

The ARRL/TAPR DCCis an annual, three-day conference featuring presentations on a variety of

technical and operational aspects of Amateur Radio. This year's DCC, held in Atlanta last

September, had 16 of the 45-minute main presentations, the usual Saturday banquet talk,

and a four-hour "deep dive" into GNU radio on Sunday. HamRadioNow videotaped all the talks,

and we are beginning to release them on-line. We'll continue with one or two a week until

you have them all.

Episode 33: What's TAPR, What's the DCC? This is an conversation with TAPR President

Steve Bible N7HPR with a little TAPR history and current events, and a review of the content

and mechanics of the DCC. If you're interested in the more technical side of ham radio,

especially the digital stuff, but aren't that familiar with TAPR, this is the place to begin.

HamRadioNow

Episode 34: ARISStat. It began with SuitSat-1, the AMSAT satellite built into a surplus

Russian space suit and tossed out the back door of the ISS. The follow-up was supposed

to be SuitSat-2, but the ISS got crowded and they had to toss the suit. So

TAPR and AMSAT repackaged the hardware into a more conventional, but

very updated satellite. That's all presented at last year's DCC in the ARISSat-1

Update. This year, Steve Bible N7HPR reviews a survey taken of the ARISSat-1 users,

including hams, educators and students, to see what everyone got out of it. If you

wonder how well ham radio stuff reaches out of our community, this provides a clue.

And a warning. We can do better.

HamRadioNow

Episode 35: HPSDR UPDATE. In Episode 33 (What's TAPR...), Steve and Gary talk about

the High Performance Software Designed Radio system that TAPR and HPSDR design

and make available as boards and parts kits for you to build. In this episode, Scotty Cowling

WA2DFI and Jeremy McDermond NH6Z go over this year's hardware and software updates.

Military cross-band test - DoD Certificate for copying the Sec. of
Defense's message?

Posted: 27 Nov 2012 07:14 PM PST
http://forums.qrz.com/showthread.php?369988-Military-cross-band-test-DoD-Certificate-for-copying-the-Sec-of-Defense-s-message&goto=newpost

Greetings all,

Has anyone received their certificate from copying the Secretary of
Defense's message on the digital modes from this year's Military cross-band
test? I copied it and submitted the requested information as noted in
the .pdf file for the event, but haven't received anything yet. I didn't
include a SASE - would that make a difference?

For those who have participated in past years and have received the
certificate, how long did it take?

Thanks and 73!

Dave - KC9GHA

Intrepid Journey for Remote Radio Contact:

Posted: 28 Nov 2012 01:46 AM PST
http://www.eham.net/articles/29420

Ten amateur radio operators set out from Bluff yesterday for one of the holy grails of the transmitting world, Campbell Island. The group, consisting of ham operators from New Zealand, Australia, the United States, Canada, Hungary and Borneo, left Bluff Harbour on the 25-metre yacht Evohe, destined for the remote sub-Antarctic islands. Expedition leader Tommy Horozakis, of Melbourne, said the purpose of the trip was to erect at least five radio stations and transmit signals around the world for 10 days. "Thousands of ham radio operators from every continent on Earth will attempt to make contact. We expect to make 60,000 contacts," he said from Bluff before the group weighed anchor. For many ham operators the ultimate thrill is to receive contact from a list of 340 countries or entities on a list established within the ham community. The highest-level award requires the applicant to contact all entities on the DXCC list. DXing is the hobby of receiving and identifying distant radio or television signals, or making two-way radio contact with distant stations in amateur radio. Expedition co-leader John Halkiadakis said the list of entities were ranked on how difficult they were to make contact with. "Campbell Island is extremely remote, with the last major ham radio expedition to Campbell Island in January 1999," he said. "So people have to wait a long time for a chance to make contact with some entities." Campbell Island ranks at number 11 on the DXCC list. The list is toppped by North Korea, who ban ham radio use, Navassa Island in the Caribbean Sea, Bouvet Island in the South Atlantic Ocean, Yemen, and Heard Island, which is about two-thirds of the way to Antarctica from Madagascar.

//
Solar Minimum; Solar Maximum:

Posted: 28 Nov 2012 01:44 AM PST
http://www.eham.net/articles/29419

The sun goes through a natural solar cycle approximately every 11 years. The cycle is marked by the increase and decrease of sunspots - visible as dark blemishes on the sun's surface, or photosphere. The greatest number of sunspots in any given solar cycle is designated as "solar maximum." The lowest number is "solar minimum." The solar cycle provides more than just increased sunspots, however. In the sun's atmosphere, or corona, bright

active regions appear, which are rooted in the lower sunspots.

How bizarre! Whatever happened to the presumption of innocence?

If there's no proof of guilt, surely the right thing to do is to issue
pass certificates immediately and apologise to all concerned?

It doesn't appear to have been an FL exam. The issue appears to have
been that the same errors were on both candidates' papers, which is
something that could happen legitimately, but to be safe, they wanted
the candidates to be re-examined, without further charge.

Everyone who gained a pass in any exam at the Lough Erne club should have their papers remarked. The club should not be allowed to run exams in the future, failing that it is to be hoped the two candidates concerned (one of whom resides in the Republic of Ireland and has failed the RAE there on numerous occasions) are not permitted to resit the exam in the Lough Erne club!

This however is only the tip of the iceberg. Cheating has been rife in Northern Ireland and the rest of the UK since the launch of the 3 tier farce which was designed solely to generate revenue for the RSGB. I and others have consistently highlighted this cheating only to have the claims consistently rubbished by an Class B/M3 twat with a vested interest in the scheme.

jimbo, if the powers that be, have said it is not a regulated band,
then why does it bother you so much. and is the thief you are talking
about. Jimmy Savilles Nephew, or is it Just Some Numpty. and the
threating behavior is all some people know. the louder the shout the
bigger the coward, the most afraid. Has anyone stolen somthing from
you?
So why does it bother you?.
Puzzled
Dont like to see you so upset

http://forums.qrz.com/showthread.php?370075-Mini-DXpedition-planned&goto=newpost

I am going on a Mini-Dxpedition!

I am renting a house on the coast of NC next week and I am bringing three
things:

1) My IC-7000

2) My Buddipole Deluxe antenna system

3) My dog

I will be there at least 4 nights. I am hoping the conditions will be ok.

It has been a while since I have been on HF...any word on how conditions
are lately??

Thanks

Joe

http://forums.qrz.com/showthread.php?370039-Return-of-Historic-W9BSP-W9UA-KW-Transmitter-at-Ensor-Museum-in-Olathe-KS&goto=newpost

After over 40 years of silence, the beautiful hand built transmitter of Marshall H. Ensor is once again in operating condition. It underwent restoration including safety considerations, by a team of Marshall Ensor Memorial Organization members.

The grand return to 75 Meters takes place on December 8th. The AM rig will push out legal limits of RF on the 3885 or near by frequency by limited crystal control.

7 PM -10 PM Central time. AM or SSB will be answered during announced time slots.

As OFCOM have specifically stated in their letter to the club:

"I think it is very unfortunate that the questions that have been
raised relating to the validity of the exam results have been
translated as indicating that cheating may have taken place and then
by implication that the integrity of the club and you as an
invigilator is being questioned. I have not found evidence that this
was the case."

Why would such action be justified?

The fact is, that, as I told the RCF, their analysis was wrong. OFCOM
acknowledge this.

"The post exam judgement is based on statistics and, in case the
results were a rare fluke,"

So, Frank, I suggest you start back tracking.

Needless to say, the RCF are not being entirely open about their 'cock up',
and this isn't the first time the same person has got his stats wrong.
OFCOM have told them to review the appeal procedures. Long over due.

One thing I want to see, when they do think they find a real case, publish
the details.

WIANEWS WEEK COMMENCING DECEMBER 02 2012.

ACMA warning about non-compliant goods

Bill Hall VK2XT turns 100

VK INTRUDER WATCH-MAN FALLS SILENT KEY

N 0 D special event station celebrating the End of the World

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING DEC 2 2012.

Must be the 'silly season' approaching, 2 or 3 of maybe the years weirdest
stories to pass the National News Desk in this week.

Alternate use for CubeSats

While we radio hams use CubeSats for communications, Glasgow based Alba Space
is planning to use them for Space Burials.

Yes Burials.

Alba Space say they aim to use CubeSats to carry cremated ashes into Space
and their longer term aims include helping all open access to Space.

http://www.youtube.com/watch?v=Ft6i_7FSdko

http://www.albaorbital.com/

N 0 D special event station celebrating the End of the World

That's right, the end is finally near. According to one of the three Mayan Calendars, the End of the World will occur on December 21, 2012.

To celebrate this literally once in a lifetime event, Special Event Station N0D (Now Zero Days) will be activated for three days during and after(?) the end of the world.

December 20 is a celebration of the end of the world.
December 21, the day of destruction and N 0 D will be on the air as long as possible. December 22nd, but that is a little iffy right now.

N0D will be activated on the satellites by Allen Mattis, N5AFV, on December 20, 21 unless the day of destruction makes that impossible, and on December 22, 2012 if the world survives.

http://www.nowzerodays.com

Many would have seen on TV the past week or so the nonexistence of 'Sandy Island.'

Well again we Radio Hams were first to discover the disappearance of Sandy Island over 12 years ago.

It seems that although Sandy Island appears on Google maps, world maps and marine charts mid-way between Australia and New Caledonia it doesn't in fact exist.

The Daily Mail newspaper in the UK refers to a story by Richard Chirgwin which says the hams in question reported that they sought Sandy Island in 2000 because its existence would have disqualified the Chesterfields from being a worthy DXpedition location.

Its existence "was one of the key issues in determining whether the Chesterfield Islands qualified for addition to the DXCC List as another new entity,"

http://www.theregister.co.uk/2012/11/22/undiscovered_sandy_island/

http://www.n4gn.com/tx0dx/16.html

PRACTICE WHAT WE REACH

Have you reached the special station 5 G 12 ITD yet?

A strange one for we VERY (tongue in cheek) 'TOLERANT' folk known as Radio Hams.

Seems special event station 5 G 12 ITD is on the air from Morocco in celebration of International Tolerance Day.

The United Nations sponsor International Day for Tolerance annually to observe and educate people about the need for tolerance in society and to help them understand the negative effects of intolerance.

Now some bright spark has realised as a group we may very well need help ourselves so we now have 5G12ITD active all bands and all modes through December 16th.

QSL via RW6HS.

(Southgate)

ACMA warning about non-compliant goods

The Australian Consumer and Media Authority is looking for devices that pose a high a high risk to the orderly use of the radio spectrum and public safety.

ACMA Field Staff, particularly in West Australia, are looking for mobile phone jammers and GPS jammers, both prohibited in this country, mobile phone repeaters, and non-compliant devices such as cordless phones and headsets.

The campaign will include education, traditional enforcement measures and also focus on improving the supply compliance of online, or over the internet purchased devices.

A comment by a radio amateur to the ACMA claimed there was concern about non-compliant imported goods that are stamped to be compliant.

He wants the ACMA to clamp down on switch mode power supplies through to plasma TV sets that don't meet the standards and cause much interference.

Hopefully the ACMA will include all offending devices when checking installations and sellers.

(Jim Linton VK3PC)

RF RESEARCH NEWS

Adapting RFID to identify and monitor human activity

University of Adelaide computer scientists are leading a project to develop novel sensor systems to help older people keep living independently and safely in their own homes.

The researchers are adapting radiofrequency identification (RFID) and sensor technologies to automatically identify and monitor human activity, to be able to determine if an individual's normal routine is being maintained so that timely assistance can be provided if it is needed.

Although RFID technology has been around since World War II and is in common use today in applications such as anti-shoplifting and vehicle identification at toll road collection points, its potential use in interpreting human activity remains largely in the laboratory.

"Our work will be among the first few projects in the world conducting large-scale common-sense reasoning in automatic human activity recognition," said chief investigator and University of Adelaide

senior lecturer Dr Michael Sheng.

The system will be low-cost and unobtrusive, and without the privacy issues and intensive monitoring of video surveillance. There will be no need for older people to wear anything or turn anything on or off.

The technology will be first investigated in a laboratory setting and then in hospital trials with geriatric patients.

http://www.radiocomms.com.au/articles/57272

(Sourced from the Radio Comms Web e-zine and published from vk7wi news)

Fire cuts off communication

In one of the most severe outages in Australia in recent memory, a fire at the Warrnambool telephone exchange in southwest Victoria 10-days ago affected 60,000 people.

Its landline, mobile and internet served as a district hub beyond Warrnambool, including the towns from Lismore right through to Hamilton, Edenhope and Portland.

While amateur radio, through WICEN (Vic), was on alert, only minimal use was made of its emergency communication services before the official stand down order was received.

Telstra acted quickly to replace the damaged exchange components and has now restored its services to the business and private sector.

(Jim Linton VK3PC, Chairman IARU Region 3 Disaster Communications Committee)

OPERATIONAL NEWS - DATELINE 2012

WW RTTY Melee December 1
WW ARRL 10 m Contest December 8- 9

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

VK5VF Adelaide 6m, 2m and 70 cm beacons back on air.

Just in time for the VHF DX season, the 6m, 2m, & 70cm beacons have been serviced and put back into operation at Mt Lofty near Adelaide in VK5.

As the VK5 Mt Lofty 6m beacon has been off air for some time, in restoring the operation of the beacon it has also had a frequency change in accordance with the WIA band plans. Part of the rebuild included referencing the 6m and 70cm beacon frequencies to the GPS.

The VK5VF beacon frequencies are,

The new 6m frequency is now 50.320 MHz

The 2m frequency is 144.450 MHz and

The 70cm frequency is 432.450 MHz

So those who are into VK VHF DX, these beacons are again available.

(VK5BB Amateur Radio Experimenters Group)

VK5

South Coast Amateur Radio Club AGM, a new group of Committee members were voted in.

Chairman : Louis VK5VFO
Treasurer : Rick VK5FRGK
Secretary : Stef VK5HSX

General Committee Members: Colin VK5FFAR, Barry VK5KBJ, Daniel VK5DF, Reg VK5FGFK, and Steve VK5ZEO.

Thanks must go to the previous Committee who worked tirelessly to secure SCARC a New home for Clubrooms and install a Shack. Great effort guys and thanks for your hard work.

There were some awards presented at the AGM, which were awarded to the following Members:

Russell Smith Memorial Award: Dave Wilson VK5LSB
Chairman's Award: Rick Kearsley VK5FRGK
Certificate of Appreciation : Herb VK5HK, Colin VK5FFAR, Jeff VK5MSC and Graham Daff.

The Club Christmas BBQ Break-up will be held on Wed 12 Dec @1830hrs, at Market Square Reserve (Old Noarlunga). The Club will provide meat, sauce & bread, while members are asked to bring a salad to share. Please BYO chairs, tables, drinks, cutlery and anything else needed.

There is plenty of open space and a playground for kids to use, so bring the family along and enjoy the Club's end of year social event.

On behalf of Committee & Members of South Coast Amateur Radio Club, SCARC would like to wish everyone all the best for the Festive Season, as well as wishing everyone a Happy and Prosperous New Year. Stay safe if you're travelling and see you back in 2013.

(Stef Daniels VK5HSX, SCARC Secretary)

HOME OF THE GOOD GUYS

Bill Hall VK2XT turned 100 on Friday 30th November 2012.

He is still on the radio every day and still talks around the world.

He has been operator for over 82 years and WIA Member all this time.

He still goes to Trash & Treasure at Dural every two months and always at Wrong Field day.

He was still driving this car until short time ago .

(Brian Kelly VK2WBK)

SILENT KEY

Vale Tom Walker VK4BTW

On the 19th November 2012, Thomas Allan Walker passed away after contending for some years with a weakening heart.

Tom was born on 11th December 1919 to Sutherland Douglas and Eleanor Jean Walker at 'Ripera', South Dulacca, southern inland Queensland.

Tom received primary school education at the South Dulacca State School, and his secondary education was received at the Gatton campus of the Queensland Agricultural and High School College, graduating his Junior Certificate.

He returned home to look after the farm upon the unexpected death of his father. Tom built his first radio from technical journals prior to undertaking a radio course by correspondence, studying at night by the light of the acetylene lamp. He did this study while working at sucker bashing (clearing of scrub re-growth) and dam building during the day.

Having gained his Certificate for Radio Service Engineering in 1945, he undertook to repair radios and television sets in the area "to help people out". This helpfulness was the hallmark of Tom Walker's life.

He also installed and serviced home lighting plants from generator to the last light bulb, but when, in 1965, reticulated power was introduced, his lack of electrical qualifications prevented him from continuing in this line.

In 1953 Tom, with his wife Miriam, established the Dulacca Radio Service, adding television qualifications to his skills in 1961.

Ultimately, Tom, Miriam and their children, (Carmen, Allan, Rhys (dec) and Ken) moved to Toowoomba, where Tom finished his working life as a technician at what is now Win TV (known as 10-4-5a in those days).

Tom joined the Darling Downs Radio Club in the late 1970's, and with the help of Roley Norgaard (ex VK4AOR) with the Morse Code after having had much trial and tribulation in CW, he , successfully contested the AOCP exam gaining VK4BTW as his call sign.

He received quite a few awards from the WIA re his service to amateur radio in Queensland. However, the most well-known of these is for his work with Intruder Watch, now IARUMS. Tom was State Co-ordinator, and every Friday afternoon would see him on 40 metres with Gordon, VK4KAL (Federal Co-ordinator) who lived at Rubyvale, central Qld.

Tom has always made himself available to any budding amateurs, both practically and sympathetically, yet for all his vast knowledge and experience, his life was example of humility and modesty. For this he was highly regarded and respected, being invited annually to conduct the election of officers at the AGM.

In later years, after a severe heart attack, his HF activities diminished to the point of ceasing altogether. However, he continued, almost to the end, covering the 2 metre net each Sunday morning via the Club's repeater VK4RDD at Toowoomba.

He is greatly missed by Club members and on air friends.

73's, Tom.

INTERNATIONAL NEWS

ALL SOUTH AFRICAN RADIO AMATEURS WILL HAVE TO REAPPLY FOR THEIR LICENSES

At an ICASA/SARL Liaison committee meeting, ICASA informed the SARL that following a qualified audit by the Auditor General, ICASA has been instructed to implement regulation 15 of the Radio Frequency Spectrum Regulations which stipulate that an amateur radio license can only be renewed for up to five years after which an new application has to be submitted.

All Radio Amateurs in South Africa will now be required to re-apply for a license for the period of 1 April 2013 till 31 March 2018.

==========

NEWS FROM ARNEWSLINE USA

ALLEGED COPPER THIEVES CHARGED IN OHIO

Federal officials in Cleveland, Ohio, have charged 28 year old Thomas M. Carbone and 23 year old Katie M. Stanton with the malicious destruction of federally-licensed communications lines. U.S. Attorney Steve Dettelbach said that the defendants are accused of allegedly breaking into and seriously damaging radio towers.

The indictment charges that on or about August 17 to 18, 2012, Carbone and Stanton unlawfully entered the property of Radio One in North Royalton, Ohio, and wilfully and maliciously destroyed and removed copper material from four radio station towers on the property. According to the indictment, this unlawful removal of copper depleted the signal strength of the radio station, thereby impeding its ability to broadcast emergency messages. As such emergency repairs cost nearly $11,000 while permanent repairs will cost an estimated $125,000.

The indictment also charges that Carbone and
Stanton conspired together to commit these
unlawful acts.

SPACE WEATHER TO INTRODUCE TWO NEW PRODUCTS

This note from National Oceanic and Atmospheric Administration.

Tentatively on December 11th the Space Weather Prediction Centre
will introduce two new forecast products titled the 3-Day Forecast
and the Forecast Discussion.

These new products will be available twice a day at 00:30 and 12:30 UTC
to provide space weather information in abbreviated and detailed formats.

Both will use NOAA Space Weather Scale information.

Examples of these new products are available at
tinyurl.com/caqy4ox and for the concise, 1-page summary
tinyurl.com/bm9flp6 for the in-depth space weather analysis.
These two products will supplement the existing product
suite and no current forecasts will be discontinued.

==========

MEDIA WATCH

Ham Radio on ABC

Southgate ARClub are reporting how Kevin Crockett VK3CKC, Max Brighton VK3ZNT
and John Williams VK2AWJ got some publicity for amateur radio on ABC radio.

The three talked about amateur radio for 20 minutes to ABC's Ann Jones.

The MP3 of the radio show can be heard at
http://mpegmedia.abc.net.au/local/centralvic/201211/r1038157_11937730.mp3

ABC - Ham Radio Signal Strong
http://www.abc.net.au/local/stories/2012/11/22/3638554.htm

Sunraysia Radio Group
http://www.sunradio.org.au/

Midland Amateur Radio Club
http://www.marc.org.au/

Jim Linton also told us how these ABC studios in Mildura and Bendigo, in
rural Victoria, were taken over by the three long-time and knowledgeable
radio amateurs.

>From the Sunraysia Radio Group was the President, Max Brighton VK3ZMT and
Treasurer John Williams VK2AWJ, and from the Midland Amateur Radio Club its
President Kevin Crockett VK3CKC.

With the ABC's Presenter, Ann Mitchell, they answered questions and made
some useful points such as the International Space Station, Echo-link, international
friendships, and the Foundation Licence that has attracted more females plus

younger people.

A number of talk-back callers through the two studio hook-up greatly added to the interest.

Now let us listen to a part of the 20 minute segment.(VK1 Studio plays MP3 with outcue ... nice to have it.)

The URL of the full ABC interview is to be found on the text edition of this VK1WIA broadcast.

Radio Ham interviewed on Swedish radio

A Swedish radio show featured an interview with radio amateur Hojun Song DS1SBO about his OSSI CubeSat.

Monday, November 26 at 12:10 CET Swedish Radio broadcast a show about the Maker Movement that included an item on Hojun Song DS1SBO and the OSSI CubeSat that is planned to launch on a Soyuz-2-1b rocket in April 2013.

The item started about 1:20 into the show and the MP3 can be downloaded from http://sverigesradio.se/topsy/ljudfil/4274449.mp3

While Hojun Song speaks in English the rest is entirely in Swedish - roll on Google speech convertor.

A picture and details of the show in Google English are at http://bit.ly/TlA6B

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

NASA PHONESAT COMING SOON TO HAM RADIO

Scientists at NASA's Ames Research Centre have built the most affordable ham band satellite to date. Speaking on Amateur Radio Newsline, KB 3 TZD said that the $3,500 orbital device is a CubeSat the size of a coffee cup that uses an off-the-shelf Nexus One smartphone as a central processor and an inexpensive off the shelf radio for communications with the ground.

Called PhoneSat 1, the tiny bird is scheduled to launch by the end of this year. Once on-orbit it will transmit back photos of Earth on an amateur radio bands for 10 days, or until the battery dies.

Subsequent iterations will be capable of much more.

For example, PhoneSat 2.0 will have a two-way S-band radio transponder which most satellites use to communicate with the ground and solar panels for extended life.

An overview of the entire NASA PhoneSat mission can be found at
tinyurl.com/phone-sat-project

New age for disaster preparedness

The well-equipped Permanent Commission of Contingencies has opened in San Pedro Sula, Honduras, Central-America.

Its weather radar covers Honduras, plus nearby Guatemala, El Salvador and Nicaragua. Also fitted are seismic measuring devices.

Porfirio Lobo Sosa, President of Honduras described it as a warehouse and office to help disaster mitigation.

The Commissioned Minister for the initiative, Lisandro Rosales, acknowledged the important role of radio amateurs in disasters when conventional communications fail.

The Emergency Coordinator of IARU Region 2, Cesar Pio Santos HR2P spoke widely about the role of amateur radio to many attending officials.

Cesar HR2P congratulated the attending Panamanian Government for giving its radio amateurs the roaming International Amateur Radio Permit, which can be of great help in disaster situations.

Earlier in November at San Marcos, Guatemala, a 7.4 scale earthquake hit claiming the lives of at least 52 people. The disaster was helped by amateur radio emergency communications.

(Jim Linton VK3PC, Chairman IARU Region 3 Disaster Communications with Cesar Pio Santos HR2P EMCOR IARU R2)

WW SPECIAL INTEREST GROUPS --- RADIO AMATEUR YOUNG TIMERS
A Youth Net meets Saturdays at 0100 UTC on IRLP Reflector #2.
Young Hams Net 3.590 - 7:30pm Victorian time.

Youngsters On The Air - 2013

IARU Region 1 Youth Coordinator Lisa Leenders PA 2 LS reports on plans for next year's youth radio camp YOTA

A youth radio camp 'Youngsters On The Air' will be held in Estonia, organized by the Estonian Radio Amateurs Union. During this week teams of young radio amateurs from 10 different European countries will be participating in different activities: presentations, competitions, visiting radio stations, observatory, etc...

As two previous events in Romania and Belgium/Netherlands have shown, it will be a great experience for the young hams which they will never forget.

When: 5-12 August 2013

WW SPECIAL INTEREST GROUPS --- RADIO AMATEUR OLD-TIMERS
http://www.raotc.org.au

Hallo everyone, this is Clive VK6CSW with a reminder that tomorrow, Monday December 3rd the Radio Amateurs Old Timers Club of Australia's monthly news and information bulletin will be broadcast on a number of HF and VHF frequencies.

The principal HF transmissions will be on 20 metres on 14.150 MHz USB at 0100 UTC beamed north from Melbourne for Eastern states listeners, and again at 0200 beamed West for Western Australia.

Also at 0200 UTC, Barry VK6WF, will be transmitting the bulletin on 40 metres on 7060 kHz LSB for country listeners in WA and SA.

During tomorrow numerous local relays will also take place on various VHF and lower HF frequencies. To find a frequency and time for your area, please visit the RAOTC website at www.raotc.org.au

Everyone, RAOTC members and non-members alike, is invited to listen to this interesting half hour of Old Timer news, stories and anecdotes and to participate in the call backs afterwards.

Once again, the December RAOTC monthly bulletin is scheduled for tomorrow, Monday December 3rd, and we look forward to hearing from you during the call backs.

73 from Clive VK6CSW.

Calling frequencies for Slow Scan TV (SSTV):
3.630, 7.033, 14.227

Calling Frequencies for PSK31
14.070

Last Sunday after the regular broadcast of WIA News, the Maryborough Electronics and Radio Group was fortunate to have Mr. John Parr, from the AJ2013 organising committee, present.

John was able to address the meeting and explain the diversity of activities which will be provided for the Scouts and also how the Special Event Station, VI4ASJ fits into the program.

Once the formal business was completed, deep and meaningful discussions on how the station and what equipment was required went on. Other areas such as how the transport to and from the Jamboree was being organised was talked over and mundane things such as floor coverings and sound absorbing dividers were sourced.

The Woocoo SES provides many support services to the greater Maryborough community and MERG would like to thank that organisation for its support to the Jamboree and amateur radio.

Once the paper licence is received, it will be photo copied and registration of services will go ahead. It is expected that EchoLink and IRLP will be available as well as ATV, on site.

So on that basis, I can say "I'll see you at the Jamboree."

Reporting for WIA National News, I'm Geoff, VK4ZPP, from Maryborough Electronics and Radio Group, Inc.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News. Each item will only be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh 'and always if the news room is to read your item write in the 3rd person.

==========

WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

==> + PUBLIC SERVICE: THE 14TH ANNUAL SKYWARN RECOGNITION DAY SET FOR
DECEMBER 1

The 14th Annual SKYWARN Recognition Day (SRD) Special Event will
take place Saturday, December 1, 2012. SRD is co-sponsored by the ARRL
and the National Weather Service (NWS) as a way to recognize the
commitment made by Amateur Radio operators in helping to keep their
communities safe. According to SRD Coordinator David Floyd, N5DBZ,
Amateur Radio operators can visit their local participating NWS office,
working as a team to contact other hams across the world throughout the
24-hour event on 80, 40, 20, 15, 10, 6 and 2 meters, as well as 70
centimeters. Read more here
<http://www.arrl.org/news/the-14th-annual-skywarn-recognition-day-set-for-dec
ember-1>.
```

==> + AMATEUR RADIO IN SPACE: MIKHAIL KORNIENKO, RN3BF, AND SCOTT KELLY TO SPEND ONE YEAR ON INTERNATIONAL SPACE STATION

Russian Cosmonaut Mikhail Kornienko, RN3BF, of the Russian Federal Space Agency and NASA Astronaut Scott Kelly have been selected for a one-year mission aboard the International Space Station in 2015. According to NASA, the mission will include collecting scientific data important to future human exploration of our solar system and to understand better how the human body reacts and adapts to the harsh environment of space as NASA plans for missions around the Moon, an asteroid and ultimately Mars. Read more here <http://www.arrl.org/news/mikhail-kornienko-rn3bf-and-scott-kelly-to-spend-one-year-on-international-space-station>.

==> + ARRL'S LOGBOOK OF THE WORLD: BUG FIX IS IN PLACE

ARRL Chief Executive Officer David Sumner, K1ZZ, reports on a bug fix for Logbook of The World.

The fix for the Logbook of The World (LoTW <https://p1k.arrl.org/lotwuser/default>) bug was implemented at 2103 UTC on November 28. Full credit goes to ARRL Information Technology Manager Michael Keane, K1MK, for figuring out what was happening and how to correct it.

There are two ways of uploading logs: via the LoTW website and by e-mail. LoTW users should note that e-mailed logs were not affected by the bug, so no e-mailed logs will need to be resubmitted.

At the time the fix was implemented, LoTW processing was running almost exactly three days behind. If a user's most recent upload was made before 2100 UTC on November 25 and it has not yet been processed the file should be resubmitted. There should be no need to resubmit logs uploaded since 2100 UTC on November 25, which would include all CQWW CW DX Contest logs submitted after the end of the contest.

There is, however, a very slight chance that logs uploaded after this date might have been overwritten. If you find that your logs that were uploaded after November 25 are not appearing in your LoTW account, please wait until after December 3 to upload them again.

Thanks to everyone who has been patient while we grappled with this bug. The issue of slow processing speed is also being addressed, but it requires a hardware upgrade that will take several weeks to implement. Your continued patience and understanding will be appreciated.

==> + HAM RADIO IN HOLLYWOOD: MORSE CODE PLAYS ROLE IN NEW SPIELBERG MOVIE

Producer Steven Spielberg has used Amateur Radio or Morse code in three of his last four movies: Super 8 (2011), The Adventures of Tin Tin (2011) and Lincoln (2012). Members of the Morse Telegraph Club -- an association of retired railroad and commercial telegraphers, historians, radio amateurs and others with an interest in the history

and traditions of telegraphy and the telegraph industry -- played an integral part in the production of Lincoln.

"Nine of the 16 telegraph stations depicted in the War Department were fully operational," explained Morse Telegraph Club International President James Wade, WB8SIW. "These instruments could be operated in any combination through the use of a specialized computer program and custom-built terminal units for the process. When necessary, a hand key could be inserted in the individual telegraph loops so messages could be improvised." Read more here <http://www.arrl.org/news/morse-code-plays-role-in-new-spielberg-movie>.

==> + ON THE AIR: THE ARRL 10 METER CONTEST: THE BAND IS HOT!

<http://www.youtube.com/watch?v=N5xJjThOlic> Will it be possible to beat the 2011 running of the ARRL 10 Meter Contest? With more than 5300 logs received and worldwide openings last year, that may be a tall order. This past weekend during the CQ WW CW Contest, 10 meters was in great shape, despite a coronal mass ejection that hit on Friday evening. But according to ARRL Contest Branch Manager Sean Kutzko, KX9X, one thing's for certain: There's going to be a ton of activity, as hams from all around the world look to work some DX on the band! Read more here <http://www.arrl.org/news/the-arrl-10-meter-contest-the-band-is-hot>.

==> + ON THE AIR: ARRL UHF/MICROWAVE BAND PLAN COMMITTEE SEEKS INPUT 6 AND 3 CENTIMETER BANDS

Last year, in recognition of the need to update the published band plans for our UHF and microwave bands, the ARRL Board of Directors formed the UHF/Microwave Band Plan Committee to develop revised national plans for the amateur bands between 902 MHz and 3.5 GHz. After receiving extensive user input, the committee completed its task and the resulting band plans were approved by the Board in July 2012. The committee has now received an additional assignment to conduct a similar update to the 6 and 3 centimeter bands. In order to do this effectively, the committee needs to know how various segments of these bands are now being utilized around the country. You can help them by sharing what you know about local usage in your area and by asking other users -- both individuals and groups -- to do the same. Read more here <http://www.arrl.org/news/arrl-uhf-microwave-band-plan-committee-seeks-input-on-6-and-3-centimeter-bands>.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: The average daily sunspot number for the week was down nearly 38 percent to 78.9, compared to last week's average. The average daily solar flux dropped nearly 13 percent, to 121. The seven-day reporting period for these data ran from November 22-28. The predicted solar flux for the near term is 110 on November 29, 105 on November 30-December 1, 100 on December 2-4, 105 and 115 on

December 5-6, 130 on December 7-11, 135 on December 12-15, 140 on December 16-17, 135 on December 18-19, 130 on December 20-22, 120 on December 23-24, 115 on December 25, 110 on December 26-28, and rising again to 115 on December 29-30. The predicted planetary A index is 11, 15 and 8 on November 29-December 1, 5 on December 2-5, 10 on December 6-8, then 5 and 8 on December 9-10, 5 on December 11-15, 8 on December 16, and back down to 5 on December 17-31. The new year is expected to begin with slightly unsettled conditions, with a predicted planetary A index at 10 on January 1-4. Look for more on the ARRL website on Friday, November 30. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>.

==> THIS WEEK IN RADIOSPORT

This week:

- November 30 -- NCCC Sprint
- November 30-December 2 -- ARRL 160 Meter Contest <http://www.arrl.org/160-meter>
- December 1 -- TARA RTTY Melee; Wake-Up! QRP Sprint; TOPS Activity Contest
- December 1-2 -- ARRL EME Contest <http://www.arrl.org/eme-contest>
- December 2 -- 10 Meter RTTY Contest; SARL Digital Contest
- December 4 -- ARS Spartan Sprint

Next week:

If a significant player has known about fraudulent examinations, but has
turned
a blind eye to it, then he is guilty of criminal conspiracy and it is a plod
matter.

(Also tonight, a posting in Realops highlights that such cheating had taken
place in Kent,
and the matter was raised with and investigated by a now-defrocked bishop,
and again the matter was swept under the carpet)

http://www.eham.net/articles/29429

The 14th Annual SKYWARN Recognition Day (SRD) Special Event will take place Saturday, December 1, 2012. SRD is co-sponsored by the ARRL and the National Weather Service (NWS) as a way to recognize the commitment made by Amateur Radio operators in helping to keep their communities safe.

Mikhail Kornienko, RN3BF and Scott Kelly to Spend One Year on ISS:

Posted: 29 Nov 2012 06:34 AM PST
http://www.eham.net/articles/29428

Russian Cosmonaut Mikhail Kornienko, RN3BF, of the Russian Federal Space Agency and NASA Astronaut Scott Kelly have been selected for a one-year mission aboard the International Space Station in 2015. According to NASA, the mission will include collecting scientific data important to future human exploration of our solar system and to understand better how the human body reacts and adapts to the harsh environment of space as NASA plans for missions around the Moon, an asteroid and ultimately Mars.

//
ARRL's Logbook of The World: Bug Fix is in Place:

Posted: 29 Nov 2012 06:32 AM PST
http://www.eham.net/articles/29427

The fix for the Logbook of The World (LoTW) bug was implemented at 2103 UTC on November 28. Full credit goes to ARRL Information Technology Manager Michael Keane, K1MK, for figuring out what was happening and how to correct it.

//
Morse Code Plays Role in New Spielberg Movie:

Posted: 29 Nov 2012 06:33 AM PST
http://www.eham.net/articles/29426

Producer Steven Spielberg has used Amateur Radio or Morse code in three of his last four movies: Super 8 (2011), The Adventures of Tin Tin (2011) and Lincoln (2012). Members of the Morse Telegraph Club -- an association of retired railroad and commercial telegraphers, historians, radio amateurs and others with an interest in the history and traditions of telegraphy and the telegraph industry -- played an integral part in the production of Lincoln.

The ARRL 10 Meter Contest: The Band is Hot!

Posted: 29 Nov 2012 06:32 AM PST
http://www.eham.net/articles/29425

Will it be possible to beat the 2011 running of the ARRL 10 Meter Contest? With more than 5300 logs received and worldwide openings last year, that may be a tall order. This past weekend during the CQ WW CW Contest, 10 meters was in great shape, despite a coronal mass ejection that hit on Friday evening. But according to ARRL Contest Branch Manager Sean Kutzko, KX9X, one thing's for certain: There's going to be a ton of activity, as hams from all around the world look to work some DX on the band!

//
ARRL UHF/Microwave Band Plan Committee Seeks Input 6 and 3 Centimeter Bands

Posted: 29 Nov 2012 06:31 AM PST
http://www.eham.net/articles/29424

Last year, in recognition of the need to update the published band plans for our UHF and microwave bands, the ARRL Board of Directors formed the UHF/Microwave Band Plan Committee to develop revised national plans for the amateur bands between 902 MHz and 3.5 GHz. After receiving extensive user input, the committee completed its task and the resulting band plans were approved by the Board in July 2012. The committee has now received an additional assignment to conduct a similar update to the 6 and 3 centimeter bands.

NZART Headquarters Infoline Issue 263

30 November 2012

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· FMTAG Notes

· VHF-UHF-SHF-EHF Contest News

· ZL9HR Update

Debby Says…I am a little concerned at the number of deposits I have received in the bank account with no call sign nor membership number as a reference.

If you have recently paid your subscription by internet banking, can you please check the date it was paid and if you included a reference so that I can credit the correct membership. This ONLY applies to direct credit payments, not cheque or credit card.

The same applies to a number of new members who have taken up the special promo price to join the Association. If you know of someone who has not heard from me, but has paid into our bank account, please ask them to forward me their application as soon as possible. Without it I cannot include their name in the prize draw.

The final issue of HQ Info-line will be sent out on Friday 14th December. If you have anything you wish to include please send to me before Thursday 13th.

Talk soon…Debby ZL2DL

FMTAG NOTES FOR HQ INFOLINE

Proposals – none at this time

Final Recommendations to NZART Council

Published in HQ Info-Line 261 and 262 for the information of, and seeking comments from, members.

Branch 69 Kapiti has applied to change the frequency of its 144.650 MHz Digipeater at Mount Field, located at TOPO50 BP32 775757. The proposed transmit and receive frequency is 144.575 MHz, in accordance with the band plan.

Comments and Applications

Please send your comments and suggestions on the above, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART website:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

VHF-UHF-SHF-EHF CONTEST NEWS

THE NEXT CONTEST IS TOMORROW and SUNDAY

The next contest is the Field Day Contest, all bands 50 MHz and up, tomorrow, Saturday the 1st and Sunday the 2nd of December 2012. The operating times are: Saturday 1700 to 2300 NZDST and Sunday 0700 to 1300 NZDST.

The contest after that is the DX Weekend Contest, all bands 50 MHz and up, on Saturday the 2nd and Sunday the 3rd of February 2013. The operating times are: Saturday 1700 to 2300 NZDST and Sunday 0700 to 1300 NZDST.

The Contest Rules are available at:

www.vhf.org.nz/VHF-UHF-SHF-ContestRules

All contest logs should be sent, to arrive within two weeks, to:

zl2wa@clear.net.nz

with Contest Log in the subject line.

Or by post to:

Contest Manager

Wellington VHF Group

P.O. Box 12-259

Thorndon

Wellington

Please include your email address if you wish to receive the results as soon as they are available.

One of the most important DX'peditions of the year is about to

Before sailing, Tommy (VK2IR) was able to fit in short interview with the New Zealand national radio station, to talk about the ZL9HR DX'Pedition to Campbell Island and Amateur Radio in general.

Please see
http://www.radionz.co.nz/national/programmes/morningreport/audio/2539655/radio-operators-sail-for-campbell-island
for a copy of the audio file playable in your browser or downloadable.
(MP3 version attached to this email for the audio podcast recipients).start.

The ZL9HR DX'Pedition ship is still sheltering from storms at Stewart Island off the south of New Zealand this evening (Wednesday 28th November) but will be leaving tomorrow morning and they hope to reach Campbell Island on Saturday morning.

Thanks, this is Ed VK2JI Australian Publicity Officer for ZL9HR.

Amateur Radio Newsline(tm) Report 1842 - November 30 2012

Attention bulletin stations. Please note that this is an extended Amateur Radio Newsline report and contains three breaks. Thank you.

Amateur Radio Newsline report number 1842 with a release date of November 30, 2012 to follow in 5-4-3-2-1.

The following is a QST. The FCC issues a rule making proposal aimed at implementing the 2007 World Radiocommunications Accords; the NTSB says it wants to end all kinds of distracted driving; South Africa's ham radio community is told it will have to re-apply for their licenses and the 8th Global Amateur Radio Emergency Communications Conference is called a major success. Find out the details are on Amateur Radio Newsline(tm) report number 1842 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: FCC PROPOSES IMPLEMENTING 2007 WRC ACCORDS

The FCC has issued ET Docket 12-338 that if passed as written is pretty good news for ham radio. Bill Pasternak, WA6ITF, is in the newsroom with the details:

--

ET Docket 12-338 released on Tuesday, November 20th proposes modify the rules governing a number of communications services for amateur radio which falls under Part 97 of its rules, the proposed changes are quite positive.

Starting at the low end of the electromagnetic spectrum and working our way up, Docket 12-338 proposes the creation of a permanent albeit shared allocation from 135.7-137.8 kHz with a power output of 1 watt effective radiated power to an isotropic radiator. To those who have never heard the term isotropic radiator, this is a theoretical point source of electromagnetic waves that emits the same intensity of radiation in all directions. Translated into everyday language it really means hams will only be able to transmit a few hundred milliwatts of power if that.

Now going up a few hundred kilohertz to the 160 mter band. That where Docket 12-338 proposes to change the Amateur Radio Service allocation to make 1800 through 2000 kHz a primary amateur service allocation.

By way of background, historically, the 1715 to 2000 kHz band was allocated exclusively to the Amateur Service. In 1953, the FCC removed the 1715 to 1800 kHz segment from the Amateur Radio Service and allocated the 1800 to 2000 kHz band to the Amateur Service on a shared basis with the Radionavigation Service. Then in 1983, the FCC allocated the 1800 to 1900 kHz band to the Amateur Service on an exclusive basis and the 1900 to 2000 kHz band to the Radiolocation Service on a primary basis and to the Amateur Service on a secondary basis.

Lastly, in the WRC-07 Table Clean-Up Order, the FCC combined the 10 to 10.45 GHz and 10.45 to 10.5 GHz bands in the Federal Table of Allocations. In doing so, the frequency band was inadvertently not changed to 10 to 10.5 GHz. To fix this the FCC will revise the text of three footnotes that pertain to this spectrum by adding the existing Amateur-Satellite Service allocation to the list of permitted non-federal services. It will also order that non-federal stations in the Radiolocation Service not cause harmful interference to the Amateur Service in the 10 to 10.5 GHz band.

As we said, its pretty good news for ham radio here in the USA.

>From the studio in Los Angeles, Im Bill Pasternak, WA6ITF.

--

If approved as written, these changes will implement allocation decisions from the 2007 World Radiocommunication Conference that concern those portions of the radio frequency spectrum between 108 MHz and 20.2 GHz by making specific updates to the rules in this frequency range. You can download the full text of ET Docket 12-338 at as a Word document at tinyurl.com/proposed-wrc-changes (FCC)

**

RADIO LAW: NTSB VS CEA ON DISTRACTED DRIVING AND DISTRACTED TRANSIT

The National Transportation Safety Board wants to eliminate all driver distraction and is broadening its focus on the use of portable electronic devices in all types of vehicles. The issue is part of the NTSB's recently released "2013 Most Wanted List." Amateur Radio Newsline's Norm Seeley, KI7UP, is here with the details:

--

While acknowledging that distracted driving didn't begin when people began making calls or texting in the car, the National Transportation Safety Board still says that portable electronic devices that do not directly support the task at hand have no place in any vehicles. This includes automobiles planes, trains, and just about any other vessel you might be able to think of. As such it argues that states and regulators can set the proper tone by banning the nonessential use of such devices in all areas of transportation.

The NTSB says that young drivers are more likely to use portable electronic devices while behind the wheel and therefore are especially at risk. It urges that laws, education, and enforcement efforts should place special emphasis on curbing the use of portable electronic devices by these younger drivers.

The NTSB goes on to say that companies should develop and vigorously enforce policies to eliminate distractions. It also says that manufacturers can assist by developing technology that disables these devices when in reach of operators.

But the NTSB has some strong opposition from the Consumer Electronics Association or CEA. That organization says that while it applauds the effort, it also notes that the NTSB misses the mark on the use of portable electronics in vehicles. It says that calling for an abstinence only approach, the NTSB ignores established realities of human behavior. It also claims that in-vehicle technology when used correctly can make for vastly safer roadways.

The CEA says that rather than calling for broad regulations or outright bans, policymakers should encourage the use of the many innovative driver safety technologies coming on to the marketplace. The CEA notes that it has already forwarded the NTSB a list of third-party applications that promote safe use of portable technologies in the automobile.

How any of this might affect mobile or even hand held pedestrian portable operations in the future by ham radio operators and other users of two-way radio is at this time unknown. But the NTSB stand seems to be that any and all forms of distraction must be removed from the public's hands while in transit. And that's not likely to sit well with the public at large.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP. In Scottsdale, Arizona.

--

It should be noted that the National Transportation Safety Board is an independent body that has no authority to enact transportation policy, nor to force the federal government to make transportation policy changes. However it makes recommendations to governments, industry and the public and uses its "Most Wanted" list as a way to highlight changes that it is advocating. (RW)

WORLDBEAT: ALL RADIO SOUTH AFRICAN AMATEURS WILL HAVE TO REAPPLY FOR THEIR LICENSES

All South African radio amateurs are going to have to reapply for their licenses. This is according to the South African Radio League which says its liaison committee met with that nation's telecommunications regulatory body Independent Communications Authority of South Africa.

At that meeting the national society learned that following an audit by the Auditor General, that the communications regulator has been instructed to implement regulation 15 of the nations Radio Frequency Spectrum Regulations. This is a law that stipulates that an amateur radio license can only be renewed for up to five years after which a new application has to be submitted. Because of this, all South Africa licensed radio amateurs will be required to re-apply for a license for the period of April 1st 2013 through March 31st 2018.

The South Africa Radio League says that the details as to how this will be accomplished are expected to be made public in the next few weeks. Until that time, South African hams should do nothing. As soon as information is made available the South Africa Radio League announce it via its news bulletin service system and make forms available on its website at www.sarl.org.za. (SARL, ICASA)

RESCUE RADIO: GAREC 2012 DEEMED A MAJOR SUCCESS

The 8th Global Amateur Radio Emergency Communications Conference also known as GAREC 2012 was held recently in Port Dickson, Malaysia. We have an updated report on what transpired at that gathering from WIA Newsman Graham Kemp, VK4BB:

--

Attending the conference on November 12 to 14 were delegates from nine countries under this year's theme of 'One world, One commitment'.

Among the presentations was one on the Mobile Emergency Weather System which assists authorities using simple equipment and training.

There were status reports from various countries and these highlighted the differences and similarities in approach to emergency planning. While solutions may not be easy to find, sharing the problems and allowing individual countries to recognize that they were not alone, provides valuable support to the Global community.

GAREC-2012 included two practical activities. These enhanced inter-personal relationships enabling delegates to work together more efficiently in future.

Future conferences may seek to involve partners in emergency response, such as the International Federation of the Red Cross and the ITU, in accord with the existing Memoranda of Understanding.

The delegates thanked the Malaysian Amateur Radio Transmitters Society in hosting this successful conference.

For the Amateur Radio Newsline. I'm Graham Kemp, VK4BB, of the WIA News in Australia.

--

The next GAREC is in Zurich, Switzerland on June 25 to 27, 2013. All groups and organizations involved in Amateur Radio Emergency Communications are invited to attend to share their knowledge and learn from others. (WIA News)

RESCUE RADIO: DISASTER READINESS FAIR IN CALIFORNIA HIGHLIGHTS CERT AND HAM RADIO

In the wake of Hurricane Sandy, a disaster-readiness fair that highlighted solar oven cooking, water storage, 72-hour emergency kits and amateur radio communication demonstrations has been held in Temecula, California. The event, hosted by the Temecula Stake of the Church of Jesus Christ of Latter-day Saints, took place on Saturday, November 10th.

At the event dozens of tables with information and demonstrations on topics pertinent to emergency preparedness were set up in and around the church facility. There were also two presentations on food storage and earthquake preparedness was given by specialists in those areas.

Gordon Neuls, N6ELS, manned a booth promoting amateur radio certification. Members of the Temecula Citizen Corps were on hand to raise awareness of the need to be ready for natural disasters and to promote the Community Emergency Response Team operations. It was noted that in the case of a disaster where normal lines of communication are interrupted, amateur radio can be used to relay information, as well as to send for help and other assistance.

According to the Temecula Press Enterprise, the Church of Jesus Christ of Latter-day Saints has long been an advocate of emergency preparedness. It noted that the church leadership encourages each of its members to have a year's supply of food and emergency items, be self-reliant and free of debt. (Temecula Press Enterprise)

RESCUE RADIO: HAM RADIO RESPONDERS THANKED FOR THEIR HELP IN GUATEMALA QUAKE

Amateur radio operators who were among the first responders following an Earthquake that hit Guatemala have been thanked for their efforts. WIA Newsman Robert Broomhead, VK3DN has the details:

--

The rescue and relief work in San Marcos, Guatemala, a mountainous region bordering Mexico that was hit by a 7.4 scale earthquake claiming the lives of at least 52 people earlier this month, was aided by emergency communications provided by radio amateurs.

International Amateur Radio Union Region 2 Emergency Communication Coordinator, Cesar Pio Santos HR2P said he was very proud of the work done during and after the earthquake on November 8, despite the difficult times.

Cesar HR2P thanked the members of the Club de Radioficionados de Guatemala for their outstanding efforts. He was responding to a report from Marco Aurelio TG 8 AMP, who was in charge of the emergency network. About 10,000 houses have been affected by the earthquake with authorities setting up 11 rescue centers for the homeless.

This has been VK3DN, reporting from Melborne.

--

According to news reports, this was the worst quake to hit Guatemala since 1976. Thats when a 7.5 magnitude temblor caused the deaths of about 23,000 people in one of the worst natural disasters of the time. (VK3PC, HR2P, WIA News)

**

RADIO LAW: HAM RADIO TOWER AMENDMENT TO ZONING IN RIDGECREST CA

The Planning Commission in Ridgecrest California was to hold a public hearing November 27th to recommend the City Council amend a city zoning ordinance that would help hams in that city erect antennas. The amendment request, should it be approved by the city council at a later date, could permit amateur ham radio antennas in excess of 35 feet to be erected subject to a ham obtaining a Conditional Use permit.

The agenda relates directly to a previous request by Ridgecrest resident Steven Rainey, N6MVX, to put up a 55-foot tower on his property back in September. Rainey could not receive a conditional use permit for the proposed tower following a public hearing. This is because the Planning Commission does not have the authority to grant such permits under the current municipal code.

According to a city staff report, the amendment request, should it be approved by the city council at a later date, could permit amateur radio antennas and windmill towers in excess of 35 feet to be erected subject to a Conditional Use permit. City Planner Matthew Alexander is quoted as saying ham radio operators represented a strong asset to the city in case of emergencies.

More is on-line at tinyurl.com/ridgecrest-antenna. (Ridgecrestca.com)

HAM HAPPENINGS: COMMEMORATE NOAA - SKYWARN RECOGNITION DAY

NOAA - SKYWARN Recognition Day is December 1st from 0000 to 2400 hours UTC and everyone is invited to take part.

NOAA - SKYWARN Recognition Day was developed in 1999 by the National Weather Service and the American Radio Relay League. Its purpose is to celebrate the contributions that volunteer SKYWARN radio operators make to the National Weather Service

As we go to air some 70 NWS ham radio operations are registered for the 24 hour operating event. These stations are expected to be operational on the High Frequency bands plus 6, 2 and 70 centimeters along with Echolink as well as IRLP.

For more informational please visit the official NOAA -SKYWARN Recognition Day website at tinyurl.com/skywarn-nws- day. (PAPA, NWS)

**

HAM HAPPENINGS: HANDIHAM 2013 RADIO CAMP ANNOUNCED

The Handihams have make known that their 2013 Radio Camp is tentatively scheduled for the Woodland campus of Camp Courage in late July and early August. The tentative dates are July 28th through August 2nd making travel days for the campout Sunday and Friday. No pricing has been announced. (Handihams)

**

HAM HAPPENINGS: COURAGE CENTER CAMPS PARTNER WITH FRIENDSHIP VENTURES

The Handihams have also announced that Courage Center Camps and Friendship Ventures have entered a joint partnership. This to create a new camp organization to serve people with disabilities.

The new organization founded on November 19th will be called Camps of Courage and Friendship. At least that will be its title until a formal name study is completed in 2013.

Campers, volunteers and staff will see traditional programs continue in 2013. However, behind the scenes, new methods and approaches will be developed to incorporate the strengths of both organizations. More about this new joint venture is on-line at www.campscouragefriendship.org. (Handihams)

**

HAM HAPPENINGS: TOWER WORK WEBINAR DECEMBER 12

The World Wide Radio Operators Foundation will be presenting a webinar on towers and how to work safely on and around one on.

Titled "Tower Work --Tips, Techniques, and Tools," this presentation taught by John Crovelli, W2GD, and Don Daso, K4ZA. During the session the two will outline things that they have learned from almost 100 years of combined experience, focusing on safety, cost savings, and of coarse problem solving.

The hour long webinar will begin at 9 PM Eastern Standard Time on Wednesday, December 12th which equates to Thursday, December 13th at 02:00 UTC. Registration is free to hams world-wide at tinyurl.com/tower-webinar-registration. (K4ZW, QRZ.com)

**

NAMES IN THE NEWS: ELLEN OCHOA, KB5TZZ, NAMED DIRECTOR OF JSC

Some names in the news. A ham radio operator will soon be heading up the Lyndon B. Johnson Spaceflight Center in Houston, Texas. This as NASA Administrator Charles Bolden announces that Astronaut Ellen Ochoa, KB5TZZ, as the next Director of the historic space development facility.

Ochoa was the first Hispanic woman to go into space. Since September 2007 she has served as Johnson Spaceflight Center Deputy Director. Prior to that position she worked as Deputy Director of Flight Crew Operations at JSC and in September of 2006 became Director of Flight Crew Operations.

Ellen Ochowa will be facility's 11th Director. She will also be its first Hispanic, first radio amateur and the second female to serve in that position. KB5TZZ will take over the reins at JSC from Michael Coats when he retires at the end of the year. (NASA, Southgate)

**

NAMES IN THE NEWS: KOLD OWNER TURNS 90

The founder of the world's most remote radio station, Radio KOLD in Antarctica has turned 90. Steve Grimsley, VK2ZP, set up Radio KOLD at Wilkes Base in 1961, and the station is still broadcasting. Family, friends and former colleagues gathered in the Australian town of Binalong to celebrate VK2ZP's birthday. (WIA News)

**

NAMES IN THE NEWS: VE3XT ELECTED ONTARIO NORTH/EAST RAC DIRECTOR

Congratulations are extended to Bill Unger, VE3XT who was recently selected as the Radio Amateurs of Canada Director for Ontario North East. Unger ran unopposed, eliminating the need for a balloted election. VE3XT has been an amateur operator since 1970 and has been involved in many aspects of the hobby. His term as Director will be for two years starting January 1, 2013 and ending on December 31, 2014. (RAC)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

WORLDBEAT: MEXICO ZETA DRUG GANG BLAMED FOR KIDNAPPING ENGINEERS

If you are an Information Technology or two-way radio technician and planning a trip to Mexico, you might not carry an H-T on a belt clip where it can be seen. This is because at least one drug gang seems to be kidnapping and enslaving those who know two-way radio to build and keep their private system going. Amateur Radio Newsline's Cheryl Lasek, K9BIK, takes a look at the situation south of the border:

--

According to a report from Mexican news site Animal Politico, at least three dozen engineers and technicians have been kidnapped in the past four years. And Felipe Gonzalez who is the head of Mexico's Senate Security Committee told Animal Politico that none of the engineers who disappeared have ever been found.

Mexican authorities blame the notorious drug running gang the Zeta's for the kidnappings. The Mexican military is trying to dismantle an extensive radio network built and operated by the drug cartel but to date authorities have not had much luck shutting it down. Not only is much of the equipment super-easy to replace, but the drug runners have apparently found some unwilling assistance by kidnapping and enslaving technicians to help build it. Among them is at least one IBM employee and several communications technicians from a firm owned by Mexico's largest construction company.

Last year the Mexican military found and dismantled one such drug runners radio network spread across northeastern Mexico that included 167 radio antennas sites. As recently as this past September, Mexican marines found a 295-foot-high transmission tower in Veracruz State.

The bottom line: It seems the drug gangs have discovered that two-way radio is a tool that they will not be without but the Mexican government is doing all it can to take these clandestine operations off the air.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, near Zion, Illinois.

--

One of the best stories in the English language that explains in depth the safety issue to engineers and technicians in Mexico is on the World Disaster Report website. Its on-line at tinyurl.com/enslaved-technicians. (Animal Politico, Whatspoppin.net, World Disaster Report, other news sources)

**

WORLDBEAT DIGITAL RADIO FAILS IN HONG KONG

As of this past October 10th, Hong Kong's new Digital Broadcasting Corporation is off the air. This after only one month of operation. The stated reason is that they simply have run out of money to continue operations.

According to the South China Morning Post, the station's co-founder Albert Cheng King Hon wanted the government to intervene between the shareholders, but Secretary for Commerce and Economic Development turned down the request for mediation.

Digital Broadcasting Corporation's financial woes have meant that the staff was not paid for the month of October, or offered severance. Nonetheless, at least one talk show host indicated that he would like to continue broadcasting without pay, but some doubted the practicality of this goodwill gesture.

Disagreements over what to do with the company's assets extend to questions over whether or not these should be liquidated to pay employees or allow the board members to buy back shares at a discounted rate. Digital Broadcasting Corporation license required it to formally launch its service by September 21st, 2012, and also to provide seven 24-hour programming channels. (RW)

**

WORLDBEAT: BCDX NET CELEBRATES ITS 24th ANNIVERSARY

The weekly 40 meter BCDX Net from South India celebrated its 24th anniversary on Sunday, November 25th. This Net began operation on Sunday, November 27, 1988 by a small group of radio amateurs that included 4S7VK, VU2FOT, VU2JOS along with some very interested shortwave listeners.

The BCDX Net is now held on Sunday morning's at 03:00 UTC on 7 dot 085 MHz Lower Sideband for the advantage of those who are keenly interested in Broadcast Band DXing. According to its operators, the unique thing about this net is that is helped hams to become SWL DX'ers and SWL's to get their amateur licenses. The current net control station is VU3SIO and assisted from time to time by VU3BGK and VU2JOS. (Southgate)

**

WORLDBEAT: MARITIME AMATEUR WEBSITE SERVING HAMS UP NORTH

The Maritime Amateur website was launched back in March 2008 with the purpose of sharing information among radio amateurs in Nova Scotia, New Brunswick and Prince Edward Island of Canada. Now in its fifth year, there has been over 43 thousand hits and has a membership of over 110 ham radio operators.

>From the homepage, there are links to local, national and international news, CANWARN, maritime nets and numerous others sits of interest to hams that spend time on the water or who just want to be of service to their communities. You can check it out at www (dot) maritimeamateur (dot) ca. For more information please contact Jim Langille by e-mail to

ve1jbl@eastlink.ca (VE1JBL)

**

HAM RADIO IN SPACE: FOX-1 CUBESAT UPDATED DESIGN PUBLISHED

The design of the Fox-1A has been updated. During the 2012 Symposium AMSAT Vice-President Engineering, Tony Monteiro, AA2TX and the Fox Engineering team presented the latest status on the design, development, and construction of the Fox-1A satellite project. Fox-1A is is a one unit size cubesat which will carry an FM repeater transponder to replace the ageing AO-51. (ANS)

**

HAM RADIO IN SPACE: 2012 AMSAT SYMPOSIUM PROCEEDINGS AVAILABLE IN THE AMSAT STORE

The Proceedings of the AMSAT-NA 30th Symposium and AMSAT-NA Annual Meeting, held October 26th to the 28th in Orlando, Florida have been put up for sale at the on-line AMSAT Store. The proceedings contain over 30 articles on subjects ranging from current satellite operations to updates on the Fox Project. For information on pricing and shipping or to oplace an order please visit store.amsat.org/catalog on the World Wide Web. (ANS)

**

BREAK 3

The news never stops and neither do we. From the United States of America we are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed to you by the following bulletin station:

(5 sec pause)

ON THE AIR: SPECIAL EVENT STATION TM1TARA

On the air, keep an ear open for special event station TM1TARA to be on air between December 8th to the 10th. This to commemorate the scientific voyages of French polar vessel the Tara.

Tara Expeditions has been organizing missions aboard this research schooner for the past 9 years. The goal is to learn more about the impact of climate change on the planets ecosystems. So far Tara has accomplished eight successful expeditions including voyages to Greenland, Antarctica, Patagonia, southern Georgia, and the Arctic. Its latest voyage was described as world-wide known as Tara Oceans.

For this special celebration operations will be conducted by F8DVD and F8IJV from Paris, France during the Tara exhibit. Look for them on 20 through 10 meters on SSB. A special color QSL card will be printed and

will be sent via the Bureau or direct. QSL with a self addressed envelope and 2 IRC's - if you can still get them -- to F8DVD. (Southgate)

**

DX

In DX, CT1FTR is currently on the air from the Sudan as ST2FT. He is active on High Frequency bands using SSB and PSK31. If you make contact QSL via CT2GBU or electronically using eQSL. OH0XX is currently active from Contadora Island in the Archipelago Perlas as HP1XX. Bands and modes are not known but if you work him please QSL via home call.

K4UUK plans to operate from Belize May 4th to the 18th 2013 as V31RD. He will be active on 80 through 6 meters on SSB. QSL via K4UUK.

GM3YTS , GM4FDM , GM0GAV , GM3POI will be active from Tuvalu Island from March 12th to the 23rd 2013 as T2GM. They will be operational on all of the High Frequency bands with an emphasis on contacts with Europe. QSL via GM4FDM

AA4NC will be operational from Montserrat February 12th to the 20th of 2013 as VP2ME. He he also plans to be active in ARRL DX CW Contest. QSL this station electronically using Logbook of the World.

Four British hams plan to be active from Easter Island February 13th to the 21st as XR0YG. They will be operational on High Frequency bands only. An actual guide to their operating hours and QSL routes is expected to be announced shortly.

Lastly, a team of operators from Germany will be on the air from Samoa next April 4th to the 18th as 5W0M. They will be operational using various modes on 80 through 6 meter plus and 2m E-M-E. QSL the main operation to DL4SVA direct, via the bureau or OQRS. For EME QSO's send cards via DL9MS. (Above from various DX news sources)

**

THAT FINAL ITEM: HURRICANE SANDY - EVERYTHING OLD WAS NEW AGAIN

And finally this week you might want to say that everything old is new again. This after Professor Darren Hayes of Pace University's Seidenberg School of Computer Science and Information Systems reports on the aftermath of Hurricane Sandy. According to Professor Hays, it appears that older technology played a vital role to assist the public after this disaster. Amateur Radio Newsline's Bruce Tennant, K6PZW has the details:

--

In an article in the news blog The Hill, Professor Darren Hays notes that the Verizon network suffered widespread outages and with no electricity, telecommunications were problematic. The old corded

telephones were plugged in by those who still had them and there were lines for payphones. For those of you to young to remember these are coin operated telephones that in many places are nothing more than a distant memory.

Professor Hays also had some nice words for the amateur radio community. He says that others resorted to using ham radio to communicate, which was found to be very effective. Hays pointed to ham radio networks like ARES and RACES which are dedicated to communications outages. Hays who holds the call KI6UEI noted that a battery-powered radio was at one point his only connection to the outside world during the storm.

Hays article notes that as the recovery in the aftermath of Hurricane Sandy continues, questions are being raised about our nation's preparedness for emergencies. On Friday, November 9th it was reported that two Congressmen, U.S. Representatives Peter King and Steve Israel, were requesting that the military assume control of Long Island Power Authority. This in an effort to restore electricity to more than 150,000 homes and businesses which at that point still without mains power.

Back in 2006 the newspaper Newsday reported that the Long Island Power Authority was warned that its critical infrastructure could not handle a major storm. One of the issues noted was that the utility was utilizing a 25-year old mainframe computer system that could not track power outages or other critical functions like monitoring for rotting utility poles.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

You can read the entire article by Professor Hays on-line at tinyurl.com/old-worked-best (The Hill)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News, TWiT-TV and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org.

A reminder to those of you who still receive these newscasts over our 661-296-2407 dial in telephone line rater than downloading the MP3 file from our website or from the RSS feed. We are still giving consideration to discontinuing telephone feed service as a cost cutting

measure. But before we do, we want to know how many people are actually using it.

If you are one of those who call in each week on the phone and have not already done so, please send us a note telling us who you are and the reason you are using telephone access rather than simply downloading the newscast from the Internet.

Our address is the Amateur Radio Newsline, 28197 Robin Avenue, Saugus California, 91350. Or, as we said, you can e-mail us at newsline (at) arnewsline (dot) org. We look forward to hearing from you.

For now, with Bill Pasternak, WA6ITF, at the editors' desk, I'm Don Wilbanks, AE5DW, in Southern Mississippi saying 73 and we thank you for listening.

Pity about the car, but I've seen worse. There's some real nostalgia in that
slide show of yours though, and we've still got that DAB radio I saw in your
Merc.

Amateur Radio Newsline☐ Report 1842 ☐ November 30 2012

Attention bulletin stations. Please note that this is an extended
Amateur Radio Newsline report and contains three breaks. Thank you.

Amateur Radio Newsline report number 1842 with a release date of
November 30, 2012 to follow in 5-4-3-2-1.

The following is a QST. The FCC issues a rule making proposal aimed at implementing the 2007 World Radiocommunications Accords; the NTSB says it wants to end all kinds of distracted driving; South Africa☐s ham radio community is told it will have to re-apply for their licenses and the 8th Global Amateur Radio Emergency Communications Conference is called a major success. Find out the details are on Amateur Radio Newsline☐ report number 1842 coming your way right now.

**

RESTRUCTURING: FCC PROPOSES IMPLEMENTING 2007 WRC ACCORDS

The FCC has issued ET Docket 12-338 that if passed as written is pretty
good news for ham radio. Bill Pasternak, WA6ITF, is in the newsroom with
the details:

--

ET Docket 12-338 released on Tuesday, November 20th proposes modify the
rules governing a number of communications services for amateur radio which
falls under Part 97 of its rules, the proposed changes are quite positive.

Starting at the low end of the electromagnetic spectrum and working our
way up, Docket 12-338 proposes the creation of a permanent albeit shared
allocation from 135.7-137.8 kHz with a power output of 1 watt effective
radiated power to an isotropic radiator. To those who have never heard the
term isotropic radiator, this is a theoretical point source of

electromagnetic waves that emits the same intensity of radiation in all directions. Translated into everyday language it really means hams will only be able to transmit a few hundred milliwatts of power if that.

Now going up a few hundred kilohertz to the 160 mter band. That where Docket 12-338 proposes to change the Amateur Radio Service allocation to make 1800 through 2000 kHz a primary amateur service allocation.

By way of background, historically, the 1715 to 2000 kHz band was allocated exclusively to the Amateur Service. In 1953, the FCC removed the 1715 to 1800 kHz segment from the Amateur Radio Service and allocated the 1800 to 2000 kHz band to the Amateur Service on a shared basis with the Radionavigation Service. Then in 1983, the FCC allocated the 1800 to 1900 kHz band to the Amateur Service on an exclusive basis and the 1900 to 2000 kHz band to the Radiolocation Service on a primary basis and to the Amateur Service on a secondary basis.
